PROCEEDINGS AND DEBATES OF THE 91st CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—Thursday, May 15, 1969

The House met at 12 o'clock noon.
The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

You will seek Me and find Me; when you seek Me with all your heart.—Jeremiah 29: 13.

O Lord, our God, who art ever calling upon us to walk in Thy way, to try Thy truth and to live Thy life, grant that the spirit of our prayer this moment may be acceptable to Thee and our hearts be in harmony with Thy holy will.

Help us to consider carefully our pilgrimage upon this planet, to measure the deeds of the past by our devotion to the present and our dedication for the future. When we think of what we could have done had we given ourselves wholly to Thee we feel humble and are heartily sorry for our misdoings.

In reverence we come to Thee again and lay our supplications before Thee. Help us to right the wrongs we have done to others and give us grace to forgive those who wrong us. Enlighten our minds with truth, enlarge our hearts with love and enlist us in the struggle for justice in our Nation and peace in our world.

In the spirit of Christ we pray. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles.

H.R. 33. An act to provide for increased participation by the United States in the International Development Association, and for other purposes; and

H.R. 8794. An act to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development, and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1287. An act to authorize appropriations for fiscal years 1970, 1971, and 1972 to carry out the metric system study.

PRESIDENT NIXON'S VIETNAM SPEECH

(Mr. GERALD R. FORD asked and was given permission to address the

OCV—796—Part 10

House for 1 minute and to include the remarks of the President on Vietnam.)

Mr. GERALD R. FORD. Mr. Speaker, President Nixon's Vietnam speech will stimulate progress toward a peace settlement.

It should convince North Vietnam's leaders that they have nothing to gain by delay or by new military offensives.

Americans have always united behind their President in time of war; now we have the nobler privilege of uniting for peace.

President Nixon has taken his countrymen into his confidence in the great tradition of other American Presidents in time of crisis. President Franklin D. Roosevelt in World War II, President Dwight D. Eisenhower in Korea, and President John F. Kennedy in the Cuban missile crisis rallied the American people.

The President made a number of facts plain—and his firmness in stating these facts should not be lost on North Vietnam and the Vietcong. Those facts are: There will be no large-scale unilateral withdrawal of American troops in the absence of a peace settlement. Peace in South Vietnam must be based on a free choice by the South Vietnamese people of the government they will live under. The Nixon administration has ruled out any idea of seeking a military solution in Vietnam. The other side cannot possibly succeed in imposing a military solution in Vietnam. The United States will not sell out South Vietnam.

President Nixon has set forth a simple formula for peace. He has made it obvious to the other side that there is really only one avenue to peace in South Vietnam—that of national self-determination through free elections.

The President showed himself firm on principle but flexible on means, determined to do all that can be done to bring peace closer and at the same time to do all that must be done to insure that peace, when achieved, is a peace that will last.

This should make "believers" of the North Vietnamese and the Vietcong.

The President's speech was a report to the American people, to North Vietnam, to South Vietnam, and indeed to the world. I believe the American people will respond favorably to the President's quiet appeal for time to build peace on a lasting basis.

I trust Hanoi will show the good sense to negotiate for peace without delay to avoid further destruction and loss of life.

The text of President Nixon's address follows:

REMARKS OF THE PRESIDENT ON VIETNAM ON NATIONWIDE RADIO AND TELEVISION

Good evening, my fellow Americans.

I have asked for this television time tonight to report to you on our most difficult and urgent problem—the war in Vietnam.

Since I took office four months ago, nothing has taken so much of my time and energy as the search for a way to bring lasting peace to Vietnam. I know that some believe I should have ended the war immediately after the inauguration by simply ordering our forces home from Vietnam.

This would have been the easy thing to do. It might have been a popular move. But I would have betrayed my solemn responsibility as President of the United States if I had done so.

I want to end this war. The American people want to end this war. The people of South Vietnam want to end this war. But we want to end it permanently so that the younger brothers of our soldiers in Vietnam will not have to fight in the future in another Vietnam someplace else in the world.

The fact that there is no easy way to end the war does not mean that we have no choice but to let the war drag on with no end in sight.

For four years American boys have been fighting and dying in Vietnam. For 12 months our negotiators have been talking with the other side in Paris. And yet the fighting goes on. The destruction continues. Brave men still die.

The time has come for some new initiatives. Repeating the old formulas and the tired rhetoric of the past is not enough. When Americans are risking their lives in war, it is the responsibility of their leaders to take some risks for peace.

I would like to report to you tonight on some of the things we have been doing in the past four months to bring true peace, and then I would like to make some concrete proposals to speed that day.

Our first step began before inauguration. This was to launch an intensive review of every aspect of the Nation's Vietnam policy. We accepted nothing on faith, we challenged every assumption and every statistic. We made a systematic, serious examination of all the alternatives open to us. We carefully considered recommendations offered both by critics and supporters of past policies.

From the review, it became clear at once that the new Administration faced a set of immediate operational problems.

The other side was preparing for a new offensive.

There was a wide gulf of distrust between Washington and Saigon.

In eight months of talks in Paris, there had been no negotiations directly concerned with a final settlement.

Therefore, we moved on several fronts at once.

We frustrated the attack which was launched in late February. As a result, the North Vietnamese and the Viet Cong failed to achieve their military objectives.

We restored a close working relationship with Saigon. In the resulting atmosphere of

12645

mutual confidence, President Thieu and his Government have taken important initiatives in the search for a settlement.

We speeded up the strengthening of the South Vietnamese forces. I am glad to report tonight, that as a result, General Abrams told me on Monday that progress in the training program had been excellent, and that apart from any developments that may occur in the negotiations in Paris, that time is approaching when South Vietnamese forces will be able to take over some of the fighting fronts now being manned by Americans.

In weighing alternate courses, we have had to recognize that the situation as it exists today is far different from what it was two years ago or four years ago or ten years ago.

One difference is that we no longer have the choice of not intervening. We have crossed that bridge. There are now more than a half million American troops in Vietnam and 35,000 Americans have lost their lives.

We can have honest debate about whether we should have entered the war in Vietnam. We can have honest debate about how the war has been conducted. But the urgent question today is what to do now that we are there.

Against that background, let me discuss first what we have rejected, and second, what we are prepared to accept.

We have ruled out attempting to impose a purely military solution on the battlefield.

We have also ruled out either a one-sided withdrawal from Vietnam, or the acceptance in Paris of terms that would amount to a disguised American defeat.

When we assumed the burden of helping defend South Vietnam, millions of South Vietnamese men, women and children placed their trust in us. To abandon them now would risk a massacre that would shock and dismay everyone in the world who values human life.

Abandoning the South Vietnamese people, however, would jeopardize more than lives in South Vietnam. It would threaten our long-term hopes for peace in the world. A great nation cannot renege on its pledges. A great nation must be worthy of trust.

When it comes to maintaining peace, "prestige" is not an empty word. I am not speaking of false pride or bravado—they should have no place in our policies. I speak, rather, of the respect that one nation has for another's integrity in defending its principles and meeting its obligations.

If we simply abandoned our effort in Vietnam, the cause of peace might not survive the damage that would be done to other nations' confidence in our reliability.

Another reason for not withdrawing unilaterally stems from debates within the Communist world between those who argue for a policy of containment or confrontation with the United States, and those who argue against it.

If Hanoi were to succeed in taking over South Vietnam by force—even after the power of the United States had been engaged—it would greatly strengthen those leaders who scorn negotiation, who advocate aggression, who minimize the risks of confrontation with the United States. It would bring peace now but it would enormously increase the danger of a bigger war later.

If we are to move successfully from an era of confrontation to an era of negotiation, then we have to demonstrate—at the point at which confrontation is being tested—that confrontation with the United States is costly and unrewarding.

Almost without exception, the leaders of non-Communist Asia have told me that they would consider a one-sided American withdrawal from Vietnam to be a threat to the security of their own nations.

In determining what choices would be acceptable, we have to understand our essential objective in Vietnam: What we want is very little, but very fundamental. We seek

the opportunity for the South Vietnamese people to determine their own political future without outside interference.

Let me put it plainly: What the United States wants for South Vietnam is not the important thing. What North Vietnam wants for South Vietnam is not the important thing. What is important is what the people of South Vietnam want for South Vietnam.

The United States has suffered over a million casualties in four wars in this century. Whatever faults we may have as a nation, we have asked nothing for ourselves in return for those sacrifices. We have been generous toward those whom we have fought. We have helped our former foes as well as our friends in the task of reconstruction. We are proud of this record, and we bring the same attitude in our search for a settlement in Vietnam.

In this spirit, let me be explicit about several points:

We seek no bases in Vietnam.

We seek no military ties.

We are willing to agree to neutrality for South Vietnam if that is what the South Vietnamese people freely choose.

We believe there should be an opportunity for full participation in the political life of South Vietnam by all political elements that are prepared to do so without the use of force or intimidation.

We are prepared to accept any government in South Vietnam that results from the free choice of the South Vietnamese people themselves.

We have no intention of imposing any form of government upon the people of South Vietnam, nor will we be a party to such coercion.

We have no objection to reunification, if that turns out to be what the people of North Vietnam and the people of South Vietnam want; we ask only that the decision reflect the free choice of the people concerned.

At this point, I would like to add a personal word based on many visits to South Vietnam over the past five years. This is the most difficult war in America's history, fought against a ruthless enemy. I am proud of our men who have carried the terrible burden of this war with dignity and courage, despite the division and opposition to the war in the United States. History will record that never have America's fighting men fought more bravely for more unselfish goals than our men in Vietnam. It is our responsibility to see that they have not fought in vain.

In pursuing our limited objective, we insist on no rigid diplomatic formula. Peace could be achieved by a formal negotiated settlement. Peace could be achieved by an informal understanding, provided that the understanding is clear, and that there were adequate assurances that it would be observed. Peace on paper is not as important as peace in fact.

This brings us to the matter of negotiations.

We must recognize that peace in Vietnam cannot be achieved overnight. A war that has raged for many years will require detailed negotiations and cannot be settled by a single stroke.

What kind of a settlement will permit the South Vietnamese people to determine freely their own political future? Such a settlement will require the withdrawal of all non-South Vietnamese forces, including our own, from South Vietnam, and procedures for political choice that give each significant group in South Vietnam a real opportunity to participate in the political life of the nation.

To implement these principles, I reaffirm now our willingness to withdraw our forces on a specified timetable. We ask only that North Vietnam withdraw its forces from South Vietnam, Cambodia and Laos into North Vietnam, also in accordance with a timetable.

We include Cambodia and Laos to insure

that these countries would not be used as bases for a renewed war. Our offer provides for a simultaneous start on withdrawal by both sides; for agreement on a mutually acceptable timetable; and for the withdrawal to be accomplished quickly.

The North Vietnamese delegates have been saying in Paris that political issues should be discussed along with military issues, and there must be a political settlement in the South. We do not dispute this, but the military withdrawal involves outside forces, and can, therefore, be properly negotiated by North Vietnam and the United States, with the concurrence of its allies.

The political settlement is an internal matter which ought to be decided among the South Vietnamese, themselves and not imposed by outsiders. However, if our presence at these political negotiations would be helpful, and if the South Vietnamese concerned agreed, we would be willing to participate, along with the representatives of Hanoi, if that also were desired.

Recent statements by President Thieu have gone far toward opening the way to a political settlement. He has publicly declared his government's willingness to discuss a political solution with the National Liberation Front, and has offered free elections. This was a dramatic step forward, a reasonable offer that could lead to a settlement. The South Vietnamese Government has offered to talk without preconditions. I believe the other side should also be willing to talk without preconditions.

The South Vietnamese government recognizes, as we do, that a settlement must permit all persons and groups that are prepared to renounce the use of force to participate freely in the political life of South Vietnam. To be effective, such a settlement would require two things: First, a process that would allow the South Vietnamese people to express their choice; and, second, a guarantee that this process would be a fair one.

We do not insist on a particular form of guarantee. The important thing is that the guarantees should have the confidence of the South Vietnamese people, and that they should be broad enough and strong enough to protect the interests of all major South Vietnamese groups.

This, then, is the outline of the settlement that we seek to negotiate in Paris. Its basic terms are very simple: Mutual withdrawal of non-South Vietnamese forces from South Vietnam, and free choice for the people of South Vietnam. I believe that the long-term interests of peace require that we insist on no less, and that the realities of the situation require that we seek no more.

And now, to make very concrete what I have said, I propose the following specific measures, which seem to me consistent with the principles of all parties. These proposals are made on the basis of full consultation with President Thieu.

As soon as agreement can be reached, all non-South Vietnamese forces would begin withdrawals from South Vietnam.

Over a period of twelve months, by agreed-upon stages, the major portions of all U.S., Allied, and other non-South Vietnamese forces would be withdrawn. At the end of this twelve month period, the remaining U.S., Allied and other non-South Vietnamese forces would move into designated base areas and would not engage in combat operations.

The remaining U.S. and Allied forces would complete their withdrawals as the remaining North Vietnamese forces were withdrawn and returned to North Vietnam.

An international supervisory body, acceptable to both sides, would be created for the purpose of verifying withdrawals, and for any other purposes agreed upon between the two sides.

This international body would begin operating in accordance with an agreed timetable and would participate in arranging supervised cease fires in Vietnam.

As soon as possible after the international body was functioning, elections would be held under agreed procedures and under the supervision of the international body.

Arrangements would be made for the release of prisoners of war on both sides at the earliest possible time.

All parties would agree to observe the Geneva Accords of 1954 regarding South Vietnam and Cambodia, and the Laos Accords of 1962.

I believe this proposal for peace is realistic, and takes account of the legitimate interests of all concerned. It is consistent with President Thieu's six points. It can accommodate the various programs put forth by the other side. We and the Government of South Vietnam are prepared to discuss its details with the other side.

Secretary Rogers is now in Saigon and he will be discussing with President Thieu how, together, we may put forward these proposed measures most usefully in Paris. He will, as well, be consulting with our other Asian allies on these measures while on his Asian trip. However, I would stress that these proposals are not offered on a take-it-or-leave-it basis. We are quite willing to consider other approaches consistent with our principles.

We are willing to talk about anybody's program—Hanoi's four points, the NLF's 10 points—provided it can be made consistent with the very few basic principles I have set forth here.

Despite our disagreement with several of its points, we welcome the fact that the NLF has put forward its first comprehensive program. We are studying that program carefully. However, we cannot ignore the fact that immediately after the offer, the scale of enemy attacks stepped up and American casualties in Vietnam increased.

Let me make one point clear. If the enemy wants peace with the United States, that is not the way to get it.

I have set forth a peace program tonight which is generous in its terms. I have indicated our willingness to consider other proposals. But no greater mistake could be made than to confuse flexibility with weakness or of being reasonable with lack of resolution. I must also make clear, in all candor, that if the needless suffering continues, this will affect other decisions. Nobody has anything to gain by delay.

Reports from Hanoi indicate that the enemy has given up hope for a military victory in South Vietnam, but is counting on a collapse of American will in the United States. There could be no greater error in judgment.

Let me be quite blunt. Our fighting men are not going to be worn down; our mediators are not going to be talked down; and our allies are not going to be let down.

My fellow Americans, I have seen the ugly face of war in Vietnam. I have seen the wounded in field hospitals—American boys, South Vietnamese boys, North Vietnamese boys. They were different in many ways—the color of their skins, their religions, their races, some were enemies; some were friends.

But the differences were small, compared with how they were alike. They were brave men, and they were so young. Their lives—their dreams for the future—had been shattered by a war over which they had no control.

With all the moral authority of the office which I hold, I say that America could have no greater and prouder role than to help to end this war in a way which will bring nearer that day in which we can have a world order in which people can live together in peace and friendship.

I do not criticize those who disagree with me on the conduct of our peace negotiations. And I do not ask unlimited patience from a people whose hopes for peace have too

often been raised and then cruelly dashed over the past four years.

I have tried to present the facts about Vietnam with complete honesty, and I shall continue to do so in my reports to the American people.

Tonight, all I ask is that you consider these facts, and, whatever our differences, that you support a program which can lead to a peace we can live with and a peace we can be proud of. Nothing could have a greater effect in convincing the enemy that he should negotiate in good faith than to see the American people united behind a generous and reasonable peace offer.

In my campaign for the Presidency, I pledged to end this war in a way that would increase our chances to win true and lasting peace in Vietnam, in the Pacific, and in the world. I am determined to keep that pledge. If I fail to do so, I expect the American people to hold me accountable for that failure.

But while I will never raise false expectations, my deepest hope, as I speak to you tonight, is that we shall be able to look back on this day, at this critical turning point when American initiative moved us off dead center and forward to the time when this war would be brought to an end and when we shall be able to devote the unlimited energies and dedication of the American people to the exciting challenges of peace.

Thank you, and good night.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the distinguished majority leader.

Mr. ALBERT. Mr. Speaker, I join the distinguished minority leader in complimenting the President on a great statement which I think will have the support of the American people. I believe also that it will improve the position of our Nation around the world. If it does not bear fruit, the world will know and certainly our own people will know where the responsibility for failure lies. While the speech enunciated certain definite principles, it left open every possible avenue of negotiation, compromise, and settlement. I would like to add—and I think the gentleman will agree with me on this—that while the President made very significant statements in this area, the speech President Johnson made when he announced his refusal to become a candidate for reelection to the Presidency last year was also an important statement and one of the major milestones on the road to an honorable settlement of this very difficult war. Both President Nixon and former President Johnson have made it clear to friend and foe alike that the commitment and the word of the United States are the bonds of the greatest nation in the world. The President is insisting that peace must be the objective of our people and the world; he is also insisting that peace does not mean surrender and that peace without honor is no peace at all.

Mr. GERALD R. FORD. Mr. Speaker, on behalf of the President and myself, may I express appreciation for the fine statement of support made by the distinguished majority leader not only on the floor today but also at a meeting held yesterday at the White House with the President. I share with the distinguished majority leader his feeling about the contribution made by former President Johnson through his own with-

drawal from the presidential election in 1968 and his actions during the last 4 years, during a very trying and difficult time. I think all Americans do owe a great debt of gratitude to former President Johnson for his patriotic service. His problems as Commander in Chief were immense but he never shirked his responsibility and I believe his basic decisions were in the best interest of the United States and the free world.

Mr. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Louisiana.

Mr. BOGGS. Mr. Speaker, I should like to associate myself with the remarks made by the distinguished minority leader and the distinguished majority leader. I listened, with most Americans and for that matter with most of the world, to the remarks made last evening by President Nixon.

Mr. Speaker, I thought that the President's statement was a very thoughtful one, that it was entirely free of threat or bombast, but he said quite firmly and without equivocation that there would be no unilateral surrender on the part of the United States and that there would be no retreat from the commitments and pledges made by us to the other nations of the world.

He also said that the door was open as wide as it could be opened, as I listened to him, for continued multilateral negotiations. He said, if I remember correctly, that this Government was perfectly willing and anxious to accept and to urge the election of a broadly based government in South Vietnam, representing all elements in that country.

I think the President made a very notable contribution to the cause of peace which is devoutly hoped for by all Americans regardless of party. I commend him upon his speech.

Mr. ARENDS. Mr. Speaker, President Nixon's speech last night was a truly historic one. It was a frank report to the American people that they might know precisely where we are, what we intend to do, and what we might expect in our untiring efforts to bring about an early and honorable settlement of the war in Vietnam.

President Nixon took the people completely into his confidence. I am sure that the people will continue to have confidence in their President.

His speech was not only a report to the American people. It was also a reaffirmation to the peoples of the world that the United States seeks nothing in the sacrifices it and its allies are making other than permanent peace and freedom for all men that they may determine for themselves the kind of government they shall have.

In explicit terms, that there can be no misunderstandings, our President has offered an honorable basis for an honorable settlement of the war in Vietnam.

It was a speech of encouragement as to the progress of the war, but offered no false expectations. We can find encouragement in the fact that the South Vietnamese are rapidly becoming able to defend themselves. Apart from the

proposed mutual withdrawal of the North Vietnamese and United States forces, there can always be a reduction in the number of forces we have there as the South Vietnamese increase in strength.

Mr. MINSHALL. Mr. Speaker, at long last Americans have been given an honest, clearcut appraisal of U.S. policy, purpose, and intent. They have been shown a blueprint for peace no reasonable adversary could reject.

Peace, with Richard M. Nixon at the helm, no longer is a remote possibility, puffed up by half-truths and unfulfilled promises. Peace, with honor, has become a distinct probability within the foreseeable future.

I am tremendously proud of the President's courage in picking up a burden he had no responsibility in creating and in the forthright manner in which he intends to reach a solution to what he quite correctly calls "the most difficult war in America's history." I am satisfied that the course of action he presented to the Nation should be acceptable to all but the most intransigent.

For the first time in a long time Americans can take hope.

Our new Commander in Chief has cast aside the proven errors of the last administration. He revealed, last night, that he will not stubbornly cling to policies of gradualism which under the last administration resulted ultimately in the commitment of more than half a million American troops. Let me remind the House that under President Nixon there has been no further escalation of our men, and the plan he presented last night would within a year's time see the safe return home of our troops.

I am pleased with the reception the President's address has received from many on both sides of the aisle. Only a few, who have hung their political hats on immediate and total surrender, have given a reflex-action spate of criticism to the address and such criticism can be discounted by examining its source.

In point of fact, a mighty hope is sweeping the Nation that we have, in just a little less than 4 months, made more strides toward ending the war than in all the 4 years preceding. We have ceased the troop buildup in Southeast Asia. We have made great strides in mending shattered relationships with the South Vietnamese and by so doing, we are increasingly able to turn the fighting over to their military. And, we have broken through the deadlock of silence which had threatened to destroy the Paris peace talks altogether under the last Administration.

President Nixon spoke for each of us last night when he said:

I want to end this war . . . to end it permanently so that the youngest brothers of our soldiers in Vietnam will not have to fight in the future in another Vietnam some place in the world.

He has charted a course which, with the support and cooperation not only of those with whom we are negotiating but of all of us in this country, will lead us to the lasting peace we so fervently desire.

Mr. LIPSCOMB. Mr. Speaker, the

President in his historic speech last night demonstrated forcefully to the American people and the world that he is a man completely and passionately committed to the cause of achieving lasting peace.

His proposal for a simultaneous withdrawal of troops by both sides on a mutually acceptable timetable provides a well-reasoned and practical way for our troops and those of our allies to be withdrawn from combat under honorable conditions.

To help see meaningful peace achieved, President Nixon unequivocally stated our desire that the South Vietnamese people be able to freely choose for themselves the type of government they want for their own country.

This provides a clear challenge to Communist objectives in Vietnam and elsewhere, and all peoples of the world will be watching the Communist reaction with great interest.

President Nixon has presented a proposal which we all fervently hope will result in stopping the fighting in Vietnam and in achieving lasting peace. His efforts deserve fullest support.

Mr. HALL. Mr. Speaker, the eloquent simplicity of President Nixon's address to the American people last night, stating our position in Vietnam, was most gratifying, since it extended the olive branch of peace in the one hand, while holding ready the sword of strength in the other.

The President made it clear, that although this Nation as well as the Republic of South Vietnam desire peace, that the eventual political settlement will have to be made by the South Vietnamese people themselves. I am thankful for his optimism and personal handling.

Mr. Nixon's challenge to the Hanoi government for a mutual pullout of foreign troops over a 12-month period, to be supervised by an international body, should be heartening news to all Americans, those who advocate a "pullout" of our forces and those who want our troops to stay until an honorable victory is won. It was significant that the President acknowledged that the South Vietnamese Army is fast approaching the time when it will be able to take over most of its own defense. It is equally significant that he warned the aggressors that they foil all peaceful purposes by continued attacks on civilians in South Vietnam, and may bring on retaliative measures.

Realizing that the President might have felt compelled to publicly reply to the North Vietnamese as well as keep the American people informed; his statement that he wants to end the war, coupled with the knowledge that there is no easy way to end it, should serve as a rallying point for all Americans to pull together, to let this country speak with one voice to our heartfelt desire for peace, but our determination that there not "be peace at any price."

We join the Nation and indeed the freedom and peace loving peoples of the world, in a prayer for success, justice, honor and peace.

Mr. DENNEY. Mr. Speaker, during the past few months, the Nixon administration has pressed ahead in an effort to

secure peace in Southeast Asia. Last evening on a national television broadcast the President set forth an eight-point plan as an offer to bring about a settlement of the war. This offer of peace was made knowing full well that more than 12 months of negotiations have resulted in limited progress.

I view the President's message as a communication with two purposes or perhaps more correctly stated, a communication for two audiences. First, the President's direction is toward the negotiating table. I would suspect that some last-minute changes were made after an analysis of the Hanoi 10-point proposal. Even the President's method of delivery, a formal speech, indicates that this message may be viewed as an official statement of position to the representatives of Hanoi. Second, and probably more significant at the present time, by means of this communication, the President was leveling with the people of the United States. The White House is not interested in troop withdrawals just to satisfy the American public. It is interested in pulling out troops in order to lower the level of fighting, to cut down the casualties, and as a sign to everybody that the war is ending.

I see the President's message as a step forward. As for an indication as to what lies ahead—we know now, that the administration is pinning its chief hopes on the Paris talks.

Mr. McCLODY. Mr. Speaker, President Nixon has fulfilled his promise to provide new initiatives in seeking to bring the Vietnam war to an honorable close. The President spoke eloquently, frankly, and courageously in explaining to the American people and to the world our aims and objectives in Vietnam, as well as the means by which peace and stability can be effectively accomplished. The President's thoughtful and straightforward message has been welcomed by citizens throughout the land. It will help further to solidify our Nation's relations with our allies.

In speaking as he did, the President has emphasized a determination to stay with our friends while at the same time we can resolve differences with those nations which are unfriendly.

Mr. Speaker, I am proud of our President and of the pattern for peace which he has outlined. I am confident that it merits the overwhelming support of the people of our Nation. In addition, it offers an excellent opportunity for North Vietnam and its allies to demonstrate whether they are truly seeking a peaceful solution to a war which can and should be terminated with the least possible delay.

Mr. PELLY. Mr. Speaker, last night President Nixon presented to the world the reassurance that the Vietnam war holds the highest priority of our Government for solution.

And, in a most positive way, he outlined the U.S. position on ending this grave problem.

Mr. Speaker, I was proud of our President as he spoke, and I was gratified to hear the commentaries that immediately followed the address. There was hardly a voice of dissent as the points for peace outlined by the President were analyzed.

There is conciliation in Mr. Nixon's program for ending the war, and this should be taken as a gesture of faith by the enemy. And, there was honesty for the American people in last night's Presidential address, and that should be accepted with gratification.

The foundation now has been laid, Mr. Speaker, and the next step is to start building for a permanent peace. I trust the wasted propaganda will be set aside in Paris tomorrow and the construction of a world without war will begin.

Mr. POFF. Mr. Speaker, the President last night appealed for the support of the American people. His goal is peace with honor. He has my support.

Indeed, he will have the support of all thoughtful Americans. The method he has proposed for achieving the goal is one around which all can unite with no violence to any personal principle or standard. Honest men, patriotic men, can reasonably disagree about Vietnam. They may disagree about the cause of the conflict, about the nature of the conflict, about the motivations of the parties involved in the conflict, about the mechanisms of the conflict, about the morality of the conflict, and finally about the techniques of resolving the political aspect of the conflict. But none can disagree about the need to terminate the conflict, and I am convinced few will disagree that the method the President has proposed is at once generous, functional, feasible, and honorable.

If the other side rejects the tender the President has made, they must suffer history's eternal indictment.

Mr. ROUDEBUSH. Mr. Speaker, President Nixon's appeal for peace last night was based on realities of the situation and offer an honorable and orderly end to that conflict.

As the President noted, it is futile to argue the pros and cons of our involvement: the fact is that we are involved and have a commitment.

The President's announcement that we will accept the neutralization and unification of Vietnam as long as the South Vietnamese people have the right of self-determination, is reasonable and indicates the United States is sincere in its quest for peace.

At the same time, the President's call for withdrawal of troops within a year by both the allied and North Vietnamese is a fair offer and should be accepted by Hanoi.

It was particularly encouraging to hear President Nixon report that the time may be drawing near when U.S. troop withdrawals will be possible without regard to progress at the Paris peace talks.

I am pleased that the President has given the Nation a candid and frank appraisal of this complex situation, and did not hold out any false or overly optimistic promises such as those that regularly occurred under his predecessor at the White House.

The American people can accept the truth, even if the truth is unpleasant. But, as the President warned, peace will take time even if Hanoi is willing to cooperate.

I believe that Members of Congress and the American people appreciate the President's report and support him

wholeheartedly in the tedious and frustrating task of obtaining a settlement that will insure the freedom of the South Vietnamese people to choose their own form of government.

The President has inherited a situation not of his own making, but is laboring with skill and determination to solve it. Let us all support him in his efforts.

Mr. CEDERBERG. Mr. Speaker, the President is to be commended for his candid statement last night on our objectives in Vietnam, and our efforts to bring an honorable and lasting peace to Southeast Asia.

It should please and reassure those Americans who expect their President to speak with candor of this war and of the steps he is taking to, as the President said, "end it permanently so that the younger brothers of our soldiers in Vietnam will not have to fight in the future in another Vietnam someplace in the world."

This was a speech that marks a new momentum in our quest for peace. But our President cannot do the job alone. We can help him, and we must, by uniting behind the generous and reasonable peace offer he has made. If we will do this, it will help to convince the enemy that he should negotiate in good faith to end the war, and not count on a collapse of American will to achieve victory for him.

President Nixon's reasonable and timely approach is a new initiative in propelling the negotiations forward. He has pointed to many approaches that can lead to fruitful negotiations, if the other side is interested in serious negotiation. Our support of the President can demonstrate that serious negotiations are in the interest of all concerned.

Mr. BROTZMAN. Mr. Speaker, I applaud the speech of the President on Vietnam last night.

Mr. Nixon's speech represented a new style in official analyses of the Vietnam situation. It was laced with candor.

I would characterize his position as tough but flexible, and he expressed this in such plain language that I believe the North Vietnamese will interpret it that way, too.

Being a longtime advocate of a bilateral staged deescalation plan for ending hostilities I certainly endorse his general outline for stopping the shooting war.

I also agree that cessation of the fighting is a necessary condition to the holding of free elections.

The President asked Americans to stand united at this crucial moment in the negotiations. I join with him in this hope.

Mr. SHRIVER. Mr. Speaker, I want to join in congratulating the President for his clear and concise presentation last night of this country's quest for peace in Vietnam.

The President emphasized what I have stated for sometime. Mainly that the South Vietnamese must assume greater military responsibility for the war. General Abrams obviously is optimistic regarding those prospects. I hope there can be substantial U.S. troop withdrawals from Vietnam in the near future.

President Nixon outlined a fair, reasonable and flexible proposal for peace which we all hope will lead to meaningful progress in the Paris negotiations. He clearly restated American objectives which simply are to guarantee self determination by the people of South Vietnam. The President emphasized we will accept any government that the people of South Vietnam choose.

He also made it clear that the United States has rejected any attempt to impose a military solution upon Vietnam.

Most important, for the first time in many, many months the American people have received a report from their President outlining this country's objectives in Vietnam and declaring new initiatives designed to end the war.

It is time that we in the Congress and all Americans everywhere unite behind the President in his efforts to obtain an early and honorable peace in Vietnam.

Mr. AYRES. Mr. Speaker, an honest man, speaking honest words, took the American people into his full confidence last night.

No one listening to his words could doubt that here was a man of peace who would through the spirit of justice bring a true accord amongst dissenting combatants.

President Nixon is striving for the only meaningful peace—one that will endure. A settlement that would encourage future aggression would be a political hoax. Such an arrangement could bring about an all-out war that would strike at our very freedom.

Our President, in his address to his people, did not brandish the sword—neither did he sheathe it. He spoke from the strength of the American forces but he also spoke of his concern for the lives of the American servicemen.

Through our words today, we should impress upon aggression-minded foreign leaders that belligerency will not lead to conquest. One can readily see that some remarks made in this country has misled the enemy into thinking that they had a substantial supporting force here.

Our Chief Executive has demonstrated his faith in the American people. Let us tell the world that we have faith in him—only in this way can we be assured that they too will heed his words.

Mr. BELCHER. Mr. Speaker, I am glad that the President is adopting the policy of taking the American people into his confidence. I have always thought the American people were tough enough and strong enough to stand the truth. I am glad the President feels the same way.

In my opinion, in this speech, the President said what he meant; and I know he means what he says. He clearly outlined to our adversaries that we wanted peace, and that he would do everything honorable to get this peace, but we were not going to surrender, and any thought they might have that America is falling apart is only wishful thinking on their part.

Mr. STANTON. Mr. Speaker, at long last, the American people have been given a frank and honest appraisal of this country's involvement in Vietnam. This, in my opinion, was the most significant factor in President Nixon's address to the Nation last night. His message was

characterized by the complete candor we have so badly needed.

The President's simple and forthright prescription for peace was an extremely generous one. It was reasonable in its call for mutual withdrawal of troops and the guarantee of South Vietnamese self-determination. Surely no one can doubt, any longer, this Nation's resolve and commitment to peace when President Nixon has staked his personal future on redeeming his campaign pledge "to end this war in a way that would increase our chances to win true and lasting peace in Vietnam, in the Pacific and in the world."

To me, the President's candid and flexible proposal represents a sound basis for an accord. The position of our Government is now clear and unquestionable. We, as Americans, should be grateful for this firm but fair statement of policy by our President. It deserves our united support.

Mr. SMITH of California. Mr. Speaker, last night President Nixon reported to the Nation the condition of our commitment to South Vietnam, and significantly, he left the overwhelming impression of his personal dedication to terminate the killing.

At the same time, President Nixon emphatically underscored the United States intent to preserve the integrity of the South Vietnamese Government as selected by those people.

We have been talking in Paris for a year. We will continue to talk, according to the message last night. But President Nixon has made it clear that there must be substantive progress in those talks along the lines set forth.

The conditions for a negotiated peace are reasonable and generous. They are conditions upon which the parties interested in a settlement surely could discuss and agree upon.

President Nixon has placed the burden of reasonableness directly upon the Communist world. Without some sincerity and some flexibility on the part of the Communists in Paris—in future negotiations—our choices will be limited. We have only three alternatives. We can win a military victory. We can pull out. Or, we can achieve a negotiated agreement. President Nixon has offered the latter option to the Communists.

One more important aspect of his speech requires comment. President Nixon set forth the overall Vietnam situation in such clear terms that emotional rhetoric, physical demonstrations, and propaganda pushes, should have no place.

A sincere commitment to peace has been expressed. The American public should unite behind the President and give this commitment sufficient time to be implemented.

Mr. BROOMFIELD. Mr. Speaker, I am pleased and encouraged that President Nixon has provided the American people and the world with an orderly and realistic plan for opening the way to peace in Vietnam. It is something they have been without for many, many years.

It is a firm yet flexible blueprint clearly setting down what is possible and what is not possible. The President has proposed a step-by-step phaseout of the war beginning with mutual withdrawal

of all non-South Vietnamese forces, international supervision of a truce and of free and open elections. This is a coherent and workable proposal.

But even more promising is the President's insistence that we are not wedded unalterably to its details.

He said:

These proposals are not presented on a take-it-or-leave-it basis. We are quite willing to consider other proposals consistent with our principles.

Those principles are quite simple. We will not abandon the people of South Vietnam and we will insist on their right to freely and openly choose their own government. Beyond that we are flexible.

The President's words are more than a blueprint for peace in Southeast Asia. They also recognize the deep divisions the war has caused in our country. They provide an umbrella under which all of us, regardless of our past differences about the war, may come together in a common effort for peace.

In that respect the President said:

We can have honest debate about whether we should have entered the war. We can have honest debate about the past conduct of the war. But the urgent question today is what to do now that we are there, not whether we should have entered on this course, but what is required of us today.

The President's words have provided us all with an opportunity: to end the war, and to end the division that has torn our country. Our responsibility is to make the most of that long-awaited opportunity.

Mr. MIZE. Mr. Speaker, President Nixon's report to the people on the status of the prospects for peace in Vietnam could not help but lift the hearts of all of us who are weary of this conflict and its drain upon our men and treasure. No one knows better than the President about the long, hard road to peace, and he would be the last person to want to raise any false hopes for an immediate settlement and the imminent return of our troops, but the important aspect of his report was his willingness to "level" with us. We know exactly where this country stands, and we have a better idea than ever before about the position of the North Vietnamese in these vital negotiations. The President left no doubt about the priority his administration has given to this issue. We can be encouraged over the progress which has been made. We may be only inching toward a settlement, but it is apparent there could be a significant breakthrough at any time. When it comes, we can be sure the settlement to follow will be an honorable one and the groundwork will have been laid to prevent other "Vietnams" in the future.

Mr. WINN. Mr. Speaker, President Nixon last night told it like it is. And, in so doing, he leveled the ground and began construction of his pathways to peace and freedom—freedom for the South Vietnamese to live their own lives and freedom for Americans from a costly and unwanted war.

His peace plan was generous and flexible. He referred, not to an "enemy," but to "the other side."

He painted a word picture of people—

North and South Vietnamese and Americans—who are more alike than they are different.

He made perfectly clear that his peace plan was not an absolute; that it was open to negotiation.

Then, the President asked the American people to help him build these pathways to peace and freedom, by presenting a united front.

This was President Nixon's first big step on the path to peace. Let us, the American people, take that step with him.

Mr. WIDNALL. Mr. Speaker, last night the President articulated for all to hear the American position on Vietnam.

He ruled out attempting to impose a purely military solution on the battlefield.

He ruled out a one-sided disengagement from Vietnam or the acceptance in Paris of terms that would amount to a disguised defeat.

We seek—

The President said—

the opportunity for the South Vietnamese people to determine their own political future without outside interference.

This includes our willingness, "to agree to neutrality, if that is what the South Vietnamese people freely choose."

While setting forth the American position, including an emphasis on an honorable and lasting peace in Southeast Asia, the President indicated his flexibility. He said:

We insist on no rigid diplomatic formula . . . Peace on paper is not as important as peace in fact.

Throughout his address, the President's tone was one of reasonableness, of a willingness to be flexible in working toward an honorable objective.

Now the time has come for the other side to respond—to show the world whether it is genuinely interested in moving forward, step by step, toward a meaningful agreement that will end the war.

I urge the Members of this body—regardless of party affiliation—to show our support of the President, recognizing that our support could well be that extra ingredient that will convince the enemy that an end of the war can be found only through negotiation.

Mr. KUYKENDALL. Mr. Speaker, we have heard the President of the United States commit our Nation to a policy of peace, to extend our efforts to end the bloodletting in a far-off corner of Southeast Asia, and we all should be gratified by his words.

Richard M. Nixon becomes the first leader of the American people who has truly spelled out a comprehensive policy in Vietnam since the first American soldier set foot in that land.

He has said to our allies, to our enemies and to us: We are going to be reasonable, and we are going to remain strong. We want nothing for ourselves, we are prepared to give much for others.

His statement gives us the best and most firm base we could possibly have for a strong and united America, mutually determined to do whatever is necessary to leave Vietnam peacefully, leaving be-

hind us a nation capable of shepherding its own flocks.

We must unite behind him, and by ending our own divisiveness, help him to end the divisiveness of the world. Dissent at home has fostered dissent abroad; in the no-policy years behind us, we floundered and growled at each other, and the world listened. A fragmented America has been the chief stumbling block to our efforts at the peace table. Now we need be fragmented no longer.

Mr. DEVINE. Mr. Speaker, last night our great President, Richard M. Nixon, in his nationwide telecast, outlined a comprehensive blueprint for peace in Vietnam. The American people have been waiting for specifics in this critical area, and that is just exactly what the President proposed.

Naturally we will have the usual bland skeptics, particularly among some of the self-proclaimed "experts" in the TV commentator field, that get "nothing dramatically new," or, "same old stuff," and so forth. However, close scrutiny and objective examination of the President's overall remarks reveals a great deal of solid, meaningful policy statements.

The North Vietnamese know what the President means when he proposes mutual and simultaneous withdrawal of all non-South Vietnam troops quickly, and within a period of 12 months. It is clear that an International supervisory verification body would be created with specific functions, based on a timetable, involving a cease-fire, free elections, release of prisoners of war as well as protecting self-determination for the South Vietnamese.

Further, President Nixon removed all doubt about U.S. intentions relative to interference in policymaking or territorial desires. He recognized that the political issues are internal with the North and South Vietnamese, to be resolved by them, with no intervention by America unless requested, and that there should be no preconditions to the talks between the North and South.

Although I did not necessarily detect a "thread of threat" throughout the speech, in my opinion the President made it unmistakably clear and concise that increased attacks by the North certainly were not conducive nor encouraging to peace. As a matter of fact he stated:

If this continues, it will affect other decisions.

Much can be read into these words, and I elect to interpret them in the context of the President's sincere and earnest desire for a peace we can be proud of—negotiate in good faith, follow the blueprint in the interest of humanity, but if the North, for reasons of propaganda, face saving, bad faith, or otherwise, continues or increases military confrontation, our alternatives are limited measurably, and the North Vietnamese and NLF must accept the responsibility for whatever may be the consequences.

Finally, this comprehensive blueprint for peace, must develop immediately from the words to affirmative action and results. No useful purpose can be served by delaying interpretations and analysis and rehashing everything that has been said. With over 35,000 American boys

having made the great sacrifice, there is just one answer. Peace with honor, and now.

Mr. ERLÉNBERG. Mr. Speaker, in his speech Wednesday night, President Nixon pronounced what his administration has implied since it came into office and what former President Johnson had implied in the closing months of his administration: that the United States is amenable to a mutual withdrawal of all foreign troops from South Vietnam. What was new in the President's proposal was a blueprint with a time schedule to that end.

His blueprint is comprehensive, his offer generous, stressing only what has been this country's objective all along: free choice for South Vietnam. He has provided a new initiative while promising flexibility in our position. The responsibility for making the next move now rests with Hanoi.

As one columnist noted:

If there is no light at the end of the tunnel yet, there is at least a tunnel.

I join the President in his fervent quest to reach the end of that tunnel.

The President laid his popularity on the line when he said that he expects to be held answerable to posterity if he fails in his search for peace. I believe the American people are convinced of his sincerity and determination to make good on his pledge. For myself, I believe he also has the skill to go down in history as a peacemaker.

Mr. TEAGUE of California. Mr. Speaker, I was very much encouraged by President Nixon's willingness to be extremely flexible in this matter of peace negotiations and counter proposals. It was most significant that the President indicated a willingness of this government to accept among other solutions a neutralized and/or unified Vietnam with the single proviso that such a condition be established through self-determination of the South Vietnamese people. President Nixon's statement was unambiguous and reflected the desire of the United States and the South Vietnamese Government to separate political and military issues during the current negotiations so that a most speedy arrangement can be achieved for a cease-fire and a mutual reduction of combatants in the area.

With this peace plan, I strongly feel that Mr. Nixon has unequivocally responded to recent proposals by the other side and I am hopeful that his candor will facilitate more meaningful discussions which are required to end this conflict.

Mr. COLLIER. Mr. Speaker, President Nixon's May 14 message to the American people on the regrettable Vietnam conflict was indeed a forthright and statesmanlike appraisal of the situation. It not only provides new avenues of hope for peace in Southeast Asia, but it lays before world opinion our desire and willingness to put down our arms on a good-faith agreement which seeks only the same good faith on the part of our adversaries in return.

The terms for peace which President Nixon set forth can leave no doubt with regard to our singular purpose—that of

insuring the right of the people of South Vietnam to have the free choice of its political destiny. It seems to me that no man who believes in individual rights and human dignity can question this purpose.

Needless to say I endorse President Nixon's Vietnam position and his peace efforts. If the American people will unite behind his program, I believe we can achieve a meaningful peace in Southeast Asia. Surrender or total capitulation at this point appears to be the only alternative—and such a course would not only be a betrayal of our commitment but a shallow and temporary cessation of the conflict which could only invite reprisals, atrocities, and subsequently future war.

Mr. SMITH of New York. Mr. Speaker, President Nixon's talk to the Nation about Vietnam last night was a refreshing restatement of our goals and aims and those of our allies in that unhappy country—the same now as they have always been—that South Vietnam be allowed to choose its own destiny and that this choice be made by all segments of its population who are willing to forgo force and violence. The conditions for peace set forth by the President are moderate, sensible, and flexible, with plenty of room for face-saving by all parties.

The United States and its allies are meeting the responsibility of leadership in mankind's quest for peace. The tide toward peace is flowing. It is irresistible. A modicum of good will on the part of the hard-pressed North Vietnamese and Vietcong will let them swim with this tide instead of struggling against it.

Mr. SEBELIUS. Mr. Speaker, like the concerned citizens in my district and those across the Nation, I share the President's paramount concern toward ending the war in Vietnam and achieving a lasting peace.

It is in this light that I would like to comment on one particular portion of the President's remarks last night that I thought were most pertinent in our Nation's quest for peace.

President Nixon said we want to end this war permanently so that the younger brothers of our soldiers in Vietnam will not have to fight in the future in another Vietnam.

Personally, as a veteran of both World War II and the Korean war, I, like all veterans of war, fully appreciate what the President is telling us. In our efforts to effect a peace, we must remember that only a just and honorable settlement will guarantee peace for future generations.

Obviously, there is an easy way, but to simply abandon Vietnam would be to invite the wholesale slaughter of men, women, and children in a human tragedy mindful of other dark chapters of history in other wars. I do not think we want that on the American conscience.

The easy way would also invite, as the President so clearly pointed out, those who believe in aggression to try again—be it in Asia, the Middle East, Europe, or in our own hemisphere. Finally, to simply withdraw would be to repeat the mistakes many have made in the past—the mistakes of our fathers' generation

that led to our generation going to war and the mistakes of our generation that has led our sons and loved ones into this conflict.

Mr. Speaker, in closing his remarks last night, President Nixon said he asked not for patience, that he asked not for partisan unity, he simply asked for support of a program of peace. I intend to give him my strongest possible support in this regard and feel Americans genuinely concerned over a lasting peace will do the same.

Mr. PETTIS. Mr. Speaker, if the fighting in Vietnam is to be ended, and if that nation is to exist as a country free to determine its own destiny, the United States must have strong and wise leadership in pursuit of those goals. President Nixon last night displayed that type of leadership.

The President's proposals are reasonable; they are fair; and they do not break the faith of the 34,000 Americans who have died in Vietnam in their country's determination to throw back the tide of tyranny.

If the Government of North Vietnam is interested in ending the war, and if it truly believes that its agents in the south do in fact represent the majority of the people of South Vietnam, Hanoi can hardly do anything but agree with President Nixon's proposals. His plan offers assurances that, left in peace, the people of South Vietnam would be free to choose any government they wish.

The President has gone more than half way in the quest for peace. He has said we are not going to attempt to impose a military solution of Vietnam's problems. He has offered a plan whereby United States and North Vietnamese forces can mutually withdraw from the south. And he has pointed out that the growing strength of the Army of the Republic of South Vietnam will permit the withdrawal of some U.S. forces as the South Vietnamese gain the capability of defending themselves—regardless of what the Hanoi government may decide.

The Communists cannot reasonably ask for more; they certainly have nothing to gain by prolonging the struggle.

Mr. SCHWENGEL. Mr. Speaker, President Nixon's speech should leave no doubt that he is earnestly seeking an early end to the Vietnam war. He said we are prepared to take risks for peace. I support that position. His emphasis of the need for political settlement and his statement that military victory is not a proper goal validates the position taken by a team of volunteers I led to Vietnam in 1967.

Phased mutual withdrawal and our willingness to accept the results of elections in which all political groups in South Vietnam could participate constitutes an acceptable basis for negotiation.

With Secretary of State Rogers in Saigon and Ambassador Lodge on his way back to Paris, the stage is set for serious and meaningful negotiation. The fact that President Nixon is willing to consider other proposals places us in a better position and holds out more hope for success.

By taking the position expressed by President Nixon, I believe we can get out of Vietnam on an honorable basis, regain our lost prestige, and establish a peace that will be real and genuine.

Mr. ZWACH. Mr. Speaker, the returns of my recent congressional questionnaire showed the main concern of my constituents to be the conflict in Vietnam. I am sure this opinion would prevail throughout the rest of our Nation.

I was happy to hear our President speak out, frankly and forthrightly, on this subject last night in his address to the Nation.

President Nixon, in plain language, understandable to all, laid out his proposal for the withdrawal of all foreign troops in Vietnam and the eventual peace between the warring factions.

In language, just as understandable to all, he warned that while striving for peace, this should not be construed as weakness or an unwillingness on the part of America to honor the commitments previously made.

The President showed unusual candor and political courage when he said that if he failed in his quest for a true and lasting peace in Vietnam he expected the American people to hold him accountable for that failure.

Mr. Speaker, I applaud this first truly hopeful sign for peace in Vietnam.

Mr. WOLD. Mr. Speaker, the President's message clearly outlined in a restrained and statesmanlike manner the objectives of the United States and her allies in Vietnam. It was also a clear offer to North Vietnam of a fair opportunity to end the fighting.

At the same time though, the President made clear that Hanoi will be the loser if it wishes to continue the war.

The proposal for a mutual withdrawal of troops by the North Vietnamese and Americans offers the possibility to save a great number of lives—both American and Vietnamese. It can also insure that the political decision as to what type of government South Vietnam will eventually have—will be left up to the people of South Vietnam.

President Nixon's speech leaves no doubt that the United States will settle for nothing less than a just and honorable peace.

I also think it was the initiative and fresh approaches of President Nixon that made the new approach possible.

Since the President's inauguration we have blunted the enemy's battlefield capability; we have restored our relations with Saigon, and we have taken new initiatives at the Paris peace talks. If these had not been skillfully coordinated there would have been no fresh initiative by the President.

Mr. WHITEHURST. Mr. Speaker, last night President Nixon issued a call for mutual withdrawal of North Vietnamese and American military forces from South Vietnam. The sincerity and freshness of his appeal should strike a chord of optimism in all of us. Surely the North Vietnamese negotiators in Paris and their superiors in Hanoi must realize that all we seek is an honorable end to the fighting.

It will take time for the President's

words to be translated into tangible moves but I believe that the President's call represents the kind of step which serves to clear the air and can place negotiations on a frank and meaningful basis. As President Nixon stated, peace will not come tomorrow. Our patience will still be tried. It is up to Hanoi now to extend its hand. Peace will come just as rapidly as they shall truly want it.

Mr. FRELINGHUYSEN. Mr. Speaker, the President has given the American people a comprehensive and clearcut statement of our Government's objectives in Vietnam, and our desire to bring the war to an early and honorable conclusion. In these efforts the President deserves the support of the American people.

The President's speech last night was both firm and flexible. He reaffirmed his deep desire to bring this war to an end soon—and in a way that will not sow the seeds for future Vietnams. Although counseling patience, Mr. Nixon has laid the basis for meaningful discussions. Let us hope it will serve to move the peace negotiations off dead center.

The President's speech should be recognized as a significant effort at peace-making. To turn this effort into solid accomplishment will require that his message be responded to in the spirit it was offered. Should this response be forthcoming, a giant stride toward peace in Vietnam will have been taken.

Mr. BLACKBURN. Mr. Speaker, President Nixon in his address of last evening has again demonstrated to the American public the candor which they can expect from their new Chief Executive.

He has not attempted to fill the American public with false hopes.

Neither has he given our allies in the struggle in Southeast Asia cause for despair.

The President has reassured both the American public and our allies in South Vietnam that America will see the struggle through until the people of South Vietnam can make their own determination as to the type of government which they desire.

At the same time, through his firmness, he has publicly advised the leaders of North Vietnam that peace is available upon honorable terms, but that surrender by the United States does not lie in the future.

I urge my colleagues and the American public to stand beside their President in this difficult hour in American history.

The test now facing the American people is one of will and determination. The question to be settled in the coming months is that of whether or not the will of a democracy of great human and material resources can be broken by the will of a dictator of a small and poverty-ridden country.

I place my hand and heart beside our President and reaffirm that this Nation will not be deterred in its most worthy purposes.

Mr. FISH. Mr. Speaker—

I want to end this war. The American people want to end this war. The South Vietnam people want to end this war.

So began the President's statement as he spelled out the allied peace proposals

as the basis for bargaining with the 10-point plan for the NLF.

The President ruled out a purely military solution or a one-sided withdrawal. He said:

We seek no bases in Viet Nam. We insist on no military ties. We are willing to agree to neutrality if that is what the South Viet Nam people freely choose.

In this clear language President Nixon dispelled any thought of American imperialism.

The President opened the way to a new government for South Vietnam either through elections or negotiations. He stated the American position in favor of "full participation in the political life of South Vietnam by all political elements." He opened the door to negotiating the NLF demand for a coalition government by declaring that we had no intention of imposing any form of government on the people of South Vietnam. Implicit is the important assumption that the President's proposals have the agreement of the present South Vietnam Government. Rigidity was avoided in the President's acknowledgement that peace would not require a formal negotiated settlement but that peace could be achieved through informal understanding.

The President's proposal for mutual withdrawal of troops ends the previous U.S. reciprocal requirements made at Manila. It sensibly includes Laos and Cambodia and significantly narrows the area of disagreement.

The fundamental issues of North Vietnam considering the conflict a civil war, the disagreement as to the provincial government before elections or a coalition government following elections remain. However, if the NLF and North Vietnam wish to bargain in good faith, a far narrower stage is set. The President has made a significant contribution to peace.

Mr. Speaker, although each item here is important, the most important consideration is the general tone of President Nixon's speech. Candor and honesty are what the American people rightly demand of their leaders. Candor and honesty is what President Nixon delivered last night—honesty coupled with a realistic appraisal and a workable program to put an end to the bloody conflict that has killed our young men, drained our treasury, and sown the seeds of discord, distrust, and discontent in our great land.

Mr. BUTTON. Mr. Speaker, I was most pleased with the remarks of President Richard Nixon last night on the position of the United States in Vietnam. It should be apparent to all that Mr. Nixon is very serious about bringing the war to a negotiated conclusion as quickly and as fairly as possible.

Hopefully, the conciliatory tone of the speech will mark the new beginning of a general reduction in violence, reduced fighting, and an end to the killing. The recognition that the enemy simply does not respond to unlimited pressure and that all sides must give a little brought initiative to the U.S. position that we have seldom had before.

With the intent of the President clearly

stated that the South Vietnamese are going to take more of the burden on themselves, I look forward, as does President Nixon, to the exciting challenges of peace.

Mr. DENNIS. Mr. Speaker, President Nixon, in an honest, concerned, and thoughtful address to the Nation, has presented a plan for peace in Vietnam which is specific in outline yet flexible in detail, and which is not only reasonable but generous. It contains but two basic points: First, mutual withdrawal of American and of North Vietnamese troops from South Vietnam and, in the case of the enemy, also from Laos and Cambodia; and, second, self-determination through a process of free choice by the South Vietnamese people. It is hard to see how anyone can honestly quarrel with propositions so clearly fair and right, and therefore the position thus so clearly set forth ought, in due time and course, to produce real progress toward a satisfactory peace.

It would be naive, however, to suppose that the road ahead will be short or easy. The existence and the extent of any real desire for peace on the part of Hanoi remains to be seen; and the critics at home grow daily more impatient—and this impatience, to some degree, is not entirely hard to understand.

It might be easy, in a way, as the President says, to simply cut and run—to withdraw unilaterally from Vietnam without delay. The prospect ahead, a prospect of protracted negotiation, with continuing casualties, is not a pleasant one. But I submit that the President is pursuing the only responsible course. With 35,000 American dead in Vietnam, with the South Vietnamese led by us to be dependent on us, with the whole picture of the Pacific area and future war or peace in that area at stake, we cannot easily or lightly shirk or shed our responsibilities and simply cut and run. The President has said that he does not ask for unlimited patience; but I think he is entitled at this point in history to have, as he has requested, a united American people behind a reasonable and generous offer for peace.

As one of those people, I, for my part, extend him that support.

Mr. LUKENS. Mr. Speaker, it was impressive watching the President of the United States last evening recall the efforts of the past by the United States to achieve realistic world peace. The President strongly stated far reaching goals and realistic objectives for world peace, not merely for a ceasefire in Vietnam.

The North Vietnamese Communists have already been clearly and irrefutably proven the aggressors in this affair. Our involvement is a noble one as we are defending this small country from a brutal military act of aggression, and we are protecting that God given right of self-determination.

It is clear, or should be, to all Americans, that a unilateral withdrawal would result in wholesale slaughter by the Communists and torture of all South Vietnamese who had not been part of the Communist cause. We cannot betray these people, and this proposal by President Nixon hopefully will prove to be

the key to our political logjam on peace in Vietnam.

It was very clear the burden the President is carrying upon his shoulders. It was also clear that he is accepting full responsibility and "expects to be held accountable" for the results. Such earnest effort and dedication by this man deserves the country's total and unified support.

Mr. MORSE. Mr. Speaker, the Vietnam conflict is basically a political problem and it took us several years to become enmeshed in it. It will take time, patience, self-restraint and a political solution to get out. President Nixon has recognized this most basic fact.

President Nixon, by his courageous and forthright statement last night, has revealed himself to be a creative man of peace. His offer of a mutual withdrawal of American and North Vietnamese forces presents, more clearly than ever before, the administration's efforts to lower the level of fighting and reduce the rate of casualties. This new formulation, and particularly his statements on political settlement between South and North Vietnam open the way to possible agreement and meaningful progress in Paris.

His proposals, generous yet realistic, constitute the most hopeful formula for peace in Vietnam that the world has yet heard. We have not been confronted, as has happened too often in past years, with inflated hopes and false expectations. The difficulties we are faced with in achieving our goals of "a true and lasting peace in Vietnam, in the Pacific, and in the world" have not been minimized. Mr. Nixon has laid it on the line, and pledged himself and his future to "a peace we can live with." We ourselves can do no less than to support him in this endeavor.

As syndicated columnist Joseph Kraft has commented:

The President seems to be moving in the right direction. If there is no light at the end of the tunnel yet, there is at least a tunnel.

I think we can look forward to the glimmer of light with more hope than we have had to date, and ask the consent of my colleagues to present here Mr. Kraft's thoughtful analysis of the potentialities, as well as the problems, that are before us:

[From the Washington (D.C.) Post, May 15, 1969]

GIMMICK SOLUTIONS CAST ASIDE AS NIXON RELIES ON NEGOTIATION

(By Joseph Kraft)

The President is moving to get out of Vietnam via the negotiations route of the Paris peace talks. He is not going for gimmick solutions based on a unilateral American withdrawal that supposedly leaves the fight to a beefed-up South Vietnamese government and army.

That is the chief import of the Vietnam speech delivered by Mr. Nixon to the Nation last night. And that impression, implicit in the text of the speech, is confirmed by last-minute changes which preceded delivery of the speech.

Originally, Mr. Nixon had not planned to give a major speech on Vietnam at all. He has a horror of the long, full-dress television appearance. Up until last weekend, the idea was that he would have a press conference, opened by a short prepared statement on

Vietnam—the same formula he followed in announcing his decision on the ABM, or anti-ballistic missiles.

But over last weekend, the President decided he did not want any blurring of his message by a bunch of questions on troop withdrawal—not to mention such extraneous business as the draft, the Fortas affair or inflation. He wanted to address himself squarely to the negotiations in a way that would be unambiguously understood by the other side. So he chose to make the formal speech.

In the same vein there is the Washington visit of the chief American negotiator at the Paris talks, Henry Cabot Lodge. His visit was not something planned—like the current Saigon visit of Secretary of State William Rogers, or the recent trip to Washington of General Creighton Abrams, the American commander in Vietnam.

On the contrary, Ambassador Lodge was ordered home only after the President had decided on the full-length speech. The reason was to heighten the importance accorded to the Paris negotiations. And, as another little bit of theatrics to the same end, it was arranged for Ambassador Lodge to brief a joint session of the National Security Council and the Cabinet on the Paris negotiations.

Behind this emphasis on the Paris talks are a multitude of considerations, some recent and others of long standing. On the recent side, there was apparently a highly encouraging comment by Le Duc Tho—the North Vietnamese politburo member and leading Hanoi representative in Paris who returned to the talks early this month after a long period of consultations at home. This comment was not made on any specific point, and its substance is being kept secret. But it is considered by some American officials to be the most positive sign the other side has ever given of serious interest in the Paris negotiations.

Another recent, though less important event was the ten-point proposal put forward by the other side on May 8. The President probably would have made his statement on Vietnam even if there had been no ten-point program. And some aspects of the Communist program—particularly the insistence that it be taken as a package with each part necessary to all the other parts—were decidedly foreboding.

But there was enough favorable content in the program to require long and intensive analysis by the President's personal staff. The analysis turned up hints that the other side might be willing to accept international supervision of peace arrangements that would accord to the present leaders of Saigon some future role in some future South Vietnam. And thus the President's statement, as originally projected, was changed to include a reference to the latest proposals by the other side.

Probably far more significant than either of these recent developments in a view held at the White House since the beginning of the Administration. American civilian and military officials in Saigon and at the Pentagon may believe that there is a good possibility for major improvement in the performance of the South Vietnamese government and army. They may think it feasible to buy time with the American public through a series of unilateral withdrawals of U.S. troops until the day comes when the Saigon regime—stiffened, maybe, by modest American contingent—can stand off the other side.

But that is not the ruling conviction at the White House. The White House has little confidence the South Vietnamese regime can be built into a sturdy barrier against the other side. It is not interested in pulling out American troops merely to fool the American public into supporting a dubious South Vietnamese buildup.

It is interested in pulling out troops in order to lower the level of fighting, to cut down the casualties and as a sign to every-

body that the war is ending. But for a settlement, the Administration is pinning its chief hopes on the Paris talks.

Whether these hopes will be fulfilled is, of course, another matter. The use of a big public speech to advance proposals has about it a show biz element that is not reassuring. Neither is it clear that the Administration will have the cohesion and discipline to hold combat actions in Vietnam to levels consistent with its diplomatic objectives.

Still, the President seems to be moving in the right direction. If there is no light at the end of the tunnel yet, there is at least a tunnel.

Mr. STEIGER of Wisconsin. Mr. Speaker, President Nixon has given the Nation an open and honest assessment of the situation in Vietnam and in Paris. He has brought all the problems, conflicts, and considerations out into the open.

As a result of the President's speech to the Nation last night, the United States is no longer bound to a rigid diplomatic formula in Paris. We will agree to neutrality if that is what is necessary. We will accept any form of government that the South Vietnamese people freely choose. We do not object to the principle of reunification of North and South Vietnam.

The President made it very clear that the United States has ruled out the further attempt to impose a military solution on the battlefield. We do not want any military bases in Vietnam. We are willing to withdraw our forces any time the Communists are ready to withdraw theirs. And we welcome the fact of a comprehensive proposal from the Vietnamese.

The President, along with every American, wants to end the war in Vietnam. He has committed all the moral authority of the Presidency to that goal. He has spelled out the position of the United States. He has more fully opened the doors to peace.

The President's honest, clear, and candid statement is refreshing after the long line of self-serving propaganda statements that have clouded the atmosphere in Paris and in Vietnam. President Nixon has put all our cards on the table. I commend the President's taking this action and will support his efforts for peace. The next move is up to North Vietnam.

Mr. ROTH. Mr. Speaker, President Nixon proved by his remarks last night that he is, indeed, a man of peace. He also made it clear to the Nation that in seeking peace he wants a durable settlement. The President—and the American people—will not be satisfied unless our troops leave Vietnam under terms that will prevent future aggression in Southeast Asia.

I was particularly pleased that Mr. Nixon outlined his eight-point peace plan immediately after Hanoi's 10-point plan was made public. All the cards are now on the round table in Paris; another major step has been taken.

As the President noted last night, the hostilities in Vietnam have been going on for years; we cannot hope to end the fighting overnight. Peace negotiations after Korea proved this, and the Paris talks have so far held true to form. Communist propaganda statements follow Communist propaganda statements, and

it takes a practiced diplomatic ear and a lot of patience to separate what is meaningful from what is meaningless. Finally, I think, we are beginning to make progress.

I earnestly hope all Americans will stand behind the President in his effort to secure a lasting peace, so the horror of Vietnam will not be repeated.

Mr. BUSH. Mr. Speaker, last night President Nixon outlined a direct and uncomplicated program to end the war. He spelled out our limited goal—self-determination for the people of South Vietnam.

I am hopeful that the North Vietnamese will accept the President's proposal so that we can disengage on an honorable basis and at the same time win for the South Vietnamese the right to determine their own form of government.

In addition to clarifying the framework for discussion in Paris, the President has been very frank with the American people. He has impressed us all with his earnest desire for peace, his intensive search for alternatives, and his desire to keep us informed about the status of the peace talks. This is what we have needed.

I think the President's speech clears the air and sets a good climate for real progress.

Mr. RUPPE. Mr. Speaker, President Nixon's statement to the people on Vietnam was a clearly outlined, specific statement of the American position, free from the morass of rhetoric that has confused and embittered large segments of the American population. Now, instead of qualified guesses as to the American position, the world knows exactly where we stand, and what our negotiating position is. It is far easier to negotiate point by point from a solid proposal, than to debate a hostile adversary from an ephemeral position.

The President has upheld the traditions of democracy by assuring the people of South Vietnam the final decision in the choice of governments for that nation is theirs and theirs alone. He has reaffirmed our position that the South Vietnamese must assume the greater share of the fighting in the war, and he has set a realistic timetable for mutual withdrawal supervised by a mutually acceptable international body. He has matched a definite peace program to the 10-point proposal offered by the other side, and said, in effect, "Let us concentrate on the points of difference."

Perhaps the strongest testament to the correctness of the President's position and the manner in which he spelled it out can be found in the accolades accorded to his speech by people of divergent viewpoints of the war. The so-called hawks and doves have hailed the President and his thoughtful proposal. This rare sign of unanimity will serve to show the Communist powers that we stand behind our President, and that we believe that his position is sound.

Mr. WHALLEY. Mr. Speaker, the President of the United States has offered, in my opinion, constructive initiatives to achieve peace in South Vietnam. Last night, the American people were told by their President—clearly and candidly—what our Government is doing to end the

war in Vietnam, what our objective is, and how it plans to handle the realities of negotiating an honorable agreement to bring peace to Southeast Asia.

Through the President's statement, the United States and Hanoi know the American goals and objectives. They know how the President hopes to move forward toward a solution of the Vietnam war that will mean not just peace tomorrow, but a peace settlement that will last. He has set forth the principles upon which a peace can be agreed.

The President said:

We seek the opportunity for the South Vietnamese people to determine their own political future without outside interference.

He declared our willingness to agree to neutrality if that is what the South Vietnamese people freely choose.

President Nixon has demonstrated his desire for peace. But, peace depends upon the other side as well. How the Communists respond will be influenced by how we respond to our President. If we support him, it could be a major factor in convincing the enemy that serious negotiations are the only solution.

If the President's proposals are to be effective, the American people must contribute patience and understanding.

Mr. MacGREGOR. Mr. Speaker, we have all heard the saying that in unity there is strength. Nowhere has this phrase been seen more to be true than in the President's address on peace in Vietnam.

It is the unity of the view expressed, the careful weaving of the old with the new, the dozens of different proposals now sorted and matched and combined into an admirably clear statement—it is all this that gives the President's statement great strength.

The address was precise; it was at once a new departure and a continuation of adherence to basic principles which has always—and will always—mark our Nation's effort for peace.

It centers on a key point: The essential issue is not what we want, or what North Vietnam wants, but what the people of South Vietnam want. This is one of those times when stating the obvious is an act close to genius. It serves to remind all concerned of the basic issue, the central concern, the heart of the matter.

Before now we have had words; but with these words we have an act, an act of political wisdom and humane judgment which will, I am sure, be seen by history as one of the great political acts of our day.

Mr. KEITH. Mr. Speaker, we all listened with great interest to the President's address on Vietnam last night.

While declining to raise false hopes or appear overly optimistic, President Nixon has, nevertheless, given the most forthright and specific statement of the American bargaining position to date. Many of the administration's proposals—acceptance of a coalition government, withdrawal of foreign troops, and supervision of the post-cease-fire elections by an international body—are reasonably close to the announced peace proposals of the other side so as to provide a sound basis for substantive discussions.

We in Congress should congratulate the President for his reasonableness in staking out this bargaining position. We should further urge him to pursue the reconciliation of his peace plan with that of the NLF with the utmost imagination and sense of compassion for the continuing suffering of the Vietnamese people.

At the same time, Mr. Speaker, we should take note, in light of the snail's pace of the negotiations thus far, that a workable peace will probably be slow in coming.

The enemy in this conflict is well versed in patience—he has been engaged in the struggle for Southeast Asia since World War II. In addition, the Vietcong are not responsive to the pressures of an electorate. He is willing to bide his time and await favorable developments.

The problem is, to a large degree, complicated by the mind and logic of the enemy. Their leaders are dedicated Communists who are not concerned with the immediate future, and are willing to endure extraordinary hardship to accomplish their objective.

In response to this, the President has rightly made clear the American determination to avoid a hasty settlement. He has outlined a framework for a lasting peace—which, as he told the American public last night, is a slow and deliberate process. President Nixon deserves the support of all Americans in his efforts to bring a workable peace to Southeast Asia.

Mr. KING. Mr. Speaker, President Nixon's Vietnam statement to the American people last evening further emphasized that his major concern is to end the war in Southeast Asia.

While reassuring the people of South Vietnam that the United States will not disgracefully pull out of Vietnam unilaterally, he did hold out promise that the time was approaching when South Vietnamese soldiers could replace American soldiers on the battlefield. The President's two-pronged plan for mutual withdrawal and free elections in Vietnam is justified and reasonable and I hope his proposal will be accepted by the North Vietnamese.

As mentioned in the President's statement, the American people are growing impatient with this war especially since American boys are losing their lives. The Paris peace talks began over a year ago and the number of American lives lost in Vietnam is now approaching 35,000.

I admire the strength and courage shown by President Nixon in exerting every effort to end this vicious drawn-out conflict. It is my sincere hope that the American people will unite behind the President and pledge their confidence and support in his attempt to find a reasonable settlement to this war.

Mr. PIRNIE. Mr. Speaker, last night the President gave to the Nation and the world the most forthright statement on our Vietnam policy that has ever come from the White House. It was an excellent presentation, one that placed the cards on the table for all to see.

There were no promises, no optimistic predictions, just plain, simple talk that was easily understood. It was the personification of credibility.

The leader of this great Nation has stressed the determination of America to achieve a just and honorable peace in Vietnam at the earliest possible date. He has emphasized our will to gain this worthy goal. He has outlined a workable plan, deserving of immediate study and a favorable response from the negotiators in Paris. He has emphasized our willingness to cooperate. We will remain sufficiently flexible on procedures but firm on principles.

Last night our President was a symbol of leadership; forthright, sincere, flexible, determined, credible, and realistic. May the leaders of the Hanoi government and all governments around the world respond in kind.

Mr. MORTON. Mr. Speaker, anyone who has ever been involved in negotiations—in labor, in business, in international affairs—knows two principles must be followed if success is to be achieved.

First, you must narrow down the areas of disagreement. Then you must open up new approaches to solutions which permit both sides to move away from frozen positions.

The President has followed these procedures in developing his peace plan. The Nixon plan strips the issue down to its bare essential—the freedom of the South Vietnamese people to choose their own form of government. That is bedrock. Furthermore, it is a position both sides can adopt as their own.

Next, the Nixon plan opens the door to a room with a dozen other doors to peace. He insists on no particular approach, although he offers a sound one. He provides some "give" in the rigid formulas of negotiation—some facesavers, some ways out of a deadlock which do not require surrender by either side.

The President's proposals offer a sound basis for negotiation. His offer represents a practical approach to the solution of the greatest problem in the world today. Here is strong evidence of a President interested in getting results—no saber rattling, begging or sloganeering, but rather pragmatic reasoning.

In my view, this is the way out of the morass in Vietnam. The President holds firmly to his principles, and offers a variety of solutions to the other side. This is the way to bring about a peace we all can honor.

Mrs. DWYER. Mr. Speaker, the American peoples—for whom peace in Vietnam must be the Nation's most immediate objective—have reason to be more hopeful about the prospects and more confident of American leadership as a result of President Nixon's address to the country last night.

While many of us had hoped for something more positive in terms of deescalating the fighting in Vietnam and providing for an initial withdrawal of some American forces, there was, nevertheless, much that was encouraging in the President's speech.

Conciliatory in tone, constructive in approach, flexible in its terms, the President's policy statement—his first comprehensive statement on Vietnam, it should be noted—will, at the very least, contribute to greater progress of the Paris negotiations. It was the kind of

speech designed to carry on the dialog and elicit further response from the other side.

What that response will be, we can only speculate. But the President has clearly moved the U.S. position forward. He has ruled out a purely military solution to the war in Vietnam. He has committed the United States to the acceptance of the results of elections in South Vietnam, so long as they are free and fair and represent the will of a majority of the South Vietnamese people. And he has agreed to consider alternative proposals from the North Vietnamese.

Of special significance to me, in view of my own often-stated position, was the President's openness to the possibility of a mutual cease-fire in Vietnam, his proposal for a mutually acceptable international team to supervise a cease-fire or the withdrawal of forces, and his specific proposal for the phased withdrawal of all outside forces within a given period of time.

The President's speech, Mr. Speaker, has brought us inevitably to what we all must earnestly hope will be the next step—an early next step—an end to, or a substantial reduction in the scale of the fighting in Vietnam. That beleaguered nation has suffered too much and we ourselves have spent too freely of our human and physical resources to permit the war to continue a single unnecessary day.

The fact that the President expressly recognized the vastness of the human suffering which this lamentable war has cost to all concerned gives me, personally, greater hope for the future than I have had in many, many months.

Mr. TAFT. Mr. Speaker, I want to commend the President for his forthright statement on the Vietnam conflict. It was a hopeful statement as well as a realistic statement. By putting the success of his administration on the line relative to peace, he has proved his sincerity.

Now, whether this peace formula, which is reasonable and logical to our Western mind, is acceptable to the North Vietnamese is another matter. Only time will tell.

However, to meet a possible rebuff from Hanoi, the President farsightedly has taken a flexible position in regard to diplomatic negotiations and he has stated his willingness to consider other approaches consistent with our principles.

Another feature of the President's speech that was pleasing to me was the inclusion of Laos and Cambodia in the area of settlement. He gives full recognition to the degree of Communist infiltration in those countries, and he acknowledges the fact that an agreement dealing solely with Vietnam would be only a piecemeal settlement in the troubled southeast peninsula of Asia.

Mr. BURKE of Florida. Mr. Speaker, I applaud President Richard M. Nixon on the forthright and earnest proposals he put forth to the American people, and to the world, last evening in his efforts to achieve a lasting peace in Vietnam. The sincerity of his efforts to bring about a peaceful settlement to end this "blood bath" is a great step toward reason.

The President's suggestion that the

South Vietnamese decide for themselves how and who should govern them without outside interference and agitation from Communist forces, or anyone else for that matter, is only fair and proper.

I agree with Mr. Nixon, that the time has long passed for any debate on the reasons why our country is involved in this war, or why the war has been fought and carried on as it has over the years. He proposes no further stalemate, but he proposes instead an orderly withdrawal of all outside military forces from Vietnam, including our own, with the understanding that the people of South Vietnam then vote on their own future.

The President's proposal therefore is a simple, honest approach toward ending the war as swiftly as possible. If the Vietcong or other outside Communist elements do not choose to honor or consider the President's offer as a solution, then the world will know once and for all that the Communists truly have as their ultimate goal the destruction of all those nations which prefer a free democratic government in the place of the heel of Communist dictatorship.

Mr. LUJAN. Mr. Speaker, the President of the United States has placed before the world a reasonable and logical approach toward peace in Vietnam. President Nixon's proposal is based on the desire of Americans to bring the Vietnam war to an end, honorably and permanently.

It is also based on our Nation's traditional policy of fairness and generosity toward our foes.

Above all, it displays a refreshing candor, a welcome frankness and a painstaking honesty on the part of the President that is truly reflective of the basic character of our people. President Nixon's eight-point proposal is clear in its meaning, mechanically workable, honorable in its intent and straightforward in its goals.

Mr. Speaker, the President has set the face of America toward peace, but he has made it clear that our armed might will remain ready to crush any rashly conceived military adventures by the enemy during negotiations.

The President has asked for the support of all Americans as our Nation embarks on this newly charted course. It is imperative that we demonstrate our support so as to prevent the enemy from misreading this proposal as a sign of national weakness.

I urge all of my colleagues to set an example for the rest of our people by rallying behind our President today, to let the world know we are one in our resolve, and to exercise patience and restraint—coupled with firm resolve—while he negotiates this proposal with the enemy.

Mr. RHODES. Mr. Speaker, the President stated well the theme of his address to the Nation when he said, "I want to end this war."

An end to the war does not mean a postponement; an end to the war does not mean a simple withdrawal of our forces from Vietnam to leave the battlefield to other adversaries. An end to the war means that the fighting, and its reason for being, will cease to exist. When

that occurs we shall see peace in Vietnam.

The President wants to end this war and has pledged himself to do so. In so doing, he has removed every conceivable roadblock to the path of peace. In his words, we have no preconditions; we have no requirements. We have only one basic principle which we will not abandon: the final decision must reflect the free choice of the people concerned—the Vietnamese. That is a principle for which we continue to stand. But that is our only interest—we seek no bases or military ties, we insist on no particular form of government or upon any particular diplomatic formula.

The President has offered to withdraw our troops immediately, provided that we have some kind of assurance that North Vietnam will do the same, whether it chooses to acknowledge that it has troops in the South or not.

The President has made a pledge of peace and has done everything in his power to bring it about. But, Mr. Speaker, the hard fact remains that he cannot do it alone.

First, he cannot do it without the North Vietnamese and the NLF. Until the enemy desires to stop the fighting, then the fighting will continue regardless of any peace proposal we may put forward.

Second, he cannot do it without the support of the American people. The President stated that if he fails to achieve peace he expects the American people to hold him accountable for that failure. I suggest, Mr. Speaker, that this responsibility and the possibility of failure rests with every American. We must stand resolved that our quest for peace will be energetic and unceasing. But we must resolve also that the principle of free self-determination, for which 35,000 Americans have given their lives, is one that we will not abandon.

I stand by our President. With the understanding that "our fighting men are not going to be worn down, our negotiators are not going to be talked down," and "our allies are not going to be let down," we will have an enduring peace in Vietnam.

Mr. ROBISON. Mr. Speaker, I should like to commend the President for his honest and forthright report to the Nation last evening concerning Vietnam.

Although, as he properly warned us, the road ahead in Vietnam—and at Paris—is still a hard and dangerous one, I believe there is substantial reason now to begin to believe that it is not as long as it was. It is important—and the President is obviously keenly aware of this—not to raise false hopes, but there is encouragement to be gained from the evident fact that both sides to this tragic conflict are now making and considering new initiatives leading to its conclusion.

When, and exactly how, that so-desired event will take place cannot yet be foretold. It was therefore necessary for the President to ask the American people to be patient yet awhile—as I believe they will be—and I would point out the importance of their also considering giving Mr. Nixon their full support in carrying out his program that, in

his words now, "can lead to a peace we can live with and a peace we can be proud of."

For it is precisely true—as the President said—that if that support is forthcoming "nothing could have a greater effect in convincing the enemy that he should negotiate in good faith."

Our Government has now made a realistic, generous, and yet still flexible offer for the appropriate settlement of this conflict. It was a clear signal—and one in which the American people can and should join. Having done that, we can then only hope that our signal is not missed or misread by the other side.

Negotiations of this sort can never be fully conducted in broad daylight. Put another way, in their sum total they are rather like an iceberg in that only a small portion of them are ever really visible. Take, for instance, this question of troop withdrawals—which Mr. Nixon now properly says should be "mutual." It is, I suspect, altogether likely that no such agreement can ever be publicly worked out so that—though it is surely desirable to attempt it—no timetable for mutual withdrawals may ever be formally announced. Still, as the President said, he is prepared—and we should support him in this—to "take some risks for peace."

It is no secret that the new administration is working as fast as it can to "de-Americanize" the war; that is, to shift back to the South Vietnamese the major responsibility for fighting what is still, essentially, their war—a responsibility I believe we should never have taken over.

By arrangement, then, with Saigon—and we are working toward this—American troops can be, and before year's end, I believe, will be withdrawn. This would have to be gradual in nature and carefully calculated, with probably supply forces being first withdrawn, and it might appear more in a decline in the rate of reinforcement than ever in the actual withdrawal of any single unit. But, however, it may be worked out, each such step down on the American side would be a further signal to the enemy to which one would hope he would respond. Again, that response might never be wholly visible for it, too, would be gradual in nature rather after the fashion by which, since the end of our bombing attacks, the actual level of violence in Vietnam has been steadily declining even though guerrilla activity has been sustained by the enemy at an unfortunately high level in order, probably, to gain such political advantage therefrom both in Saigon and here at home as was possible.

Speaking for myself, I would urge upon the administration that it expedite, as rapidly as reasonably possible, this form of deescalation of American effort, as one of those risks for peace. And this I believe should be attempted even though there are no immediate signs that progress is being made toward settlement of those difficult questions that will have to be answered before the arrangements for the actual political settlement of the war can be worked out. In this connection, inasmuch as one ob-

vious sticking point will be over whether or not there need be—to satisfy Hanoi—some form of coalition government set up in the south prior to the effort at new, internationally supervised elections, I would also urge the administration to give consideration to the recent suggestion not for a coalition government but a coalition electoral commission, in which representatives of all political groups in the south—the Saigon Government, the Buddhists, the neutralists, and the like—would participate. As this idea has been described, such a commission, in effect, would be the government for all matters concerning the anticipated elections, and such international agency as is eventually brought into the picture could either actively participate in the work of this commission or supervise it from the outside.

As the New York Times said, editorially, about this the other day:

Many months could be wasted in Paris wrangling about what sort of government will conduct the elections. But it is evident that neither side will accept government by the other or turn over full responsibility to Vietnamese or international neutrals. They will (therefore) have to join together in this task (and) an electoral commission offers the best way to bring about that coalition.

Mr. Speaker, as I said earlier, this is no time for raising false hopes—we have had far too much of that. But, at the same time, I believe there is ample reason for optimism that a corner of sorts has been turned. I am convinced the President has been moving firmly in the right direction, and he has my full support.

As one columnist has just written:

If there is no light at the end of the tunnel yet, there is at least a tunnel.

And for that, I believe, we can be grateful to President Nixon.

Mr. HOGAN. Mr. Speaker, President Nixon has demonstrated in his first major address to the American people on the war in Vietnam that his administration has considered in detail all of the alternatives for the U.S. foreign policy with regard to the war. In my opinion the President has chosen the most appropriate approach and has clearly stated his policy objectives.

I fully support the President in the stand that he has taken and I urge that all Americans give thoughtful—and prayerful—consideration to his significant proposals. President Nixon spoke for all sane Americans when he earnestly expressed our desire for peace and in the proffering of the olive branch with eminently reasonable conditions he should receive the full support of his fellow countrymen. The time for dissent is past. As the President himself has said:

We can have honest debate about whether we should have entered the war in Viet Nam. We can have honest debate about how the war has been conducted. But the urgent question today is what to do now that we are there.

It is absolutely imperative that we not frustrate the continuing efforts of the Paris peace negotiations. While we are daily discouraged by the seemingly futility of those negotiations, the President

has made it clear that a purely military solution on the battlefield is now completely ruled out. As a result, negotiation must be continued in the hopes that it will promptly lead to a cessation of the useless killing. So long as such communication is continued, a military solution will not be a valid alternative.

Hopefully, the administration has achieved a new sense of harmony between Saigon and Washington which will ultimately lead to more fruitful sessions in Paris. Finally, it must be pointed out that there are now two open, authenticated, and public statements by two parties to the negotiations which should lead to a clearer basis for new initiatives. While there are still major points of dissension between the proposals set forth by President Nixon and those of the National Liberation Front, it is important to note that there is a wide margin of agreement as well.

President Nixon has clearly indicated our desire for peace. If this desire is shared sincerely by North Vietnam and the Vietcong, peace will at long last come to this troubled country.

I urge that all Americans take this opportunity to stand behind a positive approach and allow it a chance to succeed where the negativity of dissent has failed.

Mr. DON H. CLAUSEN. Mr. Speaker, I believe I speak for millions of Americans and concerned people throughout the free world in applauding the initiative by President Nixon last evening to bring peace in Vietnam.

In so doing, the President has outlined a bold, positive, and specific approach on which the United States proposes the mutual withdrawal of all non-South Vietnamese forces, a supervised ceasefire, and self-determination for the people of Vietnam without outside intimidation, domination, or aggression.

One of the most significant aspects of the President's speech, in my judgment, was that, while we are willing to discuss a political settlement, our first thought and consideration must go toward stopping the killing on both sides. To this end, our President has said that this country will accept a settlement whether formally negotiated or merely mutually agreed to.

Now, just what is the significance of the President's proposal?

First, I think it presents a formidable challenge to the negotiators in Paris to get "off dead center" and deal with specifics—something that has been sadly lacking up to this point. Second, it constitutes a viable position on which to bargain from. And third, it represents a basis for determining the sincerity of North Vietnam and the National Liberation front as to their desire for peace and their willingness to accept at least some concrete proposals from our side regarding a settlement.

As one who, for several years, has advanced the "phase-in/phase-out concept" for resolving our country's overinvolvement in Vietnam, I have observed the remarkable progress made by this administration to encourage the Saigon government to assume a greater share of the overall security and combat re-

sponsibilities that, for too long, have been largely assumed by the United States.

I am extremely pleased at the forward progress which has been made to strengthen and update South Vietnam's military forces. Issuance of and training in the most modern weapons for their combat units is nearing completion, previously nonexistent artillery units are now an integral part of the South Vietnamese army, more and better naval vessels have been turned over to their navy, and their air force has been upgraded and enlarged. In addition, leadership, morale, and esprit de corps have been greatly enhanced in South Vietnam's overall security forces.

In his address to the Nation last night, President Nixon said that we were rapidly approaching the time when South Vietnam will be in a position to shoulder their fair share of the combat and security responsibilities. This, in my judgment, will provide additional alternatives for the President to consider in the near future.

In essence, then, I believe the President's proposal last night may well indicate where we go from here and whether or not the Communists are negotiating in good faith or merely stalling for time in order to gain a tactical advantage.

What is really important, in my judgment, is not how Hanoi responds to our President's proposal, but how the American people respond. Up to now, Hanoi's negotiators in Paris have had the unique advantage of believing and even negotiating on the basis that many Americans supported or at least sympathized with their position.

Hanoi can and undoubtedly will forthrightly reject President Nixon's positive and forward-looking proposal as part of their "wait and see attitude." They are waiting to see what the American reaction and world opinion will be to President Nixon's offer and, thus, we as a Nation, are about to be tested.

Our President has asked each of us to unite behind what I sincerely believe is a just and generous proposal to end the war in Vietnam. He has, in so doing, admitted that his own political future is "on the line." Therefore, at this critical juncture in our Nation's history, I submit that the time has come to lay aside the fixed, polarized positions of the past and to consider the President's proposal carefully.

If this President, or any President, is going to stop the fighting in Vietnam and restore peace in Southeast Asia, then we, as Americans, must get behind our President and let the entire world know in no uncertain terms that we share and support his desire to unite this country behind that common goal.

GENERAL LEAVE TO EXTEND

Mr. GERALD R. FORD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in the Record on the President's speech, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

A RESOLUTION CALLING ON THE PRESIDENT TO CALL FOR AN IMMEDIATE CEASE-FIRE AND THE FORTHWITH WITHDRAWAL OF 100,000 U.S. TROOPS FROM VIETNAM

(Mr. KOCH asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include a resolution.)

Mr. KOCH. Mr. Speaker, I must disagree with my colleagues who have risen to praise the President's statement on the war in Vietnam.

Mr. Speaker, I listened very attentively last night to the President's proposals on Vietnam. In fairness, one must say that there was some slight difference between those made last year by President Johnson and those made last night by President Nixon. But the best that could be said in praise of the new proposals is that they are too little and too late. What we needed to hear from the President was not a call for a mutually staged withdrawal over the next 12 months which has been the subject of unsuccessful negotiations for the last 13 months at a cost in American lives since March 31, 1968, of 13,754 men. Rather we should have heard a clarion call from President Nixon for an immediate cease-fire to save the lives of the young men of this country who are dying daily on the battlefield, as well as the lives of those other young men, loved by their families on both sides of the war, the parents and wives of whom weep daily, especially those who receive the all too frequent notices of death.

Recognizing all that has gone on, surely at this point the President could and should direct the immediate unconditional withdrawal of at least 100,000 of the more than 500,000 of our American troops now in Vietnam. If the South Vietnamese are not willing to fill the gap with their own men then they are not worthy of our continuing support.

In the last political campaign to win the Presidency, Richard Nixon told us that he had a plan to end the war. If such a plan really existed, it is still the best kept secret of the century.

The killing in Vietnam must stop, and rhetoric alone will not bring the war to an end.

I am introducing today a resolution calling upon the President to forthwith propose an immediate ceasefire and to commence the withdrawal of 100,000 American troops without prior condition. I hope that my colleagues will join in this resolution with me. It follows:

H. CON. RES. 256

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the President should call for an immediate cease-fire and should direct an immediate unconditional withdrawal of one-hundred-thousand United States troops from Vietnam.

RESOLUTION COMMENDING SECRETARY STANS

(Mr. DORN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DORN. Mr. Speaker, today I am

introducing a House resolution commending Secretary Maurice Stans for his mission to Europe and now to Japan and the Far East.

Our distinguished and able Secretary of Commerce realizes the danger of our unfavorable trade balance with Japan and is taking positive action before it is too late. The Secretary is undergoing a gruelling schedule, long hours and painstaking efforts to promote fair and truly reciprocal trade with our friends in Europe and Asia. Mr. Stans' efforts are encouraging to our vital textile industry and its more than 2 million employees.

Mr. Stans is giving special attention to the deteriorating textile situation. The United States has not had a favorable textile trade balance since 1957—12 years ago. While textile exports since 1957 have increased by about \$170 million, from \$525 million to \$694 million, imports have soared from \$562 million to \$1.8 billion. This left us with a textile trade deficit in 1968 of \$1.1 billion and the gap grows wider every year. Textile imports reached a record monthly level of 362 million equivalent square yards in March. The March level was 45 percent higher than March 1968. A particularly large increase occurred in manmade fiber textile imports, which were 71 percent higher than in March of last year and the first quarter total was 24 percent higher than the 1968 first quarter total.

Mr. Stans' great efforts to promote orderly trade in textiles is the first major effort at the administration level to promote a fair solution to this problem since President John F. Kennedy's famous seven-point program. I wish Mr. Stans every success in promoting orderly fair trade, mutually advantageous to all concerned, and in that effort he will have the support of the Congress and the American people.

CREATION OF A FEDERAL HIGHER EDUCATION MEDIATION BOARD

(Mr. WOLFF asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WOLFF. Mr. Speaker, the Federal Government cannot sit passively as our campuses continue to erupt in violent outbreaks of rebellion. We must act to control this damaging trend in which violence has taken the place of reasoned discussion.

To accomplish this end I have proposed to the President the creation of a Federal Higher Education Mediation Board. This Board would be composed of students, parents, educators, Government officials, and outstanding Americans from private life.

The Board could mediate disputes at institutions of higher learning when called into such disputes by either the students, administration, or faculty at any institution faced with possibility of violence.

I sincerely believe that such mediation efforts, that have proven their worth time and again in labor-management disputes, could resolve many disagreements with the potential for violence.

With the situation on the campuses having deteriorated so very much this

certainly seems like a minimum effort the Federal Government might make to improve the situation.

RIGHT OF 18-YEAR-OLDS TO VOTE IN NEW JERSEY—NOVEMBER REFERENDUM

(Mr. HOWARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOWARD. Mr. Speaker, a few moments ago the New Jersey State Assembly, acting in Trenton, passed a concurrent resolution which will provide this November for a referendum by the voters of the State of New Jersey to provide 18-, 19-, and 20-year-olds of the State of New Jersey the right to vote in future elections.

Mr. Speaker, it was our great Governor Richard J. Hughes who, in 1967, led the way to have this 18-year-old vote proposal included in the platform of the Democratic Party in the election of that year.

The State Senate of New Jersey, has already passed this resolution by a vote of 30 to 0. The State Assembly in New Jersey passed it today.

Mr. Speaker, I want to say I am proud of our legislature in my State of New Jersey and I am very proud of our Democratic Governor.

I think this is a great step forward which will show that the people of New Jersey are progressive and are fair-minded people. I am sure that we will be able to be proud of the people of New Jersey for the action they will take in supporting this referendum next November.

The SPEAKER. The time of the gentleman has expired.

VIETNAM

(Mr. RYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYAN. Mr. Speaker, last night the President of the United States spoke of a mutual withdrawal of troops from Vietnam staged over a 12-month period.

Mr. Speaker, if we are really serious about bringing this tragic war to an end, our action should not depend upon the action of North Vietnam. Rather we should immediately begin a withdrawal of at least 100,000 troops.

The longer this war continues, the more American and Vietnamese fighting men will lose their lives, and the greater the destruction and suffering of the civilian population in Vietnam will be.

While the Paris peace negotiations have dragged on over the course of the past year, over 10,000 American servicemen have been killed. The Vietnam war is the third costliest in our history, surpassed only by the two World Wars and the Civil War, in death and destruction. How many more American men will be killed during the 12 months the President believes will be required to achieve a mutual troop withdrawal? Whatever the number is, it will be far too many.

On March 26 on the floor of the House I outlined a three-point program for ending the war, which included the immediate withdrawal of 100,000 U.S. troops. This would persuade North Vietnam that the United States really intends to remove its troops from Vietnam and thereby provide a basis for a breakthrough at the Paris talks.

In his speech last night, President Nixon asked the Nation to support "a program which can lead to a peace we can live with and a peace we can be proud of." But this Nation should not be asked to support a program which contemplates the unnecessary continuation of the war for another 12 months and which, moreover, perpetuates the idea that our continued military presence in South Vietnam is either necessary or warranted. President Nixon spoke of the responsibility to see that our fighting men will not have died in vain. I think the first responsibility should be to see that no more die in vain.

The administration's request for supplemental appropriations in support of the war in Vietnam will be before the House next week. Congress should refuse to vote any additional funds for the prosecution of the war and make it clear to the President that the conflict in Vietnam must be ended now—not 12 months from now. For every day that the war is allowed to continue, more American and Vietnamese will be made to pay for a mistaken policy with their lives.

VIETNAM WAR

(Mr. WHALEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WHALEN. Mr. Speaker, President Nixon addressed the Nation last night on the subject of the Vietnam war.

In his remarks, the President kept faith with the American people in demonstrating his profound commitment to achieve peace in Southeast Asia. The resolution of that conflict is the first order of business for the new administration. The war, as Mr. Nixon made quite clear, is the greatest problem facing this country today.

As the President suggested, we cannot expend our energies in fruitless discussion of why we are in Vietnam and what has happened in the past. The fact is that we are there, that 35,000 Americans already have lost their lives, and that a negotiated settlement is the only answer.

The President faces a most difficult task in bringing the hostilities to a close. His proposal for a mutual and simultaneous withdrawal of forces from South Vietnam is a means of achieving that goal.

I am sure, Mr. Speaker, that every Member of the House, regardless of party, hopes that this will be the initiative that will break the dike.

I would like to say also, Mr. Speaker, that the President is to be commended for his frankness in bringing this most serious issue directly before the public after less than 4 months in office. His action reflects an understanding of the

mandate of the people, as expressed in November, to terminate the war and to take the public into his confidence.

FOR A NEW MOMENTUM

(Mr. ADAIR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADAIR. Mr. Speaker, the President has cleared the air of the propaganda smog and self-serving statements that have bogged down the Paris peace talks.

Acting at the moment that only he could know was propitious, he has laid out clearly what the U.S. Government is doing to end the war; what our basic objective is; and a plan that comes to grips with the realities of the negotiation.

This was not a speech to stand on; it was a speech to move on.

It calls to mind Woodrow Wilson's great principle, "Open covenants, openly arrived at." Of course, there will be confidential discussions to make real progress on details—but the great principles are there in the open to be considered in the court of world opinion.

It was Wilson, too, who formulated the great principle of the self-determination of nations. That is what the negotiations in Paris are all about.

The President has added an element of urgency and frankness to the negotiations that could well be historic. He has made it clear that time is on nobody's side. He has opened up a wide variety of approaches that serious negotiators can find fruitful.

In my opinion, this will go down in history as one of the great efforts at peacemaking by a world leader. If it is met in the spirit in which it was offered, a new momentum will be on the side of peace in Vietnam.

PRESIDENT NIXON TO HO CHI MINH: "YOUR MOVE"

(Mr. BRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRAY. Mr. Speaker, President Nixon's report to the Nation last night has left the next move up to Hanoi and to Ho Chi Minh. The President gave the American people no false hopes, no magic formulas, no over-optimistic predictions, like we have had in the past and seen dissolve before our eyes. He told it like it is.

Speaking as Chief Executive, he told the world the American position. Speaking like a man, he told his fellow citizens, the American people, that the responsibility and accountability was his.

The President will no doubt be attacked and criticized, both at home and abroad, for not yielding further to the Communists. Such a course would only mean in the end shame and surrender for the United States, and slavery and slaughter for South Vietnam.

Perhaps the "peace at any price" crowd prefers this, but I am sure the American people do not. And neither does their President.

PRESIDENT NIXON'S REPORT ON HIS INITIATIVES FOR PEACE IN VIETNAM

(Mr. HARSHA asked and was given permission to address the House for 1 minute.)

Mr. HARSHA. Mr. Speaker, President Nixon's report on his initiatives for peace in Vietnam was heartening to the American people.

It was clear, candid, concise, and conciliatory; it was reasoned, reasonable, and realistic; it was intelligent and intelligible.

It emphasized his desire, his readiness, "to withdraw our forces" from South Vietnam, asking "only that North Vietnam withdraw its forces from South Vietnam, Cambodia, and Laos, into North Vietnam."

It left no doubt that the only factor Mr. Nixon considered nonnegotiable was the right of self-determination of the people of South Vietnam.

Mr. Nixon spoke with no emotion but the emotion of sincerity; he spoke with no argument but the argument for "true and lasting peace."

It was a speech befitting a great President of a great Nation. Mr. Nixon's initiatives should indeed pave the way for a purposeful solution to Vietnam.

PRESIDENT SETS FORTH BLUEPRINT FOR PEACE

(Mr. BERRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BERRY. Mr. Speaker, the radio and television address of President Nixon last night was, in my judgment, one of the great speeches in American history. He made clear to the world his determination to end the war in Vietnam with honor, and he set forth a blueprint for peace.

Some of the quotes I am sure will live as threads woven into the Vietnam fabric, such as, "a great nation must be worthy of trust."

Again, referring to the sacrifices that have been made in Vietnam, he said:

It is our responsibility to see that they will not have fought in vain.

The President was precise in stating the principles and policies of this Nation. It would seem to me that his statement should put an end once and for all to the constant carping of a few people in high places who, by their utterances, are giving the enemy the impression of what the President referred to as a "collapse of American will."

We applaud the President for his continued forceful, compassionate, realistic, sound leadership, and join in supporting his pledge for peace.

PRESIDENT NIXON'S PROPOSAL FOR PEACE IS COMPREHENSIVE, FLEXIBLE, AND HUMANITARIAN

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYLIE. Mr. Speaker, President

Nixon's proposal for peace in Vietnam was most reassuring. It was comprehensive, flexible, and humanitarian. It was a levelheaded statement calmly presented which has characterized every action of our President. This is not the time for precipitous, hip-shooting decisions.

There is no way the President's statement could be interpreted as a call for the escalation of the war. Rather, it displayed a conscientious desire to escalate the peace. Yet, the President's statement could in no way be construed as suggesting defeat. The essentiality of prearrangement or agreement before withdrawal was made clear.

President Nixon has taken a position which all Americans intent on an honorable end to the war in Vietnam can rally round.

PRESIDENT COMMENDED FOR EFFORTS TO END TRAGIC CONFLICT IN VIETNAM

(Mr. CARTER asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. CARTER. Mr. Speaker, as one of the first men to speak out on the floor of this House that the war in Vietnam was the most ghastly and costly military mistake in the history of the United States, I wish to commend the President of the United States on the efforts he is making to end this tragic conflict.

If one listened to the speech of the President and its tone, he must have been persuaded that the President is doing all in his power to bring the war to such a conclusion that the people of that area will be able to choose the type of government which they want, with no direction from the United States as to what type this may be.

It is my fervent hope that this country shall in the future adhere to the advice given by Lincoln when he said:

Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it.

Basing our actions on this premise, our country will be involved in no future wars in Southeast Asia, and our young men will be permitted to follow peaceful pursuits and their lives flow as peacefully as the streams by which, as youths, they once sported.

THE PRESIDENT'S APPROACH TOWARD PEACE IN VIETNAM

(Mr. LUJAN asked and was given permission to address the House for 1 minute.)

Mr. LUJAN. Mr. Speaker, the President of the United States has placed before the world a reasonable and logical approach toward peace in Vietnam. President Nixon's proposal is based on the desire of Americans to bring the Vietnam war to an end, honorably and permanently.

It is also based on our Nation's traditional policy of fairness and generosity toward our foes.

Above all, it displays a refreshing candor, a welcome frankness, and a

painstaking honesty on the part of the President that is truly reflective of the basic character of our people. President Nixon's eight-point proposal is clear in its meaning, mechanically workable, honorable in its intent, and straightforward in its goals.

Mr. Speaker, the President has set the face of America toward peace, but he has made it clear that our armed might will remain ready to crush any rashly conceived military adventures by the enemy during negotiations.

The President has asked for the support of all Americans as our Nation embarks on this newly charted course. It is imperative that we demonstrate our support so as to prevent the enemy from misreading this proposal as a sign of national weakness.

I urge all of my colleagues to set an example for the rest of our people by rallying behind our President today, to let the world know we are one in our resolve, and to exercise patience and restraint—coupled with firm resolve—while he negotiates this proposal with the enemy.

PRESIDENT NIXON'S SPEECH ON VIETNAM

(Mr. RUTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUTH. Mr. Speaker, last night our President came before the American people and the world to state the purposes of the United States in South Vietnam. After hearing his speech all Americans should have a better understanding of why we are there. He went beyond a presentation of a clear and informative picture of the Vietnam war. He made new, important, and substantive initiatives for ending the war. The steps are in the right direction and should have the effect of uniting our people to see us through more hard bargaining to an honorable settlement. Mr. Nixon's statement made clear the difficulties in solving this conflict. But his proposals were flexible enough to provide wide areas of compromise without surrender of basic principles. The speech offered a timetable for withdrawal of forces and means for establishing peace. But most of all it offered new hope that this administration is determined to end this war and turn America's energies to the problems of America and the challenges of peace.

PRESIDENT NIXON'S SPEECH ON VIETNAM

(Mr. MAYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAYNE. Mr. Speaker, President Nixon's forthright proposal of last night for mutual withdrawal of forces from South Vietnam will be welcomed by all who sincerely seek an end to the Vietnam war and a durable peace. The President has made it clear to the world that we are willing to meet the enemy more than halfway and have substantially changed

our position in a sincere effort to get the peace negotiations moving. For example, the President said we will no longer insist on the United States discussing only a military settlement, but are now willing to participate in the negotiation of a political settlement if this is the desire of both the South and North Vietnamese.

With these proposals our President has clearly seized the initiative for peace for our country. He is entitled to the continued support of all American citizens and of our allies in the free world as he continues to lead us toward peace with honor.

SPEECH OF PRESIDENT NIXON ON THE VIETNAM WAR

(Mr. KLEPPE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. KLEPPE. Mr. Speaker, President Nixon last night clearly indicated his willingness to walk the extra mile toward an honorable peace in Vietnam. If the Communists also want to bring this agonizing conflict to a conclusion, the President has pointed the way. He told it like it is. His assessment of the situation and his statement of the position of the United States put this struggle in perspective. The time for serious negotiation by North Vietnam has come. The time for further impossible demands, threats and recriminations by the Communists has passed. The President recalled his campaign pledge to end this war. He added:

The fact that there is no easy way to end the war does not mean that we have no choice but to let the war drag on with no end in sight.

I view this not as a threat but as a clear statement of fact. The leaders of North Vietnam and their allies would do well to ponder it.

BILL TO PROTECT ENDANGERED SPECIES

(Mr. HOGAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HOGAN. Mr. Speaker, my distinguished colleague in the Maryland delegation, the Honorable EDWARD A. GARMATZ, has introduced an excellent bill, H.R. 8327, to preserve from extinction selected species of native fish and wildlife indigenous to our beautiful State of Maryland. To indicate my support for this effort, I am introducing today a bill identical to that of Mr. GARMATZ.

In these times of man's increasing encroachment upon nature, it is certainly right to set aside waters and lands in order to preserve them in their natural form for those who come after us and to save the creatures from wanton destruction and eventual extinction.

Not only because of the scientific and the naturalistic benefit, but because of our responsibility to the generations of Americans, of today and of tomorrow, who have every right to enjoy nature's endowments in their pristine form, it is our responsibility to see that these species are preserved.

The natural beauties of Maryland are well known and appreciated, not only by its residents, but by visitors as well, if such beauty is marred, or destroyed, the State will have lost one of its most important and irreplaceable assets.

Therefore, I hope my colleagues will recognize the merits in the endangered species preservation bill and support it.

AMERICAN UNITY TOWARD INVOLVEMENT IN VIETNAM

(Mr. DUNCAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. DUNCAN. Mr. Speaker, I join in urging the American people toward greater unity in our involvement in Vietnam. Last night we heard one of the most sincere, one of the most objective, a most truthful and realistic statement put to us by an American President.

President Nixon expressed hope for peace, but at no time did he indicate that the United States of America would weaken to the threats and harassments of communism. As he described it, his offer for settling the war is "generous," yet he had not only considered the present but the future of the people of South Vietnam.

The entire world wants peace, even the Communists. However, the kind of peace they seek is one in which they control the entire world. The United States seeks a peace that offers freedom and independence for each nation—freedom for the South Vietnamese to run their own country.

President Nixon delivered one of the best speeches I have heard. He was thoughtful, concerned, and sincere, and he was very specific in describing our commitment, in detailing our proposals for settlement, and in warning that additional casualties and suffering "will affect other decisions." In other words, his message to his country and to the world was that we are willing to end the war on reasonable terms, but we will not give in to a Communist takeover of South Vietnam to attain peace.

A country united behind our President is the contribution we Americans can make toward peace. I say let us pray for peace and let us back our Nation's effort in settling this terrible conflict.

PRESIDENT NIXON'S ADDRESS ON VIETNAM

(Mr. HUNT asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. HUNT. Mr. Speaker, I commend the President for his frank and candid message to the American people last evening on Vietnam. It has been a long time since a Chief Executive has been so forthright on this sensitive and controversial issue, perhaps made the more so because the American people in the past have had to piece together bits of information and were left to their own resources to come up with their own interpretation as to what the official position of the United States was with respect to our commitment in South Vietnam.

President Nixon last night clearly and unequivocally stated our essential objective:

We seek the opportunity for the South Vietnamese people to determine their own political future without outside interference.

A purely military solution has been ruled out, as has a unilateral withdrawal of U.S. and allied forces. The United States is willing, with the concurrence of the Government of South Vietnam, to accept virtually any settlement so long as the political future of South Vietnam is determined by the free choice of her own people. Significantly, a rigid diplomatic formula or treaty is not a precondition to a settlement nor an essential objective, providing that a clear understanding can be achieved with adequate assurances that any settlement will be observed.

For the first time, a definite timetable has been laid out for the withdrawal of a major portion of all non-South Vietnamese forces to be supervised by a mutually acceptable international supervisory body.

The position stated by the President and the explicit proposals set forth are realistic; I believe they are achievable, given a sincere desire on the part of all interested parties to seek a settlement in good faith based on the paramount recognition that "What is important is what the people of South Vietnam want for South Vietnam."

There should be no misunderstanding on the part of the adversaries as to the intent and resolve of the United States in her commitment to the people and Government of South Vietnam. There is an implicit warning in the President's message, although not emphasized in a manner that would deter from its spirit:

I must also make clear, in all candor, that if the needless suffering continues, this will affect other decisions.

In conclusion, Mr. Speaker, there was an appeal, an appeal which should be of the utmost concern to all of us here and to the people of this great Nation, whatever one's convictions. These words should be repeated at every opportunity and remembered:

Nothing could have a greater effect in convincing the enemy that he should negotiate in good faith than to see the American people united behind a generous and reasonable peace offer.

SPEECH OF PRESIDENT NIXON ON THE VIETNAM WAR

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERWINSKI. Mr. Speaker, I appreciate the fact that so many Members in a very spontaneous fashion are addressing the House commenting on the President's address of last night.

However, I would like to point out, since this is a practical world, there is one item which I believe the President underplayed yesterday. This is the fact that we are not going to have permanent peace and freedom in the world until the Communists stop their aggression. We ought to keep in mind that the people of South Vietnam are the victims of delib-

erate Communist aggression against their country. We are not the aggressors there, regardless of the Communist propaganda that may be directed at world opinion. We are not going to have peace in southeast Asia, in Africa, the Middle East, or Latin America until the Communists renounce their drive for world conquest. It is wishful thinking to believe that one noble statement by the President of the United States is going to change the evil intentions of the world's Communist leaders. I certainly hope that we will not be lulled into a false sense of security or hope by the President's great address. As practical and as sound as it was, the real menace to world peace remains the diabolical plans of the tyrants in the Kremlin and Peking. Until they understand that aggression does not pay, the freedom of the world remains in jeopardy.

Furthermore, Mr. Speaker, it is clear that the important thing concerning President Nixon's report on Vietnam is not just what he said but how his words are understood and interpreted at home and abroad.

President Nixon's speech was thoughtful and sober and it revealed necessary flexibility of attitude by the proper reaffirmation of American policy points.

By emphasizing that the North Vietnamese aggressors are asked to withdraw their forces from Cambodia and Laos as well as South Vietnam the President underscores the fact that a solution must be permanent and produce true peace.

He clearly emphasized that the great sacrifices made by American fighting men must be productive of an honest agreement that will have protected the sovereignty of South Vietnam in conformance with our pursuit of international peace and freedom for all people.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mrs. MAY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MAY. Mr. Speaker, recently I returned from a tour of Vietnam. Many of my colleagues have seen military service and know all too well the harsh outlines of the battlefield. But, this was my first confrontation with the grim reality of a world in war. In that week in Vietnam, I saw the war through the eyes of our military leaders. I saw it through the eyes of the people of South Vietnam. I saw it through the eyes of our boys in uniform fighting in farflung outposts in the jungle. More poignantly, I saw it through the eyes of my own son—a son who has been in Vietnam for the longest and most agonizing 9 months of my life. And, I assume, the longest and most agonizing 9 months of his young life.

In the 3 weeks since my return, I have been desperately searching for the words to create for my fellow Americans the real and graphic picture of what I saw and learned. Last night, President Nixon said those words for me. He told it how it is. With stark candor he told us where we had been, where we were and where we might be able to go.

Mr. Speaker, I can certainly fully understand and respect the motives of those who, in tragic heartbreak over the horrors of war, point in desperation to frantic alternatives. But, I cannot understand those who recommend these alternatives when they have full knowledge that to take these courses would be at the unthinkable cost of the lives of millions of young men yet uninvolved in war as well as those yet unborn.

To the people of America I would say this—your President gave you clear and inescapable truth last night. When you accept that, you must accept that he also presented to the world what the realities of Vietnam dictate can be the only realistic, viable and humane plan to bring about a settlement of this terrible conflict.

The President also said very candidly that we in this Nation could argue the issues of how we got in Vietnam and how we have conducted ourselves since becoming involved. And, of course, we can agree with this. But, to what purpose at this time in our history? To my son, and hundreds and thousands of our young men serving with him, Vietnam is not debatable. They are there because their Nation is pledged and committed. They are there showing some of the most incredible heroism and bravery of any young generation of any war in our Nation's history. And there they must stay until our Nation's leadership, which bears the awesome responsibility of ultimate decision, determines, with all the facts at their command that they can come home.

It is desperately important that we in America fully accept our committal to giving this world leadership toward peace. It is desperately important that we in America recognize our responsibility of protection to generations of people yet unborn. But, above all, the immediate urgency is that every one of our 500,000 men fighting in Vietnam know that we in America are giving them complete and unquestioning support. In his message last night President Nixon spelled out clearly what that support and loyalty required of us—fortitude, patience, understanding and citizenship dedication. It is my hope, my prayer and my belief that our country will give the President and the men in Vietnam all of that.

THE PRESIDENT'S STATEMENT OF LAST EVENING

(Mr. FINDLEY asked and was given permission to address the House for 1 minute.)

Mr. FINDLEY. Mr. Speaker, all Americans, including those like myself who consider our involvement in Vietnam a colossal mistake, should be heartened by the President's statement last evening. The circumstances of his speech, as well as its substance, give new hope to an early termination of our combat operations in Southeast Asia. The formula for withdrawal of our forces was expressed in conciliatory terms. To quote the President, it is not "offered on a take-it-or-leave-it basis." The door plainly was left open for further modifications.

Perhaps what is most important is the

fact that the White House gave so much advance billing to the President's remarks. This may indicate that the President has received some advance indication from the North Vietnamese that meaningful steps can now be taken to deescalate the war. With the hope that this is the case, I commend the President for his honest and forthright statement.

THE AMERICAN PEOPLE ARE ENTITLED TO KNOW ALL OF THE RELEVANT FACTS LEADING TO JUSTICE FORTAS' RESIGNATION

(Mr. MACGREGOR asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extemporaneous material.)

Mr. MACGREGOR. Mr. Speaker, notwithstanding Mr. Justice Fortas' resignation, the American people are entitled to know all of the relevant facts leading to his decision to resign. These facts should be set forth in a proper forum. That forum now need not necessarily be the House Committee on the Judiciary. It could be the American Bar Association or the Judicial Conference of the United States. I would hope that Chief Justice Warren—if he has not already done so—would see fit to release the pertinent portions of Justice Fortas' latest letter of explanation about the Wolfson Family Foundation fee matter. The larger problem of existing ethical standards and morality in high positions in Government has not been solved by the Fortas resignation.

More important than the Fortas case is popular confidence in the quality of governmental service, and in the integrity of high officials. Washington cannot function in the future under the standards of the past.

I have today introduced these two bills:

First. Making it a Federal criminal offense for anyone to pay or to offer, and for any Federal judge, Member of Congress, or policymaking official in the executive branch to receive any sum greater than \$500 for a speech, published work, professional service, personal appearance, or otherwise by way of honorarium.

Second. Requiring the quarterly disclosure to the Comptroller General for printing by the U.S. Government of the source and amount of all income received by Federal judges, Members of Congress, or policymaking officials in the executive branch.

WHY THESE TWO BILLS?

First. The bills are designed to solve the ethical problem arising from questionably large fees or honorariums for actual or implied services paid or offered to officials serving the people from high posts in the U.S. Government.

Second. It is also my intent to eliminate secrecy in conflict-of-interest matters by insuring a prompt and full public disclosure of any and all outside income received by any top governmental official.

Third. With the new salary schedule for Members of Congress, Federal judges,

and top level executive branch officials, the necessity for outside income no longer exists.

Fourth. The American public rightfully expects that the obligations of Government service will occupy the entire working time of key officials.

Fifth. These bills are designed to remove the suspicion that anyone is receiving a monetary consideration for extending preferred or favored treatment—either through means of a vote in Congress, a judicial decision or an executive action.

PRESIDENT NIXON'S REPORT ON THE WAR IN VIETNAM

(Mr. MARTIN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. MARTIN. Mr. Speaker, President Nixon's report to the Nation last evening on prospects for peace in Vietnam was one of the most logical, straightforward, and realistic approaches to the problem which the American people have heard.

The President set forth our Government's position in clear, concise terms, which could be easily understood by all Americans, as well as the North Vietnamese. He presented our Government's position in a forthright manner which would provide for a fair and equitable settlement of the conflict. He was neither conciliatory nor arbitrary. He was firm in his position in regard to the recent increased attacks by the Vietcong.

Many American people are heartsick over this war, but they also want a fair and just settlement of this conflict, and are not quitters. President Nixon's speech, I am sure, hit the right chord with our 200 million people. He is to be commended for his explicit and fair proposals which he so ably enunciated last night.

PRESIDENT NIXON'S REPORT ON THE WAR IN VIETNAM

(Mr. MILLER of Ohio asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, I rise today to commend President Nixon on his address to the Nation outlining his new initiatives to bring honorable and lasting peace to Vietnam. It was a forceful and well-reasoned expression of this Nation's resolve to end the war while guaranteeing true self-determination for the South Vietnamese people.

During the campaign Mr. Nixon promised a plan to end the Vietnam conflict, and many Americans supported him because of that promise. Last night he stated clearly that ending the war is the paramount goal of his administration. However, he cautioned against a quick or expedient settlement that some people have been advocating. We cannot tolerate a truce that would endanger the free world security posture in the Pacific region.

The President deserves the encouragement of this body and the support of every American citizen in his quest for lasting world peace.

PRESIDENT NIXON'S REPORT ON THE WAR IN VIETNAM

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WILLIAMS. Mr. Speaker, I want to commend President Nixon for his most complete and accurate appraisal of the war in Vietnam during his report to the people last night.

Just as the President stated, we are all concerned about this war, and we must terminate this war in a manner that will assure peace in Southeast Asia, and in the world, for years to come.

Of course, we could just pull our troops out of South Vietnam, as some people have suggested, and leave the people of South Vietnam to the mercy of the North Vietnamese and their Communist allies. This would give us a temporary peace. However, this action would only encourage the Communists to start another Vietnam elsewhere in a short time.

Such a unilateral troop withdrawal would encourage Communist countries in further expansion and in their stated aim of world domination.

The President made it clear that we are ready to negotiate, and anyone familiar with our history knows that we are always ready to negotiate and negotiate in good faith. The proposal made by the President that a mutual troop withdrawal from South Vietnam be accomplished is an excellent proposal and should be accepted by North Vietnam and their Communist allies at once.

The President also made it clear that any maneuver on the part of North Vietnam, such as escalating the war in South Vietnam while talking peace, will not be successful. I join with my colleagues in hoping that the North Vietnamese will realize this and will start to negotiate for peace in good faith.

PRESIDENT NIXON: SPEECH ON VIETNAM

(Mr. STAFFORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. STAFFORD. Mr. Speaker, President Nixon has, in my estimation, made a concise, relatively straightforward proposal for a political rather than military settlement of the Vietnam war, and I join in lauding his efforts to this end.

This political settlement must, of necessity, be accompanied by mutual military withdrawal, but it is clearly evident at this stage of the prolonged conflict in Vietnam that a political settlement is the only way to gain a meaningful and lasting end to this unfortunate war.

I am still personally hopeful that conditions will permit at least a partial withdrawal of American troops from Vietnam while negotiations for this political settlement are being pursued. I have confidence that President Nixon, as he stated, will continue to take every step possible to end the war.

PRESIDENT NIXON'S SPEECH ON VIETNAM

(Mr. RIEGLE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. RIEGLE. Mr. Speaker, President Nixon's thoughtful Vietnam statement came at an important time for the Nation. It is essential that our people have a precise understanding of American Vietnam policy and peace plans, particularly given the long and dismal history of the war. His candor was refreshing.

While I support the President in his determined quest for a negotiated settlement, I believe we must be fully prepared to implement new policies should the enemy continue intransigent at the negotiating table. I am convinced that such contingency plans are being developed and set in motion. This is sound and proper.

Let us be absolutely clear on one key point, however. Despite familiar phrases about "meeting commitments," "allies not being let down," and the concern about American withdrawal by the leaders of non-Communist Asia—all of whom are substantially undercommitted in Vietnam in my view—the blunt truth is that the United States is today strategically overcommitted in South Vietnam. We are spending too much American blood and money in Vietnam—and this excessive Americanization is counterproductive both in Vietnam and here at home. This fact burns through all other considerations concerning this problem. Deamericanization must get underway very soon.

As I interpret his remarks, by no means should the President's speech be construed to mean that we are reducing the pressure on the South Vietnamese to reassume full combat responsibility and press forward with long overdue economic and social reforms. Ultimately, the South Vietnamese must fend for themselves and the Government of South Vietnam must move with new urgency now to earn a much broader measure of political support from the Vietnamese people. I urge the South Vietnamese to redouble their efforts at this crucial hour.

While I deeply hold the above beliefs, I recognize that our Chief Executive must try to move this program to solution according to his perceptions and information. As I have personal faith in the President, I join with him in seeking a negotiated agreement for scaling down this U.S. overcommitment. Two weeks ago, I asked in a floor speech that he be given another 40 to 60 days to fully reveal his Vietnam plans and show substantive specific progress toward scaling down the U.S. commitment. I reiterate that call today.

But let us make no mistake about it—time has run out in Vietnam and our people will not, and should not, be asked to wait indefinitely for a desperately needed breakthrough. It must come, and come quickly, in one form or another.

I believe the President and most of his

advisers understand this. Based on this belief I stand with the President in his search for a settlement.

PRESIDENT'S ADDRESS ON VIETNAM

(Mr. HUTCHINSON asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HUTCHINSON. Mr. Speaker, the President's address to the American people last evening outlined a forthright positive course of action for bringing the Vietnam conflict to an honorable conclusion. He stated again our objective in that embattled land, to assure to the people of South Vietnam the right of self-determination. If the South Vietnamese agree to neutrality, we will respect their decision. Whatever Government results from the free choice of the South Vietnamese we will recognize. We insist on no rigid diplomatic formula. We make no proposals on a take-it-or-leave-it basis. We will consider other approaches consistent with our principles. But let no one confuse our willingness to be flexible in negotiation with weakness or with lack of resolution.

This is a program behind which the American people can unite. The conflict will be shorter if we do. Once Hanoi understands that the American will in the United States is resolute, and that the enemy cannot win through a division of American public opinion what he cannot win militarily, peace negotiations in Paris will move rapidly forward.

PRESIDENT NIXON'S TELEVISION ADDRESS

(Mr. McCLURE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. McCLURE. Mr. Speaker, President Nixon's televised speech to the Nation last night should meet with the approval of all thoughtful persons. It was a call for national unity over an issue that has divided our people for far too long. The President has gone about as far as a reasonable man dares in dealing with the Communist world, and the enemy should realize the consequences that will befall them should they fail to heed Mr. Nixon's temperate proposals.

Beyond what the President himself has said, I hope that all Americans will unite in firm resolve to back the President's quest for peace. Those who fail to do so can only reduce the possibility of successful negotiations.

Hopefully, Mr. Nixon has returned the spirit of nonpartisanship to the foreign policy arena where it belongs without bombastic rhetoric, without rash promises, without overoptimistic assessments, but with quiet purpose and firm resolve our President spoke from the heart of America. Let us not destroy the possibility of success in these efforts by seeking personal gain in irresponsible dissent.

PRESIDENT NIXON'S SPEECH ON VIETNAM

(Mr. LLOYD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. LLOYD. Mr. Speaker, last night President Nixon charted a course in the Vietnam war between outright withdrawal from South Vietnam, on the one hand, and increased aggression to achieve a military victory in North Vietnam on the other. His speech comes at a crucial point in this war and in American history. Principal criticism of the speech this morning is from those who seem to favor withdrawal. As to this, the President reemphasized two points, the first being that our withdrawal would risk a massacre of the South Vietnamese, and the second, that to renege on our pledge would threaten our longer term hopes for peace in the world, although it does appear to me that this country has made overwhelming demonstration in Vietnam that we honor our commitments. "A great nation must be worthy of trust," said the President.

The President gave us very little to cheer about in the way of announcing miracles, or even of news of encouraging progress. The fact is that the attitude of the hostile, totalitarian countries of this world today gives us little to cheer about. It is Communist aggression, not American aggression which caused this war in the first place and is continuing it today.

The President set forth specific proposals for negotiation. They reemphasized our commitment to a free choice for the South Vietnamese. If the North Vietnamese are sincere, they will respond now. To Americans he said our objective is to secure a peace we can live with. A peace we can be proud of. The history of this Nation is that under God, we do have the courage, the will, and the ability to achieve this honorable goal. The President fulfilled his obligation to the people in making disclosure of efforts to achieve peace. He deserves the Nation's thanks, both for the quality of those efforts, and for the disclosure.

PRESIDENT NIXON'S REPORT ON VIETNAM

(Mr. ESCH asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ESCH. Mr. Speaker, last night the President of the United States, in an extremely important report to the people, made a significant commitment of the American Government and the American people to peace. I strongly support the President's commitment and know that the people of the Nation will unite behind his efforts.

In his inaugural address 4 months ago the President said:

The greatest honor history can bestow is the title of peacemaker. This honor beckons America—the chance to help lead the world

at last out of the valley of turmoil and onto that high ground of peace that man has dreamed of since the dawn of time.

In his address last night the President committed this Nation to a course which will win that honor.

The President's proposal is both honorable and achievable. He set peace as our primary objective. We ask for no bases; we ask for no Americanization of South Vietnam; we ask for no permanent stationing of troops. Our only goal is the assurance that the South Vietnamese people are able to choose their own government in free elections. We agree to abide by that decision no matter what it may be. This in the best traditions of our national commitment to freedom.

Perhaps even more important than the words themselves was the President's clear commitment to procedural flexibility—his statement gave real evidence of interest in meaningful negotiations and provided the flexibility to make the Paris talks productive. We are sincere about negotiations. We are sincere about peace.

I know that the people of America will unite behind the President's efforts to find peace. I am today embarking on a program of encouraging the people of Michigan's Second Congressional District to write the President to symbolize their support for peace and for his efforts.

Mr. Speaker, 2 years ago I stood in the well of the House with seven Republican colleagues to emphasize the need for mutual deescalation and flexibility in American policy on Vietnam. The President's message, I believe, embodied those principles. Although the situation has changed since this proposal was first issued, the basic tenets continue to hold true; and I include it at this point in the RECORD:

GRADUAL, RECIPROCAL, IDENTIFIABLE DEESCALATION

(Statement of Republican Congressmen MARVIN L. ESCH of Michigan; JOHN R. DELLENBACK, of Oregon; CHARLES McC. MATHIAS, Jr., of Maryland; F. BRADFORD MORSE, of Massachusetts; CHARLES A. MOSHER, of Ohio; RICHARD S. SCHWEIKER, of Pennsylvania; ROBERT T. STAFFORD, of Vermont; and FRANK J. HORTON, of New York, July 10, 1967)

It is disturbing to us that the recent public discussion of the war in Vietnam has polarized into rigidly opposing sides, the one urging military escalation in the hope of a quick settlement of the war, the other urging total withdrawal as the only key to peace. Both of these points of view, in our judgment, reflect their advocates' lack of understanding of the nature of limited war. In addition, they are essentially negative and do not offer any positive approach to the tragic problems of Southeast Asia.

What both sets of critics have forgotten is that the conflict in Vietnam is a limited war. This fact imposes special requirements not only on our military planning but on our diplomatic efforts as well.

We do not for a moment believe that the proposal we will make later in these remarks is the only hope for settlement, but we do think that discussion of the kind of diplomatic initiative we will suggest would contribute to a more balanced appraisal of our problems and perils in Vietnam.

THE NATURE OF LIMITED WAR

The war in Vietnam is a limited war. It is limited in the combatants involved. It is limited in the objectives of the combatants. It is limited in the weapons they use. It is limited in the targets against which those weapons are employed.

Without a clear perspective of the nature of limited war, it may not be possible to devise practical diplomatic and military steps to bring the war to an end.

Many of the comments of the Administration and of both groups of its political critics on the Vietnamese war—both those who would bomb more and those who would bomb less—reflect a failure to comprehend the differences between limited and total war. Those differences are essential to an understanding of which steps may maximize the opportunities for peace.

What are the essential truths about limited war?

First, a limited war with limited objectives cannot be ended and cannot remain limited if one side insists on the unconditional surrender of the other. In one sense this is obvious; the weapons and level of force necessary to obtain an unconditional surrender would turn the war from limited to total. In another sense this fact is not so obvious; when objectives and weapons are limited both sides must be willing to compromise if the war is to be ended.

Second, the end of a limited war requires that the combatants that meet at the peace table appear to be equals. If one side were to appear to "lose face" by negotiating, negotiations in a limited war context would not occur. A peace conference between victor and vanquished is possible only when one side wins and the other loses—loses not just face but the war, too. But that means surrender, which in turn means that at least one side has removed most of the limits of its use of military force. In other words, negotiations to end a limited war must appear to be at the initiative of both sides, must appear to some degree to be the result of a military stalemate in which both sides can claim success, and must result in an agreement which each side can convincingly claim as a major achievement in pursuit of its objectives. It is not necessary for the two sides to be actual equals; nor is it necessary for the agreement to be equally valuable to each side; but it is of paramount importance that both governments can make a believable case to their people that will justify both the negotiations and their results.

Third, negotiations to end a limited war are unlikely without an advanced degree of mutual confidence in the word of the combatants. Unlike total war, limited war requires communications between the opposing sides—effective communications of both a tacit and direct form. It is through these communications that each side can understand the objectives of the other side and understand that both these objectives and the weapons used in support of them are genuinely limited. The purpose of the communications is not merely to avoid catastrophe from misunderstanding but also to build the kind of confidence in the sincerity of the other side that will allow negotiations to take place. It is thus in the interest of each side to define its limited objectives precisely, to avoid extravagant public diplomacy which might easily be misinterpreted as mere posturing for public relations purposes, and to be credible by keeping its promises and being willing to listen to the thoughts of others. It would be unwise for anyone to expect that a limited war will end suddenly—by one dramatic gesture which will lead to an immediate peace conference. On the contrary, if such a conference is to happen, it must be preceded by a series of

small steps by which each side can test the other's genuine desires and by which each side can clearly demonstrate its own. Without that atmosphere of mutual confidence, negotiations for the end of a limited war are not likely to happen and are even less likely to be successful.

Fourth, it is not possible for one side to fight a limited war and the other a total war. The escalation of one side will inevitably be matched by the other. It is unreasonable to think that if one side has an advantage in available air power and the other in available number of land forces, that either would allow the other to use its advantage without employing its own. It is equally unwise to become preoccupied with the limits you have imposed on your own military forces and neglect the obvious but unused power available to the other side. A decision by either side to remove the limits to the power it employs is a decision to risk the likelihood of total war.

From the perspective of these truths of limited war, the Vietnam positions of the Administration and both sets of its critics are found wanting.

Those who advocate a rapid or steady escalation in the power applied against North Vietnam are convinced that such a course would force North Vietnam to the negotiating table on its knees. Far more likely would be the rapid escalation of the conflict from a limited to a total war.

Among the options still available for Communist escalation in the Vietnamese conflict are: the use of terrorist bombings against Saigon and the civilian populations of other South Vietnamese cities; the infiltration in massive numbers of the very large North Vietnamese standing Army; the use of Communist volunteers in massive numbers from other Communist countries; the opening of a second diversionary military action in Korea to sap Western strength; etc.

Despite its increasing qualifications as a truism, it is nonetheless vital to appreciate that it is not in the United States' interest to become engaged in an unlimited land war on the Asian continent. Escalation which would change the psychological atmosphere of the Vietnam war from emphasis on restraint to emphasis on power would be likely to result in such an unlimited land war. Therefore, it would be wrong.

Those who advocate a sudden and complete halt to the bombing are similarly convinced that this step would have the best chance of bringing North Vietnam to the negotiating table. Unfortunately, this step would also be unlikely to achieve the desired results. Given the history of U.S. policy and the nature of U.S. domestic politics the government in Hanoi is likely to think that the sudden and complete cessation of or even pause in the bombing is either a ruse or a sign of desperation—and in either case the cause of negotiations would not be meaningfully advanced. Making the cessation a pause minimizes its risk and its effectiveness, too. The only positive value a sudden and complete cessation of the bombing of North Vietnam would have would come if the bombing were stopped for such a long time that North Vietnam became convinced of the genuine nature of U.S. motives and had the opportunity to make a diplomatic initiative of its own which would appear to be unrelated to the bombing cessation and would thereby not cause any loss of face to the Hanoi government. But in all likelihood the period of time required would be so long as to involve serious military risks in allowing the re-establishment of free-flowing supply and support channels to the South.

In other words, a complete bombing pause would not prove the genuine sincerity of the United States while a complete bombing ces-

sation long enough to prove the genuine sincerity of the United States would involve a great military risk to the United States.

In still other words, a complete bombing pause would not prove the genuine sincerity of the United States but a complete bombing cessation long enough to prove the genuine sincerity of the United States would not in any way assure the genuine sincerity of North Vietnam. It might, therefore, prove to be a greater impetus to instability than to stability.

While the Administration rejects both of these suggestions from its two sets of critics, its position is also a dubious one. It appears to be unyielding and inflexible—rigidly insisting that the first concrete step toward de-escalation be taken by North Vietnam—dogmatically demanding that North Vietnam demonstrate its genuine sincerity for negotiations before the United States does. It is an attitude which may reflect a misunderstanding of the nature of limited war, for it asks the enemy to risk losing face. The Administration insists on publicly putting the government of North Vietnam on the spot by insisting that she back down first. It is a position which comes dangerously close to changing the atmosphere of restraint to an atmosphere of power—and a limited war cannot stay limited or be ended in an atmosphere of power.

Significant military escalation, sudden and complete cessation of the bombing of North Vietnam, and a rigid devotion to the status quo all fail to meet the limited war criteria of a promising policy to bring about honorable negotiations to end the war in Vietnam.

But does a viable policy option exist? To qualify such a policy must meet the following criteria:

It must not risk expansion of the limited war to total war.

It must not risk significant erosion of the current military advantage of the United States in Vietnam.

It must induce a growing atmosphere of mutual confidence.

It must permit each side the opportunity to claim initiative.

It must not require either side to "lose face."

It must be susceptible to presentation, verification, and implementation through the private channels of diplomacy.

STAGED DEESCALATION

Such a potential policy does exist. The experts would probably call it "staged de-escalation." One variation of it would be as follows:

The United States would agree to halt all bombing in North Vietnam north of the 21st parallel for 60 days.

If during that time the North Vietnamese Government undertook a similarly limited, similarly visible and similarly measurable step toward de-escalation, the United States would immediately halt all bombing in North Vietnam north of the 20th parallel for 60 days.

If within the first 60-day period the North Vietnamese had taken no such step, the bombing would be resumed.

In five such successive steps the United States would gradually cease all bombing of North Vietnam. Each step after the first would be dependent upon a similar de-escalation by Hanoi. If no such step were taken in the first 60 days, the plan would end.

If either side violated its word at any time, the plan would end. (The system should have the flexibility, however, to cause a minor violation merely to set back the timetable rather than necessarily ending the entire experiment.)

The United States should propose the plan to the Hanoi government through private diplomatic channels only. Any public notice

or acknowledgment of its acceptance or implementation should be made only by mutual agreement.

Those equivalent de-escalatory steps to be taken by the North Vietnamese government could be proposed in the plan by the United States, or could be defined in advance by the North Vietnamese government, or could be accepted one by one as they are implemented. It is vital, however, that clear and precise information about them be communicated so that they can be verified. Obviously, agreement in advance would be preferable in order to assure that what Hanoi thinks is equivalent Washington does also.

Examples of measurable and equivalent de-escalatory steps by the North Vietnamese government might include: the cessation of shipments to and from specific military supply depots in the southern portion of North Vietnam; the erection of barriers on and the non-use of specific supply routes in North Vietnam and Laos along the Ho Chi Minh trail; the withdrawal of all MIG fighters to distant bases in Northern North Vietnam; the cessation of all terrorist bombings in specific areas of South Vietnam; the release of U.S. prisoners of war; etc.

It would be vital not to expect the North Vietnamese to undertake steps which might put themselves at a distinct military disadvantage.

The staged cessation of U.S. bombing, if the plan does not work, can be reversed on a few hours notice. The steps to be taken by North Vietnam should be expected to be of the same nature. It would be unwise, for example, at an early stage in the de-escalatory process to demand or expect, from the North Vietnamese, steps such as the dismantling of their SAM sites, total evacuation of supply depots, or withdrawal of Army units from the South.

This policy of staged de-escalation meets each of the criteria cited previously to maximize the chances for negotiations in a limited war and minimize the military risks involved.

It obviously does not risk expansion of the limited war to total war.

It does not risk significant erosion of the current military advantage of the United States in Vietnam. The greatest military advantage which results from the bombing of North Vietnam comes from destroying targets in southern North Vietnam—supply depots and routes along the Ho Chi Minh and other trails into South Vietnam. By halting the bombing stages, by starting the cessation in Northern North Vietnam and gradually working southward, then by trying each successive stage to equivalent North Vietnamese reductions in support operations to the South, the plan minimizes the military risks to the United States. If a cessation of U.S. bombing north of the 21st parallel were matched by a dismantling of and evacuation from major North Vietnamese supply depots along the Ho Chi Minh trail, and if successive U.S. steps were matched by similar North Vietnamese steps, by the time U.S. bombings were halted in all of North Vietnam, most significant North Vietnamese infiltration of men and supplies into South Vietnam would also be halted. The first U.S. step envisaged in the plan may not be matched by the North Vietnamese—in which case after 60 days all the bombing the United States is now doing could be resumed. Furthermore, the sixty day cessation of bombing above the 21st parallel would effect raids over Hanoi, but would not effect raids over Haiphong or Nam Dinh areas, each of which would be immune from bombing only after the second U.S. step which must be preceded by some significant North Vietnamese de-escalatory step.

The staged de-escalation plan would induce a growing atmosphere of mutual confidence. In fact, the most important attribute

of the plan is that each step by each side involves little military risk in itself, is clearly visible to and measurable by the other side, and is dependent upon a previous step by the other side. It is a series of small steps, each of which builds confidence in the genuine sincerity of each of the combatants. If it is successful, at the end of the process not only will U.S. bombing in the North and North Vietnamese infiltration into the South be ended, but a spirit of confidence might have emerged. That spirit of confidence could provide a real opportunity for fruitful and honorable negotiations or for a similar staged de-escalation in South Vietnam itself—or both.

The plan would permit each side the opportunity to claim initiative. The plan calls for nine or ten separate steps, taken alternately by the United States and North Vietnam. Patriots, political scientists, and propagandists in each country will be able to claim that it was the steps taken by their government which led to the other side taking similar steps. Each side can claim—and do so justifiably—that its initiatives paved the way toward peace. It is a flexible system through which both sides can equally contribute toward peace and through which both can appear to pursue their national objectives.

The plan would not require either side to "lose face." It would not require that one side yield either to the force or the threat of force of the other. It would be a mutual de-escalation from which both sides could benefit. This would be especially true if the plan were initiated through private diplomacy—and implemented and announced through mutual diplomacy, which leads to the final criterion—

The plan obviously can be susceptible to presentation, verification, and implementation through the private channels of diplomacy. It can be, and if it is to succeed, it should be.

Even if the plan meets all the criteria of limited diplomacy, will it work? No one can answer that. All that can be said for it is that it seems to offer more promise than the stand-pat policy of the Administration or the alternatives suggested by either set of its major critics. For too long the Administration implicitly, and its Vietnam critics explicitly, have held out the hope to the American people that there is some simple formula, some magic key which, if found, could end the Vietnamese war suddenly and dramatically. This is extremely unlikely. It is not in the nature of limited war for peace to come overnight—for surrender is improbable and a cease-fire comes only after arduous diplomacy.

There is no panacea for Vietnam. The proposal offered here is not put forth as one. Without doubt it can be improved upon. But the best chance for peace lies not in giant power or in giant concessions. It lies in small steps, taken quietly—steps that make the position of each side credible to the other. This is now the task of responsible diplomacy in Vietnam.

PRESIDENT NIXON'S ADDRESS ON VIETNAM

(Mr. THOMPSON of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Georgia. Mr. Speaker, last night as I watched the President of the United States on television pride filled my body because we have a President who can so forcefully articulate the American position in Vietnam.

Pride also filled my body because we

have a President who is so earnest in his desire for peace.

However, Mr. Speaker, I would be less than honest if I were not to state that President Johnson had just as sincere and honest and forceful a desire for peace as does President Nixon.

The proposals that President Nixon set forth last night, in many parts had been proposed by President Johnson.

There were some new and meaningful innovations and some new means for compromise and some new means for negotiation. However, Mr. Speaker, just as we saw President Johnson practically destroyed by public opinion in this country because of his forceful insistence on protecting the free choice of the people of South Vietnam, so could we see the same havoc wrought on President Nixon.

Mr. Speaker, I view the President's speech last night as having tossed the ball into the court of American public opinion, for had the American public supported President Johnson in his aims, this war would have already been over.

The Vietcong and the North Vietnamese feel that the American public will not back our President and we will eventually capitulate. I hope, Mr. Speaker, the American public will make clear to the North Vietnamese that we intend to back our President and we will stand forthright in insisting on a free choice for the people in South Vietnam for the type of government they would like to have.

THE SPEAKER. The time of the gentleman has expired.

JUSTICE ABE FORTAS

(Mr. GROSS asked and was given permission to address the House for 1 minute.)

Mr. GROSS. Mr. Speaker, to my mind one of the most tragic aspects of Mr. Fortas' presence on the Supreme Court is the effect it surely must have had on the young people of this country, the overwhelming majority of whom love and respect this land as much as have their forefathers.

Mr. Speaker, greed and public service are incompatible and the Fortas affair is a classic example of this incompatibility.

Beyond this, however, is the fact that the criminal laws of the United States apply to private citizens as well as to Federal officials. What we have not seen of the extracurricular activities of Mr. Fortas is most important.

Mr. Speaker, a Federal grand jury should be impaneled immediately to conduct a sweeping investigation into the activities of this man, and of his former law firm and their relationships and their dealings with the past administration.

I would hope that the House Committee on the Judiciary would turn its attention to Associate Justice Douglas and his acceptance over the last several years of a \$12,000 fee from the Parvin Foundation.

The circumstances of the Fortas and Douglas "fees" are strikingly similar except that in the case of the latter the

money comes in part from the gambling tables of Las Vegas.

I can see no reason whatsoever why Mr. Douglas' dealings with this tax exempt foundation or other organizations, if there be other organizations, should be exempt from the same scrutiny that the committee was prepared to give to the affairs of Mr. Fortas.

THE PRESIDENT'S SPEECH ON VIETNAM

(Mr. BUCHANAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUCHANAN. Mr. Speaker, our colleagues do well to praise the President of the United States for the restraint, the reasonableness, and the statesmanship of his proposals for a solution of the Vietnam conflict, and I would join in their praise.

I would also like to underline, however, the fact that he felt free to make these proposals, clearly implying a courage, a restraint, and a confidence on the part of the present Government in Vietnam, which is likewise commendable. That Government is an expression of the self-determination of the people of South Vietnam. It was born in the midst of a vicious and protracted war by the vote of the people. It is based upon a constitution created by them and approved in a referendum of the people. It is composed of men elected by the people in a larger voter turnout than is the case in U.S. elections. It therefore has nothing to fear from honest withdrawal of non-South Vietnamese forces and an honest and free election, in which I am confident the people of South Vietnam will continue to give their endorsement to a free and republican form of government.

Its counterpart in South Vietnam, on the other hand, the National Liberation Front, so-called, is the creature of the North Vietnamese Government, created, led, and supported by that Government, and could not survive if there were honest and total withdrawal of North Vietnam from South Vietnam. There is no Communist government in the world today that was created as a matter of self-determination of a people. There is no Communist government in the world today that believes, apparently, it can survive an honest election, because none are held in Communist countries.

I am confident that if there is an honest withdrawal and an honest election, it will result in an overwhelming endorsement of the present government in Saigon by the people of Vietnam.

LET US RALLY TO THE LEADERSHIP OF THE PRESIDENT

(Mr. BROCK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROCK. Mr. Speaker, what a refreshing thing it was to watch a great American acting as President of all

these United States address these people with candor and completeness on a highly emotional and very difficult issue last night. Showing his faith in this country's basic sense of responsibility, which always accompanies full knowledge of the issues, President Nixon frankly offered the world an example of America's dedication to the cause of lasting peace. Without rhetoric or fanfare he stated our objectives and the steps we will take to achieve them.

Just as our President has chosen to deal honestly with this Nation, so must we rally to his leadership in the pursuit of freedom, peace, and security for the world.

NIXON'S VIETNAM PROPOSAL

(Mr. SCHERLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHERLE. Mr. Speaker, last night President Nixon revealed his long-awaited peace proposal for Vietnam. He urged mutual withdrawal of American and North Vietnamese forces from South Vietnam within a year's time and reported that some unilateral U.S. withdrawals are likely soon, regardless of the results of the Paris negotiations.

It was encouraging to hear him declare, in no uncertain terms, "I want to end the war." But he also cautioned that there is no easy way to end the war, if we are to end it permanently. He presented to the Nation conditions vital to achieving peace and various possible courses of action. He deserves our careful consideration and support as he seeks to end this tragic conflict.

President Nixon's address was conciliatory in tone, but he made clear that he would not sacrifice the goals for which so many of our young men have given their lives.

The Vietnam situation has been the most serious international problem facing the new President. He is to be commended for examining the record and weighing further action with great care, instead of rushing to take ill-considered action when he took office, as some wished him to do. Throughout the Nation people will be observing new developments at the Paris peace talks and even more, the reactions to Mr. Nixon's proposals on the battlefields of Vietnam. We wish him success in his efforts. We are with him in the hope that this is the critical turning point which will lead to peace.

PRESIDENT NIXON WILL FIND BIPARTISAN SUPPORT FOR PEACE EFFORTS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, all Americans last night were impressed with the sincere and forthright statement of our President as he proposed his recommendations for a solution of the Vietnam problem.

This is a peace-loving nation and we want peace. The President will find that Members in a bipartisan manner on both sides of the aisle will support his proposals to find peace.

I was particularly impressed with the emphasis the President placed on the fact that whatever kind of solution or treaty is obtained, it will be a meaningful one and that our direction for the past 4 years will not have gone for naught. But I think it is well to point out that what the President said last night basically was not anything new. These are proposals that in essence President Johnson has been making for the past 3 years.

We are trying to find a solution. The President's statement last night was just a restatement of the basic problem, and on basic proposals.

Let it be remembered that President Johnson had offered not to run again just in order that these peace talks could be started, and President Johnson was carrying on the direction of the two Presidents before him in an effort to find peace for the world.

We will join in an effort to find a solution, but we should not be overexcited that this is something bold and new. It is a good strong statement and it will find support in the Halls of Congress.

I think we should also remember this is the same policy President Johnson and those who preceded him had been advocating in this troublesome field.

SOCIAL SECURITY ACT OF 1969

(Mr. VANIK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VANIK. Mr. Speaker, I have today introduced in the House of Representatives legislation sponsored by myself and 52 other Members of the House providing for a 15-percent increase in social security benefits.

This legislation must be acted upon this year. Inflation has had its most cruel impact on the millions of our senior citizens who live on social security and fixed retirement income. Action cannot be delayed on this urgent matter.

Following are the names of the Members who cosponsored this vital legislation: the Social Security Act of 1969. In the course of the next week, I expect to list additional cosponsors.

MESSRS. VANIK, BOLAND, BRASCO, BROWN of California, BURTON of California, BUTTON, BYRNE of Pennsylvania, Mrs. CHISHOLM, MESSRS. CONYERS, CORDOVA, DAWSON, DONOHUE, EDWARDS of California, FARBSTEIN, FOLEY, WILLIAM D. FORD, FRIEDEL, FULTON of Pennsylvania, GALLAGHER, GONZALEZ, HAWKINS, HELSTOSKI, HICKS, HOLIFIELD, HOWARD, KOCH, LOWENSTEIN, MIKVA, Mrs. MINK, MESSRS. MOLLAHAN, MOORHEAD, MORGAN, MURPHY of Illinois, NEDZI, NIX, OBEY, O'NEILL, POWELL, PRICE of Illinois, RANDALL, REES, RODGERS of Colorado, ROYBAL, RYAN, St. ONGE, SANDMAN, STOKES, THOMPSON of New Jersey, TIERNAN, VIGORITO, WALDIE, and WRIGHT.

PRESIDENT NIXON'S SPEECH ON VIETNAM AND PROPOSALS FOR THE CARE OF VETERANS

(Mr. EDMONDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDMONDSON. Mr. Speaker, along with most Members of this body and many Americans I listened also last night to the speech of President Nixon. I found much to appreciate in it, and much to admire in it.

I certainly join the many speakers here today in the hope that it will lead soon to fruitful negotiations and a just and enduring peace.

I particularly appreciated the President's recognition of the valor and the patriotism and the great contribution of the men who are serving in uniform in Vietnam. I thought it was well said, and certainly timely that he said it.

I found it a little difficult, though, to reconcile that Presidential recognition of our fighting men in Vietnam with the recently submitted administration budget for the Veterans' Administration, with a \$40 million cut in the Johnson budget for essential items to modernize and repair our hospitals. I am deeply disappointed by administration cuts which are compelling layoffs in the Veterans' Administration, and which have led to the shutdown of a ward that serves 30 veterans in the veterans' hospital in my own hometown, Muskogee, Okla., effective tomorrow.

I hope that we can have from the President and his administration new recommendations in the field of Veterans' Administration funding that will recognize with appropriate action the service being performed by our fighting men in Vietnam, and see to it that when they return to this country they find adequate facilities for them and personnel to take care of them, as have the veterans who have returned from other wars in this century.

In many cases, these people pay for their dedication to their country with the loss or impairment of their own personal health. One of our finest veterans programs has been our guarantee of first-rate medical care for those who need it. This is a service a grateful Nation has freely offered and willingly maintained.

Frankly, I was amazed when I learned that the revised budget eliminated a number of projects to remodel and modernize Veterans' Administration hospitals—including the one in Muskogee, Okla.—making it necessary to use facilities which are clearly inadequate and outdated.

I wrote the Administrator of the Veterans' Administration for confirmation of this information, and he replied, in part:

We are continuing with the development of our plans for this project, but actual construction will be delayed. In compliance with the current policy of restricting new construction contracts to lessen inflationary pressure, this is one of our projects for which the construction contract award has been deferred until a subsequent fiscal year.

I believe the veterans of Oklahoma and the other States where projects are being deferred have waited long enough. I believe our fighting men in Vietnam, where we have committed billions to the war they are fighting, will find it difficult to understand that their future welfare is being traded off for a savings of \$40 million. I believe this particular budget cut is unwise and untimely, and I sincerely hope that Congress reverses the administration on this item. Our Oklahoma veterans have struggled persistently and patiently for years to have this hospital at Muskogee air conditioned and modernized. I want Congress to assure them that this is the last hot Oklahoma summer that hospitalized veterans will have to endure without air conditioning. I hope we assure them that their hospital will be modern and adequately staffed.

THE LATE HONORABLE FRED HARTLEY

(Mr. DANIELS of New Jersey asked and was given permission to address the House for 1 minute.)

Mr. DANIELS of New Jersey. Mr. Speaker, on May 11, 1969 a former Member of this House, the Honorable Fred Hartley, passed away at the age of 67 in Red Bank, N.J. I rise today to express my sympathy and that of my family and constituents to his widow, Mrs. Hazel Roemer Hartley and to his family.

Mr. Hartley was born in the town of Harrison which is now a part of the 14th Congressional District of New Jersey, and was elected to this House in 1928 from the 10th Congressional District of New Jersey and served for 20 years before his retirement in 1948.

Although most of his district was in Essex County, Mr. Hartley resided in Hudson County in the town of Kearny and all during his service in the Congress represented three communities, Harrison, East Newark, and Kearny which in 1966 were made part of the 14th District. Thus, I speak of Mr. Hartley as a constituent for although he moved out of Hudson County in his later years, his heart was always in West Hudson where his great successes were enjoyed. And he was a man who knew great success at a very young age. Elected to the Kearny Town Council at the age of 22, he was the youngest man ever elected to the Congress when he was chosen by the people of the old 10th District in 1928.

Fred Hartley and I represented different political parties and had different political philosophies. Yet, I always respected him as a man of great courage and great dedication to this Nation and its principles.

Mr. Speaker, Hudson County has lost a very distinguished man, a man who brought honor and distinction to the office he held.

PRESIDENT NIXON'S SPEECH ON VIETNAM

(Mr. PUCINSKI asked and was given permission to address the House for 1 minute.)

Mr. PUCINSKI. Mr. Speaker, I have listened with great interest to the many speeches made here today praising President Nixon and his proposal yesterday for bringing the war in Vietnam to an end.

I am sure that Mr. Nixon today must gain great strength and comfort from the fact that those of us in this Chamber on both sides of the aisle have overwhelmingly joined in our support of his courageous program presented last night.

While this bipartisan support is a comfort to the President, it should be of grave concern to Hanoi and to the negotiators in Paris.

Mr. Nixon yesterday did not sound any reveille for retreat. He offered a compassionate and fair program for bringing this war to an end. But I hope that his last words do not escape the attention of the negotiators in Paris or Hanoi. The President made it very clear that American patience is not inexhaustible when he said that if this needless suffering continues we will have to take another look at our alternatives.

If Hanoi does not accept Mr. Nixon's offer, it is entirely possible that we will have to resume bombing of the North and take whatever other steps are necessary to end this conflict. It is entirely possible we will have to take stronger military action if the very generous offer made by President Nixon yesterday to bring this war to an end through negotiations fails.

President Nixon yesterday outlined a broad program, a fair program. It was an honest speech, a speech that needed to be made. There were no gimmicks; no trick mirrors. It outlined our objectives and our goals. It outlined what we are willing to do, the concessions we are willing to make to bring this war to an end. Mr. Nixon was eloquent in his sincerity and dauntless in his integrity to bring about peace with justice.

I think the American people will be united in demanding that if Hanoi refuses this very generous offer, the United States must take whatever other military steps are necessary to bring this war to an end.

I congratulate the President for rejecting the imposition of a coalition government on South Vietnam. We know the tragic history of coalition governments.

I also congratulate the President for insisting that there must be a mutual withdrawal of troops not only from South Vietnam but also from Cambodia and Laos. There again the President shows great wisdom in not permitting those two enclaves to become sanctuaries from which North Vietnamese troops could carry on their subversion and aggression in South Vietnam.

Mr. Speaker, I join my colleagues in praising President Nixon and I offer a fervent prayer that the enemy will accept this generous offer for peace. Their refusal will leave the President no alternative but to escalate our military activity until the enemy is defeated. Mr. Nixon has offered them a 14-karat olive branch of peace. I hope they have the wisdom to accept.

JUSTICE FORTAS

(Mr. MIZELL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MIZELL. Mr. Speaker, Mr. Fortas took the only course open to him in resigning from the Supreme Court. Had he remained on the bench, the American people could not have retained their confidence in the highest court in the land. With one of its members engaged in questionable activities and receiving money from questionable associates, their faith would have been severely shaken. I am certain that the Congress would have demanded Mr. Fortas' resignation, or it would have begun impeachment proceedings. Either course by the Congress would have been a further blow to the confidence of the American people in the Court.

Members of the Supreme Court should be men of character with high principles and integrity beyond reproach. Had it not been for the wisdom of the Republican leadership in the form of men like Senators BOB GRIFFIN and STROM THURMOND, Mr. Fortas would now be Chief Justice of the Supreme Court. If he had been appointed last year as the previous administration desired, chances are that none of these charges would have been made and the facts brought to light.

We now call upon President Nixon to screen very carefully the men he would name to fill this position. He will have the privilege upon the resignation of Chief Justice Warren to name two men to the Supreme Court, and thereby have the opportunity to make great headway in restoring the confidence of the American people in the high court.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. CONTE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. CONTE. Mr. Speaker, President Nixon, frankly and forthrightly, has taken a constructive step forward to bring the tragic war in Vietnam to an end. I commend him today for his action of last night, and I pray for a similar response from the other side.

Rejecting the extremes of total capitulation on the one hand and an all-out military onslaught on the other, the President, nonetheless, has placed himself and his administration on the public record as favoring settlement of this conflict in a manner as generous as seems possible at this time.

I say "generous" because Mr. Nixon chose not to get bogged down in debating points, such as North Vietnam's reluctance to admit they have troops in South Vietnam, and also the President's refusal to insist on a particular form of agreement. He asked only that whatever understanding can be reached be clear to both sides.

Mr. Nixon stressed the positive by pro-

posing a phased withdrawal of all non-South Vietnamese troops over a 12-month period. Realizing a negotiated end to the war cannot be achieved immediately, the President's withdrawal plan is designed to bring about the next best thing—a slowdown in hostilities and a reduction in the killing.

I was also heartened by the straightforward manner in which our President stated that we seek neither military bases nor other ties to South Vietnam. We seek only self-determination for the people of that embattled country.

This must be our public position as well as our private commitment. We surely have learned we must not impose our will on others, and we must not waver in this belief.

The President's proposals, added to his implicit promise to begin unilateral withdrawal of some American troops soon, may prove to be the beginning of the end to the slaughter in Vietnam.

Mr. Speaker, I pray this will be the result of the President's address to the Nation and the world last night.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. SCHADEBERG asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. SCHADEBERG. Mr. Speaker, it was refreshing to hear the President make his statement on Vietnam last evening. His forthrightness in squaring with the American people is certainly in the best interest of all of us, and is quite welcome.

I spent a good portion of the rest of the night musing over our posture in Vietnam, knowing that some 47 percent of the residents of my district expressed themselves in favor of increased military action to achieve victory, using every weapon in our arsenal short of nuclear. Some 38 percent had expressed themselves in favor of the replacement of our troops by the South Vietnamese as rapidly and practicably as possible.

In weighing the matter carefully, I have decided that the President's course is the best avenue for the United States. I believe that if we turn over the control of the fighting to our allies in South Vietnam, the tide of battle may well turn in favor of victory for freedom.

We will all be watching and praying for peace with security for the principles of freedom. Life is too precious to pour it out endlessly with hope for the freedom that is the innate possession of every human being. We cannot continue to wait until by default and/or exhaustion, tyranny has its way.

It is well that our men be released from Vietnam at the earliest time consistent with the goals of freedom and self-determination. The President has rightly called for removal of all non-South Vietnamese forces and permit the Vietnamese people to settle their differences within the framework of their own traditions.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. DELLENBACK asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DELLENBACK. Mr. Speaker, President Nixon last night performed a valuable service to America, and indeed to the world. He spoke on a problem of deep complexity; a problem the early and sound solution to which is of concern and importance to everyone in the world; a problem for which there is quite obviously no single panacea.

He spoke soundly; he spoke forcibly; he spoke clearly. He faced the facts as they exist, made no empty or easy promise. He avoided demagoguery.

His speech demonstrated his own deep concern and his commitment to a solution of the problem on a fair basis that called for an adherence to the basic principles involved while avoiding any tie to superficialities.

At a time when it is critical to the world whose hand and mind and heart are at the head of this Nation, it was comforting and confidence-inspiring to see this latest demonstration of President Nixon's capacities and commitment.

I commend the President for a task well handled. May our joint hopes and prayers for an early and sound and fair resolution of this worldwide problem be answered.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. BROWN of Ohio asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BROWN of Ohio. Mr. Speaker, President Nixon has forthrightly set out for our adversaries, the American people, and the world our Nation's position regarding peace in Vietnam. His statement establishes a solid platform for peace negotiations. It is now up to the Communists to respond.

If the North Vietnamese respond as they usually do, the first reaction to President Nixon's peace offer will be negative—probably insultingly so. Not until they have had a chance to study the proposal will we get an accurate reading on their response and know whether there is any sincere willingness on their part to find the road to peace.

Mutual withdrawal and free elections under neutral international supervision, total amnesty and full political participation by all factions in South Vietnam should be agreeable to both sides.

A lasting peace can only be secured through true negotiations which require concessions by both sides. The President made it clear that we seek such a peace, that we are willing to make some concessions to achieve it and that we are willing to negotiate sincerely in the interest of finding that peace.

The President's speech should be hailed by peace-loving peoples everywhere as a wholehearted effort to find the peace that

has eluded the world in Southeast Asia for the past generation.

Let us pray that the North Vietnamese will be wise enough to respond—and soon—in a way to maintain the momentum toward peace. To fail to do so, or to respond in a belligerent manner, God forbid, would represent a complete disregard for worldwide sentiment and be the greatest of international follies.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. TALCOTT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. TALCOTT. Mr. Speaker, I join my colleagues in supporting President Nixon in his quest for a permanent and honorable peace on our planet.

The terms of his proposal have been clearly set forth.

Now, much of the success of the quest for peace is up to us—the American citizen.

Like a successful football team, much planning and preparation has gone into this proposal. The quarterback, our only quarterback, has called a good play. Success is possible.

All of us must cooperate.

All members of the team, the bench, the cheerleaders, the spectators, the auditors—all must add their wholehearted support.

The men in uniform on the frontlines, the prisoners of war, the families of servicemen have more than done their share.

We at home, in all capacities, can help to speed the way to peace by cooperating with our President in his quest for peace. Unity at home is as important as valor on the battlefield.

Our weaknesses are not in the front lines, or at the negotiating tables. Any weaknesses on our side can be easily and quickly alleviated by full and complete support of the President so long as this proposal is being considered.

President Nixon needs the undivided support of all those who sincerely desire peace—whether we be hawk or dove, or something else, the best and quickest way to a lasting and honorable peace is the support of the President.

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

(Mr. CAMP asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. CAMP. Mr. Speaker, I want to join with my colleagues today in commending the President for his wise course of action in working toward a peaceful settlement in South Vietnam.

Aside from the mutual troop withdrawal, the most important part of Mr. Nixon's solution is his proposal for a political settlement with either a new government created by elections or by negotiations. Even more important, however, is the fact that the President has spoken with the complete agreement of President Thieu.

The North Vietnamese have been depending upon the unpopularity of the war and the steadily increasing lack of support among Americans.

What America needs now, Mr. Speaker, is the full support of the American people for the President's proposals. We need to stand fully behind our President as he works for peace in Southeast Asia. He has asked that we consider the facts, and whatever our differences, that we "support a program which can lead to a peace we can live with and a peace we can be proud of."

Mr. Speaker, I sincerely hope that the time has come when we can show a little restraint—when the American people can withhold criticism—and not interfere with negotiations in Paris that can and will bring about the end of this war. The President has provided our negotiators with the tools they need to face Hanoi at the bargaining table. We must provide them with the silence so essential to an honorable peaceful conclusion of this war.

PRESIDENT NIXON'S LUCID, COMPREHENSIVE, AND HOPEFUL DISSERTATION ON THE SITUATION IN VIETNAM

(Mr. BROYHILL of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROYHILL of Virginia. Mr. Speaker, President Nixon last night delivered a lucid, comprehensive, and hopeful dissertation on the situation in Vietnam.

If Hanoi and Moscow have been waiting for a definitive print-out of America's views on the war, they have it now.

The President, Mr. Speaker, was stern, solemn, and encouraging, as I had hoped he would be. I applaud him for his performance. Much of what he had to say was said for the ears of Hanoi and Moscow. The American people have a vastly better understanding of what the War in Vietnam is all about as a result of President Nixon's speech. Certainly, Mr. Speaker, the whirling dervish critics who have advocated a sell-out to the Communists will find the American people backing the President more strongly than ever as a result of his explanation of our efforts in Vietnam. It was a first-class performance by a first-class American President.

PRESIDENT NIXON'S VIETNAM MESSAGE

(Mr. FREY asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. FREY. Mr. Speaker, I join my colleagues on both sides of the aisle in supporting the position taken by President Nixon in his Vietnam message. All Americans, regardless of political philosophy, seek an early and honorable conclusion to the war in Vietnam. The President addressed himself to this most difficult problem in an honest and forthright manner. He offered a plan that can be

put into effect immediately. At the same time he made it clear that our patience is not unlimited.

It is most important that Hanoi note the wide bipartisan support of the President in this matter. I join all my fellow Americans in the hope that the end of this conflict is near.

PERMISSION FOR SUBCOMMITTEE ON HOUSING, COMMITTEE ON BANKING AND CURRENCY, TO SIT DURING GENERAL DEBATE TODAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Housing of the Committee on Banking and Currency may sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

MARITIME AUTHORIZATION, 1970

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules and on behalf of my colleague, the gentleman from Massachusetts (Mr. O'NEILL), I call up House Resolution 407, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 407

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4152) to authorize appropriations for certain maritime programs of the Department of Commerce. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or committee amendment in the nature of a substitute now printed in the bill. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from California (Mr. SMITH) and, pending that, I yield myself such time as I may consume.

(Mr. SISK asked and was given permission to revise and extend his remarks.)

Mr. SISK. Mr. Speaker, House Resolution 407 provides an open rule with 2 hours of general debate for consideration of H.R. 4152, to authorize appropriations for certain maritime programs of the Department of Commerce.

The purpose of H.R. 4152 is to authorize certain appropriations for the Maritime Administration programs within the

Department of Commerce for fiscal year 1970.

The bill, as amended, would authorize a total of \$387,378,000 for the following categories of activity:

First, acquisition, construction, or reconstruction of vessels and construction-differential subsidy and cost of national defense features incident to the construction, reconstruction, or reconditioning of ships, \$145 million: Funds authorized under this heading would provide for the payment of construction-differential subsidy and national defense allowances on vessels constructed for service on essential foreign trade routes. In addition, these funds will provide for the acquisition of ships replaced by and traded in on newly constructed vessels and for the expenses associated with placing these replaced vessels in the National Defense Reserve Fleet.

Second, payment of obligations incurred for operating-differential subsidy, \$212 million: The authorization under this heading will provide for payments of operating subsidy to ship operators in order to maintain a U.S. merchant fleet in support of U.S. foreign commerce and capable of serving as a naval auxiliary in event of national emergency. Based on studies of foreign costs, present subsidy board regulations provide for payment of operating subsidies to equate the difference between the fair and reasonable U.S. cost of insurance, maintenance, repairs, wages, and subsistence of officers and crew, and the estimated foreign cost of the same items if the vessels were operated under foreign registry. The 1970 estimate of subsidy payments will provide financial support for the 14 operators who presently have operating contracts with the Maritime Administration. This level of funding will provide for the continuation of berth services of our foreign commerce.

Third, expenses necessary for research and development activities, \$15 million: The research and development projects of the Maritime Administration are designed to improve the competitive position of the American merchant marine while reducing the Government's share of the costs of its construction, operation, and maintenance. The 1970 program calls for an expansion of Government-industry cooperative program efforts and will concentrate on advanced shipping systems, development of intermodal transportation, modernization of cargo handling methods, and similar technological advancements.

Fourth, reserve fleet expenses, \$5,174,000: Included funding provides for the preservation and security of ships held for national defense purposes, distributed among six active fleet sites. Periodic representation of hulls, machinery, and electrical components, combined with continuous application of cathodic protection to the bottoms, are methods employed in maintaining the ships for further service. In fiscal year 1970 preservation work will be performed on approximately 626 ships retained for national defense purposes. Custody is also provided for several hundred ships awaiting disposal.

Fifth, maritime training at the Merchant Marine Academy at Kings Point, N.Y., \$6,164,000: A 4-year course is provided to train cadets for service as officers in the U.S. merchant marine, including 1 year of sea duty designed to qualify graduates for licenses as merchant marine deck or engineering officers. About 200 cadets are graduated annually.

Sixth, financial assistance to State marine schools, \$2,040,000: This program provides for training of cadets at State marine schools for service as officers in the U.S. merchant marine. The program is aimed at a level of graduating approximately 400 deck and engineering officers each year. The five participating State schools, Maine, Massachusetts, New York, Texas, and California, prepare officers for our merchant marine requirements. Additionally, a nucleus of highly trained officers is provided to man our merchant ships in times of national emergency.

Seventh, reimbursement of the vessel operations revolving funds for losses resulting from expenses of experimental ship operations, \$2 million: This will provide obligatory authority to reimburse experimental operation of the NS *Savannah*. In previous years this authority was a specific provision within the appropriation for research and development.

It is imperative that we commence rebuilding our merchant marine fleet and, Mr. Speaker, I urge the adoption of House Resolution 407 in order that this important legislation may be considered.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as stated by the distinguished gentleman from California (Mr. SISK) House Resolution 407 does provide an open rule for 2 hours of debate for the consideration of H.R. 4152, the Maritime Authorization Act of 1970.

Mr. Speaker, the purpose of the bill is to authorize for fiscal 1970 the Maritime Administration's appropriations.

As introduced, the bill authorized expenditures of \$262,966,000. The committee has increased this figure to \$387,378,000. Almost all of this increase is for use in ship construction.

The committee bill increases the authorization for construction or reconstruction of vessels from \$15,918,000 to \$145,000,000. It also increases the research and development authorization from \$7,700,000 to \$15,000,000. One category authorization is reduced from \$224,000,000 to \$212,000,000 as the committee believes the original amount would not be used in fiscal 1970. This is the cost differential subsidy program for American shipowners.

All other authorizations in the reported bill are identical with the bill as introduced. These include:

Reserve fleet expenses.....	\$5,174,000
Merchant Marine Academy.....	6,164,000
Assistance to State maritime schools	2,040,000
Revolving fund operations.....	2,000,000

The committee supports its large increase in the construction authorization

with the clear evidence of the evergrowing obsolescence of our merchant fleet. The committee also recommends the use of the funds frozen over the last 3 years which have been appropriated for ship construction but unused. There is currently about \$101,600,000 so frozen, making a grand total recommended by the committee of \$246,600,000 for ship construction and modernization in fiscal 1970.

The committee report points out that at present levels of replacement, within 5 years the number of American ships which are less than 25 years old will fall from 663 to only 244.

The administration supported the bill as introduced with one amendment which reduced the differential subsidy. This was partially accepted by the committee.

The bill was reported unanimously.

Mr. Speaker, I support H.R. 4152 and urge the adoption of the rule.

Mr. SISK. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. GARMATZ. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4152) to authorize appropriations for certain maritime programs of the Department of Commerce.

The SPEAKER. The question is on the motion offered by the gentleman from Maryland (Mr. GARMATZ).

The motion was agreed to.

The SPEAKER. The Chair designates as Chairman of the Committee of the Whole the gentleman from New York (Mr. GILBERT), and the Chair requests that the gentleman from Missouri (Mr. RANDALL), temporarily assume the chair.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 4152, with the Chairman pro tempore (Mr. RANDALL) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN pro tempore. Under the rule, the gentleman from Maryland (Mr. GARMATZ) will be recognized for 1 hour and the gentleman from California (Mr. MAILLIARD) will be recognized for 1 hour.

The Chair recognizes the gentleman from Maryland (Mr. GARMATZ).

Mr. GARMATZ. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill, H.R. 4152, to "authorize appropriations for certain maritime programs of the Department of Commerce," is generally referred to as the "maritime authorization bill."

The bill was reported by our committee on May 9, with an amendment in the nature of a substitute text.

Under existing law, only such sums as the Congress might specifically authorize may be appropriated for several spe-

cific programs administered by the Maritime Administration. They include such matters as vessel construction, vessel operations, reserve fleet expenses, research and development, maritime training at the Merchant Marine Academy and the State marine schools, and the vessel operations revolving fund.

This bill—reported with an amendment in the nature of a substitute text—is identical to the bill as recommended by executive communication No. 269, dated January 15, 1969, and as introduced on January 23, 1969—except for changes in the authorization amounts for—item No. 1, ship construction aids; item No. 2, payment of obligations for operating subsidy; and item No. 3, expenses necessary for research and development.

The items dealing with reserve fleet expenses, maritime training at the Merchant Marine Academy at Kings Point and the five State marine academies in New York, Massachusetts, Maine, Texas, and California—and the vessel operations revolving fund—remain unchanged.

The bill as introduced would have authorized a total of \$262,996,000 for the previously indicated activities of the Department of Commerce administered by the Maritime Administration.

The bill as reported increases the total amount by \$124,382,000—to a total sum of \$387,378,000.

Four days of public hearings were held by the committee on April 15, 16, 17, and 18, during which time testimony was heard from representatives of the Secretary of Commerce, Maritime Administration, and all major segments of the maritime industry.

Specifically, the reported bill amends the budget request of the bill as introduced as follows:

Item No. 1. The bill as introduced would have authorized only \$15,918,000 for acquisition, construction, or reconstruction of vessels, construction-differential subsidy, and cost of national defense features thereto.

This amount, together with \$101,600,000 of unobligated funds which had been carried over for several years, is estimated to be sufficient to provide construction subsidy to build from eight to 10 ships.

The amount of money and the number of ships to which it would contribute, is totally inadequate in the light of the continuing drastic decline of the American-flag merchant marine. The table on page 8 of the report graphically illustrates this decline.

Industry sources provided evidence that if funds were available, at least 82 large, modern ships of various types could be contracted for during fiscal year 1970, for some 19 private owners. See table on page 4 of the report.

While recognizing the great needs for new vessels—both to replace and augment our aging fleet—the committee also gave careful consideration to the present period of extreme competition for appropriated funds.

Accordingly, this item was increased from \$15,918,000 to \$145,000,000 which—depending upon the exercise of administrative discretion in approving pending

applications—would be sufficient to assist in the construction of 18 to 22 new and modern vessels—which should include some very much needed new bulk carrier construction—as well as the new liner types such as LASH, sea barge, and container ships.

There are indications that the administration is currently reviewing maritime program needs—and that in the reasonably near future—recommendations may be made for a program which will reverse the present perilous decline. The American-flag merchant marine is currently carrying less than 6 percent of our waterborne foreign commerce.

Item No. 2. Payment of obligations incurred for operating-differential subsidy.

The Maritime Administrator stated that as a result of a recent budget review by the new administration—\$29,000,000 should be pared from the original bill—due to lack of subsidy accruals during the 2-month-long longshoremen's strike—and the increased productivity and efficiency of the newer vessels which are coming out.

With this, the committee agreed.

However, there are subsidized—and presently unsubsidized—operators with fully processed pending applications—whose needs should be considered in the national interest as steps to contribute to stemming the obsolescence of our American-flag fleet.

In order to provide the availability of operating subsidy funds to operators whose applications might be approved and become effective during fiscal year 1970—the committee recommends in the reported bill that the operating subsidy authorization should be in the amount of \$212,000,000.

As noted, this is a decrease of \$12,000,000 from the original proposed authorization—but an increase of approximately \$17,000,000 over the reduced amount recommended by the Maritime Administrator.

Item No. 3. Expenses necessary for research and development activities.

The committee increased this item from \$7,700,000 to \$15,000,000.

Considering the inadequacy of research and development programs in the recent past, the recommended increase is extremely modest.

On the other hand, it was felt that a higher figure probably could not be effectively used during fiscal year 1970—in view of the time it takes to plan, initiate, and carry forward with new research and development projects.

Mr. Chairman, the committee report sets forth in greater detail the matters involved in this legislation.

The bill, as amended, was approved unanimously by our committee, in the light of the needs which have been known for a number of years. We feel it is extremely modest.

I urge its enactment.

Mr. MAILLIARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to join our distinguished chairman of the Merchant Marine Committee (Mr. GARMATZ) in

support of H.R. 4152, the authorization measure for certain programs of the Maritime Administration. This bill, as introduced, of course represented the viewpoint of the past administration and was consistent with the low priority which it gave to our merchant marine. As our distinguished chairman has stated, the Committee on Merchant Marine has unanimously reported this bill, amended to reflect the high priority which that committee and the Congress have consistently attached to the critical need for a modern merchant marine.

I think it is appropriate at this time, at the beginning of a new administration, to reflect upon the condition of our merchant marine. About 12 years ago, we had just embarked upon an ambitious ship replacement program which would have by now replaced our entire subsidized liner fleet of some 300-odd ships. Had this program been carried out, at least this one vital segment of our merchant marine would consist entirely of modern, efficient ships, all less than 10 years of age. To its credit, Congress has never wavered in its support of this program. What were considered to be overriding budgetary considerations at the Executive level, however, have resulted in minimal requests for funds in hearings before the Appropriations Committee. Let me state at this point, Mr. Chairman, that I am in no way criticizing our distinguished colleagues on the Appropriations Committee. Indeed, they have been of great assistance in seeing that this program was not completely scuttled. We have also witnessed occasions when budgetary restrictions have been imposed which prevented the Maritime Administration from utilizing funds actually appropriated by Congress. Under such circumstances, it would appear to be an exercise in futility for the Appropriations Committee to fund this program at the level authorized.

As a result of the failure of the White House and Cabinet-level officials to recognize the significance of a strong merchant marine, both for defense and for the well-being of our economy, we have now reached the point where American ships are transporting only slightly more than 20 percent of our liner cargo and only about 5.6 percent of our overall total foreign trade. We are thus dependent on foreign-flag ships to transport almost 95 percent of our imports and exports.

May 22 again has been proclaimed National Maritime Day. The theme this year is "American Ships—Freedom's Lifeline." The concept of a lifeline is particularly appropriate when considering America's vital interest in developing a strong merchant marine. Whether we like it or not, the United States has been cast in the role of thwarting worldwide Communist aggression. At the same time, the growth of our own economy has significantly increased our dependence on ocean shipping.

Vietnam, of course, clearly illustrates the importance of our merchant marine as the key to freedom's lifeline. Over 98 percent of all supplies for the maintenance of our Armed Forces in

Vietnam have moved by ship, as well as large numbers of our troops. This effort involves our privately owned merchant marine, Government ships broken out of the reserve fleets, and the MSTs nucleus fleet. The Vietnam seallift has succeeded, however, at the expense of other areas of legitimate U.S. national concern.

In order to sustain this lifeline, we have been compelled to divert ships from their normal trade routes, further reducing what were already inadequate sailing schedules. This, in turn, has made it increasingly difficult for American-flag liner companies to remain competitive with foreign-flag carriers.

The hearings conducted by our committee clearly illustrated the woeful inadequacy of the request for construction-differential subsidy. As you know, the \$15 million request contained in the bill as introduced took into consideration a carryover of \$101.6 million appropriated for fiscal year 1968. That money was intended to build ships which we should be launching today. Therefore, in reality, the amount requested in this bill would only cover one to two new ships over the number which we anticipated would be built when that \$101 million was appropriated. If we are to have any hope of seeing the ship replacement program come anywhere near its intended goal, we must discount that \$101 million from our consideration of what should be authorized and appropriated this year. The figure our committee arrived at of \$145 million is really a bare minimum to reinstitute a realistic replacement program.

The amount requested by the Maritime Administration for operating-differential subsidy throws a highly significant light on the benefits which can be expected to flow from a revitalized ship replacement program. H.R. 4152, as introduced, would have provided \$224 million for operating-differential subsidy for the 14 currently subsidized liner companies. The Maritime Administrator, Mr. Gibson, testified before our committee that this sum could be reduced by \$17 million without reducing the number of voyages to be performed by the subsidized operators. The reason for this reduction in subsidy is simply the fact that the ships built under the vessel replacement program are more productive, more efficient, and therefore are more economically competitive with foreign-flag carriers. The amount of subsidy required to offset foreign-flag operators' lower costs is therefore less.

There have been significant developments in the concept of transporting general cargo. These include container-ships, seaborne ships, and LASH or lighter-aboard-ship vessels. Examples of this type of vessel are the container-ships to be constructed for American Export Isbrandtsen Lines. These ships will have a service speed of 25.5 knots and will be capable of carrying 1,600 20-foot containers. Six of these ships will have the equivalent productivity of 15 traditional break-bulk vessels. The increased productivity of these ships, together with the high degree of automation, will mean that the operating-differential subsidy cost to the Government will be substantially reduced. The 15 break-bulk vessels which these six container-ships will re-

place now receive an annual operating-differential subsidy payment of approximately \$10 million, whereas the six container-ships will receive an annual payment of approximately \$3.2 million. At the same time, these new ships will carry approximately 60 percent more cargo. This is just one example of the progress that is being made as a result of our vessel replacement program. The United States has been a leader in the development of these new designs, but our foreign competitors have been quick to follow our lead.

Mr. Chairman, as indicated in the report accompanying H.R. 4152, the funds recommended for construction-differential subsidy should enable the Maritime Administration to contract for the building of 18 to 22 new ships. The exact number will depend upon the needs of the carriers and the designs agreed upon. Assuming this program will be fully funded, a fleet of 18 to 22 ships of the type I have just described will be able to replace between 50 and 60 of our 25-year-old Victories, C-1's and C-2's. It must be recalled, however, that these ships, if we decide to build them, will not be laid down until 1970 and will not begin to enter service until 1973. By then, our active liner fleet under 25 years of age will have declined to less than 250 ships from its present level of approximately 600. Clearly this is a bare minimum program which your Committee on Merchant Marine is recommending.

Our liner fleet of subsidized ships is only one segment of our merchant marine. The balance of our fleet has been completely ignored. This includes the ships needed to transport the 350,000,000 tons of bulk commodities which are imported and exported by the United States annually. In this area, we have placed some reliance on American-owned ships that are operated under foreign flags. These, of course, include principally oil tankers registered under the flags of Panama, Liberia, and Honduras. These ships and many more under other flags maintain the vital flow of oil, bauxite, iron ore, and innumerable other commodities which the United States requires in everincreasing quantities to satisfy the needs of our economy.

During a period of international crisis, history has shown that a heavy price is paid by any country which must rely on foreign tonnage to transport its essential commodities. Not only may the tonnage not be available, but freight and charter rates have been shown to escalate an average of 400 percent. This reliance on foreign-flag carriers has been allowed to exist for too many years, and we will not be able to remedy it overnight. President Nixon has expressed his concern and our committee has been informed that a complete review of our maritime requirements and a program to fulfill those requirements is now underway. Hopefully, we have reached a turning point, and we will now witness an accelerating effort to revive all segments of our merchant marine.

Should the President, after completing his review of our maritime posture, decide to implement any new program immediately, the authorization level recom-

mended by your Committee on Merchant Marine will enable the President to seek funds to supplement the present budget request without the necessity of going through the authorization process again during this session of Congress. I, therefore, urge my colleagues to support H.R. 4152 as reported by your Committee on Merchant Marine.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. MAILLIARD. Mr. Chairman, I yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, I thank the gentleman for yielding. I compliment the committee and the gentleman from California and his colleagues for their leadership in bringing this to the floor of the House. I think it recognizes the need for some new additional means to protect the U.S. merchant marine.

Mr. Chairman, I would like to raise a question or two in regard to the cargo preference provision which became effective as a result of an Executive order by President Kennedy shortly before his death. This was made effective to facilitate the Russian wheat sale of that period. It applied not only to the grain sales to the Soviet Union, but also to the grain trade with certain other countries.

It did provide that in such transactions, one-half of the shipping would be in U.S. vessels, if U.S. vessels were available. I am sure the motivation was very commendable. It was to protect the U.S. merchant marine, but it has had quite a different effect. It has effectively shut off this grain trade entirely. It has not helped the U.S. merchant marine at all, because it has effectively shut out U.S. merchants from this trade. I just wondered if the committee in its deliberations considered this and if the committee has any thoughts as to whether the Executive order should stand or not.

Mr. MAILLIARD. Mr. Chairman, we have not considered it, but this committee produced many years ago the basic so-called preference law which applies to AID cargoes.

Mr. FINDLEY. Yes.

Mr. MAILLIARD. But it is not very effectively applied to commercial sales.

No. I think our committee is always very pleased—but I can remember when President Kennedy made that announcement, that I was slightly amused, because it was perfectly obvious to me that there were not sufficient ships available, and there could not be, to carry the kinds of quantities we were talking about in that particular sales program.

So with that escape clause, that if the U.S. flagships were not available, that foreign ships could be used, I can see no particular hindrance in that to the trade.

Mr. FINDLEY. This increases the cost very substantially to any merchant who is trying to compete in that business. It adds about 25 percent to the shipping costs, which are a major part of the money involved in the transaction. It has had the effect of simply denying access to this business to the U.S. farmer.

I had hoped some thought could be given to going into this.

Mr. MAILLIARD. I am not quite clear how the President of the United States

can by Executive order tell a commercial trader how he is going to ship commercial cargoes. I do not believe he can do that. I think it had to apply only where there was a government-to-government transaction.

Mr. FINDLEY. It was an exception, but it applied to commercial transactions, and it still stands, and it has had the effect of cutting us out, I might say, from competing for 1 billion bushels of wheat business in the last calendar year alone. So this is an item of great importance to the American farmer.

I think the way the President was able to effect this was the requirement that sufficient licenses be issued to any of the countries involved.

Mr. GROVER. Mr. Chairman, will the gentleman yield?

Mr. MAILLIARD. I yield to the gentleman from New York.

Mr. GROVER. Mr. Chairman, I was not here to hear the remarks of our distinguished chairman, who has worked so hard for the merchant marine. I know there is no great controversy about this legislation. Since I did not hear the preliminary remarks, I will say I know my colleague, the gentleman from California, and/or my colleagues on the committee, as well as many in the House, are well aware of the crisis which affects the merchant marine industry.

In fact, I believe we now carry 6.5 or 7 percent of our shipping in American-flag ships. That is a cause for concern, but of much greater concern to me is that we are going headlong into obsolescence in our strategic reserve fleet with no plan right now to put new ships into that reserve. Of course, the impact on our balance of payments we all know about, but I think the fact that we are having a relatively quiet day today gives us an opportunity to underscore the fact that we face a severe crisis in our maritime industry, and it is an industry in which many countries not friendly to us are going full speed ahead in strengthening their shipping on the high seas.

Mr. MAILLIARD. I appreciate the gentleman's remarks. I might comment, to strengthen what he has said, if my understanding is correct and if our information is correct, about now, or if not now, within the next few months, the Soviet Union will pass the United States of America in tonnage of its world shipping fleet. And their fleet is brand new, or almost 90 percent brand new, whereas ours is still very largely made up of World War II vessels. I find the prospect as to the potential for some pretty devastating economic warfare quite frightening.

Mr. GROVER. I thank the gentleman.

Mr. GARMATZ. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. DOWNING), a member of the committee.

Mr. DOWNING. Mr. Chairman, I rise in wholehearted support of this legislation, and I want to compliment the distinguished chairman and ranking minority member for the work which they and the other members have put into it.

Mr. Chairman, it seems to me that each year for the last 6 or 7 years some

of us in this body have risen on similar occasions, spoken our piece and resumed our seat much in the style of the old-time radio announcer who always reminded his audience to "tune in tomorrow, same time, same station." The chief difference is that we would come back not the next day but the next year. That time has now arrived, and here we are once again.

Congress has always reacted—the fault lies elsewhere. We are not, however, singing the same old refrain. The tune is quite similar, but it is pitched in a higher key and the tempo has been increased. This is not the same old merchant marine song. We are trying to sing an upbeat tune, in keeping with the ever-increasing tempo of this modern world, a tempo which year after year has left the United States literally waltzing on the high seas while our competitors have all danced away from us.

At one time we were the leader. We set the tempo and called the tune, and the rest of the world tried to keep up. This is certainly not the case today. Our generation has become the "lost generation" as far as a national maritime is concerned.

I am neither hawk nor dove, but my blood boiled just as much as any American's when the North Koreans took the *Pueblo*. Like so many of you, I became almost apoplectic over the shooting down of our Navy reconnaissance plane a few weeks ago. I would have liked to have been able to retaliate. I do not mean that I would have called for it, but I would have preferred to know that we had the capability if retaliation had been called for. Militarily we do, but logistically we do not.

The military tells us that we could muster the necessary commercial vessels to sustain a supply line to Korea in addition to the present line which stretches to Vietnam. However, in order to do this, it would mean pulling every commercial vessel away from our already thin international trade routes. We would lose the small benefit that these vessels bring to our balance of payments. Worse than that, we would retire completely from world commerce. Our imports and exports would be at the mercy of foreign flags. No nation in such a position could survive very long.

We are fortunate in so many respects that we have not had to undertake another war. We will be more fortunate when there is no longer a need for the bridge of ships to Vietnam, but our only hope for a promising future on the high seas is to build ships at a pace which will surpass the retirement rate of our present fleet. That is why I voted in committee to increase the authorization to the figure that is before us today. That is why I ask most earnestly for the support—not of a majority, but in unanimity—for this authorization bill.

Preparedness has always been the watchword of the strong. My cry is for preparedness on the high seas. Construction of 25 to 30 new ships must be started during the next fiscal year if we are to prepare for the future.

Mr. MAILLIARD. Mr. Chairman, I yield 5 minutes to the gentleman from Washington (Mr. PELLY).

Mr. PELLY. Mr. Chairman, with regard to H.R. 4152 which was reported favorably by the House Merchant Marine and Fisheries Committee, I want to make it clear my support for the committee amendment raising the authorization for construction differential subsidy, and so forth, is based on the Maritime Administrator's statement that he expects the President to recommend a new maritime program sometime this summer.

In other words, recalling President Nixon's campaign statement that his policy would be one to enable American-flag ships to carry much more American trade at competitive world prices, I think the increases over the original Nixon budget are justified so that later, if and when the President sends over a supplemental budget request to provide for construction of more ships, there would be sufficient authorization so the Appropriations Committee, if it desired to do so, could add funds in a supplemental bill later on. And, incidentally, the amount of \$145,000,000 in lieu of \$15,918,000, is based somewhat on what our committee felt was feasible in fiscal 1970. We had in mind, too, that, due to the previous administration dragging its feet, there is \$101,600,000 left over from fiscal year 1968 which is available for this purpose.

Mr. Chairman, our committee realizes that two-thirds of our merchant fleet is beyond a useful life. A new, modern merchant ship today, in many cases, will do the work of three obsolete vessels because of faster turn-around time and other features.

The United States cannot count on foreign-flag ships for several reasons, including national defense and the drain otherwise on our international balance of payments. At present, American-flag ships carry only 5.6 percent of U.S. cargoes. This should be at least 30 percent.

The Congress has every reason to believe that President Nixon will offer a program to provide, to quote his own pre-election words, "new departures, new solutions, and new vitality for American ships and American crews on the high seas of the world."

Mr. Chairman, I urge my colleagues to support this bill and thereby afford him the opportunity to fulfill those words.

Mr. GARMATZ. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania (Mr. CLARK), a member of the committee.

Mr. CLARK. Mr. Chairman, I fully support the remarks made by our distinguished chairman, concerning H.R. 4152.

We members of the Merchant Marine and Fisheries Committee have been acutely aware of the totally inadequate level of funding that this and prior administrations have allocated in the recent past for merchant ship construction. I do not feel this vital area can be overemphasized, because new ship construction is the core of the whole maritime structure of this country. Recent figures compiled indicate that today the total of U.S. merchant fleet is less than 900 vessels over 1,000 gross tons.

In less than 3 years, some 600 ships

or two-thirds of the American merchant marine will be more than 25 years old, obsolete and uneconomical. This block obsolescence coupled with the lack of any positive new ship construction in quantity, creates a substantial threat to our Nation's economy and security. In fact, at present, our replacement program is behind by at least 100 new vessels.

During our hearings on this bill, the Maritime Administrator, Mr. Andrew Gibson, stated:

Very very few of the ships in the reserve fleet are worth saving and reconditioning. The AP-5's Victory troop ships could be made available but at an exorbitant cost.

Thus the so-called reserve fleet, about which I am sure you all have heard in recent years, has been reduced to practically an "imaginary" auxiliary to the merchant fleet. One more reason for this Nation to embark upon a sensible ship construction program immediately.

It is for these reasons, and many more equally as important, but, too numerous to mention in detail here, that we on the Merchant Marine Committee have increased the authorization for ship construction from \$15,918,000 to a figure of \$145 million for fiscal year 1970.

To quote relative statistics, the administration's figure of \$15,918,000, plus a carryover of some \$101 million from previous years for construction-differential subsidy would be enough to build merely eight or nine vessels in fiscal year 1970. However, we feel that by increasing this figure to \$145 million, plus the carryover, we can embark on a shipbuilding program that is realistic, and in tune with any real program that may emerge in the near future. It would reflect the contract for the construction of from 18 to 22 new, modern vessels depending upon the type and mix during fiscal year 1970.

Mr. GARMATZ. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut (Mr. ST. ONGE), a member of the committee.

Mr. ST. ONGE. Mr. Chairman, the House will note that this bill has been substantially increased by the committee as a result of hearing witnesses from all areas of government, labor, and industry. The major increase is from approximately \$16 to \$145 million for ship construction. The original item would provide for the construction of eight to 10 replacement vessels as compared with 11 last year, whereas the amended proposal would find 31 new ships and 17 major conversions.

We, who have been following the affairs of our merchant marine over the years, are becoming more and more concerned over its deterioration. True, our best ships are the best in the world, but our average ships rate toward the bottom of the scale. A considerable portion of our fleet dates back to World War II, and whatever the shortcomings of other types of emergency construction may have been, our ship construction was wonderful since these ships not only performed through that emergency but have been utilized ever since in the Korean and Vietnam emergency and throughout the intervening periods of

relative peace. But, it must be recognized that even the products of American shipbuilders cannot last forever, and the time is past when we should have embarked on their replacement. Ships were used in the Vietnam lift that were overdue for the scrap heap and it is certain that they will be unable to perform should another emergency arise.

It is essential that we provide a bare minimum of sea lift for the future and this cannot be done under the bill as submitted to the committee providing for the replacement of only eight to 10 ships. It is essential for our well-being, both from the point of view of our commerce and our defense, to start on a program to provide an adequate number of vessels. The bill as amended by the committee provides for such a start. Admittedly, it is insufficient to meet our minimum needs, but if we provide this amount for the current year, it can be increased in the future as needed.

I strongly urge the House to consider this bill favorably, since I am firmly convinced that the choice before us is a start to an adequate merchant marine or almost total elimination from the seas.

For my part, there is no choice. I foresee nothing but harm from the current practice of cutting down each year the number of ships being built. I strongly urge my colleagues to give favorable consideration to this legislation.

Mr. SCHADEBERG. Mr. Chairman, I rise in support of the bill before us today—H.R. 4152—authorizing appropriations for our maritime program.

Every Member of this body is aware of the crisis facing our maritime industry today. Since the end of World War II, when the merchant fleet was no longer needed in the war effort, it has received the minimal attention of this Congress. Eighty percent of today's American merchant ships were built more than 20 years ago. Our merchant marine is obsolete, inefficient, and inadequate. Among the world's merchant fleets, the American fleet has dropped to fifth place; in shipbuilding, this country now ranks an inglorious 14th. The Soviet Union, by contrast, has a merchant fleet of approximately the same size as ours but 50 percent of its ships are less than 5 years old. It has expanded its shipbuilding program and its marine education program; it has constructed the largest shipbuilding yard in the world; it is building faster and more versatile ships than the United States. Seven thousand students are enrolled in schools for marine engineers and naval architects in the Soviet Union—23 times as many as in this country. It is making an all-out effort to establish its supremacy on the high seas.

In view of this crisis in the maritime industry, the Merchant Marine and Fisheries Committee, of which I am a member, increased the budget request for the shipbuilding program from \$16 to \$145 million for the purpose of revitalizing our merchant marine. It is contemplated that this authorization will make possible the construction of between 18 and 22 new ships. The committee has also recommended an au-

thorization of \$212 million for the operating-differential subsidy and \$15 million for research and development.

Let me clarify that, while I am deeply aware of the critical need for a viable maritime program, from both a strategic and an economic view, I am not happy about the large subsidies which the Federal Government is forced to offer shipbuilding companies in order to achieve our goals. Blame for this policy has been placed traditionally at the door of the unions. Part of the high labor costs, however, must be attributed to the fact that American shipyards are operating on an inefficient level of production. They are using outmoded equipment and archaic methods of operation. We could take some valuable lessons from the forward-looking maritime nations of the world which are building more ships and larger ships at a proportionally lower cost than we are. It appears that our shipbuilding companies do not have the necessary incentive to modernize their yards and to gear up for volume production. Perhaps one solution would be to award contracts for 10 ships each to two yards each year, thus offering these yards an economic impetus to overhaul their antiquated equipment and methods.

I will support the program at this time, but I believe that the maritime industry should be on notice that, if excessively liberal subsidies continue to be necessary to provide this country with an adequate merchant fleet, it will be necessary to look elsewhere for answers to this problem.

Mr. FEIGHAN. Mr. Chairman, with some exceptions such as in the field of containerization, and container ships, our merchant marine is woefully deficient and weak.

Other nations are building fast ships—they are building container ships—and very shortly our lead in both of these fields will disappear.

With respect to the balance of our fleet, it consists of vessels dating back to World War II. They performed yeoman service during that conflict and have been serving ever since. Progress has long since overtaken them and they are showing the effects of age.

The bill here as submitted by the administration called for \$15,918,000 for construction-differential subsidy for the coming year. There is a balance of \$101 million that has been arbitrarily withheld by previous administrations in this category, but even this total of some \$117 million is insufficient. It will provide for construction of but eight to 10 replacement vessels—down one from last year. It is clear that this small number will only serve to slow the decline in our fleet. What we need, on the contrary, is an increase so that at some period in the future we may be in a position to look forward to an adequate fleet—adequate not only for our commercial needs, but also defense.

We have been told in the past that the advent of newer, larger, faster planes would eliminate the need for merchant ships in emergencies. While this may be true at some indefinite time in the future, the cold fact remains that 98 percent of the materiel and a very sub-

stantial portion of the troops serving in Vietnam have been conveyed there by ship. Unhappily, another Vietnam in the future will find us without the means of supply. Many of the ships used in the Vietnam lift are in such shape that future use is unthinkable, both from an expense and safety standpoint. We must be in a position to provide newer and faster ships for such service.

The condition of our commerce is too well known to require comment. We require many more ships to maintain even the pitifully small percentage of our cargoes carried under the American flag.

The committee, to start to meet this problem, increased the ship construction item from \$15,918,000 to \$145 million. I am all too aware of the conflicting needs of various agencies of our Government, but this is one that we can ill afford to stint. Ships cannot be built overnight, and unless we make a start toward a reasonable program, we are going to wake up some morning with a very substantial requirement and no ships to meet it.

We of the committee had had the opportunity to hear the varying viewpoints with respect to expenditures, and we are all firmly convinced that the bill, as amended, represents the utter minimum that will provide some degree of safety to us.

The authorization of \$145,000,000 for ship construction will not only help the local steel industry of Cleveland but will help reverse the trend which now places the United States as 16th in the world's shipbuilding statistics. Our Merchant Marine is presently carrying less than 8 percent of our foreign waterborne trade.

Mr. BYRNE of Pennsylvania. Mr. Chairman, I rise in support of H.R. 4152, the maritime authorization bill. I join my chairman and the other members of the Merchant Marine and Fisheries Committee over their concern because of the declining posture of the U.S.-flag merchant fleet.

After World War II, this country enjoyed the largest and most productive merchant fleet in the history of the world. But today, this situation has come "full circle"—we no longer can enjoy that luxury of 25 years ago. Ironically, two-thirds of our present fleet is made up of these same vessels that were part of that postwar fleet. Needless to say, these vessels are overaged, uneconomical and just a hair away from the scrap heap.

There is no question in my mind that a critical need for new vessels is necessary and desirable to inject resilience and life into our aging U.S. merchant fleet. The time for action is now.

H.R. 4152 will provide for the construction of at least 18 to 22 new, modern vessels. Of course, this is not the complete answer to this Nation's critical need for new merchant tonnage, but it is a very good start.

I strongly urge my colleagues to give favorable consideration to this legislation.

Mr. PHILBIN. Mr. Chairman, I want to compliment the distinguished chairman and his committee for bringing this

maritime authorization bill to the floor for action.

There are few things more disturbing at this time than the steady decline over a period of years of the maritime strength of this Nation, which is an important, integral part of the national defense.

The sad fact is that our overall maritime power is receding while that of the Soviet Union is rapidly advancing.

Moreover, it should be noted that the very large Soviet fleet is young and modern, whereas most of our American fleet is old and, in many respects, outmoded.

While this bill will be very helpful, I think we must give considerably more attention to the problem of building up our American merchant marine, and I urge the committee to continue its efforts to develop a program that will enable us to build our merchant marine at a faster rate so that we can stay on a parity with other shipping in the world and be in a position, when it is required, to carry American goods in American bottoms and have afloat an adequate, modern merchant marine.

I am pleased to support this bill and am sure that the House will overwhelmingly adopt it. It is a forward step and one that should be followed up by additional action to upgrade, modernize, and build to satisfactory levels our American merchant marine.

Mr. MAILLIARD. Mr. Chairman, I have no further requests for time.

Mr. GARMATZ. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

H.R. 4152

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That funds are hereby authorized to be appropriated without fiscal year limitation as the appropriation Act may provide for the use of the Department of Commerce for the fiscal year 1970, as follows:

(a) acquisition, construction, or reconstruction of vessels and construction-differential subsidy and cost of national defense features incident to the construction, reconstruction, or reconditioning of ships, \$15,918,000;

(b) payment of obligations incurred for operating-differential subsidy, \$224,000,000;

(c) expenses necessary for research and development activities, \$7,700,000;

(d) reserve fleet expenses, \$5,174,000;

(e) Maritime training at the Merchant Marine Academy at Kings Point, New York, \$6,164,000;

(f) financial assistance to State marine schools, \$2,040,000; and

(g) reimbursement of the vessel operations revolving fund for losses resulting from expenses of experimental ship operations, \$2,000,000.

The CHAIRMAN. The Clerk will report the committee amendment.

COMMITTEE AMENDMENT

The Clerk read as follows:

Committee amendment: Strike out all after the enacting clause and insert in lieu thereof the following:

"That funds are hereby authorized to be appropriated without fiscal year limitation as the appropriation Act may provide for the

use of the Department of Commerce, for the fiscal year 1970, as follows:

"(a) acquisition, construction, or reconstruction of vessels and construction-differential subsidy and cost of national defense features incident to the construction, reconstruction, or reconditioning of ships, \$145,000,000;

"(b) payment of obligations incurred for operating-differential subsidy, \$212,000,000;

"(c) expenses necessary for research and development activities, \$15,000,000;

"(d) reserve fleet expenses, \$5,174,000;

"(e) Maritime training at the Merchant Marine Academy at Kings Point, New York, \$6,164,000;

"(f) financial assistance to State marine schools, \$2,040,000; and

"(g) reimbursement of the vessel operations revolving fund for losses resulting from expenses of experimental ship operations, \$2,000,000."

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I take this time to address a question or two to the chairman of the committee.

It is my understanding that this bill is somewhat above the budget and that the purpose of this additional funding or authorization for funding is in anticipation of a program to come later this year; is that correct?

Mr. GARMATZ. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Maryland.

Mr. GARMATZ. I would hope so. I would say to the gentleman from Iowa, I think the gentleman is correct.

Mr. GROSS. And, if the program does not make its appearance later in the year, will the additional funding be requested and the money spent for some other purpose? If the gentleman will explain briefly what would take place in that event I would appreciate it.

Mr. GARMATZ. I would hope that the administration would be more maritime minded than the past administration. I am optimistic they will come up with a program. The money that we now have will effectively carry us over, but we have in mind the subsidies with this large increase. What we are really doing in adding, roughly, from 8 to 10 percent to 18 to 20 percent of ship construction. That is where the majority of the money is. There are quite a few companies who will request subsidies for shipbuilding and I am sure some of those will be given consideration. If that is done, that will be used up probably even before the program comes forth that we are expecting from the new administration.

Mr. GROSS. I thank the gentleman.

Mr. MAILLIARD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. MAILLIARD. Obviously, I think that the basic question which the gentleman from Iowa has asked would have to be presented to the Committee on Appropriations, primarily, as to whether they want to take the situation as it now stands and then wait and see if there is a request for a supplemental appropriation, or whether they want to appropriate more money now than what might come later. It would be in their hands and they have the authority to do it.

Mr. GROSS. As I understand the proposal, the timing of it might not coincide with the actions of the Appropriations Committee.

I am merely trying to clarify what may be the situation with reference to matters that we cannot foresee here today with respect to the operations of the Committee on Appropriations.

I would like to get some feel of what will happen in the event the program does not come up at all or in the event that the Committee on Appropriations presents a bill to the House prior to the submission of the new program.

Mr. MAILLIARD. We do not know, of course, as I stated. We leave them flexibility here to prepare for a program, if we get one.

Mr. GROSS. I appreciate that information and thank the gentleman.

Mr. PICKLE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to ask the chairman of the committee a question which has been presented to me.

As I understand the authorization, it is for the acquisition, construction, and reconstruction of vessels, or payment of obligations incurred for operating differential subsidies and for certain expenses necessary for research and development activity.

My concern is that in the construction of these vessels that we are not here at this point granting any kind of a shipping subsidy insofar as commodities are concerned that might be in competition with merchants here in our own country.

By way of an example, it is rumored in my State that these new vessels might bring in to this country large deposits of calcium and that they might be subsidized in competition with our own merchants.

I assume, however, that this bill is primarily for construction and the purposes which I have previously mentioned and in no way involves subsidies for a particular commodity?

Mr. GARMATZ. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Maryland.

Mr. GARMATZ. In answer to the question which has been posed by the gentleman from Texas, the answer is "No." Second, we have no authority in the field where subsidies are concerned.

Mr. PICKLE. This would be a matter, then, for the Maritime Commission?

Mr. GARMATZ. That is correct.

Mr. PICKLE. I thank the gentleman. I will be in correspondence with the gentleman and his committee on further details about this. However, I wanted to have that assurance. Again I want to thank the gentleman.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WAGGONER) having assumed the chair, Mr. GILBERT, chairman of the Committee of the Whole House on the State of the Union,

reported that that Committee, having had under consideration the bill (H.R. 4152) to authorize appropriations for certain maritime programs of the Department of Commerce, pursuant to House Resolution 407, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARMATZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the maritime authorization bill just passed by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

LEGISLATIVE PROGRAM FOR WEEK OF MAY 19

Mr. GERALD R. FORD. Mr. Speaker, I ask unanimous consent to proceed for 1 minute for the purpose of asking the distinguished majority leader the program for the rest of the week and the schedule for next week.

The SPEAKER pro tempore (Mr. WAGGONER). Without objection, it is so ordered.

There was no objection.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, in response to the inquiry of the distinguished minority leader, we do not have any further legislative program for this week and I will ask that the House adjourn over.

The program for next week is as follows:

Monday is Consent Calendar day. There are four suspensions as follows:

H.R. 10595, extension of Great Plains conservation program;

H.R. 6808, relating to education benefits provided veterans and certain dependents;

S. 408, relating to various veterans' housing programs; and

H.R. 2667, to revise the pay structure of the police force of the National Zoological Park.

Tuesday and the balance of the week:

On Tuesday the Private Calendar will be called.

Then on Tuesday and Wednesday we expect to have up, subject to a rule, the

second supplemental appropriation bill for the fiscal year 1969.

The annual New York event for Members takes place on Thursday and we do not propose to program any legislation for that day.

Mr. GERALD R. FORD. Mr. Speaker, would the distinguished majority leader give me information on this point. I have heard that we will have just general debate on the supplemental appropriation bill on Tuesday and that the bill will be read for amendment on Wednesday.

Mr. ALBERT. That is my understanding. I have discussed that with the distinguished chairman of the Committee on Appropriations. I do not see the gentleman on the floor now, but that is my understanding, that the bill will be read for amendment under the 5-minute rule on Wednesday.

Of course, this announcement is made subject to the usual reservations that conference reports may be brought up at any time and that any further program will be announced later.

ADJOURNMENT OVER TO MONDAY NEXT

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object and I shall not object, do I understand that there will be a session of the House on next Thursday?

Mr. ALBERT. The gentleman is correct.

Mr. GROSS. But there will be no business?

Mr. ALBERT. We do not intend to program any business in view of the annual New York event.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

DISPENSING WITH BUSINESS IN ORDER UNDER THE CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule may be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

TWENTY-FIRST ANNIVERSARY OF THE ESTABLISHMENT OF THE STATE OF ISRAEL

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, in our society the age of 21 marks the threshold of maturity. Today we are celebrating the 21st birthday of a mature and well-established nation—the State of Israel.

Since its birth in 1948, Israel has grown and prospered in a most unprecedented manner. The economy has been launched, the immigrants absorbed, the desert watered, and a true democracy assured. The countless accomplishments of Israel in achieving a viable and thriving economy and a true democracy deserve both praise and awe.

Israel's gross national product has multiplied untold times from its initial tiny base. U.S. technical assistance has long since been withdrawn as being unnecessary, and her population has more than tripled. Agricultural production is expected to expand at a rate of 10 percent per year, an increase that will hopefully eliminate the need for food imports.

Much of this agricultural increase is coming from lands considered barren prior to the advent of Israel. Today, swamps, deserts, marshes, and eroded hills have been turned literally into lush gardens with tremendous productive capacity.

As former legislative and educational director in Chicago for the Steelworkers of America, and one who has always been keenly interested in the labor movement, I am pleased to note the Histadrut is the largest labor union in Israel with a membership of 1 million, over 275,000 of whom are agricultural workers and 270,000 of whom are wives with membership status. Health, welfare, education, athletics, insurance, and other programs make the Histadrut a vital segment of Israeli life.

The Hevrat Ovidum, which is affiliated with the Histadrut, operates a variety of industries and services which also make Histadrut the nation's largest business firm. Most of the cooperative farms are run by Histadrut. The elected officials of Histadrut represent all the political parties and all segments of Israeli life.

The arts, higher education, and athletics have received equal concentration. Israel boasts of a fine symphony orchestra, internationally recognized artists and sculptors, and Nobel Prize-winning authors. There are more than 1,000 libraries and 5,000 schools in Israel today, and there are seven major universities and 52 colleges, and many museums and institutes which specialize in studies ranging from archeology to atomic energy. An annual international Bible contest, and the Maccabiah games provide areas of competition.

Israeli technical and manpower assistance have been extended to many of the emerging nations in Africa, and to countries in Asia and Latin America. Hundreds of instructors, advisers, and survey missions, as well as builders, have been sent to these nations as part of a program of assistance to other developing countries.

Israel stands today as a tribute to courage, strength, ingenuity, and perseverance. On this independence day, I

congratulate Israel and wish for her people peace, prosperity, and happiness in their homeland. I salute our friends in Israel, as well as Americans of Jewish descent throughout our Nation who are joining in this celebration, and extend to them my profound respect and warmest personal regards.

PRESIDENT NIXON SAYS YES TO \$10,000 MILLION ABM, BUT NO TO \$100 MILLION JOB CORPS

(Mr. LEGGETT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. LEGGETT. Mr. Speaker, I am appalled at the decision of Secretary of Labor George E. Shultz to close 50 Job Corps conservation centers. The failure of the Senate to muster a majority to abate this desecration is lamentable.

Alder Springs Job Corps Center in the Mendocino National Forest is located in my congressional district. I am familiar with the success of Alder Springs in terms of its rescuing of human potential.

Alder Springs is 40 miles west of Willows, a small pastoral community in Glenn County in northern California. The center was dedicated on July 31, 1965. The setting of the camp is breathtakingly beautiful and for many of the corpsmen residence at Alder Springs has been their first exposure to an environment which is conducive to learning and developing positive values in a natural setting.

Secretary Shultz has stated that the isolation of some of the rural centers has been a detriment to the corpsmen. That is the opinion of the Secretary. However, the majority of the corpsmen to whom I have spoken personally have stated that Alder Springs has given them their first chance to succeed in life. I believe that the wholesome outdoor environment coupled with educational and work experience has provided many of these youngsters with positive values which will remain with them the rest of their lives. Rather than taking the self-destructing, society-destroying routes of drugs and desolation, thousands of youngsters have at least glimpsed life's broader horizons at the Job Corps conservation centers in this country.

I assisted in the dedication of Alder Springs back in 1965. I pointed out to the new young men assembled that they were part of a national experiment. We wanted to see if large numbers of young men, formerly the dropouts of society, could be "cost effectively rehabilitated."

We started off with a plant at Alder Springs of nearly \$1 million value, that since has been improved an additional 50 percent. Corpsmen originally did very poorly due to the fact that so little time was available to train supervisory personnel. There was a problem in management of the program and this was subsequently solved by vesting full local responsibility in the Forest Service.

And the boys have been doing a job. While the costs of the camp have run about \$1 million per year, the annual

benefits, constructing furniture, improving the forest, have run nearly half that amount. The boys have built trails, water conservation works, planted cover and trees, have volunteered during floods and forest fire disasters. Corpsmen have built checkdams to stem erosion and last year they converted 200 acres of brushland into pasture for livestock and deer. We are experiencing a conservation crisis in this country, and we should be aware of the constructive work these young men are doing as they improve their academic skills.

The cost to the taxpayer, true, has been running several thousand dollars per year per boy, but I firmly believe that if it is worthwhile for the United States to spend \$40 billion per year to save the United States from godless communism from without in Vietnam, our local investment in human being redevelopment is quite cheap.

The staff at Alder Springs has made an effort to coordinate academic and job training with the work which the corpsmen do. For example, the welding class learns its skill as it builds fire grates for the camp. The carpentry class has built picnic tables, poured cement sidewalks, and built outbuildings. In this way, the corpsmen are able to see for themselves that cooperative activity brings personal rewards. They are also learning skills which are transferable to the urban job market.

We must remember that the Job Corps was initiated to deal with youths who, through no fault of their own, have come from extremely deprived backgrounds. I do not think that the decision of the administration to concentrate on urban centers is necessarily a wise one from a psychological point of view. The removal of these young people from a hectic urban environment to one such as Alder Springs provides can create much more calm and controlled conditions for learning both skills and the value of community cooperation.

Mr. Ed Davis, the editor and publisher of the Willows Daily Journal, stated in a recent editorial that 1,200 young men from poor families have completed training at Alder Springs. This figure comprises 70 percent of the trainees who have arrived at the center since it opened 4 years ago. I think that is a good showing, indeed, when you consider that the group is 100 percent society dropout.

Of this group, 10 percent have returned to school, 13 percent have joined the Armed Forces, although they were previously unqualified, and 77 percent have been placed in jobs. These jobs range from operating bulldozers to carpentry work.

It should be clear to the Establishment by this time that the most destructive element in society surfaces when promises are made, accepted in good faith, and not kept.

It is clear to me that the administration is attempting to operate on the Job Corps not with a scalpel but with a meat ax. I intend to appeal to my colleagues in the House to join me in preventing this operation before it is too late.

The farmers of my district do not

quite understand national economics. They heard the Government say just a few years ago that the local water project—the Tehama-Colusa Canal—Will S. Green Canal—would have to be substantially held back because the Government did not have the money to lend. This did not make too much sense to the folks at home because they knew that whatever funds that were lent on the canal would be paid back in a few years and likewise they knew that the canal would bring better irrigated production that would nearly double income tax returns to the Government right away.

Now the Government says that not only do we not have the money for the canal but the Job Corps has got to close.

This Job Corps decision has made less sense than the canal decision to the local folks because everybody knows the great work the Forest Service has done with those city kids at the nearby Job Corps camp. They know the problems that the Government has had in getting the Job Corps camp operating right. Now that the problems of administration are coming under control, it does not seem right to summarily close up the camp without the Republicans even making a halfhearted attempt to right what they feel is wrong with the effort.

I wish to present for the edification of my colleagues a series of articles and editorials by the distinguished editor of the Willow Daily Journal, Mr. Edwin Davis.

Mr. Davis, who has followed the progress of the Alder Springs camp since its inception, tells it like it is. He knows the facts and he presents them in a straightforward manner. He has seen the difference in the lives of the many boys who have passed through Alder Springs. The Alder Springs experience has clearly been a constructive one both for the boys and for the surrounding community. Mr. Davis feels that Alder Springs provides the last chance for many young men to lead constructive lives. I concur. The articles follow:

[From the Willows (Calif.) Daily Journal]

JOB CORPS OFFERS CHALLENGE TO CITY

Mixed reactions have greeted the news that a Job Corps Conservation Camp is likely to be located in the wildlife refuge south of Willows if, as seems almost assured, Congress passes President Johnson's anti-poverty bill. And it is understandable that some residents look with a certain amount of disfavor on this development which will represent a departure from the established pattern of community life.

Some of the 100 carefully screened youths to be housed, educated and trained for useful occupations at the refuge will be members of minority races and of "underprivileged" groups.

To those of us who live in a wholesome rural community like Willows, "underprivileged" is a word which perhaps lacks complete meaning, because we have not experienced it. For full comprehension of what it implies we would have to live awhile in a teeming tenement district where a population the size of Willows is jammed into a single city block.

We would have to face the futility of a lifetime on pavement and creaking boards, the desperation of nighttimes fending off slimy cockroaches and voracious rats, the frustration of an environment dominated by

rickety tenement houses rather than fields of grain.

We would have to share the hopelessness of wanting an education where none can be adequately provided, of seeking a job where none exists.

To residents of such a slum district, a city like Willows, with its friendliness, tolerance and pleasant living conditions, must be like a mirage which is tremendously desirable but hopelessly unattainable. Perhaps this is the reason that the Willows area has been tentatively selected for one of only four pilot camps in six Western states. The environment here is conducive to healthy thoughts as well as healthy endeavor.

Whether the camps will be successful, as the depression-years Civilian Conservation Corps was eminently successful, or whether they will fail to achieve their goal of educating, training and finding jobs for these youths is still, of course, to be determined.

But, in any event, the program represents a worthy objective of giving potentially productive youths the prospect of bettering themselves in the American tradition of equal opportunity for those with the brains and character to grasp it.

Whatever the merits of the program itself, surely the reaction of Willows residents will determine, to some extent, whether it succeeds or fails here in Northern California.

If the youths are treated as unwanted interlopers, then isn't that precisely what they are apt to be? If, however, they are made to feel they are worthwhile as individuals and that Willows will do whatever it can to help the program and help the youths succeed in their endeavors, then isn't their reaction apt to reflect this warm, helpful attitude of the community?

Probably the youths will engage in organized sports. Will they do so as segmented stepchildren of the community, or will they be invited to compete with Willows teams?

Probably many of them will be churchgoers, either existing or potential. Will they be made to feel welcome or unwanted in Willows churches?

Will the community, working perhaps through a group of civic leaders, meet and plan with the Fish and Wildlife Service for a cooperative effort aimed at serving the best interests of both the Job Corps camp and the community itself; or will Willows dismiss the opportunities and the problems presented by the camp as being of no concern to itself?

Doesn't the program offer not a cross to bear, but rather a tremendous challenge and opportunity for the people of Willows to take a vital part in enlarging the horizons and job prospects of a group of youths who have lacked them in the past through no fault of their own?

STEP IS PRAISED: HIGH SCHOOL TRAINS JOB CORPS YOUTHS

A new link was added to a growing chain of cooperation between the Willows High School and Alder Springs Job Corps camp as 21 corpsmen began an 18-week night course in fundamental auto maintenance this week.

Nick Neuberger is teaching the course, and plunged the youths directly into basic use of a basic tool—the micrometer for making precise measurements. Their concentration and comments indicated they were intensely interested.

Arrangements for the course, held each Tuesday from 8 to 10 p.m., were made by Erwin A. Decker, high school superintendent, with Job Corps Camp Director, A. R. Groncki, Educational Director Stanley Lynch and Counsellor Clyde Wilson.

Tonight six corpsmen will attend adult typing class at the high school, and next Tuesday three to four will attend art class.

Lynch was high in his praise of the community in general and Decker in particular.

"This is a wonderful thing," he said. "It certainly indicates tremendous cooperation from the community, and a marvelous attitude."

"So far as I know the cooperation between Jobs Corps and community is unmatched anywhere else in the country."

"And Mr. Decker is really to be commended for his leadership in helping the corpsmen get education and training in skills."

Tom Rogers, resident counselor at the camp, is in direct charge of the 21 corpsmen attending auto maintenance classes.

The youths include Robert Gomez, Donald Mason, Jerry Borders, Richard App, Jim McClurg, Joe Piko, Ken Belsar, Ed Gilbert, Dave Weatherly, Jim Gibson, Ernest Oliver, Allen Rickert, David Renschert, Ernie Stoess, Daniel Merchant, Red Ellis, Gaston Amaro, Guillermo Ortega, Harold Nuhning, Tom McCoy and Clarence Soloman.

JOB CORPS AIM IS USEFULNESS

Like most significant steps forward in the history of mankind and of the United States, the Job Corps has its detractors.

They are just as convinced that the concept is all wrong as perhaps their forebears were convinced that the women's vote, regulation of monopolies, and income taxes were all wrong.

The Job Corps, they contend, is too expensive; indeed, it's a waste of money because a person determines his own fate.

They are inclined to forget that environment does, indeed, influence a youth and often makes the difference between useless and useful adulthood.

They are inclined to ignore the alternatives to programs such as the Job Corps—idle, unproductive adults on relief, or in jail, at an expense to taxpayers, when they could be paying their own way.

They are inclined to overlook the basic tenet of Christianity: that man be his brother's keeper.

Perhaps if many of them could spend a day at the Alder Springs Job Corps camp observing the overwhelming majority of the youths, they would change their views—if they could see the intense concentration on books and classwork, the eagerness to learn, the desire to be applauded for a job well done.

A Purdue University student, in an interview published on page 1 today, gives a discerning and inspiring account of his experience as a summer supervisor and counselor at Alder Springs. He speaks of the corpsmen's driving thirst for education, and of their rapid learning in spite of their lack of opportunity for education.

He estimates that about 90 percent of them can be helped by the Job Corps program.

The firsthand, objective account by 22-year-old Charles P. Poore should go a long way toward putting the Job Corps in its proper perspective—as by no means a waste of money but, on the contrary, as an inspiring and very hopeful attempt to replace lack of opportunity with opportunity, irresponsibility with responsibility, lack of self-respect with human dignity.

PURDUE MAN CITES JOB CORPS BENEFITS

LAFAYETTE, IND.—A Purdue University student is telling his classmates here how he really had his eyes opened about education during the summer 40 miles west of Willows.

Charles P. Poore, a 22-year-old senior in forestry from Indianapolis, says the 6 weeks he spent at the Federal Job Corps camp at Alder Springs taught him that there is just "no substitute for a good education."

Poore, Fred Hansford, University of Mississippi student, and Dick Bertoncini, Chico State College student, were working for the U.S. Forest Service when the Alder Springs camp put out a call for emergency help for supervisors.

Hal Ward, head ranger of the Willows district, loaned them to Job Corps Center Director Al Groncki, and they found in 6 weeks that:

Even the most wayward youths at the camp want an education;

Most of them will be in jail in 10 years if they don't get it;

The Job Corps is a good effort to rehabilitate these young men;

The city of Willows is a good host to the boys and helps their desire to excel.

"I've never before met a person who couldn't read a newspaper or write a letter," Poore says. "I just didn't realize how important an education was or how adversely it can affect those who don't have it."

For 6 weeks the three students lived with the 150 Job Corps youths, supervised sports and helped encourage them.

"The camp was set up to bring their education to the eighth grade level so they could be sent to another center to learn a skill. The boys worked one day at forest service duties and spent the next day at study and classwork," he says.

Two events especially pleased Poore and convinced him that although all the boys in the camp were dropouts from school, all is not lost for them.

A driving thirst for education became apparent among about 25 percent of the boys who voluntarily spent evenings with Poore trying to learn math. His classes, held informally, were conducted after the boys had completed their work or their regular study days.

Poore also drew on his Purdue Air Force ROTC training and organized a group of about 16 into a drill team.

"At first, the other boys hooted and poked fun as the boys drilled, but soon at least 15 others joined the drill team," he relates.

The math class took up rather advanced forms for boys with their backgrounds, Poore says, "but they learned fast in spite of their lack of opportunity for educations."

"They wondered why they had to learn such basic things as multiplication tables, and reading and writing. One boy couldn't understand why he just couldn't go to the electronics school, as he had volunteered for rather than to this camp to get a basic education."

"The drill team provided a discipline these boys wanted and needed. They crave someone telling them what to do; they don't like to make decisions themselves and they respect a man who can lead them."

"The drill team drilled about 1 hour daily and soon was formed into a color guard and took the flag down at night."

It is apparent Poore has a soft spot in his heart for the Job Corps boys. On one hand he has to admit their morale and outlook on life are low, but on the other hand he is quick to praise their desire to excel.

"These guys came here with no place to go; many would have been in jail in 10 years. They have to settle every problem with physical means. But about 90 percent of them can be helped by the Job Corps program. They want to be treated as human beings; they are very happy with a little recognition, some attention, a little money and freedom to make their own choices."

"They don't need a lot of these things, but just a little. It's surprising what a little medal means to them, or a person who takes an interest in them personally," Poore observes.

But they don't know right from wrong, he believes. They think "if it's right for me, it's right, and what do I care about tomorrow, I might be dead."

He said he especially noted that only about 10 percent of the boys had any religious conviction and these were always the boys with higher values. They were patriotic to the United States, though Poore doesn't feel

it is a deep-seated patriotism. Just because everyone else seems to be patriotic, they are also, he believes.

The boys were mostly from urban areas and didn't like to be in the forest. If they wandered away from camp or were among the 25 percent quitters they probably would become lost, he says.

One boy couldn't understand that the directions remained constant no matter where a person stood.

But they want to learn if it is patiently explained that education can be used and will help them. Most have the capability to learn fast, Poore says.

"There are some who came to the Job Corps for a free ride," he admits. One lad came to get about \$400 free dental work, another came as an agitator. But most were at the end of their roads, and it seemed like a good thing to make something of themselves.

The experiences have helped Poore change some of his own thinking. He plans to get an extension from the Air Force to delay the 5-year service he is committed to when he graduates in January. He will get another degree from Purdue—probably in a biological area. Then after his 5 years Air Force service, he says he'll decide whether the Air Force will be a career, or whether he'll be a teacher. His fiancée, Sue Rider, a teacher in Marion, will help him decide.

At some time in his life, Poore thinks teaching will be his occupation. "I can't explain the feeling I got when I could see how much good education can do, how even in 1 hour a boy could be so happy when he understood what a fraction was."

WILLOWS IS ALREADY "ALL-AMERICAN" CITY

Whether or not Willows wins an "All-American City" award for painting downtown buildings, constructing a civic center or expanding its sewer system, only the future can say.

One conclusion, however, seems self-evident: So far as its help to underprivileged youths is concerned—its relationship with the Alder Springs Job Corps camp—Willows is an All-American city.

Before the first youths arrived last March, a Willows civic advisory committee had been established. Its sole aim was to try and cement relationships between the camp and the community for the benefit of both.

From that beginning, here have been some of the activities in the intervening 6 months—many of them inspired by individual citizens.

Willows has:

Welcomed the first group of corpsmen to arrive with the high school band, son leaders, and other residents;

Attended the camp's dedication in droves; Taken youths from the camp into their homes;

Invited the camp's softball team to play city league teams;

Stocked the camp library with appropriate magazines and books;

Taken corpsmen on privately piloted flights to inspect their environment from the air;

Arranged for the youths to see Giants' games in Candlestick Park;

Established a special auto maintenance course at the high school for 21 corpsmen and welcomed additional corpsmen into adult art and typing classes;

Been friendly and courteous.

Is it any wonder that Western Regional Job Corps Director Mike O'Callaghan, in a letter to Congressman ROBERT L. LEGGETT, praised the community for its "positive, progressive attitude," which, he said, "not only has assisted the success of the program in Willows but has served as a pattern for the West."

Is it any wonder that the camp's educa-

tional director, Stanley Lynch, commented on High School Superintendent Erwin A. Decker's arrangement for providing classroom instruction for exceptional corpsmen:

"This is a wonderful thing. It certainly indicates tremendous cooperation from the community and a marvelous attitude."

"So far as I know the cooperation between Job Corps and community is unmatched anywhere else in the country."

Every resident of the community and of the area can be justifiably proud.

THE JOB CORPS WORTH KEEPING

If President Richard M. Nixon carries out his plan to abolish the Job Corps, he will kill one of President Kennedy's and Johnson's most valuable programs for giving the poor and uneducated a chance to become productive citizens; he will, furthermore, effect a cost cut which will not be a savings but an expense to taxpayers.

Henry J. Taylor, in a column published on this page last week, sought to justify Mr. Nixon's design by reviewing the cost of the Job Corps.

Each underprivileged youngster guided through it in its first fiscal year "cost the taxpayers \$270,000," he stated.

This is an irresponsible statement, since Mr. Taylor neglected to explain that the cost of Job Corps facilities was included in that cost. This is a huge investment, incidentally, which will be washed down the drain if the Job Corps program is ended. What other possible use could be found for camps such as those at Alder Springs west of Willows and near Weaverville, Shasta County?

Mr. Taylor went on to bemoan the current Job Corps budget, which he said "is \$280,000,000 for only 33,000 enrollees." Naturally, in a biased article, Mr. Taylor failed to note that this represents \$8,484 per corpsman, as against \$270,000 per corpsman during the initial year, when necessarily heavy outlays were made for installing and equipping camps.

Furthermore, Mr. Taylor failed to report what alternative might replace the Job Corps.

Many Alder Springs corpsmen, quoted in Daily Journal articles, realize that the Job Corps represents their "last hope."

Without such an opportunity for self-advancement the vast majority of them would have been doomed to lives of sterile unproductiveness, and in many cases to years on relief or in prison.

Edith Louderback, Glenn County welfare director, points out that the average monthly welfare payment to a family of five in Glenn County totals some \$312 per month, plus medical expenses. This means that the cost of educating a job corpsman is returned to the taxpayers in savings within approximately two years.

Perhaps unwittingly, Mr. Taylor himself quoted figures attesting to the success of the Job Corps toward producing productive citizens.

Of some 1,000 graduates during the first year, he said, about 5 of 10 found jobs, 4 of 10 entered the armed forces (most of them, if not all, would have lacked the reading and writing ability to enter the armed services if they had not joined the Job Corps), and the remaining graduates "went back to school."

Is this not an impressive record? Is it not well worth the cost to taxpayers? Doesn't it perhaps indicate that the program should not be killed but expanded?

As Mrs. Louderback pointed out in discussing Mr. Nixon's proposal to terminate the Job Corps, the success of the program cannot be measured in money.

"It's what we can do for these people that counts," she said.

"They need education. Any child with the capacity to learn should be given the opportunity—not just those whose parents can

afford it. Every child deserves an opportunity.

"After all, we spend a great deal more for people in foreign nations and expect nothing in return.

"Of these youths we expect them to become productive, to take their place in society and contribute to it."

Mrs. Louderback is justifiably known as a welfare director who is careful with the taxpayers' money. She not only keeps a sharp watch against welfare fraud but she acts, on her own initiative, to secure jobs for employable welfare recipients.

Yet the very nature of her job proves to her the immeasurable depression and deterioration which set in when a person is long without work. She recognizes that educating and training underprivileged youths not only saves taxpayers' money but creates self-respect through self-support.

Does Mr. Nixon's philosophy contain no recognition of this?

THE JOB CORPS MUST NOT END

In a speech to the 15 foreign ministers of NATO last Thursday, President Nixon proposed formation of a committee to improve "the quality of life of our peoples."

The next day his administration announced plans to close more than half the nation's 106 Job Corps centers, including the Alder Springs center some 40 miles west of Willows.

No committee has been needed to improve "the quality of life" of 1,200 young men from poor families who have successfully completed the Alder Springs training program—a phenomenal 70 per cent of the 1,700 young men who have arrived at the center since it was formed four years ago.

They themselves, mostly Negroes, have improved their own quality of life, assisted by sympathetic, skilled staff members and a program of learning by doing.

Ten per cent of the graduates returned to school, 13 percent joined the armed services (they had been unqualified previously due to educational, health or other deficiencies), and 77 percent were placed in jobs—a wide variety of skilled jobs ranging from operating bulldozers to carpentering.

Operating under a million-dollar annual budget, the cost averaged about \$5,000 for each youth successfully completing the program.

Is that cost too high? Apparently to President Nixon, who proposes appointing an international committee to improve "the quality of life of our peoples," it is.

Yet consider the far greater cost of maintaining each of these young men for the remainder of their lives on welfare. Or in prison. As many of them have freely admitted, the Job Corps was their "last chance" to lead dignified, constructive lives. It was their last chance to improve the quality of their lives. Now this last chance will be closed to countless other young men from poverty-stricken homes.

Consider, too, the work programs accomplished by the corpsmen as they have learned by doing. Located in the Mendocino National Forest they have built fire trails and lookout stations; last year alone spent 3,233 man-hours fighting fire. At the current rate of \$2.10 per hour for inexperienced firefighters this alone represents \$6,789 which the taxpayers otherwise would have had to pay.

The corpsmen have built complete campgrounds, including, last year alone, more than 75 camping tables and more than 30 stoves.

They have built checkdams to stem erosion, and last year converted 200 acres of brushland into pasture for livestock and deer.

These and other programs to conserve and enhance the publicly owned national forest have greatly offset the reasonable \$5,000 cost of training a youth for a useful instead of a

useless life—of making him self-supporting rather than tax supported; of preserving his dignity as a man. No better program has been proposed for improving "the quality of life" of deprived American youths. How can President Nixon possibly be justified in reducing and eventually eliminating the Job Corps?

LET'S FIGHT FOR JOB CORPS UNIT

During and after his campaign, President Nixon spoke of the attention he would pay to rural communities in order to strengthen their economies and preserve their valuable contributions to the nation. His proposal to close the bulk of California's Job Corps camps, including Alder Springs, represents a repudiation of that promise.

As Lloyd Britton, Mendocino National Forest supervisor, has pointed out, the Alder Springs camp has accounted for more than a half-million dollars of spending in each of the four years since it was established. The money has been spent not only in Glenn County communities but in others extending from Redding south to Williams and east to Chico. Hence, the entire region has an important stake in keeping Alder Springs in operation.

A good chunk of the annual \$525,600 in staff salaries is spent in the area. Then the camp itself has spent some \$189,000 in Glenn County and \$106,000 in nearby counties each year for groceries and other supplies. Corpsmen themselves have spent an estimated \$12,400 per year in the area, much of it in Chico as well as in Willows.

The most important reason to keep Alder Springs and the other camps operating is, of course, to continue their tremendous human contributions by converting futile, destructive lives into constructive lives.

Yet the figures cited by Mr. Britton demonstrate that not only Willows but every other major community in the region will lose economically if the Alder Springs camp is closed.

Should not all civic and other organizations, as well as individuals interested in their communities' welfare, bombard Congress with letters and telegrams urging that the Alder Springs camp be retained?

Your elected representatives in Washington are Congressman Robert L. Leggett, House Office Building, Washington, D.C. 20515, and Senators George Murphy and Alan Cranston, Senate Office Building, Washington, D.C. 20510.

It wouldn't hurt to urge Assemblyman Ray E. Johnson and State Senator Fred W. Marler Jr., State Capitol, Sacramento, to introduce resolutions in the Legislature opposing the proposed Job Corps closings.

CORPSMEN WRITE: LIVES SAVED BY JOB CORPS

Cold figures say that the Job Corps, which President Nixon plans to emasculate and eventually eliminate, has done an excellent job; that the Alder Springs Center, as an example, has placed 70 per cent of its enrollees in gainful occupations.

What about the youths themselves? What has been their reaction to the basic education and the training they have received at Alder Springs—the vast majority of them unable to read or write when they entered the center? The following excerpts are from a few of many letters received by John McLaughlin, former welding instructor at the center. They are unedited for spelling and grammar.

The letter below was written by the mother of Eddie Griggs, one of 13 children in a Negro family who now contributes to his family's support, having been employed as a welder in Philadelphia, Pa., for the past 22 months. He had arrived at Alder Springs with a third-grade educational level. Mrs. Griggs wrote to Mrs. McLaughlin as follows:

"... Eddie is doing fine since he has come back home. He has a job as a 'welder' at the P.&W. Industries. He has been employed

there for over two months now. He works the 2nd shift from 3 p.m. to 12:00 p.m. This is Eddie's first job. He is putting some of his money in the bank, because he said that one day, he would like to make a trip back to California. I have heard him talk so much about his life in the Job Corps, especially the people that he has met, that I feel as if I know all of you personally.

"Every one here comments Eddie on how well he looks and carries himself, since coming back.

"Eddie would get angry at me if he knew I were going to write this, but I use to have a problem with him as far as personal hygiene was concerned (smile) but now, no more.

"I would like to thank each and every one of the instructors who taught Eddie, and all persons, who in some way or other inspired, encouraged or taught Eddie to be a MAN."

"Big Jimmy" Brown wrote last Dec. 4 from Herlong, Calif. that "I told you I were coming back to California—and I did and how is the families fine I hope . . . I am going to get a job here make \$3.75 an hour as a welder and I am glad I have taken up welding—and I am sorry that I did not have more to say. I am close for now."

A week later he wrote, in part: "I am work as a welder on a Sierra Army Depot and I get this job for I would go into the Army. And I have get married and one kid."

Jimmy White wrote from the Gary Training Center in San Marcos, Tex., in part as follows:

"Mr. McLaughlin, today is Sunday, and I'm setting down here in the Dormitory, thinking about the wonderful time and the wonderful people that were so kind, and so helpful to me at Alder Springs, until I just had to write these few lines.

"Mr. McLaughlin, I'm doing good in my vocation and education. I have increase my reading level to 8.5 and have finished basic math . . .

"Well I guess its time for me to come to a close. I just had to write these few lines to let you know that I haven't forgot about you all, and always will remember the tremendous job of training that you all gave me at Alder Springs."

From a former corpsman now employed by the city of Honolulu came this message, in part:

"I didn't pass the writing test for the army, and I'm working as a janitor and I'm wait for call for a welders helper . . .

"As for the job that I'm working now pays \$1.55 an hour and as & when I get this job as a welder helper it pay \$2.45 an hour, when the welding job calls me I quite the job I got now."

Almost none of the youths could write an understandable sentence when they arrived at Alder Springs. As illiterates they were ineligible for training in skilled occupations, such as welding, from the customary institutions, and ineligible for the armed services—not only for lack of education but in many instances because of poor teeth or other physical ailments. As many of them have frankly said, the Job Corps was their "last chance" to lead constructive, self-supporting lives.

JOB CORPS CLOSURE BRINGS RESENTMENT

ALDER SPRINGS.—To youths at the Job Corps center here it's as if Uncle Sam had thrown them a life preserver and then, as they struggled toward it, pulled it back.

They learned with shocked disbelief that the Administration planned to close the center along with more than half the Job Corps installations in the nation. Shock has turned to resentment; it is shared by staff members.

After four years of experimenting and of some setbacks staff members feel that their program is at least reaching a peak of effectiveness in giving basic education to "last

chance" illiterates, and in training them for skilled jobs.

Lawrence Caplinger, for eight years a forestry technician in Lassen National Forest and now supervisor of corpsmen at Alder Springs, was raised in Oklahoma, Alabama and Arkansas. He is sympathetic with the plight of low-income black youths from the Deep South, who make up nearly 70 per cent of Alder Springs' enrollees, and feels gratified that "I've been here able to help a lot of them."

Speaking in the absence of Dean Lloyd, the center's supervisor, Caplinger told *The Daily Journal* in an interview Saturday that although many of the youths have been shunted through elementary school and at least part of high school, they arrive at the center "unable to read at all and barely able to write their names."

"They go to school, leave to harvest crops, and get promoted when actually they don't 'have it'—simply to provide school room for others."

The job center's task is to teach them basic education and then train them for skilled jobs, and the record indicates that the Alder Springs center is being phenomenally successful. Last year some 70 per cent of enrollees were placed in useful occupations; the figure is now running at about 77 per cent.

"We're making constant progress," Caplinger said. "We're now on the verge of raising the percentage of placements into the 90s."

Pointing out that "the government is going to have to pay so much for poverty regardless," Caplinger reflected resentment expressed by corpsmen, he said. "It will cost money—lots more money than it costs to give them basic education and train them for jobs." The figure is somewhat over \$5,000 per enrollee.

If the centers are closed, as is now planned for July, Caplinger said, the corpsmen "will feel that President Nixon has taken away their last chance, and you can't blame them."

"This is the first time anyone has paid any attention to them. They aren't going to let loose of it easily."

"If Nixon closes half the centers it will have an impact on the country that he doesn't now realize."

A sampling of corpsmen's opinion indicated that Caplinger was not exaggerating about their resentment.

Walter James White of Mobile, Ala., who had completed the 11th grade yet could barely print his name when he arrived at the center, didn't feel resentment on his own behalf since he has almost completed his training as a heavy equipment operator.

"I'm speaking of my brothers," he explained after saying that the closing would be "real bad—a promise to train men and then fail on the promise."

When asked how many brothers he had at job centers, he gestured toward Blacks and Whites alike in the mess hall and said: "They're all my brothers. They're all my friends."

"I'm talking about my fellow brothers who won't progress because they've been here a brief time. That hurts me as bad as it hurts my brothers. These days if you don't have a skill you're messed up."

One of the youths he was referring to is Richard Clark, talented 18-year-old Black from Alabama, who has been at Alder Springs less than three months.

"Not good in math" at high school, where he completed 10 grades, he has raced through basic math, fractions and decimals and is now taking algebra, aspiring for his General Education (high school) diploma and then advanced training to be a draftsman. He is taking a correspondence course in art, and his drawings indicate talent.

"I would go anywhere they send me for

training," he said, but now his future is clouded.

One of the center's most effective math teachers is a young man who has sped Clark and many other corpsmen along the educational trail and is himself a corpsman. Paul Blacketer, 21-year-old White, came to Alder Springs two months ago from a Texas Job Corps center, and showed such great math ability that he is now an assistant teacher.

He pointed out that 75 to 80 new corpsmen arrived at the center last month.

"What are you going to do with all these corpsmen—put them back on the street?" he asked.

As for himself, he aims to be a teacher. If the Job Corps program is ended, this path will be blocked and he will probably return to Georgia for "welding with my stepfather."

THEY DESERVE A FAIR SHAKE

One of California's best-known industrial leaders commented the other day on the plight of ghetto families. B. F. Blaggini, president of Southern Pacific Co., said:

"Amid unprecedented wealth, California must remember sadly, the unemployment rate in the black ghetto poverty areas of many large cities is said to hover around 32 per cent, as compared with the new national low of 3.5 per cent."

"Only by creating economic opportunity and individual responsibility for the minority people, through jobs and training, can we help them solve their problems."

Surely no governmental program has been more successful in "creating economic opportunity and individual responsibility for the minority people, through jobs and training," than the Job Corps.

The Alder Springs Center, for example, has increased its "success ratio" so much over the past four years of its existence that it is now placing 77 per cent of its enrollees in useful occupations. And Lawrence Caplinger, former forestry technician with the U.S. Forest Service and now dedicated supervisor of Alder Springs corpsmen, told *The Daily Journal* the center is on the verge of raising this already high percentage "into the 90s."

As Mr. Caplinger said: "The country is going to have to pay so much for poverty regardless. And if Job Centers are closed, it will be back on the streets for the corpsmen. It will cost money—lots more money than it costs to give them basic education and train them for jobs."

The Nixon administration has apparently latched onto the less costly Head Start program as the answer. The program is, indeed, promising. Many Alder Springs corpsmen arrive at the center unable to write an understandable sentence even though they have been shunted through nine or more grades of school. An educational "head start" when they were children could well have changed that.

But Head Start is no answer for the present generation of youths in their late teens and early 20s. Are they to be kicked back onto the street merely to make financial room for educating the following generation?

Mr. Caplinger warned of the violence to come:

"They will feel that President Nixon has taken away their last chance, and you can't blame them."

"This is the first time anyone has paid any attention to them. They aren't going to let loose of it easily."

There is logic in Mr. Caplinger's warning. Closure of Job Corps Centers would be to the detriment of the nation as well as of the corpsmen concerned.

JOB CENTER HOPE DIMS

Scant hope was held yesterday that the Alder Springs Job Corps Center will be kept alive, although members of a Willows advisory committee expressed the strong opin-

ion it should remain in operation at least another year.

James Coakley of Vallejo, Congressman Robert L. Leggett's field representative, told the group at a Willows meeting that Leggett, Senator Alan Cranston and other legislators had received no reply from President Nixon to a letter strongly opposing the Job Corps cut-back.

More than half the nation's centers are scheduled to be closed June 30—59, including 27 in California.

The Willows meeting was held in the supervisors chambers at the county court house.

Coakley, after pointing to Leggett's strong opposition to the center's closure, said: "We have to face the fact that the Administration has made the decision to close it."

He pointed out that it is strictly an Administration decision; that Congress cannot override it.

Spokesmen for the Willows Unified and Elk Creek School Districts bid for buildings and some of the equipment if the center is closed.

Willows district superintendent Erwin A. Decker emphasized his own opinion that the center should be kept open; that it has been successful in giving youths from poor families a basic education and job training and that friction between corpsmen and local residents had been minimal.

However, he added, if the center is closed he wanted to put the district on record as seeking some of the equipment and supplies at the center, as well as three relocatable buildings. The latter, he said, could be used for libraries in district schools.

County Supervisor Ralph Colbert, speaking in behalf of the Elk Creek School District, said, "They're stuck for space, in Stonyford, for instance, there are 35 kids in one room. We would like to get some of the school buildings down there if the Job Corps center does close."

Opinion in support of keeping the center open was not unanimous.

Colbert said he felt he was expressing the "general opinion" of the County Board of Supervisors, which declined to pass a resolution opposing the center's closure, as follows:

"The general feeling of the Board is that we elected this Administration to run things as reasonably and with as small a crack on taxpayers as possible."

"The thought is: Let's see how Nixon will replace this. If he comes along with something else for less cost, let's go along with it."

He said he himself felt the center was "well administered," adding: "I think it has been good for the county."

Supervisor Pete Holvik verified that Colbert's statement reflected the supervisors' general opinion. He said some of his constituents had objected that more emphasis should be placed on "getting the job done rather than making a palace; on cutting the overhead and trying to maintain what they're now doing."

He said he himself believed that with the large investment in the Alder Springs center—over a million dollars—"to tear this camp down is not good economics."

The Rev. Raymond P. Squire, pastor of the United First Methodist Church and a member of the advisory committee, said that in closing the center "we're doing away with whatever we have done. Somewhere, somehow, we're going to pay. Unless we have something better, we're just foolish."

Coakley speculated on what would happen when corpsmen who had been recruited for the centers were suddenly told: "We're pulling the rug from under you."

"Where will they go?" he asked. "It's false economy. Most of them will probably go back on welfare. If just a few get into trouble, the costs will be much higher (than the Job Corps costs)."

Robert E. Boyd, attending the meeting,

said that "while a lot of things can be said about taxes and whether the money is well spent, as I view it I don't believe in chopping things off so fast. You often create a situation more expensive."

He said he felt the center should be kept open "at least another year so they (the present corpsmen) can complete the program—until trade schools or other facilities can be established to absorb these youths."

Decker pointed out that "a big factor" concerning the Alder Springs corpsmen was "in getting them out of their environments into a wholesome environment." He said he seriously doubted that urban centers could absorb them.

Lloyd Britton, Mendocino National Forest Supervisor, also expressed disappointment at plans to close the center.

EXPLANATIONS ARE HOGWASH

The shutdown of Alder Springs and 58 other Job Corps centers is underway, by executive order of President Nixon. They are to be completely closed by June 30. Seldom before has an administration unleashed such a stream of verbal hogwash in an attempt to justify an unjustifiable move.

Secretary of Labor George Shultz, whose department has been made responsible for the Job Corps program, insists that the corpsmen will be taken care of either by transfer to the remaining centers or in 30 inner-city and near-city skill centers.

First, he fails to explain that these skill centers have not been authorized by Congress; not a dime has been appropriated for them.

Secondly, he fails to explain that the closing of the Job Corps centers will release more than 17,000 youths; yet the skill centers, even if authorized and financed, would provide only 4,000 openings. And how he would jam corpsmen from more than half the centers into the few remaining centers defies imagination.

Mr. Shultz must know, but neglects to say, that the single existing Job Corps inner-city skill center, located in Baltimore, has been, in the words of Senator Alan Cranston of California, "a tragic failure due to astronomically high absenteeism."

Even if this were not the case, the skill centers would provide no substitute for the Job Corps centers, whose success has been based on removing uneducated, often troublesome youths from their poverty-stricken environments not only to give them basic education and training in job skills but to raise their sights, to stimulate their ambition so they have the incentive to lead constructive instead of destructive lives.

It seems ironic that both a Senate and House committee were conducting hearings on the Job Corps program as the administration issued its order to close the 59 centers.

Led by Senator Cranston, 22 senators implored President Nixon to delay the action until the merits of the Jobs Corps program could be determined. They pointed out that "irreparable damage to the future lives of many thousands of disadvantaged young men and women, and substantial depletion of available trainers and instructors for such programs will be caused by the closing of Job Corps installations if Congress decides they should be retained."

The Administration has issued not a word of reply as it has rushed along a course of action which will dash the hopes of thousands of disadvantaged youths for constructive, self-respecting lives.

THE GOVERNMENT'S NONPROFIT HOTEL CHAIN

(Mr. KYL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KYL. Mr. Speaker, some of the wondrous things we do in Government do not reflect with credit on Uncle Sam's business image.

In 1958, the Federal Government purchased the Congressional Hotel for \$1,680,000 then promptly leased the hotel back to a hotel corporation for \$21,000 a year. The lease contract asks the corporation to pay for decorating and furnishing, but Uncle Sam—out of his magnificent fee of \$21,000 a year—must take care of certain other matters. Records are not voluminous, but there is evidence that the Government has spent \$88,407 in repairs on the building. Even without this expenditure, the 1.25 percent return on investment is not in keeping with today's high cost of money. Please note that I am not in any way accusing the hotel corporation of any irregular or illegal dealings whatsoever. Nor do I challenge the corporation's business acumen.

However, motivation for these remarks today stems from the fact that the Government is apparently in the process of acquiring another hotel for its non-profit chain—this one a \$5 million structure known as the Willard, on Pennsylvania Avenue. In this case, the Interior Department—not the House Building Commission—would become the hotel operator, office manager, or custodian of open spaces.

It seems that GSA has three pieces of surplus property it is willing to trade for the Willard, an old VA building located at 210 Livingston Street in Brooklyn; the Calvert Building in downtown Baltimore; and some land on an old military base at Camp Parks, Calif. At this point we must assume that the value of the Willard is about \$5 million, the advertised figure, and that the three pieces of surplus total about the same amount. In light of previous hotel dealings on the Capitol campus, one might be crass enough to question some of the values involved, though I stress again that I am not in any way reflecting on the honesty or integrity of the Willard Hotel owners.

Of course, if the Government owned the Willard, it would not return taxes to the District of Columbia, which we understand would like more—rather than less—tax base.

The deal is part of the plan to beautify Pennsylvania Avenue, especially for those occasions when we inaugurate a new President—on which occasions we line the avenue on both sides with unpainted bleachers which have never been known for their esthetic contribution.

More seriously the avenue plan hardly seems a priority item when the District of Columbia includes a few miles of other thoroughfares which have been devastated by time, neglect, and more violent factors. Still more important are the human needs which remain unmet, and which will not be improved by a Pennsylvania Avenue facade.

The fear is that the Willard owners might tear down the hotel and build an office building, and that this construction might jeopardize future development of the grand design. Government acquisition would be step one of that development. Apparently, any other property

owner in the area would frighten the Government into taking similar action if said owner would threaten to add to the tax values of the District building something new on the site. I am sure there are some individuals who might even suggest that the Treasury Department might be leveled so there would be an unobstructed view from the Capitol to the White House.

At another time, when the Nation has met its genuine needs and when we have abandoned the annual ritual of increasing the public debt ceiling, we may better consider such matters. By not acquiring public properties in the meantime, we may save enough money to accomplish the desired task.

PROPOSAL FOR ASSISTANT SECRETARY OF ARMY FOR CIVIL WORKS

(Mr. DON H. CLAUSEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DON H. CLAUSEN. Mr. Speaker, in 1966 the Secretary of the Army released a very important report entitled "A Report to the Secretary of the Army on the Civil Works Program of the Corps of Engineers by the Civil Works Study Board." This report, which was published as a committee print by the Senate Committee on Public Works, is in my judgment a valuable and comprehensive review of the civil works program of the Army Corps of Engineers.

Many excellent recommendations were made. The great majority of these recommendations were susceptible to and received administrative implementation by the Secretary of the Army and the Chief of Engineers. At this time I would like to comment on one specific and very important recommendation of the Civil Works Study Board which requires legislative implementation. In the report submitted to the Secretary of the Army by the Civil Works Study Board in January 1966, it was recommended that an office of an Assistant Secretary be established to assist the Secretary of the Army in the administration of the civil works program.

At page 17, the report concluded as follows:

ROLE OF THE SECRETARY OF THE ARMY IN CIVIL WORKS

The need for personal participation by the Secretary of the Army and the Army Secretariat in civil works matters has increased in general relation to the increased scope and complexity of the program. The importance of the program to the Nation and to the Army warrant a higher degree of personal involvement in the conduct of the program at the secretarial level than has heretofore been considered necessary. The Secretariat should also maintain general cognizance of the interrelationships of the civil works and military missions of the Chief of Engineers. The Board believes that the Secretary's Special Assistant for Civil Works should have the rank of Assistant Secretary of the Army and that his responsibilities should be principally for civil works. Adequate staff action to enable the Secretariat to function effectively should be obtained by staffing the Office of Civil Functions to handle normal and continuing demands and by establishing specific procedures for use of OCE personnel

for temporary and unusual demands for staff work.

At page 18, the following recommendation was made:

RECOMMENDATION

3. The Secretary of the Army should seek to establish an office of an Assistant Secretary of the Army with responsibilities primarily for the civil works missions and, incidental thereto, to maintain general cognizance of interrelated aspects of the civil works and military missions of the Chief of Engineers.

In my opinion, the need for more effective interdepartmental coordination at top levels has become progressively more urgent during the 2 years since the Study Board submitted its report. The workload imposed by membership on the Water Resources Council and the emerging requirements of the Council on Marine Resources and Engineering Development, together with the problems stemming from the increasing involvement in water resources development of the new Departments of Transportation and Housing and Urban Development, are rapidly intensifying the demand for more effective interagency coordination at the Secretarial level. Moreover, the National Water Commission has been established, and this will throw another heavy load upon Army. Finally, it is being charged with increasing frequency that the Secretary of the Army is unable to give the civil works program the attention it would receive were it shifted to the Department of the Interior. All of these developments emphasize the need for early action to establish an Assistant Secretary who can devote himself primarily to the civil works mission.

I am convinced that the contribution of the Department of the Army in working with the President's staff, and in interagency bodies such as the Water Resources Council, would be more effective were the Department represented by an Assistant Secretary, as are most of the other departments participating in the Water Resources Council. Representation for the Army in these interagency activities has been assigned to the Special Assistant to the Secretary of the Army for Civil Functions. The Army representatives have had additional time-consuming responsibilities in the Department. The last four special assistants also held the job of General Counsel of the Department. There is no question in my mind that the Army representation during the past several years would have been more effective in interagency negotiations had an Assistant Secretary of the Army been able, with the assistance of a small supporting staff, to devote a major part of his time to resource development activities.

The civil works program of the Army is important to the future of the Nation. The wealth and strength of our country, and the welfare of its citizens, depend in considerable part upon the wise development, conservation, and utilization of its natural resources. Moreover, the civil works program by itself exceeds in magnitude the total programs of several of the existing Federal Departments. From the standpoint of both size and importance, therefore, there is full justification in proposing that an Assistant

Secretary be made available to the Secretary of the Army to assist him in discharging his broad and vital responsibilities for the Nation's national resources.

For these reasons I am pleased to introduce with 11 of my colleagues legislation which would establish the position of Assistant Secretary of the Army for Civil Works:

H.R. 11356

A bill to amend title 10 of the United States Code to provide for an Assistant Secretary of the Army for Civil Works

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3013 of title 10, United States Code, is amended by striking out "four Assistant Secretaries" and inserting in lieu thereof "five Assistant Secretaries" and by adding at the end thereof the following: "One of the Assistant Secretaries shall be the Assistant Secretary of the Army for Civil Works. He shall have as his principal duty the overall supervision of the functions of the Department of the Army relating to programs for conservation and development of the national water resources including flood control, navigation, shore protection, and related purposes."

Sec. 2. Paragraph (15) of section 5315 of title 5, United States Code, is amended by striking out "(4)" and inserting in lieu thereof "(5)".

BLACK HISTORY—LOST, STOLEN, OR STRAYED

(Mr. SCOTT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. SCOTT. Mr. Speaker, a constituent who is employed at the National Institutes of Health has furnished me a copy of a memorandum to all NIH employees by the Director, urging them to see a series of films, the first of which is on "Black History: Lost, Stolen, or Strayed" and runs for 54 minutes.

According to the Director, it is a portrayal of some of the things that happen to an American if he is black. The Director states that this will be one of a series of films scheduled to be shown at noon and which will extend beyond the usual lunch hour. He urges supervisors to excuse employees for sufficient additional time to permit their attendance at the film showing.

It is interesting to note that this stationery has a motto at the bottom stating, "Help eliminate waste—HEW cost-reduction program," and raises the question which I feel the membership might want to ponder and that is whether citizens should be paying for Government employees to see films of this nature which, at most, portray a particular social point of view.

I am calling this memorandum to the attention of the Secretary of Health, Education, and Welfare and it is inserted in full at this point in the RECORD for the information of the House:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, PUBLIC HEALTH SERVICE,

April 30, 1969.

To: All NIH Employees.
From: Director, NIH.
Subject: NIH Film Series.

Wednesday, May 7, 1969, with the showing

of "Black History: Lost, Stolen, or Strayed," in the Clinical Center Auditorium at 12 noon, the NIH will inaugurate a series of films focusing upon social issues critical in today's world.

This new education program at the NIH is an attempt to stimulate personal involvement in the broad and complex range of human problems. The films for this series will be chosen on the basis of their relevance to racial problems, their insight into the problems and their ability to stimulate creative dialogue. From time to time, resource people from the field of civil rights and special guests will be invited to attend and discuss the films.

Much of our problem of race relations in this country appears to be due to the lack of information and a paucity of communication between groups. It therefore seems important that with our commitment to racial justice we should attempt to create within the NIH community a warm climate conducive to an honest exchange of ideas and feelings.

This first film, "Black History: Lost, Stolen, or Strayed," (54 minutes running time) is a Bill Cosby guided tour through a history of attitudes—black and white—and their effect on the black American. It is a portrayal of some of the things that happen to an American if he is black. Cosby reviews black American achievements omitted from American history texts, the absence of recognition of Africa's contributions to Western culture, and the changing Hollywood stereotype of the black American.

The showing of this film will be repeated in the Clinical Center Auditorium Thursday, May 8, 1969, at 12 noon.

Since many of the films in this series will extend beyond the usual lunch hour, employees are requested to make advance arrangements with their supervisors for attendance. Supervisors are urged, where the work situation permits, to excuse those employees who have requested additional time for attendance at the film showings.

ROBERT Q. MARSTON, M.D.

ANOTHER IMPORTANT WEST VIRGINIAN

(Mr. STAGGERS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. STAGGERS. Mr. Speaker, it is no surprise to us professional West Virginians to hear of one of our numbers who has achieved distinction in some worthy calling.

This time it is a West Virginian—Joe Bartlett—who has won a "coveted patriotic award" given by the Freedoms Foundation of Valley Forge. His story is well set forth in the Buckhannon, W. Va., Delta, a weekly newspaper published in my district, and edited by W. Herbert Welsh. The paper is outstanding in appearance, in news material, and in influence in the community. The editor is conspicuously alert in finding and in reporting news important to his readers.

The story includes a picture of the award winner taken with Senator DIRKSEN. I am sorry the RECORD cannot carry the picture. But I am proud to present the text of the article for the edification of my friends in the House. And I will let the editor of the Delta tell the story and the name of its subject in his own way.

Joe Bartlett is a friend of mine as I am sure he is of every Member of the House. We are proud of his achievement.

The article follows:

JOE BARTLETT WINS HONOR MEDAL AWARD (By Mary Liz Herndon)

A former Staff member of the Delta is to be the recipient of a coveted patriotic award, according to an announcement by the Freedoms Foundation of Valley Forge.

Joe Bartlett, well-known in Buckhannon since his employment with the Delta some 20 years ago, is to receive the George Washington Honor Medal Award for an essay he wrote, entitled, "Strange Legend: Curious Riddle."

The essay was written in the form of a Biblical parable, and dealt with the dilemma of doing business with an enemy. The awards jury judged Bartlett's writing to be—"an outstanding accomplishment in helping to achieve a better understanding of the American way of life."

A native of Clarksburg, Joe's family later moved to a farm home on Route 20, near Romines Mill, where his mother now resides. His father, the late F. Dorsey Bartlett, died in 1965.

Joe is presently Reading Clerk of the U.S. House of Representatives in Washington, where he has served nearly 28 years since going to work for Congress as a Page in 1941.

Three years earlier, in 1938, Delta Editor Herb Welch, then a cub reporter for a Clarksburg newspaper, had gone to Washington to cover the story of a lone West Virginia representative at a massive schoolboy patrol convention. Eleven-year-old Joe Bartlett was that delegate, and the story as created by Reporter Welch, won for this littlest delegation, the mightiest title of "America's Typical Schoolboy Patrolman."

When, during the adjournment of Congress in 1947, Bartlett decided to take some classes at West Virginia Wesleyan, his friend, Editor Welch, asked him to come over to the Delta and get better acquainted with the newspaper business. During the period that followed, Joe did just about everything there was to do around a weekly newspaper but run the linotype.

Long associated in political activities and other common endeavors, the two recall when Reporter Welch was courting Joe's sixth-grade school teacher on a motorcycle. The very popular teacher at Clarksburg's Morgan school, Miss Katherin Anglin, is now, of course, Mrs. W. Herbert Welch.

During the intervening years Bartlett has spent two brief tours on active duty with the Marine Corps, and is presently a lieutenant colonel in the Reserve.

Joe is married to the former Virginia Bender, daughter of Mrs. Edna Bender of Chagrin Falls, Ohio, and the late Senator George H. Bender. "Jinny" was the Ohio Princess in the 1951 Washington Cherry Blossom Festival, and Marine Lt. Bartlett was her escort. A year later they became Mr. and Mrs. Bartlett and, subsequently, the parents of two daughters, Linda, age 15, and Laura, 11.

The actual presentation of the George Washington Honor Medal to Bartlett will take place at a later date to be announced by the Freedoms Foundation.

OPERATION FORESIGHT

(Mr. ANDREWS of North Dakota asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ANDREWS of North Dakota. Mr. Speaker, now that most of the rivers and streams have returned to their channels and the flooding in North Dakota and the Upper Midwest is, for the most part, over, this is a good time to review the success of "Operation Foresight," the President's flood preparedness program initiated last February. At that time, the

Director of the Office of Emergency Preparedness was instructed to coordinate the activities of all Federal agencies involved and to make sure that all possible action was taken against the threatened floods.

The Army Corps of Engineers embarked on an unprecedented flood preparedness program, protecting over 400 communities, building over 200 miles of levees and preventing damage estimated at approximately \$230 million.

Operation Foresight, as a whole, prevented untold personal hardships which are not measurable in dollars and, in those areas where the work was done, it was a most effective program.

The people in North Dakota who benefited from the protection provided by Operation Foresight are most grateful and I insert in the RECORD at this time a statement by Maj. Gen. Frederick J. Clarke, U.S. Army, Deputy Chief of Army Engineers, on "Operation Foresight":

OPERATION FORESIGHT

We have no big announcement—but we do have some thoughts about Operation Foresight and the floods this past spring that we believe deserve consideration by the public.

This has been an unprecedented operation. While it did not involve any new laws, new policies, new operations, no startling new techniques, it was unprecedented simply in the applications which President Nixon made of existing authorities and policies.

In late February the President, having been continuously informed of the flood threat provided by the snowpack, directed the Director of Office of Emergency Preparedness to assure that all Federal agencies carry on all prudent activities to prepare against the threatened floods.

The next step was a White House meeting of representatives of the Federal agencies charged with responsibilities in a flood disaster situation. Insofar as the Army Engineers are concerned, a request was made to the Secretary of the Army for the aggressive use by the Corps of Engineers of their authorities under Public Law 99—in this case to prepare against a threatened disaster rather than waiting to react when the disaster actually happens.

Operation Foresight appears to have been a success. What we want to point out is that there was a large element of good fortune in that success, and that next time things might not go so well. We don't want people to think that Operation Foresight has revealed some quick, cheap, easy solution to the national flood problem.

But it was well worth doing. It saved property and, probably, some lives; it taught valuable lessons; it set valuable precedents. But we don't want it to create a backlash of overconfidence, complacency, or false security. I want to discuss with you what Operation Foresight was not, as well as what it was.

Let me tell you some of the unusually favorable aspects of this year's experience. Next I will tell you how the people of the flood area, aided by their Government, set about taking advantage of those favorable aspects. Then I will discuss the meaning of this experience in terms of future emergencies.

First, this was a snowpack flood. This means that we had a winter-long warning that the flood threat was gathering. We had a pretty fair quantitative estimate of the size of the threat in terms of volumes of water, timing, and demands on rivers and watercourses. There will be other similar situations in the future, and the "Foresight" experience will help us meet them. But it will not help us

cope with rainstorm floods of the kind that smash down the valleys of West Virginia, say, or the hills of the Los Angeles area, at almost any time of the year, with little or no warning. It will not help us deal with hurricane floods, such as the great floods of New England in 1955, or the flash floods which follow sudden downpours in Tucson. These take works in-being before the flood threat.

Second, by and large we knew this year's primary flood area pretty well. We had the experience of the 1965 floods in the Upper Midwest to guide us. We were all caught by surprise, however, at Minot, North Dakota based on a much lower forecast of a flood potential. But of the hundreds of towns that might have been damaged, this was the only one of size which suffered heavy damage. Our crystal ball isn't perfect and probably never will be—which is one of the cautionary things people should keep in mind. By and large, however, we, and here I mean both Federal and local people, knew the carry-off capacities of the natural channels in this year's flood area; we knew how the water moved in those channels; we knew where possibilities existed for by-passes and cutoffs; we knew where to go for sand and clay and emergency construction materials; we knew the region's resources of available machinery and equipment. We do not have exactly the same knowledge in all parts of the country. Each region is different with respect to the kind and nature of studies that have been Congressionally authorized and carried out, and with respect to the amount of experience we have derived from past emergencies. In the Midwest, the situation was unusually favorable in this respect.

Third, nature was generally kind. This is perhaps the outstanding fact about the 1969 flood. By and large, the water content of that tremendous snowpack came gently off the land. With different weather or heavy rains it might have stampeded. I doubt very much that the hasty, improvised emergency dikes and other works we put up under Operation Foresight would have withstood a stampede of waters as well as they did the more orderly run off that actually took place, generally in accord with the predictions. We want to explain to people that not all floods which invade their valleys will be as docile and tractable as this one was.

Fourth, the people of the flood area still had the memory of the 1965 disaster fresh in their minds. Operation Foresight was very largely and initially a local community effort, and I daresay never before have so many communities acted so energetically and cooperatively and unanimously over so large an area in such an endeavor. People pitched in, city fathers did not grudge money, Federal technical material and contractual help was welcomed and invited, and very, very few communities held back or grudged their share. Such energetic local participation was of great value in preventing loss and damage and disaster. I doubt you will find a single community throughout the flood area that regrets its effort or its investment in Operation Foresight now that it is all over. I hope that this lesson will be heeded in other times, perhaps in other areas, if a similar flood threat should occur again.

Fifth, but not least, we had unprecedented interest and alertness at the Federal, State and local levels. I am talking to you as a technician, not a politician. In the past two months I have met scores of political leaders in connection with Operation Foresight and I want to tell you that that Operation had no partisan labels. We face the fact that one of the valuable lessons of Operation Foresight was the lesson of whole-hearted support and initiative by all levels of Government.

The best way to present this point to you is to move now into the second phase of this presentation—the phase in which I tell you

how the Government and public officials took advantage of the warning provided, and the time available, and their knowledge of the area, and the willingness and concern of the local people, to put Operation Foresight together.

As I said, the agencies involved at various levels had been keeping an eye on the snow-pack situation beginning in January. On February 28, President Nixon summoned representatives of the Federal agencies to the White House. The Department of the Army represented the Department of Defense; since the Army headquarters in the Pentagon is responsible for military support by all elements of the Defense Department in case of natural disaster. The Office of Emergency Preparedness was represented by Director George A. Lincoln.

On the following day, March 1, the President issued his order directing that Federal agencies take all feasible steps within their respective authorities to prepare for the flood threat; and this order in effect launched Operation Foresight. For one of the things it brought about was an unprecedented and aggressive application of Public Law 99 to prepare for an anticipated disaster before the disaster actually happened. Public Law 99 authorizes the Army's Chief of Engineers to spend emergency funds for flood emergency preparations, flood fighting and rescue work, and the repair or restoration of damaged flood control works. It had never before been invoked on such a scale so far in advance of a flood. This law provided the legal basis for, and most of the money for the before-flood-preparedness phases of the Federal part of Operation Foresight.

Precisely because it was unprecedented and unique, the nature of this effort which the Federal Government was prepared to offer in support of State and local activities had to be explained to the officials of the non-Federal levels of government. The first ten days or so of March were spent in coordinating the undertaking and mobilizing the effort. By mid-March my boss, Lt. Gen. Cassidy, Chief of Engineers, and I had met with the Governors or their representatives of a score of States, accompanied by representatives of OEP and the local Army commanders. These tours and visits continued throughout most of the flood fight to make sure that the Federal aid was fully understood and fully used. Our guidance to our field offices was simple and direct: do whatever makes sense before the floods occur. To make sense, our help had to be sound from both engineering and economic standpoints, and depended on local governments providing work areas and local labor either paid or volunteer.

I'm not going to repeat the story of this flood fight. The press did a wonderful job of covering most aspects of it, and for me to tell you about it would be carrying coals to Newcastle. To refresh your memories, I will just run down some of the basic statistics:

The damage suffered in the flood we estimate at about \$100 million, largely rural and highways and bridges. The damage prevented, at about \$250 million.

These are both "eyeball" estimates. We have crews in the field recording high-water marks, establishing flood profiles, and surveying damage from which more reliable estimates can be made, but these won't be available for some weeks. I don't want to leave the impression that all snowpack flood threats are over—we still have a dangerous situation which will continue through June in the San Joaquin Valley of California.

About \$19 million were spent by the Army Engineers on Operation Foresight. These expenditures included more than 400 contracts for emergency work in about as many communities, plus the procurement and deployment of supplies and equipment. About 10 million sandbags were procured—enough to

reach across the entire U.S.-Canadian border from Atlantic to Pacific—and about 200 miles of emergency levees were built, enough to reach from here to New York. More than 200 flood-fighting experts from all parts of the country were sent into the threatened areas to supplement our regular forces in those areas in advising and supporting local efforts.

There were just a couple of aspects that didn't catch the eagle eyes of the press corps, by and large, that I would like to call to your attention.

One is the story of the effort that didn't get made, because it wasn't needed. But it was ready, and I hope people will realize that Operation Foresight included some back-up preparations which, another time, might be more prominent.

The Army, as the agent for Department of Defense, for example, prepared for an all-out disaster relief effort. Every Army headquarters reviewed its plans for disaster emergency activities and made ready its manpower and equipment resources. From February through April, the Army's Operations Center in the Pentagon maintained a 24-hour-a-day coordination center to keep track of possible needs. As it happened, almost 2,100 Army, Navy, Air Force, and Coast Guard personnel and more than 1,700 National Guardsmen were used for evacuating stranded people, levee patrolling, sandbagging, prevention of looting, aerial reconnaissance, feeding volunteer workers, traffic control, and similar tasks. A special assist was provided by the young engineer officers, which the Department of the Army released from school assignments, to assist the Corps of Engineers in carrying out the emergency work. But this was a fraction of the service that was ready and available if it had been needed.

Similarly, OEP had alerted a very big, many-sided back-up preparation effort. The President declared a major disaster in five states, North Dakota, South Dakota, Minnesota, Iowa and Wisconsin making additional federal funds available under PL 875. I'm not going to try to tell their story. Suffice it to say for the present that it was there, and people should note and remember it.

The third phase of my presentation was to draw lessons and point warnings, but I find that I have largely done this as I went along.

I think we should include the Foresight-type use of Public Law 99 and the other preparatory activities launched this spring, as part of our national disaster emergency policy—part of our regular armory of flood-fight resources that can be drawn upon in circumstances appropriate for its use. At the same time we should recognize that in many circumstances, the Foresight type of approach will not be appropriate, so that we need other devices in our armory too.

One: We need to carry forward our regular Federal flood-control programs, at such rate as Congress and the Executive branch may determine in view of the total resources of the Government. Hurriedly-built emergency works of the kind put up under Operation Foresight are not good enough or strong enough to withstand the onslaught of a wild river on a rampage—even though they may have held out, shakily in some places, during this year's well predicted and well-ordered floods.

Two: Flood control and flood protection programs should be supplemented by flood-plain land-use regulations. Such regulations would typically include zoning ordinances and appropriate flood-proofing provisions in local building codes. These are not subjects for Federal legislation; but, as you may know, the Corps of Engineers is authorized to make flood-frequency and related studies for use by local communities in connection with such proposed ordinances. We believe this

kind of activity deserves much greater attention than it has been getting. Perhaps this year's floods will help stimulate such attention.

Three: We have to move forward with our comprehensive water-resource planning endeavors in the nation's major river basins. And in the light of our flood experience of this and other years, we should gear local and State and Federal flood-control and flood-plain regulation activities into over-all policies for the management of water and related land resources. This is a big topic, too big really to discuss today. I only want to point out that we of the Army Corps of Engineers are keenly aware of the fact that flood protection is one aspect—an important one, but only one—of many involved in water resource development and management, and that all must be considered together in all their mutually interacting relationships. We have just come through a dangerous flood experience and narrowly escaped a far worse one. We should heed the warnings it presents, but without either being stampeded into ill-considered actions nor lulled into false complacency. If we plan well, and plan together, we can avoid both kinds of error.

To sum up—the degree of our success this year in flood prevention is largely the result of warning, the bold and aggressive approach ordered by President Nixon, much initiative on the part of local and state governments, enthusiastic and altruistic participation by individuals, private enterprise, and government at all levels—proving, once again, that in a critical situation, people will work together in the common good.

PROPOSED INCREASE IN SOCIAL SECURITY BENEFITS

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BURKE of Massachusetts. Mr. Speaker, the announcement by the Honorable WILBUR D. MILLS, chairman of the House Ways and Means Committee, that no action will be taken this session to increase social security benefits concerns me greatly.

The need for an increase in social security benefits is urgent and immediate. For this reason I introduced on opening day of this Congress, H.R. 55 to provide for a 50 percent across-the-board increase in monthly benefits with the resulting benefit costs being borne equally by employers, employees, and the Federal Government.

This legislation is a realistic one that deserves action.

The Social and Rehabilitation Service estimates that the passage of H.R. 55 would result in a total savings in public assistance expenditures of approximately \$370 million, of which \$250 million would be Federal and \$120 million State moneys. In terms of the number of public assistance recipients affected, it is estimated that around 400,000 small old-age assistance grants would be discontinued and that about 700,000 others would be reduced.

Mr. Speaker may I submit for the RECORD a news clipping entitled "Has Congress Forsaken Us," written by the Boston Globe staff writer, Joseph B. Levin that serves to illustrate the urgency of the problem:

HAS CONGRESS FORSAKEN US?

(By Joseph B. Levin)

Chairman Wilbur Mills and his House Ways and Means Committee are in deep trouble with the elderly voters and their children. Take a look at these letters from the mailbag:

"I believe it is about time that leaders of the senior set throughout the land should single out Representative Wilbur Mills as their target of the day and focus attention on this dictatorial chairman who has announced his intention of delaying an increase in Social Security . . . As former chairman of the Winchester board of selectmen and as a retired dean I feel strongly that Mills can be challenged successfully. What we need is a march on Washington." (Col. J. P. (retired), Winchester.)

"I am 70. Like thousands of other senior citizens I am greatly concerned about the future. Despite enormous increases in Federal pay, Congress has not voted any increases in age 65 tax exemptions . . . Why has Congress forsaken us?" (letter to Rep. Mills from Paul G. Richter, Concord, N.H.)

"My mother, 83, is on Old Age Assistance and believe me, she cannot live on what she gets. Shame on this great and wealthy country that the old people, who have worked so loyally, should get such a reward." (Mrs. A. K. Nabnasset, Mass.)

"I am a widow, 70, living on \$117.80 Social Security in my own home. With high taxes, food and high prices generally, I need \$200 a month to get by on. Must one go on welfare after 42 years as a wage earner and taxpayer?" (Mrs. J. L. Malden.)

Senior Set gladly prints your protests but has no way of knowing whether Chairman Mills ever reads this column. Perhaps his fellow committeeman, Cong. James Burke of Milton, does. He might call it to Mr. Mills's attention. Or all of you folks could write to Mr. Mills direct.

As to the welfare question raised in several of the letters, it is my view that welfare is an honorable concept deeply embedded in the U.S. Constitution. Adequate welfare is as necessary to the security of America as money spent for the Armed Forces, the universities or the police. It helps society to stay together until a better system can be devised.

LET'S NOT STOP WITH FORTAS

(Mr. RARICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RARICK. Mr. Speaker, it is with mixed emotions that I receive the announcement that Justice Abe Fortas has resigned. I say "mixed emotions" because we have only one out—that others should resign for similar reasons.

Apparently members of the high judiciary not only deliberate together, they profit together.

In yesterday's Daily News we learned that other members of the High Court have entangled themselves into holding partnerships in land companies for tax loophole benefits and for identity-concealing fronts. A form of judicial-investment conglomerate.

Here in Washington, D.C., alone, the dealings include not only the High Court, but spill down to the lesser lights—all of whom have been front-runners in revolutionary court decisions abusive of individual liberties and our basic constitutional law and traditional mores.

Little wonder urban renewal and model cities programs find favor under color of the law, in the eyes of some members of

the judiciary—some judges are not entirely disinterested.

For example, in Concord Associates, a partnership on record in Arlington County, Va., dealing in land and real estate, we find listed among the limited partners: Miss Carolyn E. Agger, wife of Justice Abe Fortas; Chief Judge David Bazelon, of the court of appeals for the District of Columbia Circuit; Mrs. Bazelon, his wife; Justice William Brennan, U.S. Supreme Court; Justice Abe Fortas; former Justice Arthur Goldberg; and Court of Appeals Judge J. Skelly Wright.

In Arlington County, Va., Duke Associates, another limited partnership dealing in land transactions, we find, as partners: Justice Abe Fortas, Judge Bazelon, and Chief Judge Simon E. Sobeloff, of the fourth circuit court of appeals.

In the District of Columbia, on record is the Colorado Building Associates, whose purpose again is given as acquisition of land, and we find among the partners: Judge David Bazelon and Judge J. Skelly Wright, just to mention a few.

Again in Arlington County, Va., a partnership called Wilson Associates, listing as limited partners Judge David L. Bazelon, and showing that by an amendment in December of 1967 Justice William J. Brennan, who had been a limited partner, transferred his holding to a retirement fund.

I raise the question; to whom would property bids from HUD and model cities programs go?

Mr. Speaker, these records I have used as an example are by no means intended to imply that a complete search has been made. There may be others even more suggestive. Should not the American people be given a full disclosure?

Is it not conceivable that the Fortas resignation is intended only to frustrate further inquiry? We have the responsibility to our people not to permit ourselves to be pacified by the departure of one—Abe Fortas—while there remain in the Federal judiciary others whose similar interests damage the solemnity of the judiciary.

If corruption in the Federal judiciary exceeds one member, it is no less corrupt by merely losing one of several corrupting influences.

Public confidence in justice demands more than Fortas' resignation from the Federal judiciary.

I include survey sheets of the identified partnerships and a newsclipping from the Washington Daily News for May 14, 1969:

ARLINGTON COUNTY, VA.

SURVEY SHEETS

Name: Concord Associates.
Partnership Agreement: 12/22/65.
Agreement filed: 1/18/66 (Arlington Co. Partnership Book # 3/523).

Purpose: Leasing of parcels of ground, and the construction, development and operation of rental real property.

Second Amendment: 4/11/66; filed 5/4/66 (Partnership Book # 4/49).

Limited partners: Carolyn E. Agger (Mrs. Fortas), 3210 R. Street, N.W., 2.10 percent; David Bazelon, 4.16 percent; Miriam K. Bazelon, 2.30 percent; Wm. Brennan, 1.40 percent; Abe Fortas, 2.10 percent; Arthur Goldberg,

4.16 percent; Abraham Ribicoff, 4.16 percent; J. Skelly Wright, 1.40 percent.

ARLINGTON COUNTY, VA.

Name: Duke Associates (originally recorded in Fairfax County Partnership book 31/425).

Amendment of 3/30/64 (filed in Arlington Co., 5/20/64; Book # 3/235).

Limited partners: David Bazelon; Abe Fortas; Roy Bazelon; Jeanette Bazelon; S. J. Bazelon; new partner: Simon E. Sobeloff, 1.4285 percent.

WASHINGTON, D.C.

D.C. RECORDER OF DEEDS

Name: Colorado Building Associates.

Filed: 2/2/65.

Instrument # 151.

Purpose: acquisition and operation of Colorado Building (1341 G. Street, N.W.).

General partners: Joel Kaufman; Stanley Rosenzweig.

Limited partners: David L. Bazelon, 8 percent; Simon Hirshman; Saul Feld, 1328 New York Ave.; Gerald Friedman, 4527 29th; David Sher; Robert Wolfson; —, J. Skelly Wright, 2 percent.

ARLINGTON COUNTY, VA.

Name: Wilson Associates.

Filed: 5/21/63 (Book #2/457).

Amendment: 5/28/63 (Book #2/463).

Limited partners: Miriam K. Bazelon, 2.88%; David L. Bazelon, 2.16%; Agnes M. Johnson, 2745-29th str., N.W., 0.72%; Charles E. Smith, 18.03%; Leonard A. Solomon, 12305 Greenhill Dr., Silver Spring, 6.48%; Myra S. Brill, 4095 Monticello Blvd., Cleveland Hgts., Ohio, 0.72%; Marvin Kogod, Miriam K. Bazelon and Arnold F. Shaw, Trustees for J. B. Trust, 503 D street, N.W., 1.08%; same Trustees for R. B. Trust, 1.08%; Arnold F. Shaw and David L. Kreeger, Trustees for J. A. B. Trust, 1.08%; same, Trustees for R. L. B. Trust, 1.08%.

Amendment: 11/21/63 (Book #3/63).

Charles E. Smith assigns to: David Kotkin, Trustee, 2.88%; Roy and Jeanette Bazelon, Riviera Dr., Golden Beach, Fla., 1.44%; Charles E. Smith, 13.71%.

Amendment: 4/15/64 (Book #3/239; filed: 5/20/64).

New limited partners: vice Charles E. Smith: Wm. J. Brennan, 2.16%; David L. Bazelon, 0.72% (together: 2.90%); Simon E. Sobeloff, 0.72%.

Amendment: 12/21/67 (Book #4/435; filed 1/9/68).

Brennan assigns 2.16% partnership to Charles E. Smith Retirement Fund.

Amendment: 11/19/68 (Book #5/171).

Robert P. Kogod, 9118 Redwood Dr., Bethesda—replaces David Kotkin, Trustee.

[From the Washington (D.C.) Daily News, May 14, 1969]

PROFESSOR CITES "PARTNERSHIP": FORTAS MAY SIT OUT CATHOLIC UNIVERSITY CASE

(By Dan Thomasson)

Besieged Supreme Court Justice Abe Fortas' real estate interests here are expected today to bring a demand that he disqualify himself from ruling on an appeal motion brought by a university law professor.

Dr. William Roberts, professor of international law and relations at Catholic University, will file a petition with the Supreme Court seeking disqualification of Justice Fortas and a fellow associate justice, William Brennan, on grounds they are business partners with two lower court judges whose decisions in the case are under challenge by Dr. Roberts.

This latest challenge to Justice Fortas follows reports by congressional sources that the Justice Department has been checking into Justice Fortas' connections with real estate syndicates in the district area. The

sources said some of these associations might constitute a conflict with Justice Fortas' court duties.

RESIGNATION RUMORS

The continuing furor over Justice Fortas' dealings with jailed Florida financier Louis E. Wolfson produced a new round of reports today that Justice Fortas' resignation is "imminent."

In his petition to the high court, Dr. Roberts will charge that Justice Fortas and Justice Brennan are limited partners in a Virginia apartment complex with David E. Bazelon, chief judge of the U.S. Court of Appeals for the District of Columbia, and J. Skelly Wright, also a Court of Appeals judge here.

The Washington Daily News and other Scripps-Howard newspapers disclosed in November that Justice Fortas, Justice Brennan, Justice Wright, Judge Bazelon, Mrs. Bazelon, Mrs. Fortas (Washington tax attorney Carolyn Agger), former United Nations Ambassador Arthur Goldberg, all had an interest in Concord Village Associates, which operates a 531-garden apartment complex in Arlington.

The project was described by tax experts as a legal "tax shelter" in which the partners could deduct from taxes on ordinary income their share of theoretical depreciation losses on the apartment complex.

Dr. Roberts also will note in his petition to the court that Judges Bazelon and Wright, who ruled on his case, are limited partners in a downtown Washington office building.

Dr. Roberts' petition stems from his efforts to prevent the university from abolishing an Institute of International Law and Relations which Dr. Roberts had a contract to head.

Two motions filed in 1967 and 1968 asked the District Court here to issue an injunction halting the dissolution of the institute. Both motions were rejected and Dr. Roberts appealed to the U.S. Court of Appeals headed by Judge Bazelon.

After numerous delays, the appeals were denied and Dr. Roberts turned to the Supreme Court, asking for a writ of certiorari. His impending petition seeks to disqualify Justice Fortas and Justice Brennan from taking part in the court's decision on whether to grant the writ and go into the case.

As partners in the Virginia complex, Dr. Roberts charges, Justice Fortas and Justice Brennan should not be sitting in judgment of decisions made by two other partners in the same venture, Judge Bazelon and Judge Wright.

In addition to his holdings in Concord Village, Justice Fortas also has a limited partnership in Duke Associates, which also operates a Virginia apartment complex.

Last fall, Justice Fortas conceded to Scripps-Howard Newspapers that he was interested in obtaining the tax breaks such ventures offered. He said this was particularly true when he was practicing law.

Last night, almost at the last minute, Justice Fortas cancelled a scheduled appearance before the First Circuit Judicial Conference in New Castle, N.H. No reason was given.

The SPEAKER. The time of the gentleman has expired.

ALCOHOLISM CARE AND CONTROL

(Mr. HAGAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. HAGAN. Mr. Speaker, today I rise again to bring to the attention of my colleagues the serious and growing prob-

lem of alcoholism. The Public Health Service and the Crime Commission have described alcoholism as the Nation's fourth most serious health problem ranking behind heart disease, mental illness and cancer. Alcoholism afflicts an estimated 5 million Americans and roughly 250,000 persons join the ranks of alcoholics each year.

For many years I have been working on developing a comprehensive program to deal with this disease on a national level. As a member of the Georgia Legislature I was instrumental in creating the Georgia Commission on Alcoholism which has become one of the finest programs of its kind in the country today. Beginning with the 87th Congress and in successive Congresses, I have introduced legislation dealing with alcoholism. I am pleased that the 90th Congress passed two significant pieces of alcoholism legislation, one, the Alcoholic Rehabilitation Act of 1968 and the other, my own bill, establishing a program of alcoholism care and control for the District of Columbia. The former, which is contained in Public Law 90-574 is a good beginning for a national program but so much more needs to be done. Let me bring out a few revealing factors on alcoholism.

The Crime Commission reported that in 1965 one out of every three arrests, some 2 million, were for public drunkenness, thus placing a heavy burden on the courts, the police and the penal system, all of which are already overburdened with the increasing crime rates. It should also be noted that only 3 to 8 percent of all alcoholics fall in the so-called skid row category.

The costs of alcoholism run high. It has been estimated that the cost to business and industry from absenteeism, inefficiency, and accidents due to alcoholism runs to some \$2 billion annually.

Traffic accidents cost the Nation some \$9 billion annually in property damage, wage losses, medical expenses and insurance costs, according to the National Safety Council. Alcohol is reliably believed to have a major role in this tragic toll. The Public Health Service has pointed out that half of all fatal motor vehicle accidents have some association with alcohol.

The life expectancy of an alcoholic has been estimated to be about 10 to 12 years less than the average.

Recognizing these facts and their tremendous impact on our people, I am introducing today the Alcoholism Care and Control Act of 1969. This measure provides for a system of incentive grants for constructing, staffing, operating and maintaining alcoholism prevention and treatment facilities and it will increase Federal participation in constructing these facilities. It will encourage the development of expanded programs of alcohol education and will establish a system of centers throughout the country for much-needed research in alcoholism and alcohol-related problems.

It also provides emphasis to the area of personnel development in the field through the mechanism of fellowships and training grants.

The provisions of this bill are needed, in fact, they are essential, if we are to involve the Federal Government in a meaningful way. If this first national breakthrough is made, our Nation will soon have a comprehensive program to treat alcoholism as a disease and not as a criminal problem.

Mr. Speaker, I would welcome any of my colleagues to cosponsor this bill.

THERE MUST BE SOCIAL SECURITY INCREASES THIS YEAR

(Mr. RANDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RANDALL. Mr. Speaker, earlier today I joined with the gentleman from Ohio (Mr. VANIK) in the introduction of a bill to increase social security payments for our senior citizens. I am sure we have all read that the chairman of the Ways and Means Committee has urged that an increase for social security recipients go over to next year. I want to commend the gentleman from Ohio. A 15-percent increase at first consideration might seem quite substantial, but compared with some of the increases in compensation for others it is quite modest. Let me first admonish and then go further to warn the Members of this House that if we fail to consider and to approve an increase in social security before we adjourn this session and go home as the recipients of a large salary increase for ourselves, we deserve the wrath that will come down on our heads.

Mr. HECHLER of West Virginia. Mr. Speaker, will the gentleman yield?

Mr. RANDALL. I yield to the gentleman from West Virginia.

Mr. HECHLER of West Virginia. I would like to commend the gentleman from Missouri for his position and say that I join with him and the gentleman from Ohio. This Congress must act on raising social security.

COAL MINE HEALTH AND SAFETY

The SPEAKER pro tempore (Mr. WAGGONER). Under previous order of the House, the gentleman from West Virginia (Mr. HECHLER) is recognized for 30 minutes.

Mr. HECHLER of West Virginia. Mr. Speaker, the committees of the House and Senate are winding up their hearings in consideration of coal mine health and safety legislation. I trust that this legislation will be passed by the Congress early next month.

Mr. Speaker, I do not believe that there can be health, safety, and security for coal miners as long as the top officials of the United Mine Workers and the United Mine Workers welfare and retirement fund put their plush personal comforts way ahead of the protection of the men who actually mine the coal. Evidence has been presented that very high salaries and pensions have been accorded to the top officials of the Washington headquarters of these two organizations. Last year over a quarter of a million dollars in salaries and

expenses went to six members of two families, the families of President W. A. Boyle of the UMW and Secretary-Treasurer John Owens. UMW Secretary John Owens drew salary and expenses of \$44,888 for 1968, while also having two sons on the UMW payroll as follows: Attorney Willard Owens, \$43,178 for salary and expenses; and District Secretary-Treasurer R. C. Owens, \$28,377 for salary and expenses.

The Department of Labor records filed under the Welfare and Pension Plan Disclosure Act and under the other reporting requirements of Congress show that UMW President W. A. Boyle drew \$62,442 for salary and expenses in 1968, with his daughter, Miss Antoinette Boyle collecting \$43,517 as an attorney, and a brother, R. J. Boyle, collecting \$36,174 as an international executive board member. Thus, the two families of Boyle and Owens collected the grand total of \$258,576 in salaries and expenses for 1968 from the treasury of the international union, United Mine Workers of America.

Not satisfied with their current salaries, Messrs. Boyle and Owens, along with the vice president, George Titler, set up for themselves and for President Emeritus John L. Lewis a very private and personal pension fund which enables them to retire at total annual pensions of \$40,000 to \$50,000 per year for life, or 100 percent of their current salaries, not contributory.

This pension fund for the three top officials and retired UMW President John L. Lewis was set up out of the pennies, nickles, and dimes of coal miners paying union dues.

The Internal Revenue Service refused to grant special tax status to this special pension fund because it was judged to be discriminatory against employees receiving considerably less than 100 percent of their salaries in pensions. So in 1960 the top officials of the United Mine Workers took \$850,000 out of the UMW treasury and deposited that in the UMW-controlled National Bank of Washington as a very special pension fund designed for only four people. The value of this trust fund has now increased to well over \$1.5 million. In 1966 the agent's fee for administering this very special fund amounted to \$1,993.98, well above the \$1,380 which a retired coal miner draws from the welfare and retirement fund if he is lucky enough to surmount all the hurdles and to qualify for his \$115 a month pension.

Mr. Speaker, I believe that the president of the United Mine Workers of America and the top officials ought either to reduce these plush 100-percent-of-salary retirement nesteggs to the meager \$1,380 which a coal miner is supposed to receive, or else liberalize the coal miners' pensions.

It might be contended that under the law the United Mine Workers of America and the United Mines Workers' welfare and retirement fund must be kept separate and distinct. Yet we all know this welfare and retirement fund came at the initiative of the sweat, blood, and sacrifice of many coal miners who went out on strike in the late 1940's in order

to obtain the royalty per ton of bituminous coal mined in unionized mines to be contributed to this fund. That royalty now amounts to 40 cents a ton, and the total amount placed into the welfare and retirement fund each year is well over \$160 million.

Roughly averaged, this amounts to approximately \$1,600 for every coal miner in a unionized bituminous coal mine. If we could imagine for a minute how much private insurance, retirement, disability, and medical, one could purchase on the private market for \$1,600 a year annual policy, we could imagine that those for whom this royalty is contributed should be fairly well taken care of.

Unfortunately, Mr. Speaker, this is not true. Many, many miners are deprived of their pensions. I have stacks and stacks of letters from those who have applied for their pensions in the belief that they had qualified for them by the amount of time they had put in. Many others have had their medical cards taken away from them shortly after their retirement. Everyone knows that when a coal miner retires that is the time when he really needs his medical card more than ever for assistance.

Mr. Speaker, despite the fact that the UMW headquarters and the fund must legally remain separate, inasmuch as it was at the union's initiative that this fund was set up, I cannot understand why the royalty of 40 cents a ton has remained 40 cents for the past 17 years. It has not been raised since 1952. If there is any difficulty in obtaining sufficient funds to take care of retired and disabled coal miners and their families, and their widows, then the union certainly should take the initiative to raise this royalty.

There are interlocking directorates between the union and the fund, however, that would seem to indicate there is a little closer relationship.

The 1968 report of the National Bank of Washington, which is the bank controlled by the United Mine Workers of America, reveals that the bank's board of directors includes UMW President W. A. Boyle—annual salary and expenses: \$62,442—and UMW General Counsel Edward L. Carey—annual salary and expenses: \$43,872.

In addition to that, members of the board of directors of the welfare and retirement fund are Welly K. Hopkins, general counsel of the UMW Welfare and Retirement Fund—salary and expenses: \$50,345.38—and Thomas F. Ryan, Jr., comptroller of the fund—salary: \$50,000.08.

I do not believe, Mr. Speaker, one can have effective protection of the coal miners when their union is arbitrary and dictatorial and also cannot even recognize the difference between truth and falsehood in what its officials print and say.

In the March 6 CONGRESSIONAL RECORD, pages 5431-5432, Mr. Speaker, I included the text of a telegram which I had sent to Mr. W. A. Boyle, president of the United Mine Workers, asking for an apology and correction for what was essentially a false, malicious, and clearly libelous article which appeared in the March 1 issue of the United Mine Workers Journal.

Mr. Speaker, I ask unanimous consent that the text of my telegram to Mr. Boyle, along with the appended documents, be reprinted with my remarks at this point.

The SPEAKER pro tempore (Mr. WAGGONER). Is there objection to the request of the gentleman from West Virginia?

There was no objection.

TEXT OF TELEGRAM FROM REPRESENTATIVE HECHLER TO UMWA PRESIDENT BOYLE
MARCH 6, 1969.

W. A. BOYLE,
President, United Mine Workers of America,
Washington, D.C.

Page 13 of the March 1, 1969, issue of the United Mine Workers Journal contains a false and malicious article signed by Rex Lauck and entitled "Ken Hechler's credo is Revealed." This article purports to quote what are alleged to be "Hechler's own ideas" as allegedly expressed in the April, 1959 issue of Pageant magazine. The United Mine Worker's Journal article concludes: "That explains much about how this man Hechler operates. Shades of Joe McCarthy!"

I trust that you are aware of the fact that the article in the United Mine Workers Journal is worded in such a fashion as to be designed to defame my character. Thousands of readers of the journal, including a large number in my Congressional District, are being fed these deliberately falsified statements which bear no resemblance whatsoever to anything I said in the Pageant article, or anything I have ever either said or thought before or since the appearance of that article.

Even if you should remove the direct quotation remarks and present this material as a paraphrase instead of an allegedly direct quote, the entire article in the journal is false, malicious and designed to defame my character.

I trust you do not condone the printing of such malicious misinformation by a man listed on the masthead of the journal as "assistant editor." I demand an immediate apology for this false quotation, attribution and characterization in the article, and the opportunity to present my views on health and safety legislation in a future issue of the journal as well as a reprint of the April, 1959, Pageant article.

The cause of health and safety legislation is far bigger than any personal differences which may have arisen between us. We cannot afford to continue to divide the forces supporting effective action to clean up the coal mines, protect the safety of thousands of coal miners and prevent the occurrence of black lung. We must seek out and welcome new recruits in this fight instead of condemning those who may not have carried the battle as long as others. Only through the aroused conscience of millions of Americans can effective legislation and sound administration be obtained. Over 40,000 coal miners in West Virginia alone are determined to obtain the protection they have failed to enjoy, and without which they will continue to suffer the risk of being burned, buried, crushed or gassed.

I appeal to you to declare a moratorium on these personal attacks and issue a call for all forces to join in a cooperative effort to win the fight still ahead of us.

REPRESENTATIVE KEN HECHLER.

[From the United Mine Workers Journal,
Mar. 1, 1969]

KEN HECHLER'S "CREDO" IS REVEALED
(By Rex Lauck)

We found it hard to understand the reasoning behind Rep. Ken Hechler's sudden attacks on the United Mine Workers and its leadership until a friend with a long memory and a good filing system called our attention to an article in the defunct Pageant magazine.

In its April, 1959, issue the magazine described with Hechler's consent: *How To Get Elected To Congress*.

The following quoted sentences are Hechler's own ideas, not something somebody else said about him. He advised:

"First you pop off to get attention, regardless of the merit of your ideas."

"Then you pose as the champion of the average man against the 'interests.'"

"Then after you are rebutted, no matter how strong the facts against you you reply at once as the single, 'lonely campaigner' seeking the sympathetic support traditionally given the underdog."

"The truth of your statement or the merit of your argument has nothing to do with your response or your conduct."

"Finally, you adopt the imaginary 'we' as the shining knight defending the oppressed people against imaginary brutalities of the 'interests.'"

That explains much about how this man Hechler operates, Shades of Joe McCarthy!

[From the CONGRESSIONAL RECORD, Apr. 15, 1959]

HOW TO GET ELECTED TO CONGRESS

Mr. KENNEDY. Mr. President, in the April issue of Pageant magazine there appeared an article entitled "How To Get Elected to Congress." This is a story of a campaign by KEN HECHLER which resulted in his election to Congress from West Virginia's Fourth District.

I was privileged to visit West Virginia during the campaign and, in a small way, to participate in it. I was impressed, as the author of the article was obviously impressed, with the vigor, the dedication, and the ability of the college professor who decided he wanted to take an active part in the political life of the country rather than merely teach others about it.

KEN HECHLER proved it is no obstacle to start without widespread support and the handicap of only a brief residence in the community is not insuperable. He proved that strength of character and an interest in the people who make up the constituency are more persuasive than opposition jibes.

I commend this article to all persons interested in political science and I congratulate the voters of West Virginia upon their wisdom in electing KEN HECHLER.

[From the CONGRESSIONAL RECORD, Mar. 24, 1959]

HOW TO GET ELECTED TO CONGRESS

Mr. HUMPHREY. Mr. President, there were a good many highly interesting political campaigns last fall. One in particular was that of KEN HECHLER, who was elected to Congress from West Virginia's Fourth District. KEN HECHLER, in winning had to overcome the distinct handicap of having lived in the State for little more than a year when he announced as a candidate in the Democratic primary against two native-born sons.

The story of KEN HECHLER's campaign to victory appears in the April issue of Pageant magazine. It is fascinating reading and should give encouragement to others who have wanted to take an active role in politics.

Last Saturday it was my privilege to address the Democratic Women's Day program in Charleston, W. Va. I always enjoy visiting the Mountain State. It is truly a lovely part of our country, and its people are warm and generous. West Virginia can be proud of the men and women who have represented the State in the Congress throughout the years. They can take special pride in our colleagues, Senator BYRD and Senator RANDOLPH, and of men in the House such as Representative KEN HECHLER.

I ask unanimous consent, Mr. President, that the article from Pageant magazine entitled "How To Get Elected to Congress" be inserted at this point in the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"HOW TO GET ELECTED TO CONGRESS"

"(By Howard Cohn)"

"There is a theory that college teachers are cloistered, impractical men. Like theatrical critics who write no plays and book reviewers who write no books, they are suspected of being head-in-the-clouds idealists who could never successfully practice what they preach."

"It is easy to visualize, then, the smiles that creased the faces of seasoned politicians in West Virginia early last spring when a lanky, effervescent political science professor named KEN HECHLER, who had lived in the area only a year and had never run for office in his life, boldly declared himself a candidate for the Democratic nomination for congress in the State's Fourth Congressional District."

"The skeptical smiles have since disappeared. For the professor is Representative HECHLER now, as the result of what one veteran newsman called 'the shrewdest personal electioneering I've seen in 23 years of campaign coverage.'"

"Mr. HECHLER went to Washington, where he is now starting his 2-year term, despite the absence of many of the qualifications practical politicians clutch closest to their hearts. He was a stranger in a section of the State where residents take deep pride in local ancestry. He was a plain-looking, bespectacled bachelor of 44 with no pretty wife or adoring children to parade before the television screens. He entered the primary against two native-born sons without the backing of any local politician and lacking the support of organized labor, which is a power in West Virginia Democratic circles."

"Opposing HECHLER in the general election was a two-time Republican Congressman who was also a distinguished obstetrician. Dr. Will E. Neal had been bringing West Virginia babies into the world for more than 50 years. 'I delivered the voters,' the incumbent Representative would remind his campaign audiences. 'It is up to you to deliver the votes.'"

"Because HECHLER overcame all of these handicaps—and even managed to turn some into assets—it is safe to say that if he ever finds time to teach another class in political science, the front-row seats will be filled with hard-bitten politicians anxious to absorb knowledge from a person who proved that his theories about winning elections are as valid as their rules ever were."

"KEN HECHLER—he never uses his baptismal name of KENNETH—says that the incredible idea of his running for Congress probably took root in the give and take of teacher-student discussions that have always featured his college classes."

"He had come in January 1957 to Marshall College in Huntington, W. Va., as a substitute for a political science professor who was taking a one-semester leave of absence. HECHLER's arrival was greeted with interest because he already had a sturdy and rather picturesque reputation in academic circles."

"Born in Roslyn, N.Y., of parents who were and are staunch Republicans, HECHLER received his bachelor's degree from Swarthmore College in 1935, and a master's the following year from Columbia University in New York. His master's thesis, titled 'Will Roosevelt Be Re-elected?' is remembered at Columbia for its great over-all length—350 typewritten pages—and the brevity of its final chapter, which contained the single word: 'Yes.'"

"In 1937 HECHLER became an instructor in political science at Columbia. A friendly, informal man, he made a practice—which he continued throughout his teaching career—of developing unusual stunts to enliven his subject matter. One of his most popular gimmicks was making phone calls

to leading political figures which his classes could overhear by means of an amplifier hooked onto the telephone."

"While teaching at Columbia, the young instructor earned a Ph. D., making him Dr. HECHLER, and went on to aid Judge Samuel Rosenman, Franklin Roosevelt's principal speech writer, in compiling several long volumes of F.D.R.'s public papers and addresses. HECHLER already had left the party of his parents to become a confirmed Democrat."

"HECHLER entered the Army as a private at the outbreak of World War II, earned a commission in the tank forces, and eventually became a major and combat historian in the European Theater of Operations. After the war he taught at Princeton where, again, his classes were tremendously popular. There followed, in succession, jobs as a researcher-writer on President Truman's White House staff, associate director of the American Political Science Association, and research director for Adlai Stevenson's 1956 Presidential campaign."

"It was with this varied and impressive scholarly background that HECHLER accepted his temporary assignment at Marshall, a medium-sized, State-supported college in southwestern West Virginia. When surprised friends asked why, HECHLER replied that he had wanted for a long time to savor life in a small community. In his White House job, he had prepared briefs on every area the President planned to visit. West Virginia, with its mountainous scenery and natural resources, had struck him as a State with an undeveloped, potentially great future."

"HECHLER quickly became a student favorite at Marshall. Though Dr. HECHLER in class, he was usually "KEN" outside."

"He was," says a fellow faculty member, "the type of professor students consider a regular guy. But while he may have won some of his popularity with gimmicks, once he served breakfast in class—he never forgot his role as a teacher. The students really worked for him."

"HECHLER's cardinal principle as a political science instructor was to try to make his students active participants in the processes of government, regardless of which party they supported. 'You are in politics whether you like it or not,' he'd say. 'If you sit it out on the sidelines, you are throwing your influence on the side of corruption, mismanagement, and the forces of evil.'"

"But as I urged my students to become active politically, my conscience started to bother me because I was not participating very directly myself," HECHLER says, "I liked Huntington and its people and had decided to settle in the city permanently. When a few students started suggesting—some laughingly and some seriously—that I should run for Congress, I brushed off the idea. Actually, though, I began to find the notion pretty appealing."

"I had been on the fringes of politics, except for the war interval, for almost 20 years without ever once experiencing the excitement that only a candidate for elective office can have. I felt I knew the congressional ropes because of my work in Washington. I had firm political ideas, and I frankly thought that I could be a valuable servant to the people of West Virginia if given the opportunity. Besides, I was intrigued by the possibility of seeing how well some of the theories I stressed as a teacher would work in a real campaign."

"But under the pressure of earning a living, these thoughts almost faded from HECHLER's mind in the autumn following the end of his teaching semester at Marshall. Settling down in Huntington as he had said he would, he served as a public affairs commentator on a local weekly television program. More important financially, he completed a book he had been writing about the dramatic crossing of the Ludendorf Bridge at

Remagen, Germany, which gave Allied troops their first foothold on the east side of the * * *.

"The Bridge at Remagen," published late in 1957, was an immediate success. A movie option was taken on it and it was sold to network television. With money coming along in sizable amounts, HECHLER began thinking again about politics. West Virginia was slated to be an important State nationally in the 1958 elections. There were two Senate seats at stake, in addition to the State's six seats in the House of Representatives.

"HECHLER began suggesting to friends and local politicians that he might want to run for a House seat. They said the idea was crazy. Then late in March 1958, with the primaries 4 months off and election day more than 7 months away, the Huntington Advertiser listed him as a possibility for the race.

"HECHLER reviewed the situation briefly. He had lived in West Virginia only 14 months. He was barely known outside Huntington. No one, except for a few students, had shown any interest in seeing him run.

"The day after the newspaper speculation appeared he gave the Advertiser a statement. 'I never sat on the fence on any issue in my life and don't intend to start now,' he said. 'Sure I plan to run for Congress. That is definite. I will file for the Democratic nomination in the August primary.'

"The Fourth Congressional District of West Virginia sprawls over 10 counties in the western part of the State and touches both the Ohio and Kentucky borders. It is a diversified region of heavy and light industrial plants and a large farm population. Huntington, with some 90,000 residents, is by far its largest city and generally favors the Democratic line, but the district as a whole usually has gone Republican.

"No sooner did he announce his intention to make the race than HECHLER proceeded to startle the district again by displaying the tireless energy of a professional basketball player. He was up every morning at dawn, rarely went to bed before midnight. In the long hours between, he toured every cranny of the 10 counties, ringing doorbells and stopping at stores, plants, on street corners to introduce himself to voters.

"Like everyone else," says Robert Burford, Democratic chairman of Cabell County, where Huntington is located, "I hadn't given KEN a chance for the nomination. Then one day in Charleston, I dropped in to chat with one of our candidates for State office. 'Who in hell is this HECHLER?' he asked me. He went to say that KEN had been dropping into creeks and hollows of his home county that no candidate for anything had bothered to visit in years. For the first time it dawned on me that he might win."

"In some respects HECHLER was the prototype of the old-fashioned political campaigner. He toured the district in an attention-getting, red-and-white convertible covered with bold lettering announcing his name and candidacy. He had a campaign song to the tune of 'Sugar in Morning' that was as delightfully corny as campaign songs have been for generations. Sung usually by four Marshall coeds, it went in part:

"Put your 'X' on the ballot,
And if you do your part,
You'll have a darned good Congressman,
Who's for the young at heart."

"There was no sense of conformity, however, in other HECHLER maneuvers. 'I had always felt from my studies,' he says, 'that a candidate could win a good many more votes by stressing his own virtues than by leveling personal attacks on the opposition's character.'

"HECHLER not only refrained from attacking his opponents personally—he praised

them. He described his two foes in the primary as 'good, fine Democrats.' In the general election HECHLER termed Republican Dr. Neal 'an honest man of conviction. I respect him for his principles, even if I may not always agree with what he stands for.'

"HECHLER also took pains to stress his virtues in unique ways. By passing out hundreds of free copies of his book, 'The Bridge at Remagen,' he emphasized that he was an author of note. He ran newspaper ads carrying letters of praise from Harry Truman and former members of the White House staff to indicate his familiarity with national affairs. He referred again and again to his primary campaign as 'the lonely battle' to point up the fact that he was running without any organized support, to win the sympathy he figured would be given an underdog. He produced character references showing that he had compiled a splendid war record and was an assiduous churchgoer.

"The college professor who had launched his campaign without a prayer of success won the Democratic primary by carrying 7 of the district's 10 counties.

"And you know what he did the next morning?" says one surprised Huntington politician. 'Why, he was standing outside a factory at 5 o'clock in the morning, thanking men who were reporting for work for voting for him and asking for support in the general election.'

"By winning the primary, HECHLER now had the backing of the regular Democratic organization and organized labor. He responded by forgetting his 'lonely battle' to go straight down the line for the entire Democratic ticket.

"Politically, HECHLER was a professed liberal Roosevelt-Truman Democrat who spoke frequently on the need to elect Democrats to cure 'the Republican recession.' And he still had a number of new tricks to unveil. He had campaign cards printed on the cheapest stock available. Printed under his name was the notation: 'The recession makes it tough to print a better card.'

"When campaign funds ran low, he bought 10-second television spots instead of the 5-minute shows Dr. Neal was putting on. 'We can't afford more television time,' HECHLER would tell audiences solemnly in the few seconds at his disposal, 'but I hope you'll vote for me anyhow.'

"The maneuvers brought appreciative smiles from the electorate. They also brought the kind of retaliation HECHLER expected and almost welcomed.

"Early digs that he was a Johnny-come-lately, suitcase politician became more strident. In contrast to HECHLER's courteous references to Dr. Neal, the Republicans made it a point to misspell his name at times as 'Heckler,' and one GOP campaign song ran in part:

"Visitor Hechler, we've been thinking,
What a State we'd really be,
If all the New York office seekers
Came to save us just like thee."

"Replied HECHLER sweetly: 'Isn't it wonderful that we live in a country where we are able to circulate such poems about our present and prospective public officials?'

"Late in October, a Republican woman member of the State legislature leveled the bitterest attack yet. Asserting in a statement that New York already has 43 Congressmen; why should we give them another one? She charged that HECHLER had been sent to West Virginia by Americans for Democratic Action, the extreme left wing of the Democratic Party, to run for Congress.

"HECHLER answered with a paid newspaper advertisement. He was not, he said, a member of ADA, and no individual or group had sent him to the State to run for Congress or any other purpose. Moreover, he expressed deep regret that the lady, 'who was not herself born in West Virginia,' had seen

fit 'to make statements which becloud the real issues.' He also managed to weave in the Biblical commandment: 'Thou shalt not bear false witness against thy neighbor.'

"HECHLER believes that his statement caused the attack against him to backfire into one of the most effective issues of his campaign.

"Undaunted, the Republican leadership saved their heaviest ammunition until 4 days before the election. Now it was the Governor himself, Republican Cecil Underwood, who called a press conference to cut HECHLER down to size.

"An investigation had shown, said the Governor, that campaign literature for HECHLER and copies of his book had been stuffed into surplus food packages the State distributed to the needy. Calling this 'the most despicable display of political chicanery I've ever seen,' the Governor said that 'anybody who would play on the hardship of our people for his own benefit isn't worthy of West Virginia citizenship.'

"HECHLER still feels badly about this particular attack. He thinks it was pretty rough politics of the sort that keeps too many capable people from seeking public office. But publicly, the would-be Congressman again treated observers to the value of the nice-guy, high-level reply.

"First of all, HECHLER disclaimed responsibility for putting campaign literature in food packages. Then he said that the Governor was a very fine gentleman who unfortunately had stooped to using words thrust in his hands by mud-slinging ghost writers. Finally, he brought out an autographed picture Underwood had given him before he entered the congressional race. 'To Dr. HECHLER,' read the inscription, 'with appreciation for intellectual leadership you are giving to West Virginia—Cecil H. Underwood, Governor.'

"HECHLER spent most of election night and morning sweating out the returns at the Democratic county headquarters in Huntington. For several hours the race seasawed, but around midnight HECHLER forged into the lead. The professor from New York who had launched his campaign with little more than his own ballot to count had received more than 60,000 votes and won by 3,500.

"After the election, HECHLER was back on the road again. Now the signs on his convertible had been changed to read: 'DR. KEN HECHLER—Your Servant in Congress,' and he was busy thanking voters and asking them about their problems. 'He's the only successful candidate I know who spent as much time seeking out people after the election as he did during the campaign,' says County Chairman Burford.

"Excluding money he would have earned if he had been working rather than campaigning, HECHLER figures the election cost him about \$5,000-\$6,500 for the primary in which he did not receive a single financial contribution, and another \$1,500 in personal expenses for his battle against Dr. Neal.

"He considers that the money was well spent for what he terms 'the most exciting adventure of my life.' And now that he has won his seat in Congress, he says that the campaign taught him nothing that differed very greatly from what he had observed in his years as a political science professor.

"Sure you need luck to win an election, and I had my share of it,' he says. 'But I believe more strongly than ever that, whatever the odds against him, a candidate has his best chance of winning by waging a clean campaign; by anticipating and taking advantage of attacks which are made by the opposition and by remaining honest to himself and his personality.'

"HECHLER says his goal now is to be an effective representative for the people of West Virginia's Fourth District. 'After what he showed us as a candidate,' says Burford, 'we're expecting he'll prove to be quite a Congressman.'

"Ken Hechler's 10 rules for campaigners"

- "1. Pay attention to the average person.
- "2. Be true to your own personality.
- "3. Be constructive and campaign cleanly.
- "4. Turn every attack on you into an asset. Couple an immediate answer with your own constructive approach to the problem.
- "5. Remember—your most effective workers are under 20 (they're enthusiastic) and over 60 (their word is respected).
- "6. Avoid "strategy meetings" that cause dissension, waste time.
- "7. Venture forth around the district every day. Don't be "deskbound."
- "8. Don't tie your hands with job promises.
- "9. Don't promise the moon to pressure groups.
- "10. Be able to laugh at yourself and enjoy it."

Mr. KEFAUVER. Mr. President, I join with the distinguished Senator from Minnesota (Mr. Humphrey) in congratulating Representative KEN HECHLER and to commend the fine article about him published in *Pageant* magazine. It was most fitting that Mr. HECHLER be recognized in this fashion, because he represents what a real citizen should be in this country of ours. KEN HECHLER, before he was elected to Congress from West Virginia, gained widespread recognition as a stimulating and outstanding professor in the field of political science.

Through his teaching career, he used the vivid device of making phone calls to leading political figures which his classes could overhear by means of an amplifier hooked onto the telephone. This was an effective method of breathing life into issues of the day and bringing political leaders and students into close contact.

Time and again, he pounded home the basic lesson of good citizenship to his students in many classes:

"You are in politics, whether you like it or not. If you sit it out on the sidelines, you are throwing your influence on the side of corruption, mismanagement, and the forces of evil."

Then KEN HECHLER took his own advice and ran for office himself. His honest and forthright campaign won the respect of the voters in his district—and won him the seat he now holds. I have known KEN HECHLER personally for many years. His is an example of citizenship that is well worth the praise of his constituents, his fellow citizens all over America, and of his colleagues in Congress.

Mr. HECHLER of West Virginia. Mr. Speaker, immediately after the publication of this article Mr. Rex Lauck, assistant UMW Journal editor, who had signed the article, indicated, "We will explain it in the next issue." When asked further how he could excuse the printing of such a false and malicious article he said he had an "emotional fixation" against Congressman HECHLER.

Four issues of the UMW Journal have been published without reference to the article despite the fact that other corrections have been made as to the misspelling of names in other articles.

Mr. Speaker, it is unfortunate that the United Mine Workers has dragged its feet for years in failing to press for effective health and safety laws that will really protect those who mine coal in this most dangerous and hazardous occupation.

In the crucial period between 1966 and 1968, in frequent meetings with the coal operators, the UMW agreed not to ask Congress for more than a pitifully poor minimum of new protection for the coal miners. Even after the disaster at Farmington last November 20, 1968, the UMW leadership sent word to Capitol

Hill and to all coal State Congressmen that the bill to protect the health of coal miners was too "controversial" and the UMW felt it might interfere with the success of a safety bill. It took an enraged public opinion in non-coal-mining States, Mr. Speaker, to force the UMW to profess support for stronger and more effective legislation and to move out in support of both health and safety laws. Once the bill passes Congress, as I have no doubt it will pass the Congress, and is signed into law, the coal miners of this Nation will never be fully protected on the job or in retirement as long as the top officials of the UMW and the UMW Welfare and Retirement Fund appear more interested in feathering their own nests than in getting out where the action is and fighting for the interests of the men who actually mine the coal. Down through the years many people have asked, why is it our laws and their administration have been so weak; why is it so many people have been killed and injured in the coal mines? The great missing balance wheel is the weakness and lack of aggressive effort by the UMW. This has been the missing element which more than anything else resulted in coal mine deaths and injuries, black lung disease, and disabled or retired miners who were cast aside like debris without any further effort to fight for their protection.

Mr. Speaker, some people have suggested that I am a union buster. All I am trying to do is to see that this union becomes a strong, effective, and clean union which helps in the process of enforcing health and safety legislation so that all coal miners active and retired will be treated with the dignity which they deserve.

Mr. Speaker, I believe that this is a somewhat symbolic issue which not only affects the coal miners but affects all people throughout this Nation. I say this because it means whether or not individuals in this Nation will be treated like human beings. I think, too, it also is symbolic of the renewed interest of the people of this Nation in their environment and the health and safety of the places they work, the air they breathe and the water they drink, as well as the dignity with which they are treated as individuals.

In addition to that I believe it symbolizes the necessity for us to examine very carefully in this Congress the great new technology which has developed and to be sure that this technology is applied not only in order to enrich certain individuals primarily interested in production, but also in a manner to protect those who work with their hands and work with these new machines.

Mr. Speaker, the continuous miner is a highly efficient mining machine which enables an individual coal miner to produce 20 tons of coal a day. It has been said that the continuous miner was invented primarily because of the pressure for higher coal production. Someone has observed that this was not designed as a life-saving machine and in my opinion that is a very pertinent observation. It was not designed as a life-saving ma-

chine, but as a production machine. As a result, this continuous miner gouges out the coal in such a manner as to leave the roof of the mine unsupported which can cause many more deaths and accidents in the mines and to stir up the dust so that it is suspended in the air. As a result, coal miners contract the deadly disease of pneumoconiosis, or black lung.

The one missing element here is that the union and its leaders which should have been representing and fighting for these men down through the years have neglected their duty.

Mr. Speaker, I do not believe anything this Congress does in the way of so-called stringent coal mine health and safety legislation can fully succeed unless the United Mine Workers of America and the United Mine Workers welfare and retirement fund take an aggressive position on behalf of the protection of the health and safety and security of the coal miners.

Mr. Speaker, I ask unanimous consent to include with my remarks certain documents.

The SPEAKER pro tempore (Mr. WAGGONER). Is there objection to the request of the gentleman from West Virginia?

There was no objection.

U.S. DEPARTMENT OF LABOR RECORD FILED UNDER WELFARE AND PENSION PLAN DISCLOSURE ACT—1966
RECORD OF PENSION PLAN FOR 4 MEN (W. A. BOYLE, GEORGE TITLER, JOHN OWENS, AND JOHN L. LEWIS)—INTERNATIONAL UNION, UNITED MINE WORKERS OF AMERICA

Report filed on July 20, 1967, for the year beginning Jan. 1, 1966, and ending Dec. 31, 1966]

	End of prior year	End of reporting year

Fees and commissions paid and charged to the plan.
Agent's fee.
To whom paid: The National Bank of Washington.

JOHN OWENS,
Secretary-Treasurer.

THE UMW

The nation's coal miners are struggling through and rebelling against one of the shabbiest chapters in the modern history of the labor movement. Their tormentors are those who should be their best friends: the United Mine Workers union and the UMW Welfare and Retirement Fund.

The men who burrow in the earth for coal are far removed from the exalted world in which officials of the union and its related welfare fund operate. This shows up in numerous ways, but none so painfully as in the rewards provided for loyal and faithful service to the union.

The most a miner can expect from his pension fund at retirement, after a career in the most dangerous occupation in the country, is \$115 monthly.

The officers and employees of the fund, whose very jobs exist because of the miners' sweat, draw benefits which are lavish by comparison. Top officers of the fund can retire at half- or even full-pay, based on annual salaries of \$30,000 to \$60,000. Even the lowest-paid file clerk in the fund's offices can expect a monthly pension of \$200 at retirement. That compares with the miner's \$115.

That's not all. Officers and employees of the UMW itself have their own separate pension plan which also provides benefits on a generous scale.

So there isn't one retirement plan—there are three. And the coal miners, whose labor in the mines produces revenue for all three, are far and away the least provided for.

This is only a fragment of a very murky iceberg. The huge financial reserves maintained by the UMW fund beg justification. The poor investment record of the fund is unexplained. There's quite a story in the cozy alliance among the fund, the union, and the union-controlled National Bank of Washington.

All of these matters, which will be the subjects of future WTOP editorials, are traceable to the almost autocratic role the UMW leadership plays with its own members.

Congressman Ken Hechler of the coal-mining state of West Virginia has urged Congress to undertake a full-scale investigation. Congress owes it to the nation's long-abused miners to heed Hechler's advice.

This was a WTOP editorial . . . Norman Davis speaking for WTOP.

[From the Washington (D.C.) Evening Star, Mar. 7, 1969]

UMW DOESN'T DIG HECHLER

(By Shirley Elder)

The United Mine Workers Journal comes out every two weeks, and every two weeks lately it has attacked a West Virginia congressman named Ken Hechler.

Hechler, a Democrat, has been called a Johnny-come-lately and some other things for embarking on a crusade for stronger health and safety laws in coal mines.

The UMW is angry because Hechler went off on his own, rejecting ideas from a proud union that has been fighting for mine safety for 79 years.

Hechler compounded the problem of stumping the coal regions of West Virginia, rallying miners to defy their union and press for reform. Hechler kept saying the union was not trying hard enough.

Now, a UMW writer, Rex Lauck, reports in the current UMW Journal that he has found out what makes Hechler run. He cites a 1959 article in Pageant magazine which he says contained Hechler's "ideas" on how to get elected to Congress.

HIS 10 RULES

But Hechler denies the quotes the Lauck article attributes to him. He refers to a copy of the Pageant article, which includes "Ken Hechler's 10 Rules for Campaigners."

For example, Hechler's first rule, "Pay attention to the average person," comes out in the journal as, "First you pop off to get attention, regardless of the merit of your ideas."

The Hechler rules continue in the same vein: "Be true to your own personality" and "Be constructive and campaign cleanly" and "Turn every attack on you into an asset," and so on.

Lauck's report of these rules:

"Then you pose as the champion of the average man against the interests."

"Then after you are rebutted, no matter how strong the facts against you, you reply at once as the single lonely campaigner seeking the sympathetic support traditionally given the underdog."

"The truth of your statement or the merit of your argument has nothing to do with your response or your conduct."

NO QUOTATION MARKS

"Finally, you adopt the imaginary 'we' as the shining knight defending the oppressed people against imaginary brutalities of the interests."

Interviewed after the paper was distributed, Lauck said his article should not have contained quotation marks. "They just got on there at the print shop" he said. "We'll explain it in the next issue."

Lauck said he had not read Hechler's actual statement when he wrote the article. Instead, he said, he printed an "analysis" by a "friend with a long memory" who recalled the Pageant piece.

Did he now, after reading Hechler's 10 rules, think the analysis was fair? "Well," said Lauck, "it depends on your emotional fixation. If you don't like Ken. . . ."

Hechler, in a telegram yesterday to UMW President W. A. Boyle, demanded an immediate apology for what he termed a "false and malicious article." He asked for an opportunity to reprint in a future issue of the journal his 10 rules as actually written.

The telegram also included an appeal for unity in the campaign for mine safety legislation.

"We cannot afford to continue to divide the forces supporting effective action to clean up the coal mines, protect the safety of thousands of coal miners and prevent the occurrence of black lung."

He suggested proponents should welcome recruits rather than "condemning those who may not have carried the battle as long as others."

HECHLER INSISTS UMW APOLOGIZE

(By John W. Yago)

WASHINGTON.—Rep. Ken Hechler demanded Tuesday that the United Mine Workers apologize for what he said was a false and malicious article about him in a union publication.

The article, which appeared in this week's issue of the United Mine Workers Journal, was intended to defame his character, Hechler said in a telegram to W. A. "Tony" Boyle, president of the UMW.

The article is entitled "Ken Hechler's 'Credo' Is Revealed." The journal said it was based on a story about Hechler's first election campaign that appeared in the April, 1959, issue of the now-defunct Pageant magazine.

The journal lists what it said was advice from Hechler on how to get elected to Congress. This includes such things as "pop off to get attention, regardless of the merit of your ideas" and "the truth of your statement or the merit of your argument has nothing to do with your response or your conduct."

The Journal article, written by assistant editor Rex Lauck, ends with this observation: "That explains much of how this man Hechler operates. Shades of Joe McCarthy."

The original Pageant article was reprinted in the Congressional Record 10 years ago at the request of then Sen. Hubert Humphrey who also praised the new congressman.

It contains no quotations from Hechler similar to those in the union publication.

Hechler's rules for campaigning, as listed in Pageant, were not untypical of those that might be expected from a political science professor, which Hechler was before running for Congress.

"Even if you could remove the direct quotation marks and present this material as a paraphrase instead of an allegedly direct quote, the entire article in the journal is false, malicious and designed to defame my character," Hechler told Boyle.

The Fourth District congressman said he hoped Boyle didn't condone the printing of "such malicious misinformation."

In addition to an apology from the union, Hechler demanded an opportunity to have his views on mine health and safety as well as the original Pageant article printed in the UMW Journal.

Hechler and Boyle have clashed several times recently over their views toward mine health and safety. Hechler has said the union doesn't do enough to support its members, and Boyle has described the congressman as an "instant expert" in the field.

The union had no official comment Thursday on the Journal article, and Lauck was unavailable to explain its source.

The union newspaper said only that the alleged quotes from Hechler were provided by "a friend with a long memory and a good filing system."

Hechler called for this friend to identify himself.

There were reports of high-level meetings at UMW headquarters Thursday on how to handle this latest offshoot of the drive for stronger mine statutes.

"Thousands of readers of the Journal, including a large number in my congressional district, are being fed these deliberately falsified statements which bear no resemblance whatsoever to anything I said in the Pageant article or anything I have either said or thought before or since the appearance of that article," Hechler said in his telegram to Boyle.

Hechler also held out an olive branch to the union chief.

"I appeal to you," he said, "to declare a moratorium on these personal attacks and issue a call for all forces to join in a cooperative effort to win the fight still ahead of us."

The cause of health and safety legislation is bigger than personal differences, Hechler declared. "We cannot afford to continue to divide the forces supporting effective action to clean up the coal mines, protect the safety of thousands of coal miners and prevent the occurrence of black lung" he continued.

APOLOGY DESERVED

WASHINGTON.—Prior to last week much of the difference of opinion surrounding the mine legislation debate was just that, compounded by rising tempers and personality clashes.

The strong feelings on the subject were enough to erupt in a heated clash several weeks ago between United Mine Workers President W. A. Boyle and Rep. Ken Hechler, who once was strongly supported by the union. Boyle, who is not noted for his even temper, was really set off when Hechler allied himself with consumer advocate Ralph Nader in taking the union to task for not doing enough for its members.

The rule of the United Mine Workers, for years a powerful force in West Virginia, and its relations not only with the mine operators but with its own members, are valid topics for discussion, even though the discussion sometimes has been little more than name-calling.

But a new aspect was added last week when a UMW publication printed what was evidently a totally false attack on Hechler, quoted him as advising other office-seekers on tactics that were cruelly cynical gutter politics and compared him to the late Sen. Joseph McCarthy.

The quotes, the UMW publication said, were from an article in a 1959 Pageant magazine about Hechler's first congressional campaign.

There was an immediate search of the Library of Congress for a copy of the magazine to see if Hechler did indeed say these things. The library's file copy was there, but it had been mutilated sometime in the last decade and the Hechler story was missing.

A reprint was turned up, however, in a 1959 Congressional Record where it had been placed by none other than former Vice President Hubert Humphrey when he was a senator. Humphrey and another senator at the time, John F. Kennedy, both praised Hechler as a new representative and his campaign as a professor challenging the established political interests and winning by taking his campaign to the people.

Some of the animosity against Hechler, even within his own party, dates back to the first campaign.

Nowhere in the article did Hechler say anything remotely like what the UMW had printed.

Hechler wronged and justifiably irritated, has demanded a public apology from Boyle.

The whole affair contains elements of mystery. Who, for instance, is the "friend with a long memory and a good filing system" who provided the union newspaper with the supposed Hechler advice. Some at union headquarters say they don't know, and those who should know won't say anything. At best, the union's editors are guilty of careless journalism.

Whoever he is, the "friend" is obviously no friend of Hechler, but he has done the union considerable harm and put it even further out on a limb than it was.

The upshot is likely to be that Hechler won't be damaged but now actually has the upper hand in the feud. He even took the opportunity last week, while demanding an apology, to make peace overtures to in the name of the common cause they both support.

While these personal arguments among Boyle, Hechler and others are offshoots of the central issue, they could affect the serious business of writing new legislation to improve the odds of getting through a career in mining alive and healthy.

While they may differ over some points, everybody involved—even the most feudal coal baron remaining—at least says they favor a better shake for the miners. Some of Hechler's tactics may seem like comic relief to an otherwise grim subject, but he is deadly serious in his concern for the welfare of West Virginia's miners.

If the congressman's opponents would reread the Pageant article they would recognize that his methods in the mine health and safety campaign aren't too different from those that have gotten him elected to Congress six times.

Boyle and his associates certainly have the right to disagree, although some of the recent snorting could hardly pass for constructive criticism, but last week they got caught with their ethics down.

Hechler deserves his apology and he should get it.

ARE DISTRICT OF COLUMBIA POLICE TOLD TO LOOK THE OTHER WAY?

The SPEAKER pro tempore (Mr. WAGGONER). Under a previous order of the House, the gentleman from Missouri

(Mr. RANDALL) is recognized for 10 minutes.

(Mr. RANDALL asked and was given permission to revise and extend his remarks and to include extraneous matter.)

Mr. RANDALL. Mr. Speaker, there are two ways a Member can react to the things he reads in our newspapers. One way is to be silent which could be interpreted as agreement. The other way, and by far the most appropriate way to react to news accounts of events here in Washington, is to call these to the attention of fellow Members by timely comment and inclusion in the CONGRESSIONAL RECORD.

On the front page of the Washington Post this morning is a picture of Marion Barry with the headline that 300 Pride, Inc., leaders staged an angry protest in the City Council chambers against the arrest Tuesday night of Marion Barry.

The article points out that the Mayor of the city of Washington has ordered an investigation into the arrest of Marion Barry on Tuesday night because he assaulted a policeman. The article goes on to point out that 300 followers of Barry, who is, as you know, director of Pride, Inc., came down to City Hall and proceeded to stage a demonstration in the District of Columbia Building.

After the conference with Marion Barry, Mayor Washington announced there would be a civilian investigation of the arrest incident headed by Acting Public Safety Director Charles T. Duncan.

Well, I suppose an investigation will take place.

The more important question is whether Mayor Washington is going to investigate the conduct of some officers on Pennsylvania Avenue that same afternoon, who stood by observing acts in violation of law and did nothing. Certainly we have reason to believe the Washington Post reported the facts accurately.

It is reported that as 20 or 30 followers of Marion Barry came down the stairs in the City Hall they were cursing and making obscene gestures. They smashed a half dozen soft drink bottles in the District Building. Is this not disturbance of the peace, disorderly conduct in a public building and destruction of property?

Then as these youths moved further on east on Pennsylvania Avenue "shouting as they walked, they pushed and shoved several white pedestrians, cursing them and making more obscene gestures." Were the police ordered to ignore these violations of law. Why does the Mayor not ask for an investigation of the conduct of the officers who saw these violations and made no arrests?

Then, at 13th and Pennsylvania Avenue they struck a news vendor in the face and went onto 12th and Pennsylvania Avenue where they stole several bouquets from a flower vendor. Was this not unlawful assault and petty larceny?

The article states a police car was following them, all students, allegedly from Federal City College. These students jeered at the two police officers inside the car. Yet the officers did nothing

according to the newspaper story.

But listen to this:

At 3d and E Streets, Northwest, a youth stole a carton of beverages from a station wagon parked outside a market—

In the words of the reporter of the Washington Post.

It causes shock and dismay to read the account of the reporter:

The officers did not leave their car.

Mr. Speaker, whenever the police department hires new members for the police force, about the only training they get is to come to the Hill, and learn to ticket the cars of our innocent constituents who come to visit the Nation's Capital and are not familiar with our parking regulations. It seems these same police cannot determine a real violation of law when it occurs before their eyes. Or could it be they are under orders to ignore such acts by the followers of Marion Barry?

Here were clear violations of the law on three or four counts—disorderly conduct, destruction of property, and petty larceny for taking the flowers and beverages.

If Mayor Washington is going ahead with his investigation of the alleged assault by the police officers upon Mr. Barry he should certainly investigate and find out upon whose orders, or whose instructions it was that these officers in these patrol cars on Pennsylvania Avenue took no action against violations that the Washington Post reports were clear violations of several different city ordinances.

In the past, Mr. Speaker, we have heard a lot about home rule. A few years ago there was a change in District of Columbia government. I am not convinced the new is an improvement over the old.

Today we have a Mayor appointed by the President and a new City Council. I submit to you, Mr. Speaker, that if this is an example of the progress we have made in this city—if what happened Wednesday afternoon on Pennsylvania Avenue is an illustration of the progress we have made under our new city government then the Lord save us if we ever have full home rule.

I would hope I am not the only Member who will take note of what happened. I hope our District of Columbia Committee and the Committee on Appropriations—makes it a point to interrogate the Mayor and his police department about what happened on Pennsylvania Avenue Wednesday afternoon when these officers remained in their car and made no effort to apprehend those committing crimes before their eyes. The Mayor must be called upon to investigate this failure by his police if he intends to have his investigation of an alleged assault by a police officer on Marion Barry—when the officer was simply doing his duty, if we believe the content of the newspaper account.

Let me repeat once again may the good Lord help us if the happenings of Tuesday night and Wednesday afternoon are measures of the progress we have made in the government of Washington, D.C.

NATION AWAITS ADMINISTRATION'S DECISION ON VIETNAM

The SPEAKER pro tempore (Mr. HECHLER of West Virginia). Under a previous order of the House, the gentleman from New York (Mr. HALPERN) is recognized for 5 minutes.

Mr. HALPERN. Mr. Speaker, for the third time in a decade a new administration has entered office faced with the problem of Vietnam, and the Nation anxiously awaits its decision on the future course of American policy. But the situation in 1969 is far different from that of 1961 or 1963. Today the United States has about 540,000 men in South Vietnam and has suffered over 35,000 casualties killed in the war.

The Vietnam conflict has produced deep divisions among the American people and has greatly weakened America internally:

It has alienated thousands of American youth. They must be brought back into the mainstream of our political and social structure so that they can make the contribution to American life of which they are capable.

It has stifled the growth of those social welfare programs which originally held such great promise of ending poverty and bringing the benefits of the affluent society to all of our citizens.

It has accentuated the concern and resentment of the Nation's poor, who see billions of dollars spent in a faraway land while they are unable to share the fruits of America's bounty.

In 1961 President Kennedy spoke of America's commitment to South Vietnam's defense. President Johnson expressed similar sentiments many times. I can only wonder if both men would have reached the same decision as they did then if they could have foreseen the disastrous consequences of this so-called commitment. The escalation of this commitment year after year has long since brought us to the point of diminishing returns. If President Nixon chooses to follow the old policies of escalation and unqualified commitment, he will find the returns meager, not only in Vietnam but also at home where the priorities of 1969 domestic problems demand attention.

Until the present burden of Vietnam is at least partially lifted from our shoulders it will not be possible to move forward and effectively cope with the problems that we face at home. The war simply cannot be allowed to continue at its present level. I, therefore, join with those distinguished colleagues of mine, in both the House and Senate, who are similarly proposing that the Nixon administration begin the withdrawal of U.S. forces from South Vietnam. The administration should immediately begin the shift from the old policy of escalation to a new policy of extrication.

Today, the size of the American commitment in Vietnam is totally out of proportion with our avowed purposes and objectives. President Johnson ostensibly sent combat troops into the country in 1965 to prevent a Communist takeover and give the Government and people of South Vietnam time to build a viable

self-sufficient national structure. We have prevented a Communist military victory and have given the South Vietnamese almost 5 years. We have accomplished our objectives.

The stationing of 540,000 men in South Vietnam can only be further justified by the objectives of a military victory, which the United States has consistently stated is not its goal. For years our officials have told us on the one hand that the eventual outcome in Vietnam would depend on the South Vietnamese Government; on the other hand they have increasingly Americanized the conflict.

Both American and South Vietnamese officials have of late spoken in glowing terms about Saigon's increased political and military strength. Both President Thieu and Premier Huong have publicly declared that the United States can begin to withdraw its troops. I can only second this recommendation. It is time to let the Thieu government stand on its own; the United States can accomplish this best by beginning an orderly withdrawal of its forces.

In November 1967, General Westmoreland described to the National Press Club a four-phased plan under which in phase 3—to be implemented in 1968—the United States would "provide the new military equipment to revitalize the Vietnamese Army and prepare it to take on an ever-increasing share of the war" and "turn a major share of frontline DMZ defense over to the Vietnamese Army." In phase 4 Westmoreland declared that:

U.S. units can begin to phase down as the Vietnamese Army is modernized and develops its capability to the fullest.

The implementation of this plan is long past due. The American people—after 4 long years of war—have a right to know precisely when it will become a reality. It should be carried out now.

Hopefully, the beginning of a troop withdrawal on our part will serve as a catalyst to reduce the scale of fighting and ultimately the casualty rate. North Vietnam has in the past shown some willingness to limit its military activities in return for U.S. deescalation. Hanoi has, for example, generally abided by the October 1968 understanding with the United States with regard to the demilitarized zone. No major North Vietnamese units have crossed the zone into South Vietnam since that time. It may well be that Hanoi will respond in a similar positive fashion if the United States initiated a troop withdrawal.

Today, President Nixon stands on the threshold of a great opportunity: an opportunity to correct the errors of the past. By initiating the withdrawal of American troops from South Vietnam, he will give the American people new hope. He will show the alienated and downtrodden of this Nation that their Government is now ready to fully confront our pressing domestic problems. If President Nixon adopts this course, he will restore the kind of enlightened leadership this Nation has so sorely lacked in recent years: a leadership founded upon commonsense and realism. I urge the President to begin at once.

AWARD TO HOUSE READING CLERK JOE BARTLETT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 15 minutes.

Mr. MILLER of Ohio. Mr. Speaker, it is always a source of great satisfaction when we learn that a member of the congressional family has distinguished himself in a creditable manner.

It is all the more gratifying when that person is one of our most faithful aides, and a friend we hold in fond esteem.

This is why I took special pride in the ceremony on Tuesday afternoon at which Dr. Kenneth D. Wells presented to House Reading Clerk Joe Bartlett, the George Washington Honor Medal on behalf of the Freedoms Foundation of Valley Forge.

This coveted patriotic award was presented to Joe for an essay entitled, "Strange Legend: Curious Riddle," which was judged to be "an outstanding accomplishment in helping to achieve a better understanding of the American way of life."

The essay, written in the style of a parable, was intended to assist one of our Members in dealing with a difficult question with which he was confronted. The parable came to the attention of our colleague, Representative DURWARD G. HALL, of Missouri, who caused it to be printed in the CONGRESSIONAL RECORD. There it was read by my distinguished fellow Ohioan, Representative CLARENCE J. BROWN of the Seventh District, who commended it to the consideration of the Freedoms Foundation awards jury. It is a delightful irony, it seems to me, that what was done by Joe as a service for another, should rebound to him with such a fitting tribute.

I wanted my colleagues to share in the awareness of this happy event. I know you join me in congratulating Joe, and extending to him, and his lovely wife, Jinny, and to their charming daughters, Linda and Laura, our very best wishes on this noteworthy occasion in their lives.

Mr. RUPPE. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Michigan.

Mr. RUPPE. Mr. Speaker, I would like to take this opportunity to associate myself with the remarks of the gentleman from Ohio and to say too that we are very honored to salute Joe Bartlett on this particular occasion.

Mr. Bartlett certainly has always conducted himself in the very finest professional manner. He has also seen fit, as your remarks suggest, to tell the story of democracy to our country and to tell the American people of the importance of our heritage of freedom and democracy.

Mr. MILLER of Ohio. I thank the gentleman.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, I appreciate the distinguished gentleman from Ohio yielding.

I too would like to associate myself with the remarks the gentleman has made, most appropriately about our esteemed reading clerk. He has served the House so well, I know of no one who loves the Capitol and the representative processes of government as Joe Bartlett. This love comes from the fact that he has been a marine and knows why he deprived himself and fought for the maintenance of freedom in our country. But more particularly he loves those with whom he works and holds them dear in his heart as they participate in the process of good government. For all of these reasons we not only salute Joe Bartlett on the occasion of my good friend, Dr. Kenneth Wells, recognizing him with the Washington Honor Medal Award of Valley Forge from the Valley Forge Freedom Foundation, but we salute him because we find it no surprise that he should write a parable so beautifully expressing as did the Master long ago. One would not intend to imply that Joe would be likened to the Master of Galilee in every respect, but insofar as his perception of need is concerned and his loyalty to his friends is concerned and his ability to speak in a parable, the likeness is not too far drawn.

So I join with my worthy colleague in saluting an outstanding accomplishment in helping to achieve a better understanding of the American way of life and to say, Mr. Speaker, this is our friend, Joe Bartlett. I thank the gentleman for yielding.

Mr. ALBERT. Mr. Speaker, I appreciate the gentleman from Ohio advising us of the honor which has come to the minority reading clerk, Mr. Joe Bartlett. I understand that the gentleman himself called Mr. Bartlett's essay to the attention of the Freedoms Foundation of Valley Forge, which subsequently chose to award this work its George Washington Honor Medal.

We, of course, know that the House has many able and dedicated staff members and certainly Joe is one of these. We are always pleased when recognition comes to an employee of the House. I am happy to join the gentleman in complimenting Mr. Bartlett.

Mr. GERALD R. FORD. Mr. Speaker, we have among us a gentleman who each day faithfully and skillfully performs the duties of reading clerk. Our own Joe Bartlett is a man of many talents which go far beyond those involved in his everyday duties. Two days ago some of those talents were recognized officially by the Freedoms Foundation of Valley Forge, Pa. It is with appreciation for his many abilities that I join with my colleague the gentleman from Ohio, Representative CLARENCE MILLER, in congratulating Joe Bartlett upon being awarded the George Washington Honor Medal.

Mr. Speaker, Joe Bartlett won the George Washington Honor Medal for an essay which is not only exceedingly well written but is a penetrating analysis of one of the most controversial issues arising from the Vietnam war. That this analysis is presented as a parable in modern dress makes it all the more impressive. Joe Bartlett's "Strange Legend" parable appeared in the CONGRESSIONAL RECORD on April 19, 1968. I commend it to

those who have not read it and suggest that for others a rereading of it would be profitable. Again, my congratulations to Joe Bartlett—congratulations which I know are echoed among all of my colleagues in the House.

Mr. STEIGER of Wisconsin. Mr. Speaker, I join in saluting the House Reading Clerk, Joe Bartlett, and appreciate the gentleman from Ohio, Mr. Miller, calling the attention of the House to the honors bestowed on Joe Bartlett.

I want to include a further recognition. The U.S. Jaycees recently paid tribute to Joe Bartlett for his "unselfish service" to the Jaycees.

At this point, Mr. Speaker, I include a copy of the inscription on the plaque presented by the Jaycees along with an article from Roll Call and a letter from President Nixon:

THE U.S. JAYCEES—A TESTIMONIAL OF A
GRATEFUL ORGANIZATION

Presented to Joe Bartlett in honor and with deep appreciation of the distinguished and unselfish service given to the United States Jaycees while serving with outstanding leadership, vision and ability, 8th Annual Governmental Affairs Leadership Seminar, 1969.

[From Roll Call, Mar. 20, 1969]
JOE BARTLETT ADDS NEW AWARDS TO
COLLECTION

Joe Bartlett, Senior Reading Clerk of the United States House of Representatives, was honored by The United States Jaycees for outstanding service to the young men's organization during a session of the 8th Annual Governmental Affairs Leadership Seminar at the Capitol, Monday.

Bartlett, who began his career as a House page at the age of 14, was cited for his distinguished service in helping formulate the Governmental Affairs Awareness program and continued support of this Jaycees involvement effort since its inception in 1962.

In 1965, Bartlett was honored by a resolution before the House body by the State of Georgia for his assistance to the young men of that State. In 1967, he was presented the Georgia Jaycees Distinguished Service Award.

Bartlett, a native of Clarksburg, West Virginia, first got his start in Washington as a result of a trip to the Capitol as "America's Typical Schoolboy Patrolman." As a result of this selection, he was given a 30-day appointment as page, which has evolved into a career of nearly 28 years of public service in the House.

His career, which began in 1941, was interrupted twice by stints in the Marine Corps during World War II and the Korean Conflict. Upon his return from service at the end of World War II, Bartlett, then 19, was selected as chief page. He served in that capacity until called back into active service with the Marine Corps during the Korean Crisis.

It was during the second tour of duty that he met his bride-to-be, Bartlett, stationed in Virginia, was assigned as one of the Cherry Blossom Festival escorts in 1951 and met Ginny Bender, daughter of the late Senator George H. Bender of Ohio. They were later married and presently make their home in Chagrin Falls, Ohio with their two daughters, Linda and Laura.

In 1953, Bartlett was chosen as the youngest reading clerk in the history of the House. In 1960, 1964 and 1968, he was selected as Chief Reading Clerk for the Republican National Conventions.

Bartlett was recently honored by the Freedoms Foundation of Valley Forge which awarded him the George Washington Honor Medal Award for an essay, "Strange Legend: Curious Riddle."

THE WHITE HOUSE,
Washington, March 26, 1969.

MR. JOE BARTLETT,
Senior Reading Clerk,
House of Representatives,
Washington, D.C.

DEAR JOE: I was pleased to see that you have been honored for outstanding service by the United States Jaycees at their 8th Annual Governmental Affairs Leadership Seminar.

You can take great pride in this award, yet I know your greatest satisfaction must come from knowing you have given so generously in the service of our nation over the years.

Pat and I join in sending our congratulations and very best wishes to you and Ginny.

Sincerely,

RICHARD NIXON.

The record of Joe Bartlett is outstanding and his service to young people sets a high example for all of us.

The recognition by the U.S. Jaycees is but another tribute paid to Joe Bartlett by those he has served.

Mr. MINSHALL. Mr. Speaker, it is a pleasure to express my congratulations to our esteemed reading clerk, Joe Bartlett, on receipt of the George Washington Honor Medal Award from the Freedoms Foundation.

This is a great honor from a distinguished organization. I know Joe is justly proud of the recognition accorded his essay, "Strange Legend: Curious Riddle."

As many of you know, Joe and his charming family reside in Chagrin Falls, Ohio, in the 23d Congressional District which I represent. The Chagrin Falls Herald, one of the outstanding suburban Cleveland newspapers, took note of Joe's award in the following article:

FREEDOMS FOUNDATION HONORS JOE BARTLETT

Joe Bartlett, reader of the House of Representatives, and Chagrin Falls resident, has been awarded the George Washington Honor Medal Award by the National School Awards Jury for his essay "Strange Legend: Curious Riddle," which he wrote in 1968.

Bartlett's essay was written as a parable on a young congressman who is fighting with his conscience on the advisability of voting on a bill which would OK trade with an enemy power.

He falls asleep pondering the question and dreams of an expert woodworker, Naivius, who lives in the land of Samaria. His trees were of the straightest quality and his talent with the wood unsurpassed.

Learning of his great skill and quality wood, Roman authorities in Judea ordered a shipment of his finest timbers. His reaction was one of doubt, as he did not know for what use the lumber was meant.

His colleagues and family argued with him that the wood would surely be used to build housing for the poor, hospitals for the sick and schools for the children. And besides, he would be paid well for his work.

Placated, Naivius consents to the transaction and the lumber is sent on its way.

Still disturbed by the question, Naivius decides to go to Jerusalem to see first-hand what good works his timbers had performed.

He becomes weary after a climb up a steep hill. He sits to rest on a wooden crossbeam and senses that the wood is his own. He gropes for some meaning of the structure.

In the darkness he is able to make out words written on the wood, "King of the Jews."

When in Chagrin Falls, Bartlett lives at 600 North St., with his wife, daughter of the late Senator George Bender.

Mr. MOSHER. Mr. Speaker, I want very much to associate myself with the remarks being made today in behalf of Joe Bartlett, a man for whom all of us who serve in the House have such great respect.

It is one measure of Joe's many talents that he has received the Freedoms Foundation's George Washington Honor Medal for his essay "Strange Legend: Curious Riddle." I am pleased to join in this salute to a dedicated servant and articulate student of the House of Representatives.

As another measure of the affection with which we in the Cleveland, Ohio, area hold "our own" Joe Bartlett, I want to share with my colleagues in Congress a newspaper column by George Condon of the Cleveland Plain Dealer dated February 26, 1969. Under unanimous consent, I include the article at this point in the RECORD:

THE FACE IS FAMILIAR, BUT . . .

(By George E. Condon)

WASHINGTON.—Partying is almost a way of life in Washington, but every now and then there is a wingding here that is entitled to be described as something special. The "Bash for Bartlett" a few years ago was in that category.

Joe Bartlett was the guest of honor at that Capitol Hill party, and among those who came together to salute him were many of the most famous names in Washington. It was timely and appropriate recognition for a personable man who, for 25 years, has been one of the unsung heroes of Congress.

Joe Bartlett, who now calls Cleveland his home, came to Washington from the West Virginia Hills in 1941, the holder of a 30-day appointment as a page in the U.S. Senate. He somehow has managed to extend his association with the government in a way that suggests he is on his way toward becoming a career man, if more than a quarter of a century ago can be regarded as a beginning.

Bartlett's achievements include being the youngest chief page in the history of the Senate and being the youngest man ever to be named reading clerk of the U.S. House of Representatives when he was given that appointment in 1953.

It is one of the happy surprises you uncover when you search into the murky area of Washington officialdom, that the governmental monster can be reduced to the simple, essential element of men—especially anonymous career men like Bartlett who still have stars and stripes in their eyes after many years of close association with the nation's leaders. They are the ones, of course, who keep the wheels turning; who provide needed continuity to the political process.

Bartlett, incidentally, is in the puzzling position of the supporting actor whose face is familiar to millions, but who still remains an anonymous, indistinct figure on the national scene. Whenever the President, or a visiting ruler, or a home celebrity, addresses a joint session of Congress which is televised, Bartlett usually is prominent in the closeup scene, being seated on the level just below the speaker of the House.

If the general public doesn't know Joe Bartlett, the men and women who run this government of ours do. And when he speaks, the House of Representatives listens—the ability to command such attention being one advantage that a reading clerk has in this parliamentary system. A reading clerk actually does more than read the roll call of the House; he has to be aware of what is in the legislative hopper and he has to have an intuitive knowledge of the turns and twists that the large deliberative body is likely to take. But reading the roll call of

the House membership is a terrifically demanding duty in itself because there are 435 names to be read, and in the course of an average roll call, the reading clerk will call out 800 names.

One student of the Washington political scene once got out his slide rule and figured out that during more than one-fourth of the time that the House of Representatives is in session, the roll of members is being called; over 428 calls in all, with each one taking about 27 minutes. The senior reading clerk recalls one 32-hour period when there were 40 roll calls and he clutched his throat as the memory swept over him.

Bartlett's association with Cleveland, and, specifically, Chagrin Falls, came through marriage. While still in Marine uniform, he met and married Virginia (Jinny) Bender, the daughter of the late former U.S. Sen. (and former representative) George H. Bender. They have two children, Linda and Laura. And although they live in Washington, home is where grandma lives—Mrs. George Bender's home at 600 North Street in Chagrin Falls.

Mr. BROWN of Ohio. Mr. Speaker, I am delighted to join in praise today for one of the people who makes service in this body much easier than it might otherwise be. I refer, of course, to Joe Bartlett, one of the two reading clerks of the House. Joe is sometimes referred to as the minority reading clerk but that is not exactly accurate because, like all employees of the House, he serves all Members equally and well. While Joe holds his post at the designation of the Republicans in the House, he is technically named by our distinguished Speaker. Joe and his colleague, friend, and fellow reading clerk, Charlie Hackney, are equals in their role, even though Joe has a few years of seniority. But they share their responsibility so well that many who hear them think they sound alike and some have even said that as time takes its toll of their hairline, they look something alike.

Suffice it to say, since we are all proud of the good job they do in the House, it is also a particular pleasure for me to have had a small part in honoring Joe for his outside accomplishment in the literary area. I am proud of him for his achievement, for the sentiment it expressed, and for the fact that he is a fellow Ohioan by adoption if not birth.

As my tribute to Joe on the occasion of this honor he was rendered by the Freedoms Foundation and in appreciation to both him and Charlie, I should like to insert for the edification of my colleagues two articles which recently appeared in the public press about our reading clerks. The first is by Aldo Beckman in the Chicago Tribune on December 8, 1968, and the other is a wire service story put together by Frank Eleazer and his UPI staff for distribution to UPI clients across the country. The insertion that I include is the article as it appeared even around the world in Vietnam in the Stars and Stripes edition of March 16, 1969:

[From the Chicago Tribune, Dec. 8, 1968]

READING CLERKS—THEY MAKE THE HOUSE A HOME FOR ALL 435 REPRESENTATIVES

(By Aldo Beckman)

WASHINGTON, December 7.—Joe Bartlett and Charles W. Hackney Jr., the reading clerks in the United States House of Representatives, have it made this year.

They have only 37 new faces that they must recognize immediately when they see them and 37 new names to learn to pronounce correctly.

For that is the number of new congressmen that will begin serving here next Jan. 3. Although there actually were 40 new congressmen elected last November, 3 of them are "retreads," men who have served in an earlier Congress and now are returning after an interruption in their service.

MUST KNOW ALL NAMES

In addition to knowing the new members by sight, the two reading clerks also must recall the names of all the other members of the 435-seat legislative body.

While it seems like a herculean task for the average man who has difficulty remembering the name of the one new man on office staff, Bartlett and Hackney, both long-time veterans of Capitol Hill service, take it in stride. This year's memory task is simple, they said, when one recalls there were 92 new faces in the House after the Democratic landslide in 1964.

Their first test will come shortly after the House convenes and the first roll call is taken. It is the clerk's job to read the roll, either during a vote on a bill or on a quorum call.

VOICE STANDEE NAMES

After reading thru the names twice those answering on the first round are, naturally, not read during the second round, their memory tests occur when members not answering the first two rounds stand in front of the clerk's podium in the "well" of the House chamber.

Then Bartlett or Hackney, whoever happens to be conducting the call, voices the names of the members standing there.

Both have reputations as never having missed, but Bartlett confided, during an interview that he has slipped up a time or two. "I've never missed under pressure," he said, "but I have called out the wrong name a time or two, when I was relaxed and not concentrating."

"But I quickly recovered each time, and the member who was the subject of my fumble always thought I had just seen someone else and called his name."

"On occasion, I've drawn a blank on a name and as I go down the line in the well calling names, it's a little scary as I get closer to the man whose name I can't recall," he said. "But I've been lucky. Every time it's happened, the name has popped into my mind just before I had to identify the member."

GETS PICTURES, BIOGRAPHIES

Bartlett and Hackney send for pictures and biographies of the new members shortly after the election, and enclose a request for the proper pronunciation. New members, proud of their recent election to the Congress, can get pretty disturbed if their name is mispronounced the first time it is spoken in the House.

And with a Congress including a Kuykendall, Schneebell, a Frelinghuysen, a Galfanakis, and a Kluczynski, pronunciation can be a problem.

Most of the pictures have arrived and the two clerks will be spending much of their time the next three weeks studying them. "The biographies are about as important as the pictures," said Bartlett, who has been reading clerk since 1953, when, at the age of 27, he was the youngest man ever named to the post.

"It helps divide the chicken farmer from the banker," he explained. "And I don't mean to belittle either occupation."

"But a man's looks are influenced by his background, and the biographies are a real big help."

CALL TAKES 28 MINUTES

The average time for a roll call is about 28 minutes, but last Oct. 8, when Repub-

icans were stalling in an effort to force the Democratic leadership to call up a reorganization bill, one roll call took more than two hours. The speaker needed that much time to round up enough members to make a quorum, and the clerks were ordered to slow down their reading.

During that same session, which ran more than 33 hours, a modern record, Bartlett and Hackney called 46 roll calls, an all-time record. Since Senate-type filibusters are impossible under House rules, any filibuster, such as the one instigated by the Republicans during that all-night session, simply exploit the use of the reading clerks, with repeated demands for roll calls.

During such sessions, the clerks keep medicated cough drops handy, and gargle at regular intervals.

Altho neither Bartlett nor Hackney has had much formal speech training, both have superb speaking voices, with extreme clarity, volume, and perfect enunciation. Without such traits, they would not have their current jobs.

KNOW HOUSE PROCEDURES

Both also have intimate knowledge of legislative procedures in the House, another absolute must for a reading clerk.

While Bartlett was named by Republicans and Hackney by Democrats, they are non-partisan while on the job. They draw identical salaries [just under \$20,000 a year] and share all duties.

Both served their political parties as reading clerks in the national nominating conventions last fall.

Altho they have been partners only since 1963, when Hackney was appointed to the post, their voices sound so much alike that it is impossible to tell who is reading a bill, if the listener is out of view of the podium.

Bartlett expressed some surprise upon learning this, insisting there has never been any effort to make the voices sound alike.

SERVED IN MARINES

Hackney worked as a cloak room clerk before being named House reading clerk, while Bartlett was chief of pages in the House. He first came to Washington from his native Clarksburg, W. Va., in 1941, as a House page, an honor he won after being named "America's typical schoolboy patrolman." Altho the appointment was for only 30 days, he has been here ever since, taking time out to serve two hitchhikes in the marines, once during the Korean war.

Both Bartlett and Hackney enjoy their jobs and have nothing but praise for the members.

"Anybody that says nice guys finish last is just wrong," said Bartlett. "There are lots of great guys here and they all came in first."

"After all, every member here was sent here by half a million Americans."

[From Stars & Stripes, Mar. 16, 1969]

HANDY MAN AROUND THE HOUSE

(By Frank Eleazer)

WASHINGTON.—Congressmen pay Joe Bartlett, of Chagrin Falls, Ohio, \$20,000 a year because he can remember their names every time. And in 16 years nobody has had occasion to demand a refund.

How does he do it?

"I sweat a lot," says Joe, who with his fellow reading clerk, Charles W. Hackney Jr., of Lexington, N.C., alternated last year in calling the roll of the House 428 times.

Actually it isn't the call of the roll that's so tough. All this takes is good voice, clear diction, and basic knowledge of a few incidents like the fact Kuykendall has to come out "Kirkendall;" that Hébert really spells "Ay-bear"; and that Sebellius is pronounced "Sebeelius," instead of that other way.

The problem is that anywhere from 40 to more than 150 members fail to answer when called. Instead they present themselves en masse in the well of the House at the end of

the call, there to be individually identified, addressed and recorded, either as present or as voting for or against.

Thus Bartlett, 42, and Hackney, 46, become the only two people in the world who can, do, and must recognize on sight each of the 435 House members, and be prepared to call him by name, properly pronounced.

They know all the tricks in the memory trade, and think little of them. Joe recalls his first meeting with a House member now departed who, upon being introduced to "Mr. and Mrs. Bartlett" at a pre-session social event, subsequently introduced them to another guest as "Mr. and Mrs. Pear."

Association is an important part of the name-calling game, Bartlett concedes. For instance, unlike some others around the Capitol, he has never confused Rep. Don Clausen and Rep. Del Clawson, both Republicans, both Californians.

"Don is a pilot," says Bartlett, "while Del is a Mormon and a former mayor." And if that's not enough explanation to help you sort out the guests at the next neighborhood party, don't feel too badly about it.

Bartlett concedes he's no whiz kid himself at that kind of event. And Hackney admits that at private social affairs he sometimes flounders along with the rest of us trying to catch and hold fast to new names and hang them onto new faces.

However, both Bartlett and Hackney, naturally more name-conscious than the average person, offer some hints that might be helpful to harried hosts, guests, traveling salesmen, Rotary clubbers and others given to mumbled introductions and all-purpose greetings.

1. Get the name, if it means asking for it a couple of times. Repeat it.

2. Look—really look—at the guy (gal) who goes with it.

3. Exchange enough chitchat to fix in your mind, in case nobody told you, and generally nobody does, who your friend is or what he does for a living.

4. If you really mean business, write the name down the first chance you get.

Meantime, like Bartlett and Hackney, there are sometimes other steps you can take. Joe, a Marine reservist, was invited the other night to a fancy dinner at the Marine headquarters here.

"It was a great party," said Joe, happily recalling afterwards that he had every name and connection in mind before he walked in the door.

Hackney says when he enters a roomful of people many of whom he knows, or is supposed to know, he keeps his eye roving over the group picking out and mentally affixing name tags to those he will be greeting shortly. That way he avoids last-minute panic.

Getting back to those roll calls, Bartlett, who's been at it since 1953, and Hackney on the job now for six years, admit they still get knots in their stomachs every time that mass of members presents itself in the well.

The custom is to start at the right and work to the left, taking the members, in turn, picking out for special advance recognition only the ladies and the more elderly or infirm of the men.

"I am always working three faces ahead," reports Bartlett. "I have never yet drawn a blank that didn't clear up before I got there."

Because of recent roll call scandals involving the improper recording of members not actually present, House leaders are currently seeking bids on an electronic tally system, built around a computer, to record and count votes as they are cast.

The reading clerks (who were not involved in the ghost-voting practice) welcome this advance. However, it will not change their basic function of calling the roll, or relieve them of many related reading and paperwork duties.

And it won't cut down a bit on the sweat

during the big stampede to the well. The new computer is guaranteed never to forget a name. But it is no good at all at remembering faces.

GENERAL LEAVE TO EXTEND

Mr. MILLER of Ohio. Mr. Speaker, I ask unanimous consent that I may revise and extend my remarks in the RECORD and include extraneous matter and that other Members may have the same permission with respect to this subject.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

FEDERAL FINANCIAL DISCLOSURE ACT OF 1969

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. RUPPE), is recognized for 10 minutes.

Mr. RUPPE, Mr. Speaker, today I am introducing the Federal Financial Disclosure Act of 1969. This bill is the most stringent financial reporting legislation to be presented to Congress to date. This is legislation to bring all policymaking officials of the executive, legislative, and judicial branches of the Government under strict reporting requirements. It is neither a clever nor a devious bill. It is straightforward and to the point. It is designed to obtain reports on all sources of income, direct and indirect, by covered individuals and members of their immediate families.

There is coincidence in my presentation of this legislation today. This morning we received word that Justice Abe Fortas is resigning from the Supreme Court. This is a man proposed by former President Johnson for Chief Justice of the U.S. Supreme Court. Today his resignation comes in the wake of evidence that Mr. Fortas found it difficult to separate his public trust from his desire for personal gain. Before we in the House of Representatives cast too many stones, however, let us not forget that the other branches of Government, Congress and the executive, have not been free from the type of stigma which has afflicted the Supreme Court.

Mr. Speaker, there is a crisis of confidence shaking the very foundations of American government. We must move during this session of Congress to reestablish the faith of the American people in their national leadership. When I was elected to Congress in 1966, the American people were stunned by stories of influence peddling and abuse of the public trust by individuals in positions of power. Members of the Republican Freshman 90th Club banded together and proposed a package of new ethics legislation. Others in Congress joined our cause, and we accomplished what had not been possible for 180 years of congressional history. We succeeded in establishing an ethics code, and Ethics Committee, and a system of partial financial disclosure. During the 90th Congress we took a step forward. Now it is time to build on that foundation.

The public portion of the House of

Representatives financial statement, under reporting procedures established during the last Congress are little better than a sham and a facade. A listing of holdings without accompanying financial statements is next to meaningless. Loopholes under the present reporting procedure are legion. For example, when is a company doing substantial business with the Federal Government? In my case I made a decision to report everything in which I might conceivably have even an indirect interest. However, I strongly suspect that with a rearrangement of my finances—putting items in trust or corporate entities—it would have been possible to sharply reduce my public disclosure. It was after studying and filing the report that I decided on the necessity for drafting strict reporting requirement legislation. It also seemed logical to me that all high officials in Government should be covered by the requirements.

The Washington Post was absolutely correct when it stated in an editorial Wednesday:

The portion of the member's report that is made public is both superficial and incomplete. . . . The facade must give way to the reality of candor with the public.

Mr. Speaker, the public is losing patience, and it is tired of the "put on" and the half measure. Allegations and controversy surrounding Bakers and Dodds and Longs and Powells and Fortases and mink coats and freezers and vacuna coats and beachside motels are eroding public respect for the principal institutions of democracy. We must act. If we fail to act, our failure will lead to ever-greater public cynicism, and the residue will flow as a pollutant into all facets of American life. Can we expect from our Nation and the younger generation better than the example we in this Chamber provide? Can any man doubt that we are in trouble in this Nation? A whole generation of Americans is losing patience with double standards, demagoguery, and hypocrisy. There are those of increasing prominence who would rip our society asunder and tear our institutions to the ground. We in Government cannot succeed in asserting effective leadership in this age of moral turbulence and spiritual crisis if we fail to lift ourselves above any hint of suspicion. Adoption of the Federal Financial Disclosure Act of 1969, which I am introducing today is the logical step forward.

This act is simple. It calls for full financial disclosure by Members of the House, Senators, Justices, and judges of the U.S. court system, the President, the Vice President, Cabinet members and other policymaking officials of the executive branch as determined by the Chairman of the Civil Service Commission. Under the act the following items must be reported:

First. Gross income of principal person and members of his immediate family.

Second. All honorariums and compensation payments, including names of sources and amounts—includes commissions, salaries, fees, and so forth.

Third. Gross income from business enterprises, including amounts, addresses,

and names of businesses, and nature of the businesses.

Fourth. Itemization of gains from dealings in property, including names and addresses, and brief description of each transaction.

Fifth. Income from interest, including sources and amounts.

Sixth. Sources of income from rents, royalties, and dividends.

Seventh. Indebtedness, including names and addresses and aggregate amount.

Eighth. Itemization of income from partnerships or memberships in professional groups. Names and addresses for such payments that exceed \$1,000.

Ninth. Itemization of income from estates or trusts in which principal has an interest, and nature of that interest.

Tenth. Report on all gifts exceeding \$100 in value, including names and addresses of donors, amount or value of gift, and description thereof. Report shall also contain a list of gifts to the principal and his family which exceed \$500 in value, including names and addresses of donors.

Eleventh. Report to contain list of assets held by principal and his immediate family. List to include value of each asset and brief description. Household furnishings and personal effects excluded.

Twelfth. Report to include names and addresses of each person or organization to whom the principal and his family owe at least \$5,000. It also includes statement of total indebtedness.

Thirteenth. Report to include all funds used to defray expenses incurred by reason of his being an official member candidate or judge, including names and addresses of all persons contributing to the funds, the amount of each contribution, the amount of each expenditure and the purpose of each expenditure.

I urge early congressional consideration of this legislation and request that the full text of the Federal Financial Disclosure Act be published in the CONGRESSIONAL RECORD following these remarks.

The bill follows:

H.R. 11380

A bill to provide for public disclosure by Members of the House of Representatives, Members of the United States Senate, Justices and Judges of the United States Courts, and policymaking officials of the executive branch as designated by the Civil Service Commission, but including the President, Vice President, and Cabinet members; and by candidates for the House of Representatives and the Senate, the Presidency, and the Vice Presidency; and to give the House Committee on Standards of Conduct, the Senate Select Committee on Standards of Conduct, the Director of the Administrative Office of the United States Courts, and the Attorney General of the United States appropriate jurisdiction.

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Financial Disclosure Act".

SEC. 2. For the purposes of this Act—

(a) The term "Member" means a Member of the Senate or the House of Representatives and the Resident Commissioner from Puerto Rico.

(b) The term "Judge" means a Justice or Chief Justice of the Supreme Court of the United States, Judges of the United States

District Courts and the United States Courts of Appeals.

(c) The term "Officer" means the President, the Vice President, Cabinet Members, and any Presidential Appointee who has been designated as a policymaking official by the Civil Service Commission.

(d) The term "candidate" means an individual who has taken the action necessary under the laws of a State to qualify him to be a candidate either in a primary election held to nominate a candidate for election to the Presidency, the Vice Presidency, the United States Senate, or the House of Representatives, or in a general election or special election held to fill any of these offices.

(e) The term "election" means a general or special election held to select a Member, President, or Vice President and a primary election held to nominate candidates for the office of President, Vice President, or Member.

(f) The term "gift" shall refer to something of value voluntarily transferred from one party to another without compensation or monetary consideration.

(g) The term "fund" shall refer to a sum of money or other material resources available for use by Member, judge, officer, or candidate or anyone acting on his behalf.

(h) The term "asset" shall refer to an item of value owned or in which exists a beneficial interest.

SEC. 3. (a) Each person serving as a Member, each judge, and each officer designated by the Civil Service Commission as a policymaking official of the executive branch shall file on or before April thirtieth of each year with the appropriate person, a written report containing the information required by this Act covering the preceding calendar year. The Members of the Senate shall file such reports with the Secretary of the Senate and the Senate Select Committee on Standards of Conduct. The judges shall file such reports with the Director of the Administrative Office of the United States Courts. Officers shall file such reports with the Attorney General of the United States.

(b) Each candidate for the House of Representatives or the Senate who is not a Member of the House or the Senate shall file with the Clerk of the House or the Secretary of the Senate at least fifteen days before the date on which is held the first election in which he is a candidate a written report containing the information required by this Act covering the preceding calendar year. Where an individual becomes a candidate after the beginning of such fifteen-day period, he shall file such a report within twenty-four hours after becoming a candidate.

(c) Any candidate for the Office of President or Vice President who is not President or Vice President shall file such report with the Attorney General within fifteen days after his nomination by his party, but not less than thirty days prior to the general election.

(d) The report required to be filed under subsections (a), (b), (c) of this section shall be verified by the oath or affirmation of the person filing such report.

(e) All reports required under subsections (a) of this section shall be maintained by the Clerk of the House or the Secretary of the Senate for the duration of the Member's consecutive terms in office as public records available for inspection at reasonable times by the public. All reports required under subsections (b) and (c) of this section shall be maintained for a period of one year by the appropriate person as public records which shall be available for inspection at reasonable times by the public.

SEC. 4. (a) The report required under subsections (a), (b), and (c) of section 3 of this Act shall include a complete account of the Member's, judge's, officer's, or candidate's gross income and that of his spouse

and dependent children. For the purposes of this Act, gross income shall be defined as set forth in section 61 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 61). The report of income shall specifically include, though not to the exclusion of other items listed in section 61, the following information:

- (1) the names and addresses of all persons and organizations from whom was received by the Member, judge, officer, or candidate, or on his behalf with his knowledge and consent, any honorarium or compensation for services, including fees, commissions, salaries, and similar items, and the amount of such honorarium or compensation for services, or if not money, the substance of the honorarium or compensation and the appraised value thereof;
- (2) gross income derived from business enterprises including the amounts thereof, the nature of his interest in the business, and the names and addresses of each such business;
- (3) an itemization of all gains derived from dealings in property, including the names and addresses of other parties involved and a brief description of the transaction which took place;
- (4) the sources from which were derived income from interest and the amounts thereof;
- (5) the sources from which rents were derived and the amounts thereof;
- (6) the sources from which royalties were derived and the amounts thereof;
- (7) the sources from which dividends were derived and the amounts thereof;
- (8) the names and addresses of all persons and organizations from whom he received assistance in the discharge of indebtedness and the aggregate amount or appraised value thereof;
- (9) itemization of income or benefits derived from distribution of the Member's, judge's, officer's, or candidate's share in any partnership or professional group, and the names and addresses of all person and organizations from whose payments such distributions are made: *Provided, however,* That no such names and addresses need be furnished when the distribution to the Member, judge, officer, or candidate from any such person or organization in said year is less than \$1,000;
- (10) itemization of income derived from an estate or trust in which the Member, judge, officer, or candidate has an interest and the nature of that interest.
- (b) The report shall list all gifts to the Member, judge, officer, or candidate which in aggregate value exceed \$100 in the year from a particular source. Included in the report shall be the name and address of the donor, the amount or value of his gifts, and a description thereof. The report shall also contain the name and address of a donor to the Member, judge, officer, or candidate, his spouse and his dependent children when the amounts or values of such gifts given in the course of a calendar year from a particular source exceed \$500, and shall describe each such gift and the value thereof.
- (c) The report shall list assets held by the Member, judge, officer, or candidate, by his spouse or dependent children, or by any of them jointly. The list shall include the value of each asset and a brief description thereof, but household furnishings and personal effects need not be reported.
- (d) The report shall include the names and addresses of each person and organization to whom the Member, judge, officer, or candidate, his wife or dependent children, or any of them jointly owe an aggregate amount in excess of \$5,000, and include a statement of the total aggregate indebtedness of the Member, judge, officer, or candidate and such family members.
- (e) The report shall include a statement of any funds established by the Member,

judge, officer, or candidate, or on his behalf, to assist him in defraying expenses which may be incurred by reason of his being a Member, judge, officer, or candidate. The report shall set forth the names and addresses of all persons contributing to the funds, the amount of each contribution, the amount of each expenditure from such funds, and the purpose of each such expenditure.

Sec. 5. (a) The Senate Select Committee on Standards of Conduct shall have jurisdiction to review the report filed with it by a Member of the Senate under this Act, and shall recommend to the Senate appropriate disciplinary action against any Member of the Senate who it determines has failed to file any such report or knowingly and willfully filed a false report. Such violations shall be reported to the Attorney General. The committee shall develop and prescribe the forms to be used in making such reports.

(b) The House Committee on Standards of Conduct shall have jurisdiction to review the report filed with it by a Member of the House under this Act, and shall recommend to the House appropriate disciplinary action against any Member of the House who has failed to file any such report or who has knowingly and willfully filed a false report. Such violations shall be reported to the Attorney General. The committee shall develop and prescribe the forms to be used in making such reports.

(c) The Director of the Administrative Office of the United States Courts shall have jurisdiction to review a report filed with it by a judge under this Act, and shall recommend to the Judicial Conference appropriate disciplinary action against any judge it determines has failed to file any such report or knowingly and willfully filed a false report. Such violations shall be reported to the Attorney General. The Judicial Conference shall develop and prescribe the forms to be used in making such reports.

(d) The Attorney General shall have jurisdiction to review a report filed with him by an officer and shall take appropriate action against any officer he determines has failed to file an appropriate report or who knowingly and willfully filed a false report. The Attorney General shall develop and prescribe the forms to be used in making such reports.

(e) Subsections (a) and (b) of this section are enacted as an exercise in the rule-making power of the Senate and the House of Representatives, respectively, with full recognition of the right of the House and Senate to make changes therein at any time in the same manner and to the same extent as in the case of any other rule of the Senate and House.

Sec. 6. Any Member, judge, officer, or candidate who willfully fails to file a report required by this Act, or who knowingly and willfully files a false report under this Act, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

THE MARITIME INDUSTRY

(Mr. RUPPE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RUPPE, Mr. Speaker, our colleague the gentleman from Massachusetts (Mr. KEITH) recently spoke to the New York State Maritime College Alumni Association's 50th anniversary dinner, at the Hotel Statler in New York.

Mr. KEITH's interest in maritime matters predates—by many years—his coming to Congress, and predates, too, his relatively recent appointment to the Merchant Marine and Fisheries Committee.

His congressional district has probably

launched as many ships as any other coastal area of a similar size—in the United States—or perhaps throughout the world.

In Mr. KEITH's speech he summarizes the situation that confronts our merchant marine—and points up the need for action in the years ahead. Mr. KEITH's speech follows:

SPEECH BY REPRESENTATIVE HASTINGS KEITH

Admiral O'Donnell, Captain Maley, Toastmaster Mueller, and Alumni of the New York State Maritime College. I am honored to be here for your 50th Anniversary Dinner.

My Congressional District has a long seafaring tradition. There is hardly a tidal river south of Boston, that hasn't at one time or another, been the scene of a ship launching. The whaling ships are no more—but New Bedford still is a busy port, eager to play a major role in an industry that, in our national interest, should be revitalized, and the General Dynamics in Fore River is one of the major ship builders for our Navy. It should and will play a major role in the longed for era when our Merchant Marine can take its place along side of our naval forces under the American flag. Carrying the products of American enterprise to the other nations of the world.

And so, I'm pleased to talk to you about a subject which, besides being of great personal interest, is, in my view, going to become relatively fashionable in the near future.

In my years on the Merchant Marine and Fisheries Committee, I've been in a position to observe what's been happening to our industry. In 1966, for example, I served as a member of a Congressional delegation which went behind the Iron Curtain to observe the Russian's effort to win control of the oceans. Upon my return I added my voice to those of others who, through the fog which historically enveloped our Maritime policy, have warned America that—"Soviet Maritime policy already has gone a long way toward achieving supremacy at sea, and, unless effectively challenged by the Free World, can be expected to achieve this strategic objective well before the end of this century."

I further warned that the Russians had 10 times as many Merchant ships on order as we did. Our predicament now is well known. America is becoming one of the smaller boats on the World's oceans. So much so that the *New York Times* has said: "The current state of the Merchant Marine represents a genuine crisis for the United States as a maritime power." It is further pointed out that since 1947, the percent of foreign trade carried aboard U.S. Flag ships has dropped from 58% to less than 6%—with 10,000 tons of commercial cargo lost to foreign flags every month. Our fleet is not only antiquated—but it's shrinking, and now consists of some 800 fewer ships than in 1950.

What's more, a history of the last 70 years of our Merchant Marine shows a lack of National planning similar in some respect to that of our earlier defense establishments.

For example, at the time of the Spanish-American War we were without a Merchant Fleet. We had to buy and charter vessels from foreigners—at exorbitant prices and rates.

During the first world war the Merchant Marine didn't do much better, although we tried. Wilson got the Shipping Act of 1916 through. It authorized, as you know, a ship-building program and shipping board to run things. But the vessels weren't ready until it was time to bring the troops home!

In the meantime, the United States, once again, bought ships from foreign nationals. At the end of hostilities we found ourselves with another rag-tag fleet consisting of ramshackle Japanese freighters and nu-

merous old Austrian and German ships, ships seized by the Allies but sold to us only following our entry into the War.

And what about the roaring 20's and the early 30's? What Maritime policy there was, could be summed up by "scrap 'em or sell 'em"! With it faded any vision of a strong fleet which the Merchant Marine Acts of 1920 and 1928 were powerless to revive. As if to finish things off—the shipping board was abolished in 1933 and its responsibilities turned over to the Department of Commerce.

As we all know, the efforts of the Merchant Marine during the Second World War were heroic, so heroic, in fact, that statistics to show how many ships were built, and how many tons of material were transported, became somewhat insignificant. Suffice it to say that at war's end we had approximately 60% of the World's merchant tonnage, compared to 13% before the War.

We also had a headstart on every other shipbuilding nation, our Merchant Marine, a relatively small industry in America, stood ready to play a disproportionately large role in National and International affairs.

During the post war period, however, new pressures arose, and I'm afraid that we'll have to admit that neither government nor industry responded adequately to them. Labor was restless, management faced stiff competition, restrictive regulations sprang up like weeds, and the fleet, of wartime vintage, rapidly became obsolete.

In looking at the various proposals to get us out of the maritime mess, I am struck by the number of imaginative ideas and statistics which are used to draw an extraordinary profile of America's future on the seas.

We hear market forecasts saying that during the 70's the ocean movement of tanker cargoes will grow by at least the same 9% per year as it is now, that dry cargo tonnage will grow by 4% to 5% each year, and package freight by 20%.

We hear that atomic propulsion will be economically feasible by 1973 and our more creative designers are proposing tankers so large that the Queen Mary could fit on their decks.

We hear more and more about "value engineering" which will cut costs and the land bridge concept which, along with the expected discovery of new ore deposits, may cause the trade routes to be rewritten again.

We hear that within the next five years, probably 40 to 50% of the world's freight items will be packaged—opening the door for an even quicker exploitation of such things as long and short haul vessels—in short, a systems approach will be employed.

And, perhaps most astounding of all, is something I only discovered on the plane from Washington this afternoon—the fact is that technology currently available would permit the use of a steel tube 38 feet in diameter and 1400 feet long and which would travel 200 feet below the surface at a speed of 40 to 50 knots. Dubbed the "eel", this vessel, and I use the term advisedly, could be instrumental in bringing to the ocean an application of the automatic distribution revolution which has already occurred on land. A new total approach will then be possible. The automatic loading and unloading of homogenous cargoes such as coal, ore, sand, and oil, can occur. Additionally, dry cargo could be carried in containerized ships and ocean-going catamarans. However, the conclusion of the article brought an abrupt end to the fantasies it had created for me . . . by reminding that there were: "A number of almost insuperable obstacles" still remaining before such a scheme becomes operational.

All of this reminds me of a fact very often forgotten in discussions about the future of the Merchant Marine. The most important ingredient for the revolution which is to come is Men . . . men trained in the unique technology of the sea.

Who . . . is to loosen the bureaucratic strings which have tied the Merchant Marine down like Gulliver . . . bound down by the Lilliputians . . . ?

For . . . who is to pilot and service the gigantic underwater bullets I have described. Which are to be driven by small crews which sit in front of an instrument panel no bigger than that of a light plane?

Who . . . can best develop new and applicable mechanical inventions—who but those who know the sea and her habits most intimately?

Who . . . will know how to manage the sea as a course of natural wealth and as a profitable commercial highway better than those who know how to capitalize on her quirks, utilizing her strengths and avoiding her weaknesses?

These questions, and many others, point up the need for a highly trained group of ships officers and men, scientists, technicians, vessel captains, operations men, planners and visionaries to turn the oceans into bountiful commercial lakes. And without an educational system geared to this massive task . . . the ship of state will continue to be a . . . shrimp boat!

I want to make one thing perfectly clear. "The maritime industry has been permitted to decline to a point at which the nation's defense and economic welfare are imperiled. We must set as our goal a sharp increase of the transport of U.S. trade aboard American flagships. The present rate is 5.6%; by the mid-seventies, we must see that rate over 30% and the growth accelerating. I support a building program to accomplish that objective."

So said Richard Nixon in Seattle last year and it's beginning to look as though the Nation may cash in on this campaign promise. My discussion with the leaders of the new Nixon Maritime team, including Andy Gibson . . . A graduate of the Massachusetts Maritime Academy, Rocco Siciliano, the Undersecretary of Commerce and spokesman for the Administration's special maritime planning council, leads me to believe that before many more months pass we are likely to see the results.

During the last few years, 11 separate proposals for rebuilding the fleet have come from the Federal bullpen, but nothing has been done. The Nixon team, culling the usable from this storehouse of information and, by adding a dash of creativity of its own at long last . . . can bring the nation to the beginning of a new maritime era.

Maybe there's some life left in the old bureaucracy after all. Personally, I'm delighted because it has always been my approach that after some initial studies have been made, we would learn more . . . by doing than by studying further. I remember when I first began in the Insurance business . . . studying estate planning, I can say now there was no classroom lesson as valuable as getting on with a job—I can say too, that in the Merchant Marine, we've studied it enough. There's been enough planning—on a horizontal plane—and at the highest level. It's time we got on, with some part, at least, of the job.

We have to jump in and swim . . . or we'll never get anywhere.

What's needed to get us headed in the right direction? I always hesitate before answering such as this because there are those who suggest that Congress has had a hand in bringing about the downfall of the Merchant Marine.

But the Congress has been active. Only this week the Merchant Marine and Fisheries Committee in Executive Session reported out unanimously a bill that will authorize Uncle Sam to really move toward a meaningful maritime program. We on that Committee—Republicans and Democrats, representing East and West, North and South—Coastal districts, as well as the Heartland of Amer-

ica—All of us share the concern and the hope that this country resume its rightful role as a maritime power.

We believed President Nixon's campaign promise—

We trust his appointed leaders, Rock Siciliano and Andy Gibson—

We know they have made big plans, that they must move forward and become a reality—we expect the Congress to act favorably on our legislation, and more importantly on the President's program when it comes to us. It is to this end—to have the ships officers ready to man this fleet and to manage its ocean related industries, that I introduced earlier this session a bill which would change the \$600 grant given to students in our maritime academies to a \$1000 grant/loan which would also require the recipient to serve in the Merchant Marine or in the Armed Forces if he didn't go in the Merchant Marine.

Six other Members of Congress joined me as co-sponsors. Now when I think about it, I wonder if the bill shouldn't have stipulated that those who receive the stipend must serve their nation in a marine related enterprise, never mind the Armed Forces.

May I take this opportunity to urge my partisan audience to write to their Congressman urging their vote for my bill or Congressman Hathaway's bill which is somewhat similar to mine. Even better—write to the Chairman of the Merchant Marine and Fisheries Committee to ask him to take it up at his earliest convenience. Right now, isn't too soon.

There is the problem of course, that at present we are still working with the Johnson Budget and we will in effect be doing so, until 1971. What we're after now is to get the most ships for our subsidy dollar and to get rid of the bureaucratic constraints to which I have already alluded earlier.

Obviously, there's no simple outline of what's needed.

While the problem is complex, some basic things can be easily seen as necessary for its solution.

1. Money—clearly the first order of business. Red Ramage of the MSTs told me the other day that "money is the answer" and at first I thought he was wrong. Of course, many other ingredients must be present, but I'm beginning to think Red was right in the sense that if Congress doesn't appropriate what's needed nothing will be accomplished.

2. Second, of course, more unanimity is needed in the industry, particularly between those who are subsidized and those who are not. Over the years the fractionalism of the industry has been a major cause of its decline, and I'm told that in many respects things aren't much better today.

3. Third, we must find some way to achieve more stability of labor, both shoreline and sea-going.

4. Fourth, a massive education program, both of citizens as to the importance of the oceans, and of the future servants of the seas—the technicians, designers, and managers of the future.

I read recently that by 1975 it will be possible to sail a ship of 20 or 30 thousand tons with a crew of 18, all of whom will be dressed in Brooks Brothers Uniforms. Times . . . they are changing, and the needs of modern technology and economics must be served. I can't emphasize enough how important the training of our seamen of the future is—its a job we must get on with right away.

It has another, perhaps more potent, meaning for modern men who are beginning to see that the soil will not be able to feed humanity forever. There will be many seamen in the future because the day is rapidly approaching when the chief source of protein may be the sea; and a day, too, when the chief source of minerals, as yet undiscovered, will be necessary to satisfy the growing appetite of an ever industrializing society.

Looking far into the future the U.S. will

have to be among those nations with the best Merchant fleet—both in men and ships. If we aren't we will find ourselves having to go, hat in hand, asking the more advanced maritime powers for food, natural resources and, perhaps, trading right—May I call your attention to a statement—a statement not appropriate to our present status, but reflecting instead the status of another nation—a rival whose goals and methods of achieving them are in sharp contrast to our own.

I quote: "the fleet has been joined by hundreds of new and improved vessels of various types. The creation of a Merchant Marine has made it possible to free the nation from dependence on foreign vessels for maritime shipping. Today, the nation can deliver any cargo—to any point on earth, using high speed ships." This passage could and should be a description of America's Maritime goals. Unfortunately, however, it is, in fact, a statement of Soviet maritime achievements.

This, gentlemen, in part at least, is a measure of the task.

PRESIDENT NIXON'S MESSAGES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. QUIE) is recognized for 10 minutes.

Mr. QUIE. Mr. Speaker, the President has made three recent statements which are extremely significant to the country and the world.

First, and foremost, was yesterday evening's talk on Vietnam in which his firm but conciliatory and flexible position proves his sincere desire for bringing peace and withdrawal of American involvement in the Vietnam conflict, as well as ending the loss of American lives.

I commend the President on the most forthright statement to date on this subject. He has given us assurance that he will pursue every possible avenue for a just peace. Anyone watching him on television knows his credibility, his leveling with the American people. From now on we should know the successes and the reversals that are bound to occur.

Closely tied to the war in Vietnam and a subject of interest to every parent and draft-age young person was his message of May 13 proposing changes in the Selective Service Act.

Studies that we have made at the Education and Labor Committee of the House indicate to me that it is untenable to hold over the head of every young man 7 or more years of draft vulnerability. We must go to a prime age group with vulnerability for 1 year. Entering at age 19 and leaving at age 20 is the right age.

I have now come to concur that we should move away from undergraduate deferments.

We cannot do this immediately. I would suggest it be accomplished over a 4-year span—that each person deferred now for undergraduate study become vulnerable for the draft for 1 year when he completes his undergraduate work. I feel there should be no new deferments for undergraduate study after this year. This would eliminate all deferments for undergraduate study after 4 years.

Also, from our studies in the Education and Labor Committee, I must conclude that the Nixon proposal to continue deferments for graduate students for the full academic year for which they are called is excellent.

If deferments for undergraduate students should someday be terminated as I have suggested, then they, too, should be permitted to finish the full academic year for which they are ordered for induction.

With the prime age group being 19–20, as the President suggested, of course a large number of those drafted would be in undergraduate study.

And, finally, one of the great concerns of the American people is that we spend too much on the military and not enough on the needy. If we are to help poor people, the first order of priority ought to be feeding the hungry and malnourished.

President Nixon's recent message on this subject proposing increases in food assistance, I believe, is superb. It touches every area of change that ought to be made in the present programs.

It would provide poor families enough food stamps to purchase a nutritional complete diet.

It would provide food stamps at no cost to those in the very lowest income brackets.

It would provide food stamps to others at a cost of no greater than 30 percent of income.

It would insure that the food-stamp program is complementary to a revised welfare program, which the President will propose to the Congress this year.

And, it would give the Secretary of Agriculture the authority to operate both the food stamp and direct distribution programs concurrently in individual counties, at the request and expense of local officials.

For some time I have advocated that both food stamps and direct distribution programs be permitted to be run concurrently in all counties.

The record shows that, when a county moves from direct distribution to food stamp program, a heavy falloff of poor people who participate in the program occurs.

The Department of Agriculture under previous administrations said the reason for this condition is the fact that so many people receive food under direct distribution who really are not poor enough to be eligible under the food-stamp program.

While there may have been some cases where individuals should not have received direct distribution, I doubt that this generally is the case.

In fact, the number of participants began increasing after a food-stamp program had been in effect for awhile. The delivery system has been very poor in some counties.

The proposals of the President committing his Office of Economic Opportunity to assistance in delivery of food stamps and commodity packages is a move in the right direction. If anyone knows where the poor really are located, local community action agencies ought to be in the forefront.

What we have learned through administration of the emergency food and health services program, which was my amendment to the Economic Opportunity Act, has shown us the way to provide improved food services to the most needy so that it has the greatest

impact in solving their nutritional needs.

Mr. Speaker, I commend the President on both the timeliness and the substance of all three of these messages which shows so clearly his awareness of the vast concerns facing this Nation and his determination to take forceful steps dealing with these problems.

IN FURTHER SUPPORT OF MASS TRANSIT

(Mr. KOCH asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, last Friday, Secretary John A. Volpe announced that the Nixon administration would soon be submitting a proposal to establish a mass transportation trust fund to deal with the long-neglected need for mass transit in the urban centers of this country.

As one who has been working to enlist support for such a trust fund, I am more than pleased that the Secretary has decided to push ahead with this program, one that will be so vital for our metropolitan areas.

On February 18, I introduced my first mass transit bill which would establish a trust fund and provide \$10 billion over the next 4 years for mass transportation facilities. The trust fund will be financed by using the existing 7 percent automobile excise tax; these excise taxes now go directly into the General Treasury.

While I am encouraged that the Nixon administration has finally endorsed the mass transit trust fund concept, I am concerned that the proposal currently being drafted by the Department of Transportation does not provide the amounts needed to deal with the problem of mass transit so long neglected by the Federal Government. It has been reported that Secretary Volpe plans to ask for only \$300 to \$400 million for the program's first year. The bill I have introduced and which is now cosponsored by 74 of my colleagues, provides for \$1 billion for the first year, \$2 billion the second year, \$3 billion the third, and \$4 billion in the fourth making a total of \$10 billion over a 4-year period. It is a modest program when contrasted with the \$4.5 billion which will be spent this year alone on highways.

One of the more unique features of the proposal I have introduced is the Federal participation to the extent of 90 percent. This is the same degree of Federal support given to the highway program. Currently, whatever small mass transit Federal funds that are available are doled out with only a two-thirds Federal contribution. If we are to make mass transit competitive with highways we will have to give it the same degree of assistance as we give our highways.

It would appear that Secretary Volpe is thinking in terms of a Federal participation of somewhere between 60 and 80 percent. I hope that he will reconsider this decision. To make mass transit competitive for the near bankrupt cities, the Federal participation must be 90 percent in both cases.

I am pleased to report, Mr. Speaker, that there has been an enthusiastic response to my bill. As I have said, there

are now 75 Members of the House supporting it. In addition, I have received numerous letters from all over the country affirming the need for an expanded program of assistance for mass transit and expressing enthusiastic support for the mass transit trust fund bill.

Those of us supporting this bill have founded a mass transportation action alliance, ZOOMass Transit, to coordinate the broad "grassroots" support that this kind of legislation has. I have written to the mayors, city and State legislators, and chambers of commerce from the Nation's 25 largest cities, and I should like to submit for the RECORD some of the statements made by these supporters:

I have heard from Mayor Joseph L. Alioto of San Francisco who is interested in the trust fund with respect to what help it might bring to the Bay Area Rapid Transit System; Ivan Allen, Jr., mayor of Atlanta, who expressed his "support and cooperation" in my efforts "to establish an urban transportation trust fund"; former mayor of Seattle and now Assistant Secretary of Transportation, J. D. Braman, who has also been an active proponent of an expanded mass transportation program in the U.S. Conference of Mayors; Thomas D'Alesandro, mayor of Baltimore and chairman of the Transportation Committee of the National League of Cities which has endorsed the mass transportation trust fund concept; Mayor W. H. McNichols, of Denver, who while still interested in the highway trust fund noted that "we also need assistance in developing an adequate mass transportation system" and agreed that the \$10 billion suggested amount is not "out of line" and that the Federal participation in mass transportation should be increased to 90 percent; Mayor Erik Jonsson who commenced his letter with:

You have the strong support of the City of Dallas for legislation now pending in Congress for the establishment of an urban mass transportation trust fund.

Mayor Eugene P. Ruehlmann who said:

Cincinnati is indeed interested in the solutions of the mass transit problem.

Carl B. Stokes of Cleveland who said:

I wholeheartedly support you in your efforts to make urban mass transportation more realistic and to provide the necessary tools to enable the cities to start work on this overwhelming problem.

Mayor Sam Yorty who noted:

The City of Los Angeles and the surrounding communities have an urgent need to expand and improve their mass transit facilities . . . You may be assured that I wholeheartedly support the principal of establishing a federal trust fund for improving the urban mass transit.

Mayor Alfonso J. Cervantes of St. Louis, Missouri who said:

We who are aware of the critical need for public transit service must certainly support a bill of this nature. Transit is an essential element in the balanced efficient and orderly development of our metropolitan areas.

Mayor Louie Welch of Houston acknowledged my letter and said that he would have his departments look into the matter.

Support for ZOOM and the bill has

also been secured from over 200 city councilmen and State legislators representing districts in New York City, Chicago, Los Angeles, Philadelphia, Detroit, Baltimore, Cleveland, St. Louis, Milwaukee, San Francisco, Boston, Cincinnati, Dallas, New Orleans, Pittsburgh, San Antonio, Seattle, Buffalo, Memphis, Denver, Atlanta, and Minneapolis.

We hope to receive more support from other cities and urban towns, unions, civic organizations concerned with mass transit, and mass transit authorities.

In conclusion, may I say that the mass transportation trust fund has now been endorsed by this administration and the previous administration. It is time that we move on from endorsements and proposals and implement the program by passing legislation in this Congress.

SPONSORS OF URBAN MASS TRANSPORTATION FUND (H.R. NUMBERS: 7006, 9661, 10554, 10555, 11079, 11080)

California: Glenn Anderson, Alphonzo Bell, Phillip Burton, Don Edwards, Richard Hanna, Gus Hawkins, Chet Holifield, Harold T. Johnson, John E. Moss, Thomas M. Rees, John V. Tunney, Jerome R. Waldie, Charles Wilson, Lionel Van Deerlin.

New York: Joseph P. Addabbo, Mario Biaggi, Frank J. Brascio, Daniel E. Button, Hugh L. Carey, Shirley Chisholm, Thaddeus J. Dulski, Leonard Farbstein, Hamilton Fish, Jr., Jacob Gilbert, Seymour Halpern, James M. Hanley, Edward I. Koch, Allard K. Lowenstein, Richard D. McCarthy, Martin B. McKneally, Richard L. Ottinger, Bertram L. Podell, Adam C. Powell, Benjamin S. Rosenthal, William F. Ryan, James Scheuer, Lester Wolff.

New Jersey: Cornelius Gallagher, Henry Helstoski, James J. Howard, Joseph G. Minish, Edward J. Patten, Peter Rodino, Frank Thompson, Jr.

Michigan: John Conyers, Jr., Charles C. Diggs, Jr., John D. Dingell.

Florida: J. Herbert Burke, Dante B. Fascell, Claude Pepper.

Illinois: Frank Annunzio, Abner Mikva, Melvin Price, Sidney Yates.

Ohio: Michael Feighan, Louis Stokes, Charles Vanik.

Massachusetts: James A. Burke, Harold D. Donohue, Thomas P. O'Neill, Jr.

Indiana: John Brademas, Andrew Jacobs, Jr.

Minnesota: Donald Fraser, Joseph E. Karth.

Maine: William D. Hathaway, Peter Kyros.

Colorado: Frank E. Evans, Byron C. Rogers.

Maryland: Samuel Friedel.

Missouri: James Symington.

Pennsylvania: Gus Yatron.

Rhode Island: Robert O. Tiernan.

Connecticut: Emilio Q. Daddario.

Washington: Brock Adams.

Wisconsin: Henry S. Reuss.

THE END OF A COLORFUL ERA IN CALIFORNIA POLITICS

(Mr. SISK asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. SISK. Mr. Speaker, I rise to call to the attention of my colleagues the end of a colorful era in California politics. State Senator Hugh M. Burns of Fresno, a longtime friend of mine and of many other members of the California delegation from both sides of the aisle, has been ousted from his office as president pro tempore of the California State Senate and chairman of the State senate committee on rules.

The ouster was accomplished by a

coalition of eight of his fellow Democrats and 13 Republicans.

Hugh Burns is not what you could call a noncontroversial figure. In 1959, he shocked and stunned his Democratic colleagues by endorsing Earl Warren for Governor of California and in 1968 publicly endorsed Richard Nixon for President. These acts brought anguished cries of "Treason" from many of his fellow Democrats.

But in between he served Democratic Governor Pat Brown well and he campaigned actively for Presidents John F. Kennedy and Lyndon B. Johnson.

Hugh Burns is the kind of politician many of you here in the House of Representatives would appreciate. He places the desires of his constituents above considerations of party policy. His philosophy, expressed on more than one occasion, is that an elected official's first responsibility should be to the people who voted him into office. Then, he says, the next priority should go to the State of California. Finally, he says, you should do what you can for your party.

He works at politics with an intensity that few can match and even fewer can understand. His word is his bond, and in his scheme of things, loyalty to the people who have been loyal to you is the highest of virtues. He is completely lacking in pretense and has never sought to create an image of greatness or statesmanship about him.

Hugh Burns has served the State of California loyally and well for more than 33 years since he was first elected to the State assembly in 1936. I am sure that many of you who know him will join me in wishing him the best for the remaining year and a half of his present Senate term. It is safe to assume, I believe, that the unflappable Irishman from Fresno will get in a few more good knocks before the new leadership of the State senate has had the reins in its hands for very long.

HALF THE POOR FORGOTTEN

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, 19 months ago the President's National Advisory Commission on Rural Poverty issued one of the finest reports ever made on the subject. Among other things, the Commission stated:

Rural poverty is so widespread and so acute as to be a national disgrace, and its consequences have swept into our cities, violently . . . It may surprise most Americans to know that there is more poverty in rural America, proportionately, than in our cities. In metropolitan areas one person in eight is poor, and in the suburbs the ratio is one in fifteen. But in rural areas one of every four persons is poor.

The report pointed out that since passage of the Economic Opportunity Act of 1964, antipoverty programs of unusual scope and variety have been developed and put into effect, but it added that most of the antipoverty effort has been aimed at the urban poor.

That report was issued in September 1967, and was entitled, "The People Left Behind." The lack of concern reported about rural poverty then remains at least

equally true today. The Commission's recommendations have never been given the public exposure they deserve and the fate of the report is now described by its title. It too has been left behind.

Mr. Speaker, nowhere is the "disgrace" of rural poverty more pronounced than in housing. The Department of Agriculture reports that there are 8.2 million substandard occupied dwellings in the Nation and that over half this total, 4.8 million, are in rural America which has less than one-third of the Nation's population, but nearly half of its poverty stricken.

HUD PROJECTS FOR RURAL POOR

Of all the federally assisted housing programs, the low-rent public housing projects of the Department of Housing and Urban Development, together with the insured home loan, rental housing and labor housing loan, and grant programs of the Farmers Home Administration and the Department of Agriculture, provide the bulk of the service extended to those at or below the poverty line in rural America. But to realize what these programs have provided for rural America as compared with urban centers is to mock the desperate requirements of the rural poor. Such a comparison forces admission that federally assisted housing programs have not even begun to draw close to the number of dwellings that are falling into the substandard category in rural America.

Indifference to rural housing needs seems to have become a nonpartisan tradition in the Department of Housing and Urban Development. Its failure to exert an equal effort in rural America is currently reflected in the public utterances of Housing and Urban Development Secretary Romney who spent 3 hours testifying about the Nation's housing goals to the House Banking and Currency Subcommittee on Housing and mentioned rural needs casually and only once, in reply to a question which pointed out to him that rural housing requirements are greater than those of urban centers. Nowhere in Mr. Romney's written statement, dealing with his "Operation Breakthrough," designed to develop low-cost manufactured housing for the Nation, is there any mention of rural America. A foreigner, sitting in on this portion of the subcommittee's hearings on housing goals, would undoubtedly come away with the impression that the housing needs of the Nation are almost entirely centered in the cities. An examination of where the resources of our housing programs have been invested would confirm that opinion.

NO RURAL-URBAN DISTINCTION

A further indication that rural America has been "left behind" by HUD is the fact that it makes no distinction between what is invested in low-rent public housing projects in urban and rural America. HUD staff members can easily recite figures which show that a total of more than 680,000 units of low-rent public housing are in use or are under construction in the Nation, but they are unable to say what part of this total applies to rural areas because they do not refine their statistics to reveal such information.

They merely hand over their latest public housing project directory, dated December 31, 1967, and leave it to someone else to develop this information.

Mr. Speaker, a study of that directory shows that HUD has practiced tokenism toward rural America regarding its low-rent housing program. But to arrive at this conclusion it is necessary to establish arbitrary criteria which determines what is rural and what is urban. The Bureau of the Census uses communities of 2,500 or less in designating rural areas. Farmers Home Administration serves communities which are basically rural in character and have populations of 5,500 or less. Both of these standards are widely viewed as being unrealistic in measuring the dimensions of rural America and its problems. A more accurate yardstick to mark the boundary between rural and urban America should utilize communities of at least 10,000 population, outside of standard metropolitan statistical areas; that is to say, outside of contiguous counties which are socially and economically integrated and have at least one city of 50,000 residents or more.

Using communities of 10,000 population or less outside of standard metropolitan statistical areas as a designation for rural America shows that less than 10 percent of HUD's low-rent public housing units—66,443 out of a national total of 680,664 units under management or under construction—were located in rural areas as of December 31, 1967. The ratio undoubtedly has not improved and, if anything, has probably gotten worse since then.

The following, Mr. Speaker, is a State-by-State breakdown, using the criteria of communities of 10,000 population or less outside of standard metropolitan statistical areas, showing the number of units in use under management or under construction in rural and urban centers:

ROLE OF FARMERS HOME

Mr. Speaker, additional housing units provided for the rural poor by Farmers Home Administration, despite assertions by its staff members that it is the only vehicle providing housing of any consequence in communities of 5,500 or less, hardly changes the picture at all. As mentioned earlier, the housing programs this agency administers to serve the poor consist of insured home loans, rental housing, and farm labor housing. However, farm labor housing is the only one of the three utilized solely by the rural poor. The other two serve both low- and moderate-income families. Farmers Home estimates that half its rental project units, 2,127, are occupied by people at or below the poverty line. It does not know how many poor families are served by its insured home loan program. To give Farmers Home the benefit of the doubt, it is assumed that all insured loans to families with incomes of \$5,000 or less are at or below the poverty line—something that is theoretically possible since the poverty line moves to higher income brackets as the size of the family increases. For example, HUD's approved income limits for admission of families to low rent public housing in many communities, in many states, allows admission of families of six members with incomes exceeding \$5,000. Making this assumption for Farmers Home insured home loans produces an estimate of 15,066 family housing units as of last year. When all three Farmers Home programs benefitting the poor are added together, the total is 21,096 family units over the entire history of the program.

When the HUD low-rent public housing program is combined with Farmers Home Administration programs providing dwellings for the poor the total is 87,533 units for rural poor families. This is about 2 percent of the 4.8 million occupied substandard dwellings and six-tenths of 1 percent of the 14 million poverty stricken in rural America. At this rate of progress it will take more than a thousand years to eliminate present substandard housing in rural America.

Mr. Speaker, this is not to say that Farmers Home is unaware that its programs are totally inadequate to meet the housing needs of the rural poor. In his testimony on housing goals, James V. Smith, Farmers Home Administrator, said that although its 1970 budget estimate for rural housing authorization was nearly tripled to \$1.2 billion, this still is only half the annual funding required to achieve the level of 3 million units for low-income families in 10 years. Mr. Smith goes on to make the observation that he realizes that the Federal Government alone cannot solve the rural housing problem, that in fact it can only

make a minor contribution to filling the overall need and that, in view of what he calls "present circumstances," the bulk of the job must be handled in the traditional manner by private enterprise.

CREDIT FLOW INADEQUATE

Mr. Smith apparently forgot that elsewhere in his statement he pointed out that the flow of housing credit in rural areas is often inadequate, sporadic, and sometimes nonexistent. He asserts that local lenders are just unable to tie up their limited lending resources in long-term housing credit and that rural resources for tapping the credit of larger institutions in larger places are inadequate. He adds that repayment terms in rural areas are often less favorable, interest rates are generally higher and the loan to value ratio is lower. Consequently, he says, a large and very real housing credit gap exists for rural people.

Given Mr. Smith's "present circumstances," how is the private sector expected to handle the bulk of the job of providing adequate housing for rural America, let alone housing for low income families?

It is obvious that, at this rate of progress, the amount of substandard housing in rural America will never be eliminated—that, in fact, it will double and triple in the years ahead.

SITUATION COULD WORSEN

Moreover, there are indications that the Nation may even build less public housing in the future. The January issue of the Journal of the American Institute of Planners contains a report by Chester Hartman, Assistant Professor in the Department of City and Regional Planning, Harvard University, and Gregg Carr, a graduate student at the Department of Architecture and Social Relations at Harvard, indicating just that. They conducted a survey among public housing authority commissions and concluded that a substantial portion of the commissioners do not favor adding to the stock of publicly subsidized housing either through traditional programs or through new forms that are emerging. The authors tend to support assertions that most commissioners are conservative, almost obstructionist.

Mr. Speaker, their report follows:

HOUSING AUTHORITIES RECONSIDERED

(By Chester W. Hartman and Gregg Carr)

The local public housing authority is a product of the "good government" ethic of the 1920's and 1930's, which postulates that certain public welfare programs should be run by disinterested laymen—representing "the best of the community"—who will keep these programs "out of politics." A nationwide survey of authority commissioners indicates widespread lack of knowledge about and sympathy with the housing programs they administer and the low-income families they serve. Inherent disparities between the commissioner group—who are white and of high socioeconomic status—and public housing clientele—largely low-income black families—are one possible source of this conflict. It is suggested that the housing authority system currently acts as a barrier to expanded and improved housing programs for the poor, and instead agencies, which will aggressively advocate the interests of those in need of decent low-cost housing, are

needed. Possible alternatives to the quasi-independent housing authority include establishment of a department directly responsible to the elected chief executive, greater federal and/or state involvement, and decentralization of housing program administration to give greater control to community organization.

The 1960's have seen a modest resurgence of interest and activity in the field of low-rent public housing. Following its doldrums phase in the 1950's, the public housing program has increased its output—although by no means spectacularly—and has been the object of renewed interest on the part of government officials and housing experts. New techniques are being tried to replace and supplement the traditional housing project approach; new ideas are springing forth. In his 1968 Housing Message, President Johnson called for six million units of low- and moderate-cost housing to be built in the next decade; the Kerner Commission showed an even greater sense of urgency when it advocated producing the same number of units in five years. In short, there are signs that both the will and the techniques to achieve the 1949 National Housing Goal—"A decent home and suitable living environment for every American family"—may finally be emerging in our society. This is attributable not only to the racial conflicts that beset our nation, but also to an increasing awareness of the contradictions and tensions inherent in a society of such great affluence which allows over 20 percent of its people to live in substandard homes and neighborhoods. We also note that those newer techniques for providing and operating low-rent housing—joint public-private sponsorship, rent supplements, leasing, rehabilitation, scattered-site development, the various forms of "turnkey" development and management—are more satisfactory to low-income families and more acceptable to the community.

ISSUES IN HOUSING AUTHORITY ADMINISTRATION

Questions about scale and nature of low-rent housing programs are intimately tied to the issue of who is going to carry out these programs. In recent decades this has been virtually the exclusive province of local public housing authorities, established to carry out the provisions of the 1937 Housing Act and its subsequent amendments. From its inception, the federal low-rent housing program has been basically local in character, administered through quasi-autonomous local bodies responsible for fundamental decisions such as, whether there will be any public housing at all, how much and what kind there should be, where it should be located, whom it will serve, as well as more detailed operational decisions.¹ Reliance on the device of an independent authority to administer the public housing program was in part fiscally motivated: establishment of an independent authority permitted municipalities to raise money for specific purposes, retaining the tax-related advantages of public purpose borrowing, without endangering local debt limits or burdening local tax structures. The move toward special purpose independent authorities was also rooted in the "good government" thinking of the 1920's and 1930's, which postulated that an independent citizen-governed agency would be more efficient and public-regarding, less corrupt and subject to political influence than other agency forms, such as a department directly under the control of the mayor or local governing body. The notion was that men of probity and wisdom, imbued with concern for the public welfare but not necessarily possessing any expertise other than sound general knowledge and common sense, would be the best repository for certain kinds of public wel-

¹Footnotes at end of article.

fare programs.² The two salient characteristics of the housing authority, then, are its relative independence from the normal political processes and reposition of power in the hands of a lay board which is intended to represent a cross section of the best of the community.

There are at present some 2,200 local housing authorities³ in the country, operating nearly 700,000 units of federally aided⁴ low-rent public housing.⁵ The number of authorities has rapidly increased in recent years.⁶ Local housing authorities naturally vary widely with respect to size of the programs they administer: from small town authorities which administer as few as 20 or 30 units to the New York City Housing Authority, which currently manages 145,000 low-rent units.⁷

Local housing authorities are usually governed by a five-man board,⁸ in whom virtually all legal and discretionary powers reside.⁹ In most states members of municipal authorities are appointed by the mayor, members of county authorities by the county board of supervisors, with a multitude of variations on this dominant pattern.¹⁰ Appointments are generally for four or five-year terms (several states stipulate two, three, and six-year terms). Generally speaking, state laws make no provision for compensation except for expenses of housing authority commissioners—a feature of the housing authority system closely related to the "good government" notions embodied in its origins.¹¹ The housing authority board is generally regarded as a policy-making body, with the actual administration of that policy to be carried out by a staff under an executive director.¹² According to the standard guidebook on housing authorities:

The commissioners' responsibilities are directly parallel to those of the directors of a bank or board members of a private corporation . . . It is the responsibility of the commissioners to:

1. Set basic local policy and approve major program undertakings for their agency or authority and see that they are carried out by the staff in the most effective and efficient way possible;
2. Assume fiscal responsibility for program funds and assure their judicious expenditure;
3. Promote the interests of the program and the agency or authority they serve at the community, the state, and often at the national level; and
4. Provide personal leadership for the economic, social and physical development of the community as a whole.¹³

More recently, some of the newer ideas and programs in the low-income housing field have involved curtailing the local housing authority's traditional role as developer, owner, and manager of public housing. In some instances new programs have bypassed the housing authority altogether in favor of new public, quasi-public, or private agencies. The so-called "turnkey" program cedes to the private sector the development function, placing the housing authority in the role of purchasing completed developments, which it then owns and manages. Under the so-called "Turnkey II" program, the housing authority would turn over the operation of public housing projects to private realty management firms or nonprofit groups. New experimental programs authorized by HUD and OEO call for establishment of tenant management corporations for public housing projects. Under the leased housing program, ownership of public housing remains in private hands. The 1965 Rent Supplement Program ignores the housing authority in favor of direct negotiation between the private developer and FHA. In several cities housing development corporations have been estab-

lished to perform many of the functions traditionally performed by the housing authority.¹⁴ These moves stem in part from the traditional American preference for the private sector and from a vague belief that the costs of achieving housing goals will thereby be reduced.¹⁵ In large part they represent both a general dissatisfaction with public housing in the past and a specific lack of confidence in the local housing authority as a vehicle capable of doing the job that needs to be done. While the failures of American housing reform have been many and complex,¹⁶ a large number of persons familiar with the housing field have suggested that local housing authorities themselves (notwithstanding some outstanding examples to the contrary) have been a principal hindrance to progress. The issues are whether local housing authorities have been aggressive advocates of larger and better low-rent housing programs, have shown willingness to try out new ideas and programs, have been adequate interpreters to the community of the need for public housing and of the alternative ways of meeting this need.

Very little is known about the persons who make policy for and run local housing authorities. These men and women have vast powers, potential and actual, over the program they presently run and over the future of public housing. Yet we lack the elementary knowledge about who these persons are, their training and background, their values and attitudes.¹⁷ Some insight into these issues is essential if we are to form views on the adequacy of the local housing authority system to act as the administrative vehicle for the kinds of housing programs that must be implemented in the next decade.¹⁸ In an effort to obtain answers to these questions as a basis for evaluation, the authors, with the cooperation of the National Association of Housing and Redevelopment Officials,¹⁹ in the summer of 1967 mailed a survey to all 10,276 housing authority commissioners in the country (excluding Puerto Rico). Eighteen hundred and ninety-one commissioners returned usable questionnaires, giving a fairly representative sample.²⁰ The sixty-item questionnaire asked for basic demographic data about the commissioner; information about the nature of the commissioner's job and the way in which the authority operates; plans regarding the future of the low-rent housing program in the commissioner's area; and attitudes toward the public housing program and its clientele.²¹

WHO ARE THE HOUSING AUTHORITY COMMISSIONERS?

The basic demographic facts about housing authority commissioners, as reported by the respondents, are shown in Table 1.²² A general description of a housing commissioner is a white male, in the middle or upper-middle income ranges, well educated, in either business or a profession, middle-aged or elderly.

This contrasts sharply with the tenant group for whom commissioners are responsible and whose interests they presumably represent. For example, 26 percent of all public housing families lack a male head of household, yet few women serve as housing authority commissioners. Over 55 percent of all households in public housing are nonwhite—a proportion which is steadily increasing—yet only six percent of the commissioners are nonwhite.²³ Only 11 percent of public housing commissioners have incomes anywhere near the public housing range (and most of these have incomes so low only because they are retired): the median annual income in public housing nationally is \$3,132 for nonelderly households and \$1,468 for elderly households, compared with \$11,700 for the commissioners.²⁴

Postgraduate training or a graduate or professional degree	43	28

¹ Of the nonwhite commissioners, 4.4 percent were Negro, 1.5 percent other races.

² 14 percent of the commissioners indicated they were presently retired. Those who were retired were asked to indicate their former occupations.

³ Includes a very small number of respondents who checked more than 1 occupation, such as real estate and insurance or real estate and law.

Two related issues are raised. First, under the theory of cross-sectional community representation, are the interests of public housing clientele—present and potential—adequately represented on housing authorities, even if one makes the assumption that their interest in the program is no greater or smaller than that of other segments of the community? The very small number of poor and nonwhite commissioners suggests that this is not the case.²⁵ An additional datum dramatizes this conclusion: of the 1,891 respondents, less than 3 percent had ever lived in public housing and not a single respondent was currently living in public housing. Such a situation seems at odds with current thinking about maximizing participation of the poor in guiding policies and operations of programs intended for their benefit.

The original notion of citizen boards and independent authorities was not intended to comprise representatives of the full range of community interests. Rather, the original notion was somewhat elitist and paternalistic in concept: the board would be comprised of distinguished community representatives (not unsurprisingly gauged by such criteria as occupation, wealth, and "place in the community") who would have the capacity and desire to incorporate in themselves and rep-

Footnotes at end of article.

resent the multiple interests which the community had in the public housing program. There were to be no interest groups represented per se.²⁶ The "better people" in the community could be counted on not only to adequately represent the interests of the poor but to refrain from representing their own personal interests or those of their class or reference group. This apolitical—some might say naïve—notion of human behavior and social institutions underlay the housing authority concept. The predominance, therefore, of conservative interests and occupations among housing authority members—business executives and persons associated with banking and finance, insurance and real estate—required no apology and could impart to the local public housing program only the stamp of responsibility and competence.²⁷ In the early years of the public housing program, as it was originally intended to serve the "submerged middle class" of the Depression years and exclude the true poor,²⁸ authority board members probably had interests and values quite similar to those of the program's clientele. As the program increasingly is called upon to serve the needs of the "permanent poor," and as the life styles and interests of the program's clientele and its governors increasingly diverge, the original concept of the housing authority becomes less and less adequate. It may be asked whether a group which is so completely unrepresentative, in basic demographic terms, of the clientele it serves can adequately understand, sympathize with, serve and protect that clientele. In the following sections, which deal with the operations of the housing authority, details of its programs, and that views of the commissioners, this issue will be treated more directly.

THE PROGRAMS THE COMMISSIONERS OPERATE

With the exception of a handful of affluent suburbs, there is probably not a city or town in the United States that does not have a substantial housing problem, and the 20 to 25 percent national rate of substandard housing probably does not vary greatly from community to community. There are few, if any, communities in which the public housing program has effectively "conquered" the slum problem. One can well ask why communities do not build more public housing, since it is the principal means, public or private, through which low-income families can be housed decently at rents they can afford. One obvious answer is the limitations imposed by federal appropriations, both in the aggregate and in terms of allocations of these funds to regions and localities. Another reason is doubtless to be found in the community itself: general opposition to public housing and specific objections to locational proposals may serve to keep down the number of public housing units in any given community.²⁹

The results of this survey indicate that opposition to additional public housing on the part of the housing authority commissioners themselves is a further explanation of the lethargic rate of low-rent housing construction. In response to the question, *If you (personally) could have your way, how much public housing would you like to have in your community*, one-third of the commissioners indicated that, in their opinion "the present number of [public housing] units is just about right." Probably they would not favor or vote for any additional low-rent public housing units at the present time. While the proportion of commissioners who presently want no more public housing was somewhat lower among the larger housing authorities, more than one out of every four commissioners (26 percent) among authorities with over 1,000 units under management expressed opposition to additional public housing.

The commissioners were also asked, *What would you cite as the two principal reasons*

why more public housing has not been built in your community? The factors indicated as primary explanations³⁰ are listed in Table 2. Again, nearly one third of the commissioners cite the housing authority itself as the reason why more public housing has not been built. The most frequently cited reason—indicated by almost two out of five commissioners—was the absence of pressure from low-income families and their advocates. This highlights the fact that in most communities there exists very little organized pro-public housing sentiment. Low-income families themselves tend to be poorly organized and frequently apathetic. Few cities have citizens' organizations, such as a housing and planning association, to carry on the fight for decent housing. Failure of the housing authority itself to play an active role in advocating more comprehensive and varied solutions to the community's housing problems (and in some cases, outright hostility to expanded programs on the part of housing authority commissioners) leaves a vacuum in the political process with respect to housing reform.³¹

TABLE 2.—REASONS FOR NOT ADDING MORE PUBLIC HOUSING

	[In percent]	
	Authorities with over 1,000 units	Total
Lack of pressure from families in need of decent housing (and from organizations which represent their interests)	125	139
Housing authority itself feels there is enough public housing at present	35	32
Lack of support from mayor or public officials	18	20
Not enough Federal funds	15	19
Unwillingness of people in existing neighborhoods to allow public housing	27	17
Lack of land or high cost of land	27	17

¹ Percentages add up to more than 100 percent, since commissioners in many cases indicated more than 1 reason.

Other reasons cited by the commissioners largely have to do with the generally negative climate of community opinion with respect to public housing: neighborhood hostility to the incursion of public housing, reluctance to use scarce land, and lack of support from public officials. What is clear from these responses, and from our more general information about community attitudes, is that the housing authority commissioners frequently are operating in a hostile environment, and their mixed feelings about the program reflect overt and implicit pressures on them at integral parts of their communities. Only one-fifth of the commissioners cite lack of federal funds as the principal reason why more public housing is not built. The conclusion that must be drawn from these responses is that even if sufficient federal funds were now available

for a massive low-rent housing program, it is most likely that in a great many communities local directors would be unwilling to make use of these funds.

As we noted earlier, the public housing program is flowering with new ideas about how to use public subsidies to produce housing that is more satisfying to its low-income occupants and more acceptable to the entire community. It has also been suggested that there is an intimate relation between magnitude and quality of public housing programs: until we are capable of producing publicly assisted housing that is a considerable improvement over past efforts, a vastly expanded program will—and perhaps should—meet great opposition. The newer programs in the low-rent housing field have been moving away from the "project" approach—relatively large developments for the exclusive occupancy of subsidized low-income families, owned and operated by the housing authority—toward forms of housing and forms of subsidization that are more "anonymous" and dignified: housing that is physically less distinctive from nonsubsidized housing, that is smaller in scale, that is managed in a fashion not notably different from management practices in the private sector, and that attempts some mix of low-income subsidized families with non-subsidized families of various incomes and social groups. The various newer techniques—leasing, rehabilitation, "turnkey," "scattered-site," mixed public-private sponsorship, and the like—all share one or more of these characteristics to a greater or lesser extent. Efforts to turn the public housing program in these new directions have come primarily from more progressive figures and forces in the low-rent housing field; upper echelon officials in HUD have been particularly eager to bring about these changes (within limitations imposed by the inherently decentralized nature of the low-rent housing program). Enthusiasm decreases as one moves down the line to the regional and local levels.

Not surprisingly, few commissioners reported that these new approaches are already in use or that plans exist to use them, as shown in Table 3.³² Few of the new techniques have been used to date. Even among very large authorities only a minority have used these devices. (It should be noted that a housing authority can report use of a given technique even if only a few units out of the authority's total development program are in this category; the figures therefore by no means should be taken to signify the percentage of units provided under the newer programs.) Only the so-called "scattered-site" approach has been used to any extent to date, but this is an imprecisely defined concept, which takes on less meaning in small communities, where projects will be small in any case, similar to the "scattered-site" projects in larger communities.

TABLE 3.—USE OF NEW HOUSING APPROACHES

	[In percent]							
	Authorities with over 1,000 units		Total		No present plans to use		No answer	
	Already in use	Plan to use	Already in use	Plan to use	Already in use	Plan to use	Already in use	Plan to use
Leasing	23	27	32	18	3	7	51	38
"Turnkey"	11	33	37	19	4	12	48	37
Rehabilitation	15	21	40	23	4	9	50	38
Mixed public-private sponsorship, mixed-income developments	5	27	43	25	3	9	50	38
"Scattered-site" construction	24	28	28	20	18	20	32	30

A more important finding emerges when commissioners were asked their opinions about new programs compared with the traditional project approach: *Should available public housing authorizations in your com-*

munity be used for some of the new public housing programs that have been suggested (leasing or purchasing units from private owners; acquiring substandard units for rehabilitation; entering into arrangements

Footnotes at end of article.

with private sponsors to create mixed sponsorship, mixed low- and moderate-income developments), or should they be used to increase the supply of traditional housing projects? (See Table 4.)

Nearly three out of every five commissioners—and nearly a third of the commissioners of authorities which manage more than 1,000 units—report they do not yet know enough about these new programs to make a decision. Of the remainder a substantial proportion indicate preference for traditional projects, which have been so thoroughly and justly criticized, over the newer programs. Regardless of the sources for this failure to keep commissioners up-to-date on newer developments in the housing field—whether it is the fault of HUD, professional organizations in the field, the housing authority staff, or the commissioners themselves—the extent of ignorance about current trends in the programs these commissioners operate would seem to indicate a critical defect inherent in the system of lay boards. These men and women are not professionals in the field of housing. Nor do they spend a great deal of time on their jobs: 67 percent of all respondents indicate they devote an average of two hours or less per week to housing authority business; only 5 percent report that they put in an average of ten hours or more (even among authorities operating more than 1,000 units, only 16 percent of the commissioners report putting in this much time, and 64 percent report devoting four hours or less each week to housing authority affairs.)²³ Asked directly, *Do you feel a need for more information about the public housing program in general?*, nearly two-thirds (66 percent) of all commissioners replied “yes,” and the proportion was only slightly lower (62 percent) among commissioners of authorities with over 1,000 units. One can well question whether in a complex and constantly changing field like low-rent housing, the system of vesting decision-making powers in a spare-time, uncompensated lay board can produce the most effective, flexible and up-to-date housing program for the community.²⁴

TABLE 4.—PREFERENCES FOR NEW VERSUS TRADITIONAL PROGRAMS
(In percent)

	Author- ities with 1,000 units	Total
All or most units in projects.....	32	24
All or most units in new programs.....	37	17
Did not know enough about new programs to make a decision.....	31	59

The fact that among those commissioners sufficiently informed about new programs such a high proportion express a clear preference for traditional housing projects (59 percent of those expressing a preference opted for putting all or most new units in projects, 41 percent indicated they would put all or most units in the newer programs; among commissioners of authorities with over 1,000 units the respective percentages are 45 percent and 54 percent) further indicates the difficulties in translating new Congressional programs to the local level. In view of the demonstrated evils of “institutionalization” and isolation of the poor in easily identifiable and hence stigmatized compounds, one can question whether opposition, on the part of so many housing authority commissioners, to the new techniques for housing the poor demonstrates adequate representation of the interests of the community's low-income families, and to what extent these views instead reflect simple inertia or the desire of the rest of the community to insulate it-

self from its low-income and nonwhite residents.

A related issue is how the public housing program in each community is to deal with so-called “multiproblem families”—those households and individuals so battered by the cumulative effects of poverty and discrimination that they are in need of considerable help in the form of medical, psychological, vocational, homemaking, and educational services. Our survey attempted to get commissioners' views on the place for such persons and families within the public housing program and the role of the authority in providing these needed services. Nearly two out of five commissioners (38 percent) felt that “families with severe social problems ought to be rejected for public housing altogether”; another 24 percent felt that these families “ought to be accepted by the authority but placed in separate projects or separate parts of projects”; and 37 percent felt that these families “ought to be assigned apartments on the same basis as other families.” Among commissioners of authorities with more than 1,000 units, the respective figures are 31 percent, 14 percent, and 55 percent.

With regard to the issue of social services to families accepted into public housing, 35 percent of the commissioners felt that “social services are not the responsibility of the housing authority”; 57 percent felt that “the authority ought to cooperate with social service agencies by providing space in projects and referral services, but should not directly be involved in the provision of social services”; and only 8 percent felt that “the housing authority ought to be responsible for directly providing social services and social workers to tenants in need of assistance.” The commissioners' dominant view of this matter was expressed by one respondent who wrote: “Less emphasis on social work for tenants. This is not housing work.” Commissioners of large housing authorities tended to feel more responsibility for providing social services as part of the public housing program, mainly in the area of cooperation with social service agencies: among commissioners of authorities with over 1,000 units, 13 percent rejected the notion of any housing authority responsibility for social services, 77 percent thought that space and referrals ought to be provided, and 9 percent felt that provision of these services was the direct responsibility of the housing authority.

Clearly, then, among commissioners responding to the survey, a very substantial proportion feel that families with multiple social problems do not belong in public housing at all, and very few feel that the housing authority ought to take direct responsibility for meeting the social needs of those multiproblem families accepted. These views doubtless stem from the earlier role that the public housing program played as a temporary home for the “submerged middle class.” As the program's clientele has changed and as the institution is called upon to perform a different role in society, the traditional view that public housing is only for the “worthy poor” and that the business of the housing authority is solely to provide decent shelter becomes less and less tenable. One must ask how the so-called “multiproblem families” (who may be most in need of a supportive home and environment) are going to get decent housing if the one agency in the community charged with this responsibility will not provide assistance. It may also be asked how tenant services are to be provided to those public housing residents in need of help if those who administer the program do not accept this responsibility. Obviously, questions of finance are involved—to date federal subsidies for public housing have been designed to cover only housing costs and have not been sufficient to provide social services as well—but again one must ask whether the views of the commissioners, as

expressed here, reflect the needs of the low-income families who are their responsibility.²⁵

COMMISSIONERS' ATTITUDES TOWARD TENANTS

Our survey also included a series of opinion items, directly and indirectly about the public housing program and its clientele, with which commissioners were asked to express agreement or disagreement. Table 5 presents responses to the more important items on the list.

With respect to the issues of racial heterogeneity versus homogeneity, more than two out of five commissioners (42 percent) disagreed with the proposition that the authority's tenant assignment policies ought to seek to promote racial integration rather than segregation, despite the plethora of federal laws and policies to the contrary.²⁶ Commissioners of large authorities were more amenable to the ideal of racial heterogeneity, but a substantial proportion—about a third—of these also rejected the idea.

One of the principal issues in the public housing field currently has to do with tenant-management relations. Again, one may look at this problem in terms of the evolving character of the program and its clientele. As the proportion of families with social and behavioral problems increases; as the gap widens between clientele and management of public housing (in terms of central and project staff, as well as board of commissioners); and as issues of social justice and community participation and control come increasingly to the fore, it is inevitable that the relationship of public housing tenants to those who run the program will become an ever greater source of concern and conflict. A growing number of persons in the housing field have concluded that housing authority personnel are out of touch with, if not hostile to, the needs and desires of their tenants, and that one of the principal causes of dissatisfaction among public housing tenants is their inability to have a meaningful voice in the basic decisions that affect their daily lives.²⁷

Survey results would seem to support the contention that a massive gap exists between public housing clientele and those who run the program. Although most of recent tenant protests about public housing and most surveys of public housing tenants indicate strong resentment against the excessive, picayune, and arbitrary regulations that characterize public housing operations,²⁸ nearly three out of five commissioners (59 percent) agreed and only 27 percent disagreed with the statement that even stricter regulations and enforcement mechanisms are needed. These views are rooted in frequently antagonistic overall attitudes toward public housing tenants on the part of many commissioners. Nearly two out of five commissioners (38 percent) agreed with the sweeping statement, “Most public housing tenants have no initiative,” including nearly one out of three commissioners (31 percent) of the large authorities. The prevalence of such negative feelings about public housing families can lead only to conflict between tenants and management and probably serves to reduce the effectiveness of public housing as a supportive experience for poor families.

Participation of tenants in project life is now seen as an important, perhaps necessary, element of satisfactory residential and communal life for low-income families. Similar assumptions, of course, underlie the anti-poverty program and, to a lesser extent, the urban renewal program. As noted earlier, both HUD and OEO are fostering experiments with greater tenant involvement in basic decisions relating to public housing management.²⁹ Commissioners were asked: *In view of recent proposals that programs directed toward assisting the poverty sector ought to have representatives of the poor on their governing bodies, do you favor having a public housing tenant serve as a housing commissioner?* Fifty-six percent said no,

Footnotes at end of article.

only 23 percent said yes, and the remaining 21 percent said they were not sure.⁴⁰ Opposition to this idea was even stronger among commissioners of large authorities: 66 percent of the commissioners of authorities with over 1,000 units rejected this notion, only 15 percent said yes, and 20 percent had no opinion. The statement that elicited the strongest disagreement by the commissioners referred to the possibility of establishing tenant unions to act as bargaining agents in establishing procedures for managing

housing projects. Sixty-one percent of the commissioners disagreed with this proposition, and only 24 percent agreed. The forcefulness of these negative opinions was underscored by one commissioner who wrote next to this statement: "Let's tear them all down if we stoop to this." It seems clear that the present housing authority commissioners constitute a formidable barrier to the goal of giving public housing tenants some meaningful measure of control over their own lives.

TABLE 5.—ATTITUDES TOWARD RACE, RULES, AND TENANTS

(In percent)

	Authorities with over 1,000 units			Total		
	Agree ¹	No opinion	Disagree ¹	Agree ¹	No opinions	Disagree ¹
The authority ought to attempt to keep projects racially mixed through tenant assignment policies.....	62	5	34	48	10	42
At present, the authority needs stricter rules and regulations, and proper means of enforcing them, in order to promote acceptable behavior on the part of tenants.....	47	5	48	59	14	27
Management ought to recognize and negotiate with tenant unions.....	38	12	50	24	15	61
Most public housing tenants have no initiative.....	31	9	60	38	13	49
It is up to the government to make sure that everyone has the opportunity to obtain a secure job and a good standard of living.....	38	4	57	28	3	69

¹ In the original survey respondents were given the option of checking "strongly agree" or "agree," "strongly disagree" or "disagree." In these tabulations the categories have been collapsed.

Finally, responses to one general attitudinal statement about political philosophy, frequently used in survey research to indicate basic political orientations, served to confirm this generally conservative posture on the part of housing authority commissioners. Sixty-nine percent of all commissioners disagreed (57 percent strongly), and only 28 percent agreed with the view that "It is up to the government to make sure that everyone has the opportunity to obtain a secure job and a good standard of living." On this, as well as the above issue, commissioners of large authorities expressed only slightly more liberal views.

POSSIBILITIES FOR CHANGE

Our survey has shown that the men and women who make basic public housing policy at the local level are in no sense representative of the client group the programs are intended to serve. A substantial proportion of the commissioners do not favor adding to the stock of publicly subsidized housing, nor use of newer forms of public housing, nor many of the "liberalization" trends, including increased tenant participation. In one sense this should not be surprising. These commissioners probably reflect the sentiments of the larger community (or at least the white, middle class majority). As one of our commentators noted: "The authors properly point out that most commissioners' views are conservative and almost obstructionist. The commissioners' unwillingness to increase their programs is not peculiar to them, and cannot be solved merely by replacing them; for the fact is that on this as on other matters these people probably reflect the opinions of the world around them, rather than a set of opinions peculiar to themselves. I think it would be well to remember . . . that it is not really the commissioners who are our problem, but rather it is the American society they so well represent. . . ."⁴¹

Clearly, the billions of federal dollars along with the local resources and support required to attain the National Housing Goal will not be forthcoming until (1) better and more acceptable programs for housing low-income families are utilized and (2) both those who need and those who advocate decent housing develop the necessary political

and social pressure to achieve these ends. Yet without sufficient demonstrations of the superiority of newer techniques for subsidizing low-income families—which can be brought about only by farsighted and innovative housing agencies—it will be difficult to dispell the deep well of anti-public housing sentiment that exists in our society. The need is for dedicated, powerful agencies that can proselytize and produce on a scale large enough to break this logjam, but we must conclude from our survey that the housing authority, as presently constituted, is an inadequate vehicle. What is needed instead is an agency that can and will aggressively advocate and work for a comprehensive low-rent housing program in the community; an agency that perhaps must be metropolitan in jurisdiction and must be able to plan for and implement the entire range of urban development programs rather than treating low-income housing in a vacuum; that is sensitive to the needs and demands of the poor; that is willing to make use of the very best of the newer techniques for providing government housing subsidies; that can act in effective cooperation with local community groups; and that will work, through exhortation and example, to change the community's negative attitudes toward publicly subsidized housing rather than acquiescing and sharing in these prejudices.

One possibility, of course, is to work to replace existing housing commissioners with men and women more dedicated to the evolving goals of the program and to the true interests of the poor. Such a process would, however, be extremely difficult and time-consuming. Since normally only one appointment is made annually to each authority (commissioners operate on staggered terms), it would take several years at best to change a board's composition. Moreover, under existing practices, the political battles to get a representative of the poor, a public housing tenant,⁴² or a person who truly represents these interests appointed to the board are laborious, particularly in the absence of strongly organized political forces to pressure the mayor or designating body into making such an appointment. Tradition, sentiment, and the conventional wisdom would probably provide strong pressures to perpetuate appointment of the present type of commissioner.

A more promising approach—although by no means easy to effect—might be to abolish the housing authority board, and with it the notion of an independent authority, in favor of an agency directly responsible to the elected chief executive. What our cities need, if they are to mount a serious and final attack on the slum problem, is an effective agency that can plan, oversee, and where necessary directly implement on a completely new scale the various programs that seek to bring about achievement of the National Housing Goal. The housing authority, as traditionally conceived, provides neither the professionalism nor the leadership necessary for a housing program of this magnitude and quality. Instead, it inserts, at a critical level of internal decision-making, an intervening layer of part-time, lay commissioners who act as a brake on the program by failing to keep abreast of new trends and techniques and by representing a microcosm of middle class, white views about the poor, their housing, and the responsibilities of government. Better to have an agency that is true to its own interests and clientele, directly responsible to a central elected official body, where the necessary compromises and tradeoffs regarding allocation of scarce resources can eventually be made.

Although technical problems will have to be met (rewriting state statutes and bond agreements, revising municipal debt limit stipulations) to permit transformation of independent housing authorities into regular municipal departments, these problems are by no means insurmountable. Further, the political and legal problems of abolishing these positions are made easier by the very fact that they are part-time, honorific, usually unpaid posts. The model provided by the New York City Housing Authority, the largest in the nation, is instructive here: in 1958 that Authority switched over from the traditional board-staff agency to an authority headed by a three-man board of housing professionals, who are full-time and well-paid (the chairman receives \$35,000 annually, the two other members, \$25,000), and who act as both policymaker and administrative chief of the authority's vast operations. The NYC authority is now regarded as one of the most progressive, innovative, and aggressive in the nation in providing New York City, within the limitations imposed by inadequate federal funding and frequent community opposition, with programs to meet its vast low-income housing problems.⁴³

Other solutions are possible as well. The notion of a housing development corporation with many of the powers of the local housing authority but with much greater freedom to engage in other programs of housing construction and rehabilitation, moving easily in both private and public sectors, and unrestrained by many of the legal, geographical, bureaucratic, and political limitations that characterize the housing authority, also has great appeal.⁴⁴ Still another alternative is greater federal or state direction for the low-rent housing program to insure that low-income families are obtaining maximum benefits from available federal programs. In the past year or two, greater leadership and direction appear to be coming from HUD, in the form of suggestion rather than mandate.⁴⁵ States can certainly influence and control the operations of local housing authorities since it is the state that has created these bodies. An example of this kind of state direction is a new Massachusetts statute which prohibits local housing authorities from constructing projects larger than 100 units for exclusive occupancy by low-income families.⁴⁶ More recent moves toward decentralization of government services provide one further alternative. There is no reason why local community groups could not negotiate directly with HUD and be the financial conduit and

administrative agency for housing subsidization programs passed by Congress. Centralized direction and planning of the housing program as a whole, combined with highly decentralized sponsorship and administration of specific development schemes, would probably provide the most effective and satisfactory model for the future.

(AUTHORS' NOTE.—This study was undertaken with the assistance and cooperation of the National Association of Housing and Redevelopment Officials. The research also received support from the Richard King Mellon II Charitable Trust, the Harvard Department of City and Regional Planning, and the MIT-Harvard Joint Center for Urban Studies. The authors wish to acknowledge the considerable assistance given them throughout their work by Dorothy Gazzolo, Mary Nanno, and Frank Milwee of the NAHRO staff. The views contained herein are those of the authors and are not necessarily shared by the National Association of Housing and Redevelopment Officials. The authors also wish to acknowledge with gratitude the helpful comments given on an earlier draft of this article by Sol Ackerman, Phyllis Ewen, Bernard Fritzen, Lawrence M. Friedman, Ann Gordon, George Schermer, Abner Silverman, and David Yentis.)

FOOTNOTES

¹ See United States Housing Administrator Nathan Straus' speech at the annual meeting of the National Association of Housing Officials in Cleveland, Ohio, November 18-20, 1937, where the 1937 Housing Act was termed "essentially a piece of enabling legislation, since it formulated national housing policy in broad outlines and leaves the actual work of planning and developing these projects as well as authority and responsibility to the local housing body."

See also Charles Abrams' description of the original housing authority concept: "Under the formula the central government's agency lays down general rules and checks their observance. But the most important responsibilities rest with the local government's agency. It is the local housing authority that decides where to build, how much to spend, how to select tenants, what rent to charge." Charles Abrams, *The Future of Housing* (New York: Harper Bros., 1946), p. 282.

The federal supervisory agency for the low-rent public housing program (at present the Housing Assistance Administration in the Department of Housing and Urban Development) is responsible for funding and establishment of general policies. A good deal of dispute and conflict exists over the extent and nature of federal involvement at the local level, but the long-range trend has been to allow local authorities increasing control over their programs. In 1959 the Declaration of Policy of the United States Housing Act was amended to read: "It is the policy of the United States to vest in local public housing agencies the maximum amount of responsibility in the administration of the low-rent housing program. . . ." It is to be noted, however, that the former restrictive nature of federal regulations in many areas is still embodied in the state legislation under which local housing authorities are established. Failure to relax state laws to keep abreast of the new flexibility at the federal level has meant that some local authorities cannot take advantage of newer ideas and variations. For a review of the history of the low-rent housing program through the 1950's, see, Robert Flasher, *Twenty Years of Public Housing* (New York: Harper, 1959).

² In an early book, Charles Abrams expressed the prevailing sentiment in favor of these independent bodies: "Freedom from political interference was the main reason for incorporating the local housing authority, just as it was for its forerunner, the incorporated school board. The New York law,

upon which other local housing legislation was modeled, was drawn after the city voters had displaced a corrupt Tammany administration. The local corporate authority device was molded to secure its independence from political meddling. . . . With their members receiving no compensation (other than for expenses) and with membership of city officials limited, appointments would go to men and women of independent stature rather than to political worthies. . . . Housing must be kept free of political entanglements and such freedom is better secured under the [authority] formula." Charles Abrams, *The Future of Housing*, pp. 283, 285. Chapter 21 of Abrams' book "The Local Public Housing Agencies," pp. 281-95, is an excellent summary of the original premises underlying creation of local housing authorities. For other early advocacy of the independent housing authority, see Annette Baker Fox, "The Local Housing Authority and the Municipal Government," *Journal of Land and Public Utility Economics*, XVII, No. 3 (August 1941), 280-90; B. J. Hovde, "The Local Housing Authority," *Public Administration Review*, I (Winter 1941), 167-75; Leonard A. Goldberg, "The Use of the 'Authority' in Public Housing," *Georgetown Law Journal*, XXVII (June 1939), 1129-32.

³ The most commonly used term for the local public housing administrative body is "authority." In Michigan, Kentucky, and Iowa these bodies are called "commissions." Occasionally, the terms "agency," "board" and "committee" are used.

About nine out of ten housing authorities are municipal in jurisdiction. Slightly over 200 county (in New Jersey and Connecticut, borough; in Louisiana, parish) housing authorities exist in twenty-two states. Regional housing authorities exist in four southern states, and all housing authorities in Ohio are metropolitanwide in jurisdiction. In Alaska and Hawaii local public housing programs are administered by a state housing authority. Housing authorities in many Indian areas are reservationwide in jurisdiction. See *Housing and Urban Renewal Directory*, 1964-65 (Washington: NAHRO, 1965).

⁴ Three states (New York, Massachusetts, and Connecticut) and one city (New York City) operate their own low-rent public housing programs, similar in most respects to the federal program, but with the state or city providing financial assistance and overall supervision. In these areas the same local housing authority operates both federal and state (and in the case of New York City, municipal) programs.

⁵ Not all housing authorities have as their exclusive concern the public housing program. Of the 1,776 authorities which run public housing programs listed in the *Housing and Urban Renewal Directory*, 1964-65, Publication No. N485 (Washington: National Association of Housing and Redevelopment Officials, 1965), 180 were combined housing and urban renewal agencies, eleven had housing, urban renewal and community renewal program functions, and one had jurisdiction over housing, urban renewal, and codes.

⁶ In March 1959, there were 1,046 housing authorities with units under management or in the residential stage; in March 1963, the figure was 1,423; in December 1966, 2,009. Information provided by Louis Katz, Director, Statistics Branch, Housing Assistance Administration, HUD.

⁷ The distribution of housing authorities in 1967, according to size of program, was as follows:

Authorities	
Less than 50 units.....	617
50-99 units.....	416
100-499 units.....	752
500 or more units.....	276

Twenty cities with population over 500,000 contain one-third of all federally aided pub-

lic housing while 56 percent of the places with public housing programs account for only 8 percent of all low-rent units. See *Statistical Abstract of Housing Assistance Operations* (Washington: Department of Housing and Urban Development, January 1968).

⁸ In a few instances four-, six-, and seven-man boards are stipulated. Ten southern states provide for consolidated or regional authorities with one member appointed from each constituent jurisdiction and an additional member appointed by the board itself in case an even number of members results.

⁹ A typical state enabling statute reads: "Every such [housing] authority shall be managed, controlled and governed by five members, appointed or elected as provided in this section or in section twenty-six L. . . ." Massachusetts General Laws, Ch. 121, Sec. 26K.

¹⁰ Among the variations are: appointment of one or more members by the judiciary branch; appointment by the governor or other state officials; requirement of confirmation of all appointments by a second party (such as the municipal legislature); appointment by the municipal legislature; appointment of one member by vote of the other members. Boards of Indian reservation housing authorities are appointed in a special manner. In Massachusetts towns, four of the five members are elected by the general public.

¹¹ Several states do allow compensation for commissioners, usually a relatively small amount. For example, Kentucky law permits the local legislative body to fix compensation for municipal authority members, not to exceed \$400 annually for members, \$2,000 annually for the chairman. Massachusetts is the only state where fairly substantial compensation is permitted: \$40 per day for members, \$50 for the chairman, with annual maxima of \$10,000 and \$12,500 respectively. This system has been heavily criticized as a waste of needed public funds and a source of administrative chaos since authority members in the larger cities tend to put in almost daily appearances in order to collect the full per diem payments allowed them. The presence of such lucrative compensation for part-time work also tends to place these jobs in the category of "political plums."

¹² The exact distribution of functions between board and staff varies widely in different authorities, and there is little in the way of codified guidelines as to which matters fall under whose province. A guidebook published for housing authority commissioners by the National Association of Housing and Redevelopment Officials attempts in a general way to set forth the tasks and expectations of this role and to delineate responsibilities between commissioners and the executive director and his staff, but the material contained therein is perforce vague and overly general. See Louise N. Bell, *The Commissioners' Handbook* (Washington: NAHRO, 1968).

¹³ *Ibid.*, pp. 1, 3-4.

¹⁴ See *Journal of Housing*, XXIV, No. 4 (May 1967), for reports on housing development corporations in St. Louis (by Michael Mazer and Richard Granat, 200-03) and Philadelphia (by Byron Fielding, 221-5).

¹⁵ See Chester Hartman, "The Politics of Housing," in J. Lerner and I. Howe (eds.), *Poverty: Views from the Left* (New York: William Morrow and Company, 1968), pp. 149-67; and Eugene Smolensky, "Public Housing or Income Supplements—The Economics of Housing for the Poor," *Journal of the American Institute of Planners*, XXXIV, No. 2 (March 1968), 94-102.

¹⁶ For a good overview of these failings, see Lawrence M. Friedman, *Government and Slum Housing: A Century of Frustration* (Chicago: Rand McNally and Company, 1968).

¹⁷ Investigation of the characteristics of citizen boards and authorities and examination of the original premises which underlay their creation is not confined to the housing field. The National Advisory Commission on Selective Service undertook a similar survey of members of local draft boards in order to gain a better picture of the workings of this system. See *In Pursuit of Equity: Who Serves When Not All Serve?*, Report of the National Advisory Commission on Selective Service (February 1967).

¹⁸ A few scattered studies exist of individual housing authorities with some reference to the roles and functions of the board and individual members. See, Martin Meyerson and Edward Banfield, *Politics, Planning, and the Public Interest: The Case of Public Housing in Chicago* (Glencoe: The Free Press, 1955), pp. 35-59 and passim; May B. Hipsman, *Public Housing at the Crossroads: The Boston Housing Authority* (Boston: Citizens' Housing and Planning Association of Metropolitan Boston, 1967), pp. 10-15 and passim; Robert K. Brown, *Public Housing in Action: The Record of Pittsburgh* (Pittsburgh: Univ. of Pittsburgh Press, 1959). It is only in individual case studies that one can get a sense of the narrower political forces that lead to appointment of particular individuals to a housing authority. Power, prestige, and in some cases emolument accompany these appointments, and, not surprisingly, individual and group obligations and allegiances, in addition to the desire to further certain policies, are factors which determine and influence appointment of housing authority commissioners.

¹⁹ NAHRO is the professional organization which advocates the interests of local housing and redevelopment authorities. It publishes *Journal of Housing*, holds frequent national and regional conferences, and provides a multiplicity of services to its members, who include staff personnel as well as board members.

²⁰ Because of financial constraints, NAHRO was able to do a followup mailing to only a 20 percent sample of the list of commissioners. The other principal reason why the response rate was not higher probably has to do with the recent establishment of many authorities, which made it difficult or impossible for some commissioners to answer many of the questions.

Comparison of the distribution of respondents with the total distribution of housing authorities by geographical region and number of units managed by the authority indicates that, aside from a slight underrepresentation of commissioners from the southeastern region and a slight overrepresentation of small (in many cases, recently established) authorities, the respondents are representative of the commissioner group as a whole.

The distribution of the universe of housing authority commissioners by region and housing authorities by size of program, compared with the distribution of respondents to our survey, is as follows:

[In percent]

	Respondents	Universe
Region:		
New England.....	5	4
Middle Atlantic.....	11	10
Southeast.....	26	32
North-central.....	21	18
Southwest.....	29	28
Pacific Southwest.....	5	4
Pacific Northwest.....	4	3
Size of program (units under management):		
Less than 50.....	35	30
50 to 99.....	17	20
100 to 499.....	34	36
500 or more.....	14	13

²¹ Nearly all questions were of the multiple-choice, precoded variety. Respondents were not asked to indicate their names or the names of their chief municipalities.

²² Since large cities and their housing authority commissioners account for such a disproportionately large percentage of the nation's total public housing stock, response data will be presented separately for very large authorities (defined as those with more than 1,000 units under management—132 respondents in all) and for the total sample.

²³ Naturally, in many smaller cities and towns where there are few nonwhite residents, in public housing or otherwise, one would not expect to find nonwhite commissioners, but even in the larger cities this finding holds true. Isolating those authorities whose non-white public housing population is 50 percent or more, the proportion of nonwhite commissioners is only 13 percent.

²⁴ Information on characteristics of families living in public housing is for 1965 and is drawn from Program Planning Division, Housing Assistance Administration, Department of Housing and Urban Development, *Families in Low-Rent Projects*, Publication 225.1 (Washington: HUD, 1966).

²⁵ Similarly, the report of the National Advisory Commission on Selective Service indicated that 96.3 percent of all local board members were white and that 70 percent were in white-collar occupations. "Craftsmen, service workers, semiskilled workers and laborers," the Report noted, "are represented on local boards in far smaller proportions . . . than their representation in the general population." The Commission in its recommendations for changes in the organization of local boards states that "their composition should represent all elements of the public they serve."

²⁶ Relevant skills, however, as distinguished from interests, were an acceptable basis for appointing housing authority commissioners. The few states which stipulate by statute the appointment of one or more local commissioners according to their occupations designate such occupations as licensed engineers, contractors, labor representatives, and persons experienced in real estate or finance.

²⁷ In 1945 the *Journal of Housing*, using somewhat different categories from those used in the present survey, cited occupational distributions of housing and authority commissioners in 1940 and 1945 as follows:

[In percent]

	1940 (909 commissioners)	1945 (1,778 commissioners)
Business, banking, and finance.....	48	54
Professionals (law, medicine, minister, architecture, welfare, and so forth).....	20	20
Wage earners and labor officials.....	12	10
Farmers and farm organization officials.....	6	4
Public officials and civic leaders.....	6	5
Miscellaneous.....	8	7

It is interesting to note, however, that the current dominance of banking, business, and finance personnel is a relatively constant feature of the housing authority system. See *Journal of Housing*, VIII (August 1945), 136.

²⁸ See the incisive review of the thirty-year history of the public housing program in Lawrence M. Friedman, "Public Housing and the Poor: An Overview," *California Law Review*, LIV (1966), 642-69.

²⁹ About a dozen states require a local referendum (in some instances applicable only to certain cities or classes of cities) before public housing can be built or a contract

with the federal government entered into. This, of course, places an additional constraint on the local housing authority. See Housing Assistance Administration, Dept. of Housing and Urban Development, *State Referendum Requirements for Low-Rent Housing* (Washington: HUD, September 26, 1967).

³⁰ A checklist of responses was offered to this question, with the option of writing in other reasons.

³¹ For a good description of the political forces lined up for and against public housing, see, Jewel Bellush and Murray Hausknecht, "Public Housing: The Contexts of Failure" in Bellush and Hausknecht (eds.), *Urban Renewal: People, Politics and Planning* (New York: Anchor Books, 1967), pp. 451-61.

³² The question asked (with a checklist supplied) was, *Which of the following new approaches to public housing authorized by recent federal action has your Authority used or does it plan to use?* The high proportion of "no answers" quite probably relates to lack of knowledge about these programs and can be interpreted as indicating that these programs are not currently being used or planned for.

³³ As indicated, this is an average; doubtless, there are peaks and troughs of activity, and at times housing authority commissioners will devote considerably more time to running the authority.

³⁴ In commenting on an earlier draft of this article, George Schermer, a long-time student of housing authorities, noted: "It is the rare authority member that puts in many hours touring the developments, observing and learning about housing conditions, or concerning himself with programs to resolve the general housing problem . . . I have the feeling that many housing authorities consider themselves, and are considered by the local political powers, as nothing more than the local managing agents for the federal low-rent housing program. This is not to say that they are enthusiastic about that function. Rather, their attitude may be paraphrased as follows: 'Uncle Sam has imposed this housing program on the localities. We do not think much of it, and we might be better off without it, but politics being what they are, we have to manage the stuff the best way we can. The less of it we have, the better.'" Letter from George Schermer to the authors, July 12, 1968.

³⁵ A recent report on tenant-management relations commissioned by NAHRO had this to say about the reluctance of many housing authorities to consider social services as part of their responsibility: "The public assertion 'this is not our responsibility' is psychologically stultifying. It has the effect of discouraging action from every quarter. The local authority and particularly the top administration will simply have to take the initiative and supply some leadership. If they can't do that, they are not fulfilling the demands of their job. To help them they should employ as large a staff of competently trained social workers and community organizers as the budget will permit. They would seek additional funds to supplement their own. . . ." See, *Public Housing Is The Tenants*, prepared by George Schermer Associates and Kenneth C. Jones for the National Association of Housing and Redevelopment Officials (Washington: NAHRO, 1967), pp. 41-2.

³⁶ Naturally, regional differences are marked in this regard. The proportion of commissioners expressing disagreement with racial integration of public housing projects ranged from 64 percent in the Southeast and 52 percent in the Southwest to 14 percent in New England and 15 percent in the Middle Atlantic states.

Of the 3,510 federally aided public housing projects occupied during FY 1965, over 2,100 (60 percent) were one-race projects. See, Pro-

gram Planning Division, Public Housing Administration, Department of Housing and Urban Development, *Moveout Rates in Low-Rent Housing, July 1, 1965-June 30, 1965*, Publication 228.0 (Washington: HUD, 1965).

³⁷ The Schermer-Jones report cited in note 35, subtitled "Rethinking Management's Responsibility and Role in Tenant and Community Relations," was commissioned by NAHRO out of concern for the increasing gap between housing authorities and their tenants and in an effort to communicate the nature and magnitude of this problem to those who run public housing. The report concludes that: "The essence of good tenant and community relations is primarily communication and only secondarily policy and procedure. . . . Effective person to person contact depends on attitude, openness, mutual respect, concern. . . . In summary . . . it seems doubtful that there is one particular form of organization that is superior for public housing administration. The guiding principle must be that administration must be brought closer to the tenants and all functions coordinated so that the tenants can be brought into participation." George Schermer Associates and Kenneth C. Jones, *Public Housing Is the Tenants*, pp. 43, 47 (emphasis in original). The problems described in this report—considered by many housing experts to be an exceedingly important, competent, and reasonable document—are underlined by the reaction of some housing authority commissioners to the report itself. A resolution of the New England Regional Council of NAHRO, dated March 13, 1967 and addressed to the members of NAHRO Board of Governors, states in part:

"Whereas: Much of the contents of the Report is highly critical of the operations of Local Housing Authorities, many of whom are dues paying members of the Association.

"Now, therefore, be it resolved. . . . It is the consensus of the Committee that its dues are being used in a manner not beneficial to the overall membership of the Association, but rather to promote dissent and disenchantment with the Public Housing Program as a whole which could lead to its ultimate demise."

The new \$125 million HUD modernization program for older projects also lays great stress on meaningful tenant involvement and implicitly acknowledges serious defects in existing management practices. The HUD circular announcing the program to local housing authorities contains the following language:

"Local authorities obtaining modernization funds will be expected to develop long and short term programs in each of the following areas: . . .

"Involvement of the tenants in the plans and programs for the modernization of the project, changes in management policies and practices, and expanded services and facilities.

"All of these lines of activity reflect the Administration's concern that all programs for low-income families should help these families rise out of their poverty into self-dependence."

See, Assistant Secretary for Renewal and Housing Assistance, Department of Housing and Urban Development, *Subject: Program for Upgrading Low-Rent Housing Projects*, Circular 222621-P (November 14, 1967).

³⁸ See, for example, Chester W. Hartman, "The Limitations of Public Housing: Relocation Choices in a Working-Class Community," *Journal of the American Institute of Planners*, XXIX, No. 6 (November 1963), 283-96 and George Schermer and Kenneth C. Jones, *Public Housing Is the Tenants*.

³⁹ OEO has recently awarded a consulting contract to develop Tenant Management

Corporations in several large housing projects in different parts of the country.

⁴⁰ Recent protests by public housing tenants have included the demand for representation on the local public housing authority. See, for example, story on rent strike by New Rochelle (NY) public housing tenants, *New York Times* July 6, 1968, p. 22. The *New York Times*, October 3, 1968, reported that one result of the New Rochelle rent strike was to secure appointment of a housing authority tenant to the New Rochelle Housing Authority, believed to be the first public housing tenant to serve on a municipal authority in New York state. It is interesting to note that the man appointed was a resident of one of the Authority's middle-income projects.

⁴¹ Comment on an earlier draft of this article, transmitted to the authors on April 2, 1968.

⁴² Until its repeal just this year, the original Massachusetts housing statutes forbade a public housing tenant from serving on a housing authority board.

⁴³ Under Mayor John Lindsay, New York City recently attempted to merge the Housing Authority with several other housing and housing-related agencies in the city to form a single, coordinated agency to handle housing and redevelopment in that city. Although some degree of consolidation and reorganization was effected, the attempt to include the Housing Authority—the largest of these bodies—in the amalgam was unsuccessful.

⁴⁴ See note 14.

⁴⁵ For example, a circular dated 3-22-68 from Don Hummel, Assistant Secretary of HUD for Renewal and Housing Assistance, to all local housing authorities, entitled *The Social Goals for Public Housing* reads:

"A thorough and searching examination of our policies, practices, and priorities is called for to see that they are in line with our social objectives. We ask for your full support in this effort.

"As a matter of national policy, the following are among the most important of the social objectives of the [low-rent housing] program:

"A broader cross-section of low-income households in public housing neighborhoods, so as to avoid concentrations of the most economically and socially deprived households. . . . More attention to residents' dignity, privacy, and personal safety. Special attention should be given to the elimination of unnecessary rules and regulations.

"Leadership to achieve better and more coordinated social services for project tenants.

"Greatly expanded participation of tenants in project management affairs and programs designed to strengthen the self-sufficiency of tenants."

⁴⁶ See Ch. 705, Acts of 1966, Commonwealth of Massachusetts. Under this act, the usual public housing subsidy can be used only to construct scattered site projects or to lease, rehabilitate, or purchase units from the private sector.

PERFORMANCE AND PROMISE

All of these things, Mr. Speaker, constitute only a part of the rural poverty problem that has existed, does exist and will continue to exist and worsen unless the Nation, and especially the Congress, lives up to the intention of all of our housing legislation and all of our anti-poverty legislation. Congress has repeatedly said everyone should have a decent home, be free from hunger and have a job that will provide an adequate income. But it is difficult to believe that most of the Members of Congress really believe these things when performance is measured against the promise.

THE WEALTHY MUST PAY THEIR SHARE

(Mr. PODELL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, the subject of tax reform has been aired, debated, belabored, and bemoaned. Many are the breasts which have been beaten in its name. Innumerable are the tears which have been shed over it. To date, there has been no tangible alteration of a situation which all acknowledge is intolerable. Most of the criticism leveled at our tax system has been legitimate. It has illuminated fiscal injustice, which is a major shame of our society, allowing the wealthy to grow richer at the expense of those who possess little. As a consequence of these unfair tax laws, the lower- and middle-income taxpayers are struggling ever harder as they fall farther behind in the race to earn a decent living. We have it in our power here to redress existing imbalances and restore the faith of our people in the tax system of the United States.

We know fully what these evils are. All have been fully exposed to public view and congressional scrutiny. Commencing with the oil depletion allowance, we have examined these loopholes all the way down to the gift deduction and capital gains method of evading taxes. One loophole, however, glares out at us, daring the hand of reform to alter its privileged existence. Even the outrage of oil depletion pales besides our knowledge that a few privileged individuals are able to earn millions and evade all income taxes. One cannot help but gasp in exasperation at such damning revelations. Millions of Americans are desperately wrestling to make ends meet on a daily basis, as those adroit few evade their responsibilities. It is long past time for Congress to slam these loopholes shut in the faces of these few parasites.

When a citizen may earn in excess of \$10 million and legally claim more than that amount in deductions, we have a disjointed tax system. If a person is allowed to degrade the principle of charity by utilizing it as a vehicle for tax evasion, charity itself is compromised. When capital gains have become a means for depriving Government of necessary revenue, redress must be granted to the public. This is particularly true when we realize that every dollar retained by these malefactors must be taken from lower- and middle-income people.

Many millions of our people are growing increasingly aware of what is actually transpiring—how their tax system is being used against them by these few. The system which mercilessly pursues the ordinary man turns into a red carpet for the rich to walk on toward full enjoyment of ill-gotten gains. Mr. George Meany has aptly named them "The Loophole Set." The public also is aware that Congress has power to immediately rectify this situation, and possesses a series of choices in order to accomplish this goal.

A minimum tax for these evaders is our answer.

Adoption of a minimum tax to allow exemption of only half the incomes of such nontaxpayers is one alternative. Another is requiring people to allocate their deductions between income from taxable and nontaxable sources. We could tax appreciable property upon the death of its owner and remove the unlimited charitable deduction over a given period. A maximum tax is another possibility, under which high-income taxpayers would pay more than half their incomes in Federal tax. Cumulatively or singly, these alternatives would put an end to the disgusting spectacle of massive income tax evasion by people earning millions.

In effect, what these few are really saying is that "What is ours is ours, and what belongs to the rest of the Nation is negotiable—in our interest." Do we wonder then why discontent mounts among people who see our system fostering injustice and rewarding larceny?

It is worth reiterating that a nation is only as strong as the belief of its people in its institutions. Today our tax system stands compromised in the eyes of many Americans. Congress is also an institution with responsibility for that tax system.

THE GROWING CANCER IN OUR BODY POLITIC—NAZISM, AMERICAN STYLE

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, I have noted with increasing revulsion and distaste a series of highly revealing exposés which deal with a new Nazi political movement within our country. Drew Pearson and Jack Anderson have joined COPE, the Anti-Defamation League of B'nai Brith, Group Research, and the Institute for American Democracy in exposing Liberty Lobby and Willis Carto for what they are—American Fascists and neo-Nazis working for destruction of American democracy in the shadow of the Capitol of the United States.

Liberty Lobby, complete with its ideological baggage of a darker era, has even penetrated into the circle of this House. Worse yet, it has exercised political power within the party of which I have always been a proud member. Would that this were not so.

Willis Carto, its real power within, is a noted extremist and exponent of neo-Nazi philosophy of the most virulent and primitive sort. His major vehicles for such activity have been American Mercury Magazine, Washington Observer Newsletter, and a publishing operation in Sausalito, Calif.—Noontide Press. He has further sought to inhibit our press through creation of a so-called Press Ethics Committee, which is as fraudulent as it is unnecessary.

In such a manner, a Fascist movement embracing and advocating Hitlerian goals, complete with Hitlerian trappings seeks a significant voice in the daily lives

of all Americans. Its machinations must be frustrated before it blossoms further. Its avowed goals of militarization of our Nation and an eventual Armageddon with the Soviet Union are incompatible with our entire concept of national life.

With deep sadness, I turn my attention to statements which have been made indicating that Members of this House have accepted major financial contributions from Mr. Carto. Such liaisons have no place in our political system and are not to be countenanced within the party of Jefferson, Jackson, Roosevelt, Truman, and Kennedy.

How sad a reflection upon our times that at such a point in history we should be confronted with Hitler's heritage within America's Government and most basic institution. How tragic a denouement.

Of late there has been much oratory to the effect that our sacred ideals, symbols, and foundations are endangered by extremism and ideologies which preach the opposite of what the Republic stands for. No better example of this is to be found than the works and ideals of Willis Carto.

Fervently do I hope that those members of my own party who, mistakenly, I am sure, accepted his aid, will renounce him and his works. It is the only acceptable alternative for anyone who holds national office in the name of the Democratic Party and its ideals.

As far as Liberty Lobby itself is concerned, I feel that America, her institutions, and people are immune to its venom. My faith reposes in the strength and viability of our institutions, and the maturity and courage of our people. All they will give to Mr. Carto and his ilk is what my Irish friends so aptly call the back of my hand.

Mr. Speaker, our country has traveled a long road through history. Bedeviled by internal strife and factional bickering, we have surmounted more than one mortal challenge which sought to change the essence of our ideals and thwart our national purpose. Each time the best elements in our national life have come to the fore and prevailed. Such a challenge stares us in the face again today, presenting us with a familiar choice—democracy or abrogation of liberty.

Let us rise above pettiness and above hatred, turning our backs collectively upon such messengers of hate. Let the call of Hitler's legacy fall upon deaf ears and die the death such ideologies deserve.

If we must struggle along ideological lines, let such combats be waged without the aid of fiends from the darkest pit that a few would unloose among us. For they are never satisfied with a little blood or a small sacrifice. More is always demanded. Democracy's children are their victims. Freedom's hopes are their slaves. Liberty's dreams are their conquests. There will come a day when all Willis Cartos have been relegated to the same museums and history books where Adolf Hitler now reposes. If this day is ever to arrive, it will be because those of us here have had the courage to put them there by our acts, attitudes, and integrity.

CHAIRMAN GEORGE MAHON RECEIVES GEORGE WASHINGTON AWARD

(Mr. DORN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DORN. Mr. Speaker, it was my great privilege and honor to attend the annual banquet of the American Good Government Society on April 30 when our beloved colleague and friend, GEORGE MAHON, received the coveted 1969 George Washington Award.

Mr. MAHON's response was an honor to the Congress and a credit to the entire Nation. I was never more proud of our chairman than when he delivered the following superb response:

This is a great moment for my wife Helen and me. I wish to express my deepest thanks to the American Good Government Society for the award which you have presented me. It is a great honor and I shall never cease to appreciate it.

I wish to express my special thanks to my Texas friends who have come from afar to be here this evening.

I have been to these dinners before but this one seems better than any of the rest. Of course, it could be that the honor which is being bestowed upon the Mahons could have something to do with it!

I am honored to be on the platform with my friend Senator Bennett, and to hear former Governor Cecil Underwood, of West Virginia, make the most interesting remarks about the Electoral College I have ever been privileged to hear. Despite the turbulent history of the Electoral College, I am not so sure but that it is about the most stable college we have these days!

I have looked over this list of the past 32 recipients of the award. Many have been members of the House or Senate. It is a very distinguished company.

However, I tend to look with some condescension upon prior Congressional recipients of the award! And let me explain. In view of the recent pay raise, Senator Wallace Bennett and I are the highest priced members ever to receive the award! We are in a class by ourselves. But, what with all the problems which confront us, it looks like we are going to begin to earn the pay raise.

A recent calculation shows that the average American taxpayer in order to pay his local, state and Federal taxes, in effect, works from January 1 through April 27 for the government. This is April 30. My work to pay taxes has been concluded and I'm now speaking on my own time, not the government's, and I shall not be hampered by bureaucratic limitations!

I think I'm going to feel at home with the George Washington Good Government Award. After all, my first name is George, and I was also born on the 22nd. It makes little difference that it was September 22 and not February 22! Of course, one other George received the award, George Humphrey, former Secretary of the Treasury, who spoke of budgets that would curl the hair! Regretfully, we have continued to have "hair curling" deficits.

The remarks of the distinguished gentleman from Ohio, my warm friend, Mr. Bow, were most complimentary and generous. Never have I seen Frank Bow more extravagant. He usually leans to the conservative and often deals in understatement. Maybe this is explained by the fact that his generous encomiums didn't cost any money!

Frank Bow is a big man. His booming and resonant voice can fill any hall. But Frank Bow's true bigness is his heart. It

has been a great experience for me to work with him through the years in matters that involve deeply the destiny of our country.

In spending matters we have long been aware that heads of government agencies insist upon ever-increasing expenditures. They love spending . . . But Frank and I feel—and upon good authority—that the love of money is the root of all evil and we try to hold them down. We believe—as I think you do—in the principle of pay-as-you-go in government spending.

Now that we have a budget surplus of sorts in prospect, I am thinking of switching to a pay-less-as-you-go philosophy!

But even though Frank is my good and always helpful friend, I have a lurking suspicion that he wants the House to go Republican so that he can take over my job as Chairman! As I see it—from my standpoint—this would be a major disaster. But I will say this: If I have to bow to anyone, I'd rather bow to Bow than any Member I know.

One further serious word about economy. It is a far cry from the days of Calvin Coolidge, but I would like to quote with approval one statement of his. He said he favored economy not because he wished to save money but because he wished to save people.

Our major problem is saving people, our country, and promoting its continued growth. In this context, the much used word "militancy" forcefully comes to mind. I am not thinking in terms of militancy by dope addicts, demonstrators, riot instigators, or small, disruptive, undisciplined groups in the colleges. I am thinking in terms of militancy by the majority.

I just cannot believe that the great majority of our people will indefinitely stand idly by and see the greatest citadel of liberty and freedom and abundance on earth go down the drain. Sometimes we seem to be hobbled by timidity and a spirit of appeasement. It is time for the great majority to call a halt. It is time to see to it that the destructive elements are denied full leeway in their efforts to erode and destroy the very foundation of our institutions.

I want to see more militancy on the part of the great rank and file of college students who are rapidly losing an opportunity to live in an atmosphere where education and growth are possible. I applaud President Nixon's statement of yesterday in which he urged college administrators to take firmer action to maintain stability.

I want to see more militancy on the part of people who believe in the old-fashioned virtues.

I want to see more militancy on the part of office holders and community leaders. Too often as candidates we are "bloody, bold, and resolute" but as officials we tend to overrationalize every situation which arises and take on the image of appeasement and timidity.

No, I am not advocating rashness or violence; I am advocating that we take steps to curb anarchy which is eating ravenously at the very heart of this great country.

A few days ago I had a letter from a minister from my home county. I want to quote a couple of sentences:

"It looks like too many of our men in high places . . . are gutless. And for that reason, small groups all over the great United States are being permitted to destroy the great principles for which we have stood so long."

Gutless may not be a very nice word, but anarchy is not a nice word either. I think it is time, high time, for law-abiding citizens—that great majority—to rise up in their might and insist upon the preservation of the best qualities in American life. That is the issue before the American people. Perhaps never before in our history have a so-called free

people been so badgered and beleaguered by small groups of outlaws and exhibitionists.

Thomas Paine said, those who expect to reap the blessings of freedom must undergo the fatigue of supporting it.

There are no pat answers to the problems but there are reasonably adequate answers. They relate to such fundamental virtues as restraint, discipline, morality, constitutional government, and patriotism.

Americans never mount a major effort until they become deeply concerned and aroused. That point has been reached and I believe we are at the beginning of the turning of the tide.

I conclude in a spirit of high hopes and optimism. I do not have to tell this audience of people who believe in constitutional government that our country, our cherished institutions, our governments at all levels will be as good, as free, and as great as a militant majority of our people are determined they shall be!

Again, let me express my deepest thanks to the American Good Government Society and wish you much success in your efforts to promote the welfare of our great country.

Thank you very much.

PROPOSED FTC BAN ON UNSOLICITED CREDIT CARDS SHOULD BE APPLIED TO BANKS THROUGH FEDERAL RESERVE BOARD AND FDIC ACTION

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, last February I expressed my concern in a speech on the floor of the House about the apparently widespread practice by banks and business firms of mailing credit cards to consumers who have not requested them. My remarks at that time were prompted by a personal experience I had with an unsolicited credit card, and my belief that many other consumers who have received unsolicited credit cards have found the experience as irritating and unsatisfactory as my family and I did.

That belief has been confirmed since I first raised this issue in the House, and in several public appearances. I have received hundreds of letters from fellow consumers across the country giving detailed evidence of the unpleasant experiences they have had as a result of receiving an unsolicited credit card. Many of them feel, as I do, that this practice poses a threat to family budgets and potentially to the national economy.

In view of this record of concern, I was delighted to learn today that a significant step is about to be taken to help remedy this problem. The Federal Trade Commission has publicly proposed promulgation of a regulation which would stop the practice of sending out credit cards to any party without an expressed written request from the party for such a card. I am including at the close of my remarks a copy of the FTC press release announcing hearings on this proposed regulation.

The new regulation classifies the practice of sending unsolicited credit cards, quite rightly in my view, as "an unfair act or practice, and an unfair method of

competition in violation of section 5 of the Federal Trade Commission Act."

This proposed regulation is most commendable, as far as it goes. Unfortunately, however, because of limitations on the jurisdiction of the Federal Trade Commission, the regulation—even if approved, as it certainly should be—would not apply to banks or air carriers. It would apply only to "retail department stores, marketers, and retail dealers of gasoline, travel and entertainment establishments, and other credit card issuers—within FTC jurisdiction."

My own study of this problem reveals that banks are certainly one of the major sources of unsolicited credit card mailings, and it is urgent that they be covered by rules similar to those proposed by the Federal Trade Commission.

The Federal Reserve Board and the Federal Deposit Insurance Corporation are the two Federal agencies with jurisdiction over banks, and every effort must be made to see that these agencies act on the unsolicited credit card problem in the banking field as the FTC has done with respect to commercial enterprises under its regulatory jurisdiction. With that in mind, I am today calling the action of the FTC to the attention of officials of the Federal Reserve Board and the FDIC with a request that they issue similar bans applicable to banks at the earliest possible time. In addition, the two bills I have already introduced, H.R. 6945 and H.R. 8920, would remove any remaining uncertainty over the authority of the Federal Reserve Board and the FDIC to act in this area, and provide them with an unequivocal mandate to see that the practice by banks of sending out unsolicited credit cards is ended.

The Federal Trade Commission action deserves the support of the Congress and all American consumers. But its effects in resolving the unsolicited credit card problem, for the reasons I have cited, can be only partial, at best.

The FTC action reconfirms the need for broad prohibitions against the issuance of credit cards without consumer request, and suggests the need to extend prospective prohibitions to the establishments that appear to be the prime offenders—the banks. I hope that the FTC action will be imitated by the Federal Reserve Board and the Federal Deposit Insurance Corporation, and will stimulate prompt action on the legislation which I, and other Members of the Congress, have introduced giving these agencies a clear mandate to issue and enforce prohibitions on unsolicited bank credit cards.

FTC INITIATES TRADE REGULATION RULE PROCEEDING REGARDING THE MAILING OF UNSOLICITED CREDIT CARDS

The Federal Trade Commission today announced it has initiated a proceeding for the establishment of a trade regulation rule regarding the mailing of unsolicited credit cards.

The proposed rule would affect retail department stores, marketers and retail dealers of gasoline, travel and entertainment credit card establishments and other credit card issuers. Banks, common carriers and air carriers which mail out credit cards would not be covered by the rule because the Commission lacks jurisdiction over them.

A hearing on the proposed rule will be held at 10:00 a.m., Wednesday, September 10, 1969, in Room 532, FTC Building, Pennsylvania Ave. and Sixth St., N.W., Washington, D.C., and all interested parties, including the consuming public, will be given the opportunity to present data, views or argument.

Data, views or argument may be filed in writing with the Chief, Division of Trade Regulation Rules, Bureau of Industry Guidance, Federal Trade Commission, Washington, D.C. 20580, not later than August 12, 1969.

The proposed rule would forbid those issuers covered by it to mail a credit card to anyone without first receiving in writing his request for the card, or his consent to its being mailed.

In its notice initiating the proceeding, the Commission stated that it has reason to believe that:

"(1) Marketers of products and services such as gasoline companies, department stores, and all purpose credit card issuers have attempted to increase the use of credit cards through distribution of credit cards through the mails to persons who have not requested such cards or agreed to accept the same.

(2) A credit card holder is more likely to purchase at a retail outlet honoring his credit card.

(3) Unsolicited credit cards are often lost in the mails and the intended recipient is unaware there is a card or that an account is established in his name.

(4) Such credit cards are often misappropriated and fraudulently used by unknown parties and the intended recipient of the credit card is put to the often considerable burden of demonstrating to the billing company that the goods or services were not ordered or purchased.

(5) Billings resulting from fraudulent use of cards or billing errors cause concern among consumer recipients that their credit reputations may be jeopardized.

(6) As the result of an unsolicited credit card being issued, recipients are put to the burden of returning the unwanted credit card to the sender if they wish to indicate that the card is not desired.

(7) Credit card issuers who resort to the use of unsolicited mailings of credit cards may be placed at a competitive advantage over their competitors, who do not utilize the unsolicited mailings, and therefore that:

(8) Such practices constitute unfair acts or practices, and unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act."

And the Commission pointed out that, "Where a Trade Regulation Rule is relevant to any issue involved in an adjudicative proceeding thereafter instituted, the Commission may rely upon the Rule to resolve such issue, provided that the respondent shall have been given a fair hearing on the applicability of the Rule to the particular case."

NIXON'S VIETNAM PROPOSALS: HARD QUESTIONS AVOIDED, BUT MODERATE IN TONE

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, the most impressive thing about President Nixon's speech on Vietnam last night was its moderate tone. The President conveyed the impression that he is truly interested in negotiating a peace, and not in recriminations.

The President is also to be commended

for attempting to spell out the U.S. negotiating position for the achievement of a political settlement in Vietnam. Many of the positions he set forth have been part of U.S. thinking for a long time, but—for reasons I never could comprehend—the previous administration was not willing to state them publicly.

The Nixon speech, however, suffered grievously from the apparent fact that it was cleared in advance with the Saigon Government and left many, if not most, of the hard questions unanswered—questions that will have to be resolved before much progress can be expected in Paris.

For example, the speech did not make clear that, before any new election can take place that would give the National Liberation Front full opportunity to participate, the existing Constitution of South Vietnam would have to be drastically amended. President Thieu has insisted that any new election would have to take place within the framework of the existing Constitution, and President Nixon did not contradict him.

President Nixon also failed to discuss in any way the extremely difficult problem of providing for interim governmental arrangements in South Vietnam during the preelection period. He said that the elections themselves would take place under the supervision of an agreed upon international agency, which is a constructive suggestion so far as it goes. But he did not state or imply that such an international body would have governmental responsibilities. Thus, the implication of the proposal is that during the preelection period the present Saigon Government would remain in control of those areas it now dominates, and the NLF would remain in control of Vietcong dominated areas. It is hard to see how truly free elections could take place under such circumstances in areas dominated by either of these two sides, much less in the contested areas. Perhaps the President has in mind that some different interim governmental arrangements would have to be worked out, but his speech did not seem even to recognize the existence of the problem.

President Nixon's proposal also failed to deal with the question of reducing the level of violence on both sides as a necessary first step toward peace. As Governor Harriman pointed out in his comments following the address, the President made no reference to the stepped-up level of activity by U.S. bombers since last fall in suspected areas of Vietcong concentration in South Vietnam. He referred only to the Vietcong attacks against South Vietnamese cities.

Another big question left open by the President's speech was the size and structure of the U.S. forces that would remain in South Vietnam after the withdrawal of "most" such forces during the proposed 12-month withdrawal period. Although the President stated that we do not want to retain any "bases" in South Vietnam, he seemed to be saying that we would want to retain some U.S. forces in designated areas in South Vietnam for an indefinite period. This seems to be a pullback from the pledge of total

withdrawal made by President Johnson at Manila in 1967.

Also notably lacking in the President's statement was any reference to the need for broadening the present Saigon Government to include many non-Communist groups and individuals excluded thus far, such as General Minh, whose presence in the government would make it far more likely that a political settlement could be worked out with the NLF. The President, likewise, made no mention of the political repression that the Thieu-Ky government continues to practice, including the imprisonment of dissenters and the closing down of critical newspapers. In fairness, though, it should be noted that President Nixon simultaneously refrained from comment on the ruthless political methods of the NLF, except for his reference to the continuing attacks on populated areas in the cities of South Vietnam.

With this speech, President Nixon has no doubt put the United States in a better posture with respect to Vietnam in the eyes of the world than it has been for some years. This was particularly true because of his clear and unequivocal statement that our objective is to assure to the South Vietnamese people a free choice for their own future, and nothing more. Refreshingly, there was no mention of the claim that the maintenance of a non-Communist government in South Vietnam is a vital U.S. interest, nor was there any reference to the long-reiterated "domino" theory. Now certainly the United States will be in a far better position to continue the negotiations in Paris on a realistic basis, especially in view of the fact that the NLF has recently put forward a realistic negotiating position for the first time.

I suggest, however, that the negotiations cannot possibly succeed until the hard questions, like those I have mentioned, have been resolved. I believe, also, that a scaling down in the level and intensity of American military activity is needed. As Governor Harriman said last night, experience has shown that military pressure does not produce the desired results on NLF and North Vietnamese behavior that its advocates have stubbornly predicted. In this connection, recent press reports that the Hanoi government has had serious problems in maintaining the morale and willingness of its people to continue their sacrifices since the United States stopped the bombing of North Vietnam are interesting.

Finally, I hope that the President will make the fundamental decision that the Thieu-Ky government cannot continue to retain a veto power in the negotiations and that indeed the chances of a political settlement will remain dim so long as the Thieu-Ky regime maintains its present monopoly of power.

To achieve the desired withdrawal of "non-South Vietnamese forces"—as the President tactfully called them, avoiding the term "foreign"—I would hope that the President would proceed not only to scale down American offensive activities, but also to withdraw immediately a significant number of Ameri-

can forces, inviting comparable reciprocal action by the North Vietnamese. It may well be that much can be accomplished in this way without expecting Hanoi to make an explicit agreement about "mutual withdrawal" of forces. Any such agreement will be politically difficult for Hanoi to make both because of its official position that it has no forces in the South, and because of its insistence that the presence of U.S. forces in South Vietnam is not in any way comparable to the presence of Vietnamese in Vietnam, whether from the South or the North.

TOWARD A NATIONAL SYSTEM OF WELFARE

(Mr. MINISH asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MINISH. Mr. Speaker, I am today introducing legislation to provide for a major overhaul of our country's present welfare system by converting the aid to families with dependent children program to a wholly Federal program. Under my bill, AFDC will be administered by local agencies under federally prescribed terms and conditions including national minimum standards with the cost being fully borne by the Federal Government.

I have focused my legislation on the aid for dependent children program because this is by far the largest- and fastest-growing public assistance program. It is also the welfare program which, due to sharply increasing enrollment and cost, is contributing most to the growing fiscal crisis of urban local governments. Aid to families with dependent children now pays out more cash grants to needy families than the combined total for the other federally assisted programs for the blind, disabled, and aged, and it now accounts for more than two-thirds of all the people on public assistance in the United States. Of the approximately 9 million Americans who receive some sort of welfare, 6,146,000 of them were covered by the AFDC program during fiscal 1969.

Underlying the difficulty in preparing legislation on this subject is the fact that although the need for some form of national welfare system has been widely recognized, there are complex questions as to how a national standard could be formulated, the financing relationship between the various governmental levels, whether there should be national standards of eligibility, which programs should be included, and so forth. Hopefully, my legislation will answer some of these questions and provide a framework within which we may work toward a constructive national welfare policy.

My bill includes the provisions of H.R. 6612 introduced by me on February 7, 1969, for the promulgation by the Secretary of Health, Education, and Welfare of national standards and eligibility requirements for aid to families with dependent children. In practice the Secretary will adopt existing State formulas for determining the level of assistance to prevail in each State, except that in no

case may the benefits be less than the national average payments during the calendar quarter preceding the enactment of this legislation.

Such an approach will result in a significant lessening of the disparities which currently exist in AFDC payments among the various States. According to the latest available figures, the State of Massachusetts now pays \$67.85 per month to the average aid to dependent children recipient. In New York, aid for dependent children pays \$61.90 a month per recipient. For the Nation as a whole the average is approximately \$41.35 per recipient. My own State of New Jersey now pays \$65.28. In the State of Mississippi, on the other hand, the average monthly check for a dependent child is only \$8.50. South Carolinians receiving assistance must get by on about \$18.40 each per month. Alabama pays only \$15.30 and Texas only \$18.85.

The extreme disparities in benefits are unjust, do not reflect any reasonable differences in the cost of living, and encourage migration to large metropolitan areas where the welfare situation has already reached a critical point. Under my measure, the lowest State payment levels would be increased to the national average at the time of enactment of this legislation. States with higher assistance levels would be reimbursed at these same levels for expenditures under the AFDC program. The net effect will be to maintain the reasonable benefit levels of many States, while increasing to a decent level the pitifully low payments which millions of people now receive—payments which are totally inadequate for sustaining life even on a minimum level.

The bill makes a basic change in the financing arrangements for the aid to families with dependent children program by providing one hundred percent Federal financing, thus recognizing its national character and giving the Federal Government responsibility for assuring a workable and just policy. For some time now we have accepted the need for a national highway system and the Federal Government has provided virtually all the funds to construct this system. We must now face the fact that the welfare crisis can only be handled effectively and justly by the Federal Government.

Welfare expenditures today are becoming an unbearable burden to local governments and their hard pressed taxpayers in our Nation's metropolitan centers. In my own State of New Jersey, Federal assistance covers less than 45 percent of the cost of the AFDC program. The balance must be paid for by the taxpayers of the State, particularly the taxpayers in large urban counties like Essex. The number of recipients of AFDC funds in New Jersey has risen from 36,000 to 171,000 in the past 10 years and the State cost has increased from \$2,676,000 in 1958 to \$18,876,000 in 1968. In Essex County where my congressional district is located, the increase has been proportionately greater. Thirty-five percent of the entire State welfare load is carried by this county despite the fact that only about 15 percent of New Jersey's population resides here. In 1958

welfare costs in Essex were \$2,994,000. In 1968 the county spent approximately \$20 million on AFDC assistance. Needless to say, a continuing increase at this rate will mean fiscal chaos for the county and financial ruin for its taxpayers.

Mr. Speaker, under this legislation, the Secretary of Health, Education, and Welfare, in addition to adopting State standards and eligibility requirements, would formulate a complete plan for the administration of the program. Actual administration would be by existing county welfare agencies which would be required to report annually to the Secretary. The localities also would be charged with dispensing funds to the needy, conducting day care centers for children of recipients undergoing work training, supervising work training programs, and providing the many necessary social services which are often neglected now in the scramble for scarce local resources. Counties would be reimbursed for all expenses of the AFDC program so long as they abide by the plans outlined by the Secretary.

Mr. Speaker, I urge my colleagues in the House, and particularly the members of the Ways and Means Committee, to study this legislation carefully. Its enactment would lead to a more rational and more enlightened welfare system geared to current realities and recognizing that the plight of the urban taxpayer can no longer be ignored.

NATIONAL ISSUES

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, at the invitation of Mr. Charles H. Flynn, the erudite editor of the Ansonia, Conn., Evening Sentinel, I recently submitted a guest editorial for publication in the Evening Sentinel. Mr. Flynn, who recently was elected president of the Connecticut Circuit of Associated Press invited me to discuss some of the issues which predominate the 91st Congress with the understanding that my guest editorial would be published while Mr. Flynn vacations in Ireland.

I have submitted the following under the heading "The National Issues":

THE NATIONAL ISSUES

(Written for the Ansonia Sentinel by U.S. Representative JOHN S. MONAGAN, Fifth District, Connecticut)

The 91st Congress is faced with strong public demand for action on several legislative fronts. The letters which I receive indicate that the national issues most prominently in the minds of the people in our District other than World Peace, which predominate, are:

Coordination and regulation of poverty programs;
Clarification and limitation of welfare programs;

Control of unsolicited mailings of pornographic and obscene materials;
Tax reform and budget control; and
Evaluation of Federal spending programs and the allocation of national priorities.

In a sense this last matter surpasses all the others. Since it involves taxation, appropriations, and the exercise of statesman-like judgment as to the areas of national interest

in which our expenditures should be channeled, I have long maintained (my bill, H.R. 5545) that a Commission should be established to set Federal priorities. Although in a sense this is presently done in the Executive Branch by the Bureau of the Budget, nevertheless we need some legislative authority to harmonize the various goals advocated by the various goals advocated by the different Congressional committees. For example, the question of the competing claims on behalf of tax reduction, expenditures for urban areas, and spending for national defense are supported and attacked in various quarters. A balanced judgment on these matters must be reached.

One finds today a rising popular demand for control of expenditures and tax reform. The taxpaying public feels that it is paying about as much as can be expected. Wage-earning taxpayers are particularly concerned about the current tax loopholes which permit people with million dollar incomes to escape paying taxes altogether. Certainly these inequalities should be eliminated. My proposal (H.R. 7744) for a mandatory minimum tax would be a step in the right direction.

The competing demands of our deteriorating cities and the maintenance of adequate defenses provide another conflict of opinion. The current proposal to construct a modified Anti-Ballistic Missile System and various other military demands have emphasized this conflict. The alteration of the original ABM proposal by the Nixon Administration, its cost and the questions which some scientists have raised about its efficacy, require that it be given the most searching consideration. At the same time the deployment of a similar system by the Russians, the potential threat of Chinese nuclear capacity, and the judgment of the President and our military leaders all must be thoughtfully reviewed before action. It will be some time before this matter comes before the House and I have not yet made a final determination as to my position, but these are some of the considerations which are involved.

Certainly there are opportunities for reducing expenditures. In the last Congress budget proposals were reduced approximately \$6 billion and actual expenditures were cut about \$2 billion. I believe that defense spending can be further reduced and other spending, such as that involved in the farm program, cries out for review and reduction.

In a sense the battle against smut and pornography does not rank with the other matters which I have mentioned, but there are two significant aspects which are involved which make it a matter of great importance. First of all it touches on the morals of the Nation and secondly it constitutes a danger to the youth of our country. One sees the unsolicited pornography that floods the mails only to realize regretfully that the United States has the dubious distinction of matching Denmark as one of the two most permissive countries in the world. Certainly reasonable guarantees of freedom of speech and freedom of the press can be maintained while the public and especially the juvenile public are protected from those who purvey dirt for money.

The current preoccupation with poverty in this country is entirely admirable and should be pursued without flagging. At the same time there has been such a proliferation of governmental programs and activities, all with this same objective, that some review of their purposes and some coordination of their activities is required. From Social Security to OEO the Nation will be spending \$27 billion next year on the disadvantaged and yet most of these programs operate without any reference to the activities of others in the same field.

The Subcommittee which I chair is presently making an effort to determine the de-

gree to which anti-poverty programs operate efficiently and economically. The starting point for my subcommittee's investigation will be the much publicized General Accounting Office's "Review of Economic Opportunity Programs." Oversight of the entire anti-poverty effort must be increasingly exercised by the Congress.

One of the most critical problem areas in government today is that of the welfare program and its exploding cost. This is particularly true in States like Connecticut where the high level of payments has increasingly attracted welfare recipients from rural or less prosperous States. The recent astronomical rise of payments in Connecticut, where the percentage of the State budget allocated to welfare has risen from approximately 20 percent to 30 percent in three years, sufficiently underlines the seriousness of this whole matter. I have recently filed a bill in Congress (H.R. 9952) which would require uniform standards of welfare in all the States. By raising the standards elsewhere it should be possible to deter out-of-state welfare recipients from coming into more prosperous sections such as Connecticut. The problems of the metropolitan areas would be lessened and the farms and the small towns would be preserved as vital elements in our society. My purpose is to reduce, not increase, the future burden of Connecticut wage earners and taxpayers.

These are not all the issues which face the Congress, but they are those most prominent at the present time. I know that I shall have the support and the cooperation of the people of our District as I seek to move our government in the right direction in these matters. The continued advice and recommendations of all my constituents will as always be most welcome.

LABOR DEPARTMENT SAVINGS BOND CAMPAIGN—PERSUASION OR COERCION?

(Mr. RYAN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, it has come to my attention that the Department of Labor, along with several other executive agencies, has recently launched an intensive campaign to promote employee purchasing of U.S. savings bonds. While it is certainly proper for the Government to encourage purchase of savings bonds by its own employees, I am disturbed that "encouragement"—at least in the Department of Labor—borders on coercion.

By way of illustration, let me outline briefly some of the features of the Department of Labor's savings bond campaign.

The instructions for the conduct of the campaign were contained in an April 15 memorandum to supervisory personnel from Under Secretary of Labor James D. Hodgson, which I include at this point in my remarks:

MEMORANDUM TO SUPERVISORY PERSONNEL BY THE UNDER SECRETARY OF LABOR, WASHINGTON, APRIL 15, 1969

The 1969 Savings Bond Campaign will commence in the Department of Labor on April 21. In order to demonstrate that Department management enthusiastically endorses the campaign, it is planned to use supervisory employees as canvassers. The basic guidelines under which they will operate are:

1. There will be no pressure put upon employees, but all will be seriously urged to sign up.

2. Please emphasize that in making the Department of Labor a stimulating place to work we are building an esprit de corps and unity of purpose. We particularly want to excel in programs where we can be compared with others. Therefore, all employees are urged to respond to this appeal.

3. Payroll deduction is a convenient way of saving, helps support the Government and, of course, is a sound and valuable investment, but the paramount appeal by the Department is *widespread participation* in this joint effort, not investment.

4. The Government has set a goal of 80 percent participation in the bond payroll savings plan. However, the Department of Labor likes to excel in responding to worthy causes, to do just a little better than other agencies. Therefore, we are setting ourselves a goal of at least 90 percent employee participation. Many other organizations both in Government and private industry regularly exceed this figure so the target is not unreasonable.

5. Any person who does not sign the card after a discussion with his supervisor will be talked to by the next higher level of supervision to insure he or she is fully aware of the importance the Department places on this program. If discussion at these two levels of supervision does not result in participation, no higher referrals will be made.

6. Employees should be advised that any payroll deduction authorization effective in July will count in this year's drive. Therefore, it is appropriate to point out that there will be a substantial Government-wide pay raise effective in July.

7. It is the fact of participation, not the size of the deduction, that is important in this particular drive, a minimum deduction may be all that some will wish. No encouragement for higher amounts should be extended in such cases.

8. The payroll deduction method is reliable. Employees now receive their bonds regularly and promptly.

Please accept my thanks for your efforts in this program. Only through leadership on the part of its supervision can the Department expect to achieve the leadership position to which it aspires.

JAMES D. HODGSON,
Under Secretary.

Several aspects of Under Secretary Hodgson's memorandum strike me as—if not overtly coercive—at least surpassing the threshold of legitimate encouragement. First and perhaps foremost is the use of "supervisory employees" as canvassers for the campaign. In effect, this means that employees are to receive initial "encouragement" to buy bonds from supervisors who may, in fact, be the same individuals supervising them in their day-to-day employment activities.

Since the supervisor must himself respond to the goals for participation outlined by the Department of Labor, an employee may feel he will incur the enmity of his supervisor if he refuses to participate in a program for which his supervisor is held accountable. This situation in itself places undue pressure on an employee to sign up for a program in which he otherwise might be reluctant to participate.

Rather than building the "esprit de corps" to which Under Secretary Hodgson refers, it seems to me that the practice of using supervisory personnel to canvass for a program which has no relevance to the overriding purposes and duties of either the supervisor or the employee may produce exactly the opposite effect;

namely, an undermining of the relationship between supervisor and employee which is essential to the performance of the duties for which both bear responsibility. If canvassing of any kind is to be permitted within a Government agency, then it surely ought not to be done by the same supervisors with whom an employee must deal on a day-to-day basis, especially since both the employee's participation in the program and the supervisor's success in promoting participation by his employees is wholly irrelevant to either's capacity to fulfill the duties and responsibilities which should be his main concern.

A second provision of the Labor Department's memorandum—the referral of persons who do not wish to sign up for savings bonds to the “next higher level of supervision”—is patently outrageous.

Point 1 of Secretary Hodgson's memorandum stipulates that “there will be no pressure put upon employees” to sign up for the program. At the same time, however, employees are to be referred to a higher level of supervision for declining to contribute to the Labor Department's savings bond campaign.

The referral of an employee to a higher supervisory personnel as a result of his declining to participate in a program endorsed and promoted by the Department of Labor can be construed only as the most overt and direct pressure on the employee to sign up. If the employee has already indicated that he does not wish to participate in the program, referral to the next highest level is plainly coercive. As such, the practice should be terminated immediately.

An employee surely ought to have the right to dispose of his wages as he sees fit, without pressure or coercion being placed on him to obligate himself to a monthly deduction which he does not wish to incur. If government agencies feel bound to promote the purchase of savings bonds, they most certainly should not utilize supervisory personnel to cajole employees—with whom they must work on a day-to-day basis—into participating in an effort which is wholly extraneous to the purposes of the Labor Department and its programmatic responsibilities.

If the Department of Labor wishes to promote an “esprit de Corps” and “unity of purpose” among its employees, I suggest the Department organize such an effort—which I would applaud—around its own programs and responsibilities and not around the purchase of savings bonds, which is an irrelevant and meaningless test of organizational unity and purpose.

As a Member of Congress, I am interested, and concerned, with how the Department of Labor fulfills the responsibilities mandated to it by Congress, not with how many of its employees purchase savings bonds. I hope that the executive leadership of the Department will, by eliminating the coercive aspects of this campaign, exhibit a similar emphasis on meeting its primary responsibilities as a Federal agency.

ARMY ELECTRONICS COMMAND WASTES TAXPAYERS' MONEY

(Mr. HARSHA asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. HARSHA. Mr. Speaker, it is not my intention to beat a dead horse; nor do I plan to join the currently popular chorus against the much publicized military-industrial complex. But I would like to provide for the Record a detailed report on how the U.S. Army Electronics Command conducts public business and obligates our tax money for electronic equipment. The enormity of the waste is so incredible to me that it would seem to border on criminal action, however, most of it could be eliminated in one stroke if the Congress of the United States would hold a single military officer as personally responsible for a single case of stupidity and remove him from the service by assigning him the appropriately poor rating in his next fitness report.

In this particular case, to say that the Army wasted the money would be equal to saying the entire Pentagon wasted the money. That would dilute the responsibility and blunt any effort to seek to determine and expose the real individual source of the problem. I do know, for example, that the commanding general of the Army Electronics Command is Maj. Gen. J. B. Latta, and that his Director of Procurement and Production is Col. Jacob B. Cooperhouse.

The total sum of money wasted here was \$853,125; so this case cannot be considered really significant compared to the billions of dollars wasted elsewhere. The important thing is, however, that this waste was incurred under a procedure called negotiations through which bids are opened in secret and awarded in secret. I am told that this is the procedure through which General Latta's command awards about 85 percent of all of its contracts. This means, conversely, of course, that only about 15 percent of all the Army's Electronics Command's multibillions of dollars' worth of contracts are publicly issued, and under conditions which permit free, open, competitive bidding and resultant dollar savings to the taxpayers.

The case to which I refer concerns a transponder test set identified by the official nomenclature, AN/APM-132(). This unit measures 11½ inches high by 13¾ inches deep by 11½ inches wide and weighs 45 pounds, including all the cable assemblies, covers, attenuators, and straps. The major component is the actual test set which measures 4¼ inches high by 15½ inches deep by 13 inches wide and weighs 23.5 pounds. It is used for testing aircraft transponder—radio—sets. The Army paid \$119,515 to Packard Bell Electronics Corp., Los Angeles, Calif., to develop this equipment, which began in June 1960, and was completed in 1962.

In August 1965, the Army negotiated the first in a series of noncompetitive contracts with this firm, the last of which was awarded January 22, 1969, for a total of \$1,262,809.58, making a grand

total of something in the order of \$8 million awarded to this company for this equipment, including nearly \$2 million for what, a bit cynically, is called a competitive data package to which I shall refer later.

From August 1965 through January 1969, the Army purchased approximately 1,100 production units of the AN/APM-123() at a price that never went below \$5,000 per unit.

In the last award, on January 22, 1969, the Army purchased 195 units and paid \$6,450 per unit, despite the fact that the Army held an unsolicited bid—dated November 11, 1968—from another supplier who offered to manufacture the 195 units for \$4,784 per unit, for a total of \$932,880—and that was \$329,929.58 lower than the high bid which, took the contract on the basis of “urgency” of delivery.

In consideration of that often-used official alibi, it must be kept in mind that this equipment was a radio test set used in the field to test airborne radio sets already in service, and that “urgency” of delivery is a tired old expression invoked on official procurement documents to supply authority to award a contract to virtually anyone whom the procurement people want to have it, outlandish price notwithstanding.

After considerable pressure was applied against the Army Electronics Command from within the electronics industry to finally permit open, competitive bidding for this then-ancient equipment, the Army, on April 28, 1969, did accept competitive bids for this equipment under invitation DAAB05-69-B-0348 covering 241 units. Multronics, Inc., Rockville, Md., bid a unit price of \$2,074. Hydrospace Systems, Cedar Rapids, Iowa, quoted a unit price of \$2,075. In a total field of 26 bidders, the average bid was \$3,700 for this equipment which the Army had been buying from Packard Bell since 1965 on a noncompetitive basis for well over \$5,000 per unit. Packard Bell, incidentally, is a subsidiary of Tele-dyne, recently mentioned in Senator PROXMIRE's listing of the top 100 defense contractors, together with his list of “retired” military officers who form a very active part in that same military-industrial complex against which the late President Eisenhower warned several years ago.

Yet, there is still more to even this relatively small example of dollar wasting and competition restricting: I have been informed by a highly reliable source within the electronics industry that the foreign market for this piece of equipment to which I refer in this example is at least equal to the demands of the U.S. Army. In short, then, what the Army has, in effect, done, is to pay for the initial development of a product, then provide an uncontested market for the exclusive benefit of Packard Bell—first, within the Army, and later, to a broad market overseas. And all of this has been tersely justified on the claimed basis of “urgency” of need in the interest of providing for the national defense. In all reality, it might better be classified as, shall we say, a giant hoax which has cost the U.S.

taxpayer an estimated \$3,000,000 more than necessary.

The very worst part, I would like to mention, is the fact that the Army paid Packard Bell over nearly \$2 million for a "competitive data package" and ancillary items required for use in the subsequent—and only—competitive procurement under DAAB05-69-B-0348. I would like to place into the RECORD the specific language included in this procurement document which warned all potential bidders against possible defects in the very drawings which were officially provided for bid preparation:

NOTE.—Special attention is invited to the provision herein, entitled "Production Evaluation." Under the provision, among other things, the contractor agrees to accept at no increase in contract price or delay in delivery during the life of the contract certain changes in the technical data. For example, although the drawings cited for construction cover the design of the equipment, the compatibility of drawing detail has not been proven out, and, furthermore, the drawings do not define the necessary production techniques in sufficient detail to follow successful manufacture without contractor production engineering effort. The unit price of the equipment shall reflect the distributed costs of the effort required by the production evaluation provision which includes production engineering.

In other words, the Army is saying that it does not guarantee that the unit manufactured by the drawings officially provided will result in the production of a unit which will meet the Army requirements; this, in spite of the fact that the Army already paid about \$2 million for the "package." You will note that they do not say these drawings are unsuitable. They only hint that they may be unsuitable, and urge all bidders to increase their bids accordingly, although they do not say to what degree these prices should be increased. Senator PROXMIER's list of names on the Teledyne payroll today may include those officers who were responsible for all this since 1960, but there are many more important things for us to do here in the Congress than try to make a case on that basis. It is fair, however, to apportion the blame to those officials who remain in office who were responsible for the last \$1,262,809.58 noncompetitive contract negotiated with Packard Bell in January 1969. That requirement certainly could not have been urgent unless somebody in logistics deliberately delayed the procurement requisition until that condition did prevail, in which event, that individual should be identified and removed from office, along with General Latta and Colonel Cooperhouse who, in this one stroke, cost the taxpayers \$853,125 more than necessary when they paid \$6,450 for 195 units of this AN/APM-123() when they could have purchased it for \$2,074 as proven in the competitive bidding 3 months later.

Unfortunately, this practice of non-competitive bidding, and its resultant dollar waste and competition restriction is not limited to just the Army Electronics Command. It is practiced in other divisions of the Department of Defense as well.

Admittedly, therefore, this is one small isolated case. But there are many such

instances, and Congress should call a halt to this practice of "negotiating" contracts or hold those in authority personally responsible for such waste.

I include the following information table at this point:

SCPHILA IFB DAAB05-69-B-0348—OPENED
APRIL 28, 1969—AN/APM-123()

AN/APM-123() Transponder Test Set, in accordance with Military Specification Mil-

T-55605 with exception cited in procurement document and Drawing SC-DL-538301(A). Quantity: 241 units of AN/APM-123() (V)1 and 1 unit of AN/APM-123() (V)3. (Previous Procurement: Development by Packard Bell and after that sole-source with Packard Bell for a half-dozen deals which came to \$8 Million averaging like \$5,000 a unit, where on 1/22/69 an award with Packard Bell for \$1,262,810 covering 195 units for an average \$6,475.00 each.):

Note: Packard Bell also quoted 241 units with waiver \$5,045 and \$5,056.

RESIGNATION OF JUSTICE FORTAS

(Mr. HUNT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HUNT. Mr. Speaker, this morning at 9 a.m., the President accepted the resignation of Mr. Justice Fortas of the Supreme Court. As a direct result of the recent and persistent adverse publicity of certain of the personal affairs of Mr. Fortas, I believe this action was not only necessary, but proper. The integrity of and confidence in the U.S. Supreme Court, the highest judicial tribunal in the land, cannot long withstand these public attacks when the propriety of the actions of one of its members is held in question.

AN SST ALTERNATIVE

(Mr. MacGREGOR asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous material.)

Mr. MacGREGOR. Mr. Speaker, I am pleased to see that the New York Times, in its editorial of May 13 entitled "An SST Alternative," has endorsed the approach contained in legislation introduced by Congressman FRANK Bow and by me which seeks to substitute private-investor risk money for public funds in the further financing of supersonic transport airplane development.

For more than 3 years Congressman Bow and I have advocated the creation of an entity, the SST authority, to be publicly controlled but privately financed so that individual Americans could pur-

chase an interest in this commercial venture. Our idea would provide a marketplace test for the claim that money invested in the American SST will return handsome dividends.

In May 1966 I urged the House of Representatives to cut out \$280 million in public funds for SST development and was defeated on a voice vote. On July 18, 1967, I moved to delete \$142.3 million in new public SST spending. This motion went down to defeat on an 80-to-30 teller vote. On October 18, 1967, I moved again to cut back SST appropriations by \$142.3 million, and this time lost by the narrow margin of 8 votes.

These efforts finally bore fruit last year when the Congress deleted the entire \$223 million originally recommended in the previous administration's fiscal 1969 budget for continued development of the SST. We should now phase in the alternative financing plan and substitute private-investor risk money for public funds in this program.

While America's great human needs remain shortchanged, we cannot afford vast additional Federal expenditures on the commercial supersonic transport airplane. The needs of the ill-fed, ill-housed, ill-educated, and ill-trained must receive priority attention over the convenience of the few who might enjoy faster air travel.

Mr. Speaker, I insert the text of the New York Times editorial at this point in the RECORD:

AN SST ALTERNATIVE

President Nixon was not responsible for the erroneous decision to subsidize the development of a supersonic passenger plane

at a time when Government funds were sorely needed for programs of social welfare and private industry was capable of bearing the financial burden. But he now has an opportunity to undo a mistake and strike a blow for the more rational ordering of Federal spending priorities.

Since the Government has already advanced \$650 million for the S.S.T.—or about half of its total contribution—it cannot withdraw without running the risk of having the entire enterprise collapse. But there are viable alternatives, the most promising of which is the establishment of a public S.S.T. authority.

The Government's S.S.T. contribution should be converted to a preferred equity interest in a new public corporation with variable proportions of the total common stock being reserved for the airlines and the investing public. To the extent necessary, the S.S.T. authority would be authorized to raise development funds by selling bonds whose interest and principal were guaranteed by the Federal Government.

In addition to freeing Federal resources for higher priority programs, such an S.S.T. authority scheme offers other advantages. The equity interest feature corrects the defect of the present arrangement in which the Federal Government bears most of the risk in return for a fixed share of profits, if any. And to the extent that funds were raised by selling common stock, the S.S.T. would be subjected to a critical test in the market place.

RESIGNATION OF SUPREME COURT JUSTICE ABE FORTAS

(Mr. BROCK asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BROCK. Mr. Speaker, the resignation of Supreme Court Justice Abe Fortas is a historical event without precedent. Certainly, Mr. Fortas should have resigned—there is no question about that.

More important, however, is the fact that we are dealing here—not with an individual—but with the prestige and credibility of one of our three great constitutional institutions, the Supreme Court of the United States.

The Fortas scandal has dealt the Supreme Court a telling blow.

Because of its peculiar place and role within our constitutional structure the Court must strictly avoid even the slightest trace of impropriety, prejudice, or bias in its decisions. The indiscretions of former Justice Fortas have cast a shadow that must be dispelled—our first concern must be to restore the integrity of the Court.

Therefore, I believe it is incumbent upon Chief Justice Warren to order a full review of all decisions in which Justice Fortas cast a deciding vote. While I recognize the magnitude of such a request, nothing short of a complete review can restore that universal trust and respect which is so necessary if we are to maintain adherence to the law of our land.

PRESIDENT NIXON MOVES TOWARD PEACE

(Mr. CRAMER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CRAMER. Mr. Speaker, last eve-

ning President Nixon reported to the Nation on the war in Vietnam. In what I consider to be the most forthright and meaningful expression of this country's position on the war, the President said:

Nothing could have a greater effect in convincing the enemy that he should negotiate in good faith than to see the American people united behind a generous and reasonable peace offer.

I believe the President's proposals for bringing peace in Vietnam are sufficiently and forthrightly stated that meaningful negotiations can and I hope will immediately follow. I wholeheartedly support him as I am sure the majority of American people will support him in the effort for peace.

Mr. Speaker, I am convinced that an America united behind the President's new and forceful initiative will be the first step toward ending the fighting in Vietnam for it will demonstrate to the enemy that they cannot hope to win the war by a breakdown of resolve here at home.

I am highly encouraged by the President's personal leadership and the spelling out of specific proposals for terminating the war in Vietnam. A firm re-statement of America's commitment to South Vietnam coupled with concrete proposals for mutual troop withdrawals followed by a freely selected government offers to date the best hope for meaningful negotiations toward an honorable and lasting peace in Vietnam and all of Southeast Asia.

Bringing an end to the tragic loss of American lives in Vietnam while at the same time insuring that those who have given their lives in defense of freedom have not done so in vain is the President's goal and the Nation's goal, I believe. This desired result can be achieved through successful negotiations along the lines of the peace formula set down by the President last night.

OFFSHORE SHELL MINING RIGHTS CLAIMED BY COASTAL PETROLEUM A THREAT TO BEACH AREA

(Mr. CRAMER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CRAMER. Mr. Speaker, the paramount public interest in the submerged lands in and around the State of Florida is being placed in jeopardy as a result of a 28-year-old oil and mineral exploration agreement entered into by the State of Florida with the Arnold Exploration Co. The agreement in question was purchased by the Coastal Petroleum Co. in 1947, and Coastal is now seeking to exercise what it claims are its rights under the agreement by requesting a permit to drill for limerock in Lake Okeechobee in central-southern Florida, by announcing its intention to drill for shell less than 100 feet off the coast of Treasure Island in my congressional district on the Gulf of Mexico and by claiming it is entitled to payment for any shell included in the dredging of sand on to Treasure Island Beach as part of a beach erosion control project.

Congress long ago recognized the vital public interest in submerged lands by requiring the applicant to apply for a permit to the U.S. Army Corps of Engineers before beginning any mining or other exploratory operations which could in any way interfere with navigation or the broader public interest.

It is my opinion that the rights being asserted by Coastal Petroleum are contrary to public policy and therefore invalid. This, of course, is a matter for the courts to decide and it is my understanding that some of these questions are presently being litigated. In the meantime, however, it is my belief that no permit should be issued to mine limerock in Okeechobee and I have made my position on this matter known to the U.S. Army Corps of Engineers.

I am bringing this matter to the attention of the entire Congress because the legal questions involved could have a broad effect on public works projects throughout the United States. It raises the question of the rights of the people to basic sand and fill material to accomplish public works projects and whether a company which holds a lease like the one held by Coastal Petroleum can infringe on these rights.

In the Treasure Island situation, there are other legal questions to be decided including whether the claims of Coastal Petroleum to payment for any shell included in the dredging of sand as part of the beach erosion control project are valid, whether Coastal's announced intention to dredge this material itself is contrary to the rights of upland owners, and whether shell is a mineral included in the agreement in the first place.

Following is an editorial which appeared in the May 2, 1969, issue of the St. Petersburg Independent discussing the adverse effect such mining would have on the basic economy of the west coast of Florida:

INDEPENDENT EDITORS SPEAK: OFFSHORE SHELL MINING A THREAT TO BEACH AREA

You've got the water. Now think hard! What is the one other thing you need to make a beach?

Even a shepherd from the Alps could answer that—sand.

How much is sand worth to an area like the Suncoast, an area which depends upon tourists who like to swim in the surf and soak up the sun?

Obviously, you can't put a price tag on such a precious commodity. To the economy of the Suncoast, each grain of sand is as valuable as gold, providing it is located where nature left it—on the beaches.

Federal, state and local governments are spending some \$750,000 to rebuild the eroded beach at Treasure Island. A related project at Indian Rocks Beach raises the total cost to \$846,000 for a little more than two miles of beach.

That gives you some idea of how valuable sand is.

Coastal Petroleum Corp., which has a monopoly on exploration rights for minerals on 4.5 million acres of submerged land off the Gulf Coast and in 11 state lakes, now has asked the U.S. Army Corps of Engineers for a permit to explore a 600-acre tract about 1,000 feet off Treasure Island.

According to a company official, the object of the search would be deposits of shell material which could be mined and sold commercially to be used as a base for roadbeds and driveways.

It is a callous request. It is inconceivable that a public-minded company would seek to take material from the Gulf floor less than a quarter mile from a beach which is being renourished at a cost of \$750,000 to the taxpayers.

But Coastal is even complaining about the beach renourishment project, claiming it is using sand which is on land leased to the firm under its mineral rights contract.

Coastal Petroleum's attempt to rape Lake Okeechobee by opening a limestone mining operation there already is the subject of a controversy which has reached the White House.

No doubt this request also will touch off a lively controversy.

But Coastal Petroleum's lease cannot allow the firm to go merrily on its way, jeopardizing the public's beaches, water supply, flood control projects and recreational areas.

The public good demands that the firm's request for an exploration permit be denied.

RESIGNATION OF JUSTICE FORTAS

(Mr. SCHWENGEL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SCHWENGEL. Mr. Speaker, the resignation of Justice Fortas removes the cloud of suspicion which has hung over the Supreme Court since the disclosure that he received and belatedly returned \$20,000 to the Wolfson Foundation. However, it would appear to me that a serious breach of legal ethics has occurred. If the appropriate bar associations cannot deal with the situation, perhaps congressional action will be needed.

In addition, it should be clear now that disclosure of outside income by Federal judges is necessary to maintain the integrity of our judicial system. Since the disclosure provisions affecting Congress badly need strengthening, the provisions of the Court must be stricter to be meaningful.

STATEMENT IN SUPPORT OF INCREASING THE PERSONAL EXEMPTION FROM \$600 TO \$1,200

(Mr. SCHWENGEL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SCHWENGEL. Mr. Speaker, I have recently introduced legislation, H.R. 10841, to amend the Internal Revenue Code of 1954 to increase the personal exemption for the taxpayer, his spouse, and dependents from \$600 to \$1,200. I introduced similar legislation in the last Congress, but, unfortunately, it was not acted upon. The urgency of this legislation increases daily.

The evidence is unmistakable. All agree that when the Federal income tax was originally enacted in 1913, Congress sought to leave "free and untouched" enough income to permit support of a family according to a proper standard of living. The exemptions at that time were set at \$3,000 for a single individual and \$4,000 for married couples.

Since that time, of course, we have had an unhappy combination of two world wars, the cold war, the Korean war, the Vietnam conflict and inflation which has resulted in the personal ex-

emption being reduced to the point that it no longer even remotely relates to the intent of the original income tax law.

The present \$600 exemption was provided by the Revenue Act of 1948. In the 20 years that have passed since its adoption the cost of living has increased 44.6 percent. The vast majority of the States which have an income tax, and the District of Columbia, allow a personal exemption in excess of the present \$600 Federal exemption. At least 10 of the States have personal exemptions equal to \$1,200 or above. My own State, Iowa, has a tax credit of \$15 per person, which is roughly equal to a \$2,300 exemption.

It is time for the Federal Government to act. Congress cannot raise its own salaries and be blind to the needs of the rest of the population.

The often heard claim that we are presently in the longest period of uninterrupted prosperity the United States has ever known has a hollow ring to those who are barely making ends meet because of the high cost of living. I know the heavy inroads that have been made in the real purchasing power of the middle- and lower-income taxpayer. State and local taxes have been increasing at a rapid rate; the Federal tax surcharge was made effective April 1, 1968, and social security taxes just went up this January. Inflation, which has been creeping for many years, increased its tempo in 1968 when the cost of living rose 4.2 percent, the largest annual rise in 17 years. The brutal truth is that living costs for millions of our citizens are rising faster than paychecks. The real wages of those in the manufacturing industries, for example, have virtually stood still since 1965 while the cost of living increased 10.3 percent.

Prices on everything we buy from automobiles to groceries continue to spiral upward. Bad as these are, they are paled by the relentless increase in the cost of services. Medical costs continue to skyrocket. Auto and appliance repairs, mortgages and services in general are all costing more.

For parents of college students the present \$600 exemption is even more unrealistic than it is for those with children living at home. The U.S. Office of Education estimates that the average charges for tuition, fees, and room and board for a full-time resident, undergraduate student in a public 4-year institution for the 1968-69 school year will total \$1,114. In a private 4-year institution the cost for the year is estimated to be \$2,297. And who today, will argue that a college education is a luxury?

Immediate relief is needed. It is my firm conviction that an increase in the personal exemption is the best method to achieve this objective.

Those who argue most strongly against an increase in the personal exemption do so in terms of the revenue that will be lost to the Government. They should reassess their thinking to include considerations of equity, primarily and secondarily, the fact that additional revenue will be generated by the additional funds in the economy generated by the higher personal exemptions.

To reduce the impact of the initial revenue loss and also to restrict the benefit of the increased personal exemption to those who need it the most, this legislation provides that the increase in the exemption is to be limited. The increase in the exemption is to decline with the increasing income and eventually disappear at high income levels. Under my bill the increase in personal exemption for the individual will decrease \$1 for every \$10 his adjusted gross income exceeds \$20,000. For a married couple the increase in the personal exemption will begin to diminish at the same rate when their adjusted gross joint income exceeds \$40,000. The higher figure for a married couple is not a substantively higher amount but is technically necessary because of the split income provisions of the Internal Revenue Code.

The Federal income tax system has succeeded because it has generally been based on the ability-to-pay principle and is considered to be progressive. However, we have the right to question the fairness of our tax system when it enables special interest groups to pay relatively low taxes or to avoid the payment of taxes altogether, and the bulk of the people are having difficulty making ends meet after paying taxes. If we must have inequity in our tax system, and perfection is impossible to achieve, of course such inequity should be in favor of the average worker and the family which are the backbone of our society.

It is my belief that there is no single tax reform more urgent than this proposal. Reform is, of course, needed throughout the entire Federal tax structure to remove serious inequities and abuses. I am pleased that the House Ways and Means Committee in recognition of the urgent need for reform has conducted extensive hearings which began on February 18. Overall tax reform is such a tremendous undertaking that enactment of all necessary legislation may well encompass both sessions of the 91st Congress. It is my sincere hope that an increase in the personal exemption will be given the highest priority so that its early passage will be assured.

A. EFFECT ON INDIVIDUALS

The increase in the personal exemption to \$1,200 will result in billions of dollars of tax savings to individuals. However, we must not look upon these savings to the taxpayer as an equivalent loss to the Government. Some of these tax savings will come back to the Government in the form of higher taxes of other taxpayers. The low to moderate income families will probably spend all or virtually all of the tax savings. Those in the middle-income brackets will spend a good portion of them and often be able to save or invest for the first time. To both groups this extra income will greatly enhance the quality of their living.

In the autumn of 1966 the Department of Labor conducted a survey of 39 metropolitan and four nonmetropolitan regions to determine how much was required for a family of four to maintain a moderate standard of living. The family of four was a hypothetical one consisting of a 38-year-old man with a steady job, a wife

who does not work, a 13-year-old son, and an 8-year-old daughter. A moderate standard of living was defined as providing "for the maintenance of health and social well-being, the nurture of children, and participation in community activities." This generalized concept was translated into a list of commodities and services which could be priced. The content of the budget was based on the manner of living and consumer choices in the 1960's. It is neither a luxury budget nor a poverty budget. The estimated annual cost of this moderate standard of living averaged \$9,191 in urban areas of the United States, \$9,376 in metropolitan areas, and \$8,366 in smaller cities.

The study found that about 72 percent of the total cost of the budget was allocated to the family's basic needs—food, housing, transportation, clothing, personal care, and medical care. Such costs averaged \$6,610, about \$727 higher in metropolitan areas than in smaller cities. An average of \$719 was included for "other family consumption," which included reading, recreation, education, tobacco, alcoholic beverages, and miscellaneous expenses. In addition to these items of family consumption, the budget included allowances for gifts and contributions, basic life insurance, personal income and social security taxes, and occupational expenses. Personal taxes totaled 11.9 percent of the budget in the metropolitan areas and 11.1 percent in the smaller cities.

Overall budget costs were about \$800 higher for the homeowner than the renter. Homeowners constituted about 75 percent of the families surveyed. This \$800 figure included an average of about \$450 in payments on mortgage principal which was an element of "savings" not included in the budget for renter families. However, the additional income required to cover these mortgage payments also resulted in higher personal taxes for homeowner families, despite the fact that their mortgage interest payments were tax deductible. Few families of the type represented by this budget claimed contributions, interest, and other eligible deductions in excess of the standard deduction.

Total budget costs were highest for homeowner families in metropolitan areas and lowest for renter families in smaller cities, averaging \$9,599 and \$7,946, respectively.

This budget is supposed to reflect an increase in aspirations and expectations as compared to the previous budget published in 1960 reflecting a "modest but adequate" standard of living. However, my immediate reaction to these figures is that if 72 percent of this typical family's income is required for basic consumption expenses, another 12 percent for personal taxes, another 4 percent for social security taxes and occupational expenses, less than 8 percent for other family consumption—the things that give pleasure and enrichment to life—and life insurance and gifts and contributions must come from the balance, then the quality of life for this family leaves much to be desired.

Imagine what an additional \$2,400 a year would mean to this family. For the 25 percent who do not own homes it

would be more than enough to cover the \$800 estimated for the cost of annual mortgage payments and additional personal taxes required and thus enable them to experience the pleasure, pride, and improvement in the manner of living that accompany owning a home.

It will enable this family for the first time to have more than just the minimum savings represented by life insurance—averaging \$160 in premiums for a year—and social security.

Since the children in this hypothetical family were under college age, this budget contained practically nothing for higher educational expense. But for a family with similar expenditures and college-age children, \$2,400 could mean the difference between providing them higher education or their having to seek employment with only a high school education.

This additional money would enable this family group to eat out in a restaurant once in a while. The hardworking housewife will particularly appreciate this.

The budget allows for auto ownership for most of the families in these cities, but the standard only provides for the purchase of a used car every 4 years; \$2,200 could mean a new car or at the very least a better used car.

In other words, the additional money available to this family through the increased personal exemption would give it, often for the first time, a broader spectrum of choices, not based solely on necessity.

To the really low-income family this increase in personal exemption would eliminate the necessity for their paying Federal income taxes completely. A social security study of poverty in 1966 showed the "poverty line" for a nonfarm family of four was \$3,335. Anyone who falls below the poverty line will have less than a minimum diet for health or will have to choose between necessities. Michael Harrington goes a step further and believes it is probably justified to include all Americans in 1969 with family incomes—for four, in a city—of less than \$5,000 to be within "the magnetic field of poverty."

Under present tax law a family of four with an adjusted gross income of \$3,335 has to pay \$46 in Federal income taxes. With an adjusted gross income just under \$5,000 they would have to pay \$286 in income taxes. My legislation would eliminate the payment of Federal income taxes at these levels completely.

B. EFFECT ON THE BUSINESS COMMUNITY

The importance of placing additional money into the hands of the consumer is indicated by the fact that personal expenditures represent over 60 percent of the gross national product. The additional tax savings accruing to individuals will also increase the incomes of grocery stores, appliance dealers, clothing manufacturers, and others. As these billions of dollars of increased purchasing power are spent, re-spent through the economy, they will eventually increase consumer demand by several times the original amount.

This increase in demand for both goods and services will, in turn, spur

greater productive investment to meet the greater output required to meet the expanding consumer market, as well as the development of new techniques and new products. As production increases, so will profits. These increased profits will provide more funds for expansion, and continuing expansion will enable employment to remain at high levels as, hopefully, we return to a peacetime economy.

This ongoing process of high production, high profits, and high levels of employment will result in a larger tax base for the Federal Government, so that it will have a net loss much less than the amount of tax savings to individuals as a result of increasing exemptions.

C. EFFECT ON THE AMERICAN ECONOMY

We are all aware that at the present time various measures have been undertaken to dampen a too buoyant economy. It might appear that any move to place additional money in the hands of the consumer would serve to cancel out these efforts. But efforts to slow the economy and thus halt inflation are already making significant headway. The next step may very well be the need to prevent a tendency toward recession and an increase in unemployment.

The time lag between the introduction of legislation and its final enactment is all too well known. It is my fervent hope that the timing of this legislation will coincide with the needs of the overall economy. However, its passage today would not be soon enough for those caught in the cost-of-living squeeze.

I do not share the pessimistic views of those who think that military expenditures will continue at an extremely high rate when the hostilities in Vietnam are concluded. The pressure from the military for bigger and better weapons systems will be there, of course. And I certainly want to keep our defenses at a safe level. Also it will be necessary to restore inventories, which have been depleted by the Vietnam war, to normal levels and additional troops will undoubtedly be required for some time in Vietnam.

However, my trip to Vietnam last year convinced me that the United States should never again allow itself to become involved in this kind of futile disaster. Also, I feel there is such revulsion to war as a solution to our international problems, particularly among the young people all over the world, that peace has a better chance of being achieved than ever before. We do not want to return to isolationism, and our national security must always be paramount, but any objective view of our priorities must show that solution of our domestic problems is as important to our society as the solution of our international problems. There have been many hopeful signs, such as the nuclear nonproliferation treaty, that the Soviet Union too, is interested in diverting its resources and attention from military considerations to the long neglected social needs of its citizenry.

The needs on the domestic scene in the United States are all too evident—jobs for the hard-core unemployed, educational improvement at all levels but particularly for the culturally deprived,

inadequate housing, congestion, poverty, pollution, and the exodus of rural Americans to the cities. The Federal Government has initiated numerous programs to attack these problems, and many of them have been successful. The leadership must still be provided by the Federal Government but the real thrust must come from the private sector and the single most important factor is jobs.

An increase in the personal exemption will provide the funds necessary to stimulate the economy as the amount of military spending is decreased. By placing more money in the hands of the consumers in the form of tax savings, the demand for consumer oriented goods and services will increase. Government funds can be concentrated in those areas where private industry cannot operate profitably—such as training the hard-core unemployed. Once trained there should be jobs available because of the expanding economy.

More funds will be available for saving and investment. The increase in the availability of funds for mortgages will serve to stimulate the construction of housing which is one of the most urgent needs of our society.

By being able more easily to satisfy their material needs, a greater segment of the population will be able to work toward fulfilling the needs of the community and toward healing the divisions that are causing so much unhappiness and unrest in the Nation today.

Mr. Speaker, in his inaugural address President Nixon stated that "we are approaching the limits of what Government alone can do." This legislation will enable each of us to turn away from the necessity for Government aid to our own resources. I urge my colleagues to assist me in assuring the passage of this legislation.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WAGGONER, for May 19 and 20, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HECHLER of West Virginia, for 30 minutes, today; to revise and extend his remarks and include extraneous matter.

Mr. RANDALL, today, for 10 minutes; to revise and extend his remarks and to include extraneous matter.

(The following Members (at the request of Mr. WOLD) to revise and extend their remarks and to include extraneous matter:)

Mr. HALPERN, today, for 5 minutes.

Mr. MILLER of Ohio, today, for 10 minutes.

Mr. RUPPE, today, for 10 minutes.

Mr. QUIE, today, for 10 minutes.

(The following Members (at the request of Mr. MIKVA) and to revise and extend their remarks and include extraneous matter:)

Mr. GONZALEZ, for 10 minutes, today.

Mr. MARSH, for 30 minutes, on May 19.

Mr. FEIGHAN, for 30 minutes, on May 19.

EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DOWDY and to include extraneous material.

Mr. GROSS and to include certain newspaper articles.

Mr. RUPPE to extend his remarks and to include extraneous matter.

Mr. PHILBIN in three instances and to include extraneous matter.

(The following Members (at the request of Mr. WOLD) and to include extraneous matter:)

Mr. HASTINGS in two instances.

Mr. BUSH.

Mr. McEWEN in 10 instances.

Mr. WYMAN.

Mr. MESKILL in two instances.

Mr. THOMPSON of Georgia.

Mr. DENNEY.

Mr. ASHBROOK in two instances.

Mr. O'KONSKI.

Mr. BURKE of Florida.

Mr. MILLER of Ohio.

Mr. HOGAN.

Mr. SCHADEBERG in two instances.

Mr. KEITH.

Mr. HOSMER in three instances.

Mrs. HECKLER of Massachusetts in three instances.

Mr. QUILL.

(The following Members (at the request of Mr. MIKVA) and to include extraneous matter:)

Mr. BOGGS.

Mr. ROONEY of Pennsylvania in two instances.

Mr. REUSS in six instances.

Mr. O'HARA.

Mr. GAYDOS in three instances.

Mr. ROYBAL in five instances.

Mr. GONZALEZ in three instances.

Mr. ASHLEY.

Mr. DADDARIO in three instances.

Mr. CHARLES H. WILSON in two instances.

Mr. RARICK in three instances.

Mr. ANDERSON of California in two instances.

Mr. STUCKEY in two instances.

Mr. HANNA.

Mr. VANIK in three instances.

Mr. MILLER of California in three instances.

Mr. FOLEY.

Mr. PHILBIN in four instances.

Mr. ROONEY of New York.

Mr. BENNETT.

Mr. DULSKI in three instances.

Mr. BEVILL.

Mr. JOHNSON of California in three instances.

Mr. MANN in three instances.

Mr. RIVERS.

Mr. HENDERSON in two instances.

Mr. WATTS in two instances.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1287. An act to authorize appropriations for fiscal years 1970, 1971, and 1972 to

carry out the metric system study; to the Committee on Science and Astronautics.

ENROLLED BILLS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 33. An act to provide for increased participation by the United States in the International Development Association, and for other purposes; and

H.R. 8794. An act to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development, and for other purposes.

ADJOURNMENT

Mr. MIKVA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 56 minutes p.m.), under its previous order, the House adjourned until Monday, May 19, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

773. A letter from the Deputy Secretary of Defense, transmitting a report that no disbursements have been made as of March 31, 1969, from the appropriation for "Contingencies, defense," in the Department of Defense Appropriation Act, fiscal year 1969, pursuant to the provisions of that act (Public Law 90-580); to the Committee on Appropriations.

774. A letter from the Deputy Assistant Secretary of Defense (Properties and Installations), transmitting notification of the increases in cost of two construction projects being undertaken for the Army National Guard; to the Committee on Armed Services.

775. A letter from the Vice Chairman, Board of Governors of the Federal Reserve System, transmitting the 54th annual report of the Board, for 1968, pursuant to the provisions of section 10 of the Federal Reserve Act, as amended; to the Committee on Banking and Currency.

776. A letter from the Commissioner of the District of Columbia, transmitting a draft of proposed legislation to authorize in the District of Columbia a program of public day care services and to provide public assistance in the form of foster home care to certain dependent children; to the Committee on the District of Columbia.

777. A letter from the Chairman, Equal Employment Opportunity Commission, transmitting a listing of the names, salaries, and duties of all employees of the Equal Employment Opportunity Commission during fiscal year 1968, pursuant to the provisions of section 705(d) of the Civil Rights Act of 1964; to the Committee on Education and Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 or rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 4204. A bill to amend section 6 of the War Claims Act of 1948 to include prisoners of war captured during the Vietnam conflict; with amendment (Rept. No. 91-249). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Fifth report on recreational boating safety (pt. 2) (Rept. No. 91-250). Referred to the Committee of the Whole House on the State of the Union.

Mr. MAHON: Committee on Appropriations. H.R. 11400. A bill making supplemental appropriations for the fiscal year ending June 30, 1969, and for other purposes (Rept. No. 91-252). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. EILBERG: Committee on the Judiciary. H.R. 1828. A bill to confer U.S. citizenship posthumously upon James F. Wegener (Rept. No. 91-251). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK:

H.R. 11306. A bill to amend chapter 44 of title 18, United States Code, to exempt ammunition from Federal regulation under the Gun Control Act of 1968; to the Committee on the Judiciary.

By Mr. BINGHAM:

H.R. 11307. A bill to provide for educational assistance for gifted and talented children; to the Committee on Education and Labor.

H.R. 11308. A bill to reclassify certain positions in the postal field service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BLANTON:

H.R. 11309. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. BRINKLEY:

H.R. 11310. A bill to provide additional benefits for optometry officers of the uniformed services; to the Committee on Armed Services.

By Mr. BROYHILL of Virginia:

H.R. 11311. A bill to adjust the postal revenues and to afford protection to the public from offensive intrusion into their homes through the postal service of sexually oriented mail matter, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 11312. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of certain materials to minors; to the Committee on the Judiciary.

H.R. 11313. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of salacious advertising; to the Committee on the Judiciary.

By Mr. BURTON of Utah:

H.R. 11314. A bill to amend section 131 of title 23 of the United States Code, relating to control of outdoor advertising along Federal-aid highways, in order to authorize one

or more pilot programs for the purpose of such section; to the Committee on Public Works.

By Mr. BUSH:

H.R. 11315. A bill to amend section 204(a) of the Coinage Act of 1965 in order to authorize minting of all new quarter dollar pieces with a likeness of the late President Dwight David Eisenhower on one side; to the Committee on Banking and Currency.

By Mr. CHAMBERLAIN:

H.R. 11316. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of certain materials to minors; to the Committee on the Judiciary.

H.R. 11317. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of salacious advertising; to the Committee on the Judiciary.

H.R. 11318. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 11319. A bill to amend part A of title IV of the Social Security Act to repeal the limitation upon the number of children with respect to whom Federal payments may be made under the program of aid to families with dependent children; to the Committee on Ways and Means.

By Mr. COLLINS:

H.R. 11320. A bill to amend title II of the Social Security Act to increase the amount of outside earnings permitted each year without deductions from benefits thereunder; to the Committee on Ways and Means.

By Mrs. DWYER:

H.R. 11321. A bill to provide for the redistribution of unused quota numbers; to the Committee on the Judiciary.

By Mr. FLOWERS:

H.R. 11322. A bill to authorize the Secretary of Commerce to conduct research and development programs to increase knowledge of tornadoes, squall lines, and other severe local storms to develop methods for detecting storms for prediction and advance warning, and to provide for the establishment of a National Severe Storms Service; to the Committee on Interstate and Foreign Commerce.

By Mr. HOGAN:

H.R. 11323. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. JACOBS:

H.R. 11324. A bill to amend title XVIII of the Social Security Act to provide payment for chiropractors' services under the program of supplementary medical insurance benefits for the aged; to the Committee on Ways and Means.

By Mr. LEGGETT:

H.R. 11325. A bill to amend the Maritime Academy Act of 1958 to increase the amount of assistance to such academies and to provide a minimum subsistence payable per student; to the Committee on Merchant Marine and Fisheries.

H.R. 11326. A bill to provide increased annuities under the Civil Service Retirement Act; to the Committee on Post Office and Civil Service.

H.R. 11327. A bill to amend chapter 83, title 5, United States Code, to eliminate the reduction in the annuities of employees or Members who elected reduced annuities in order to provide a survivor annuity if predeceased by the person named as survivor and permit a retired employee or Member to designate a new spouse as survivor if predeceased by the person named as survivor at the time of retirement; to the Committee on Post Office and Civil Service.

H.R. 11328. A bill to modernize the U.S. postal establishment, to provide for efficient and economical postal service to the public, to improve postal employee-management relations, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MATSUNAGA:

H.R. 11329. A bill to include firefighters within the provisions of section 8336(c) of title 5, United States Code, relating to the retirement of Government employees engaged in certain hazardous occupations; to the Committee on Post Office and Civil Service.

H.R. 11330. A bill to amend title 5, United States Code, to improve the basic workweek of firefighting personnel of executive agencies, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MURPHY of New York:

H.R. 11331. A bill to incorporate College Benefit System of America; to the Committee on the Judiciary.

By Mr. PATTEN:

H.R. 11332. A bill to provide for the redistribution of unused quota numbers; to the Committee on the Judiciary.

By Mr. PETTIS:

H.R. 11333. A bill to authorize the Secretary of Agriculture to make indemnity payments to certain beekeepers; to the Committee on Agriculture.

H.R. 11334. A bill to amend chapter 53 of title 10, United States Code; to the Committee on Armed Services.

H.R. 11335. A bill to reclassify certain positions in the postal field service, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 11336. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for employers who employ members of the hard-core unemployed; to the Committee on Ways and Means.

By Mr. PODELL:

H.R. 11337. A bill to prohibit federally insured banks from making unsolicited commitments to extend credit, and for other purposes; to the Committee on Banking and Currency.

H.R. 11338. A bill to safeguard the consumer by requiring greater standards of care in the issuance of unsolicited credit cards and by limiting the liability of consumers for the unauthorized use of credit cards, and for other purposes; to the Committee on Banking and Currency.

By Mr. POLLOCK:

H.R. 11339. A bill to repeal chapter 44 of title 18, United States Code (relating to firearms), to reenact the Federal Firearms Act, and to restore chapter 53 of the Internal Revenue Code of 1954 as in effect before its amendment by the Gun Control Act of 1968; to the Committee on the Judiciary.

H.R. 11340. A bill to authorize funds to carry out the purposes of title V of the Public Works and Economic Development Act of 1965, as amended; to the Committee on Public Works.

By Mr. ST. ONGE:

H.R. 11341. A bill to amend the Immigration and Nationality Act to make additional immigrant visas available for immigrants from certain foreign countries, and for other purposes; to the Committee on the Judiciary.

H.R. 11342. A bill to amend title II of the Social Security Act to provide minimum monthly benefits thereunder at age 72 for all uninsured individuals, without regard to the time at which such age is attained; to the Committee on Ways and Means.

By Mr. TEAGUE of Texas:

H.R. 11343. A bill to amend title 39, United States Code, to exclude from the U.S. mails as a special category of nonmailable matter certain obscene material sold or offered for sale to minors, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. THOMPSON of Georgia:

H.R. 11344. A bill to amend the Railroad Retirement Act of 1937 to provide for cost-of-living increases in the benefits payable thereunder; to the Committee on Interstate and Foreign Commerce.

H.R. 11345. A bill to permit the Federal Government to further assist the States in the control of illegal gambling, and for other purposes; to the Committee on the Judiciary.

By Mr. THOMPSON of Georgia (for himself, Mr. WIDNALL, Mr. RIVERS, Mr. CLEVELAND, and Mr. BEVILL):

H.R. 11346. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to provide grants to States for the establishment, equipping, and operation of emergency communications centers, to make the national emergency telephone number 911 available throughout the United States; to the Committee on the Judiciary.

By Mr. VANIK (for himself, Mr. BOLAND, Mr. BRASCO, Mr. BROWN of California, Mr. BURTON of California, Mr. BUTTON, Mr. BYRNE of Pennsylvania, Mrs. CHISHOLM, Mr. CONYERS, Mr. CORDOVA, Mr. DAWSON, Mr. DONOHUE, Mr. EDWARDS of California, Mr. FARBERSTEIN, Mr. FOLEY, Mr. WILLIAM D. FORD, Mr. FRIEDEL, Mr. FULTON of Pennsylvania, Mr. GALLAGHER, Mr. GONZALEZ, Mr. HAWKINS, Mr. HELSTOSKI, Mr. HICKS, Mr. HOLIFIELD, and Mr. HOWARD):

H.R. 11347. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$80; to the Committee on Ways and Means.

By Mr. VANIK (for himself, Mr. KOCH, Mr. LOWENSTEIN, Mr. MIKVA, Mrs. MINK, Mr. MOLLOHAN, Mr. MOORHEAD, Mr. MORGAN, Mr. MURPHY of Illinois, Mr. NEDZI, Mr. NIX, Mr. OBEY, Mr. O'NEILL of Massachusetts, Mr. PODELL, Mr. POWELL, Mr. PRICE of Illinois, Mr. RANDALL, Mr. REES, Mr. ROGERS of Colorado, Mr. ROYBAL, Mr. ST. ONGE, Mr. SANDMAN, Mr. STOKES, Mr. THOMPSON of New Jersey, and Mr. TIERNAN):

H.R. 11348. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$80; to the Committee on Ways and Means.

By Mr. VANIK (for himself, Mr. VIGORITO, Mr. WALDIE, Mr. WRIGHT, and Mr. RYAN):

H.R. 11349. A bill to amend title II of the Social Security Act to provide a 15-percent across-the-board increase in monthly benefits, with subsequent cost-of-living increases in such benefits and a minimum primary benefit of \$80; to the Committee on Ways and Means.

By Mr. ANDERSON of California:

H.R. 11350. A bill to repeal a portion of the act of July 15, 1968, relating to entrance, admission, and recreation user fees in connection with the national parks and other Federal areas; to the Committee on Interior and Insular Affairs.

H.R. 11351. A bill to prohibit the use of interstate facilities, including the mails, for the transportation of certain materials to minors; to the Committee on the Judiciary.

By Mr. ASHLEY (for himself, Mr. BETTS, and Mr. LATTA):

H.R. 11352. A bill to amend title 28 of the United States Code to provide that the western division of the northern judicial district of Ohio shall constitute an additional judicial district in Ohio and to authorize two district judges for such judicial district; to the Committee on the Judiciary.

By Mr. BENNETT:

H.R. 11353. A bill, the Tax Reform Act of 1969; to the Committee on Ways and Means.

By Mr. BUTTON:

H.R. 11354. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. CLARK:

H.R. 11355. A bill to adjust agricultural production, to provide a transitional program for farmers, and for other purposes; to the Committee on Agriculture.

By Mr. DON H. CLAUSEN (for himself, Mr. KLUCZYNSKI, Mr. CLEVELAND, Mr. McEWEEN, Mr. SCHWENGL, Mr. HENDERSON, Mr. DENNEY, Mr. McCARTHY, Mr. HOWARD, Mr. HAMMER-SCHMIDT, Mr. MILLER of Ohio, Mr. ANDERSON of California, and Mr. EDMONDSON):

H.R. 11356. A bill to amend title 10 of the United States Code to provide for an Assistant Secretary of the Army for Civil Works; to the Committee on Public Works.

By Mr. DULSKI:

H.R. 11357. A bill to amend title II of the Social Security Act to provide a 10-percent across-the-board increase in the benefits payable thereunder, with subsequent cost-of-living increases in such benefits; to the Committee on Ways and Means.

By Mr. DUNCAN:

H.R. 11358. A bill to amend title 38 of the United States Code to provide that any 5-year-level premium term plan policy of U.S. Government life insurance shall be deemed paid when premiums paid in, less dividends, equal the amount of the policy; to the Committee on Veterans' Affairs.

H.R. 11359. A bill to regulate imports of milk and dairy products, and for other purposes; to the Committee on Ways and Means.

By Mr. FARBERSTEIN:

H.R. 11360. A bill to amend the Internal Revenue Code of 1954 to provide that pensions and retired pay of judges performing full-time judicial services after mandatory retirement age be excluded from gross income; to the Committee on Ways and Means.

By Mr. HAGAN:

H.R. 11361. A bill to provide for the more effective prevention and treatment of alcoholism; to the Committee on Interstate and Foreign Commerce.

By Mr. HOGAN:

H.R. 11362. A bill to increase the amount authorized for the acquisition of land in Maryland under the Endangered Species Preservation Act of October 15, 1966; to the Committee on Merchant Marine and Fisheries.

By Mr. LENNON (for himself, Mr. GARMATZ, Mr. DINGELL, Mr. FELY, Mr. DOWNING, Mr. KEITH, Mr. KARTH, Mr. DELLENBACK, Mr. ROGERS of Florida, Mr. POLLOCK, Mr. HANNA, Mr. GOODLING, Mr. LEGGETT, Mr. McCLOSKEY, Mr. ANNUNZIO, Mr. FREY, Mr. LONG of Louisiana, Mr. BIAGGI, and Mr. FEIGHAN):

H.R. 11363. A bill to prevent the importation of endangered species of fish or wildlife into the United States; to prevent the interstate shipment of reptiles, amphibians, and other wildlife taken contrary to State law; and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. LOWENSTEIN:

H.R. 11364. A bill to provide for improved employee-management relations in the postal service, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 11365. A bill to amend subchapter III of chapter 83 of title 5, United States Code, relating to civil service retirement, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LUKENS:

H.R. 11366. A bill to authorize the Secretary of Commerce to conduct research and development programs to increase knowledge of tornadoes, squall lines, and other severe local storms, to develop methods for detecting storms for prediction and advance warning, and to provide for the establishment of a National Severe Storms Service; to the Committee on Interstate and Foreign Commerce.

By Mr. LUKENS (for himself and Mr. BROCK):

H.R. 11367. A bill to declare the policy of the United States with respect to its territorial sea; to the Committee on Foreign Affairs.

By Mr. McFALL (for himself and Mr. SISK):

H.R. 11368. A bill to amend the Small Reclamation Projects Act of 1956; to the Committee on Interior and Insular Affairs.

By Mr. MacGREGOR:

H.R. 11369. A bill to require quarterly disclosure to the Comptroller General of the United States of the sources and amount of all outside income received by any person serving as a Federal judge, a Member of Congress, or a policymaking official in the executive branch of the Government, and for other purposes; to the Committee on the Judiciary.

H.R. 11370. A bill to make it a Federal crime for anyone to pay, or to offer to pay, and for any Federal judge, Member of Congress, or policymaking official in the executive branch of the Government to receive, any sum greater than \$500 for a speech, published work, professional service, personal appearance, or otherwise by way of honorarium; to the Committee on the Judiciary.

By Mr. MEEDS:

H.R. 11371. A bill to amend the Military Selective Service Act of 1967 to specify the period in which a person is engaged in certain graduate study necessary to the maintenance of the national health; to the Committee on Armed Services.

H.R. 11372. A bill to amend the act, entitled "An act to authorize the partition or sale of inherited interests in allotted lands in the Tulalip Reservation, Wash., and for other purposes," approved June 18, 1956 (70 Stat. 290); to the Committee on Interior and Insular Affairs.

By Mr. MIKVA (for himself, Mr. ANDERSON of California, Mr. BROWN of California, Mrs. CHISHOLM, Mr. CONYERS, Mr. CULVER, Mr. HAWKINS, Mr. KASTENMEIER, Mr. KOCH, Mr. LEGGETT, Mr. REES, Mr. TUNNEY, and Mr. WALDIE):

H.R. 11373. A bill to amend title 18, United States Code, to prohibit the establishment of emergency detention camps and to provide that no citizen of the United States shall be committed for detention or imprisonment in any facility of the U.S. Government except in conformity with the provisions of title 18; to the Committee on the Judiciary.

By Mr. MINISH:

H.R. 11374. A bill to amend part A of title IV of the Social Security Act to make the program of aid to families with dependent children a wholly Federal program, to be administered by local agencies under federally prescribed terms and conditions (embodying the eligibility formulas currently in effect in the several States but designed to encourage such States to apply nationally uniform standards), with the cost being fully borne by the Federal Government; to the Committee on Ways and Means.

By Mr. MORSE:

H.R. 11375. A bill to amend title 10 of the United States Code to prohibit the assignment of a member of an armed force to combat area duty if any of certain relatives of such member dies, is captured, is missing in action, or is totally disabled as a result

of service in the Armed Forces in Vietnam; to the Committee on Armed Services.

By Mr. PURCELL:

H.R. 11376. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. RAILSBACK:

H.R. 11377. A bill to amend chapter 83, title 5, United States Code, to eliminate the reduction in the annuities of employees or Members who elected reduced annuities in order to provide a survivor annuity if predeceased by the person named as survivor and permit a retired employee or Member to designate a new spouse as survivor if predeceased by the person named as survivor at the time of retirement; to the Committee on Post Office and Civil Service.

By Mr. REIFEL:

H.R. 11378. A bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain water resource development proposals; to the Committee on Interior and Insular Affairs.

By Mr. RIEGLE:

H.R. 11379. A bill relating to withholding, for purposes of the income tax imposed by certain cities, on the compensation of Federal employees; to the Committee on Ways and Means.

By Mr. RUPPE:

H.R. 11380. A bill to provide for public disclosure by Members of the House of Representatives, Members of the U.S. Senate, justices and judges of the U.S. courts, and policymaking officials of the executive branch as designated by the Civil Service Commission, but including the President, Vice President, and Cabinet members, and by candidates for the House of Representatives and the Senate, the Presidency, and the Vice Presidency; and to give the House Committee on Standards of Conduct, the Senate Select Committee on Standards of Conduct, the Director of the Administrative Office of the U.S. Courts, and the Attorney General of the United States appropriate jurisdiction; to the Committee on the Judiciary.

By Mr. TEAGUE of California (for himself, Mr. DEL CLAWSON, Mr. BROWN of California, Mr. DON H. CLAUSEN, Mr. GUBSER, Mr. HAWKINS, Mr. LEGGETT, Mr. EDWARDS of California, Mr. PETTIS, Mr. TALCOTT, Mr. TUNNEY, Mr. SISK, Mr. ROYBAL, Mr. VAN DEERLIN, Mr. CHARLES H. WILSON, Mr. JOHNSON of California, Mr. HANNA, Mr. CORMAN, Mr. MAILLIARD, Mr. BELL of California, Mr. LIPSCOMB, Mr. REES, Mr. HOSMER, Mr. BOB WILSON, and Mr. BURTON of California):

H.R. 11381. A bill to establish fee programs for entrance to, and use of, areas administered for outdoor recreation and related purposes by the Secretary of the Interior and the Secretary of Agriculture, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. TEAGUE of California (for himself and Mr. McCLOSKEY):

H.R. 11382. A bill to establish fee programs for entrance to, and use of, areas administered for outdoor recreation and related purposes by the Secretary of the Interior and the Secretary of Agriculture, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WAGGONER:

H.R. 11383. A bill to amend title 28, United States Code, to limit the appellate jurisdiction of the Supreme Court in certain cases relating to the apportionment of population among districts from which Members of Congress are elected; to the Committee on the Judiciary.

By Mr. MAHON:

By Mr. MAILLIARD:

H.R. 11392. A bill for the relief of Mrs. Tatiana Miller; to the Committee on the Judiciary.

By Mr. MIKVA:

H.R. 11393. A bill for the relief of Constantine Foster; to the Committee on the Judiciary.

By Mr. MORTON:

H.R. 11394. A bill relating to the parishes and congregations of the Protestant Episcopal Church in the District of Columbia; to the Committee on the District of Columbia.

By Mr. PUCINSKI:

H.R. 11395. A bill for the relief of Rev. Father Luis Iscla Roviera, S.J.; to the Committee on the Judiciary.

By Mr. VAN DEERLIN:

H.R. 11396. A bill for the relief of Tam Wai King; to the Committee on the Judiciary.

H.R. 11397. A bill for the relief of Carole Ann Lee; to the Committee on the Judiciary.

H.R. 11398. A bill for the relief of Faustino Murgoa-Melendrez; to the Committee on the Judiciary.

H.R. 11399. A bill for the relief of J. Jesus Vasquez; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII.

111. The SPEAKER presented a petition of Gordon F. Dollar, Los Angeles, Calif., relative to redress of grievances, which was referred to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

ODD FELLOWS CELEBRATE 150
YEARS OF SERVICE

HON. JOHN DOWDY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. DOWDY. Mr. Speaker, I would call to the attention of this Congress the 150 years of service rendered to humanity by the Independent Order of Odd Fellows. Founded in Baltimore in 1819, our fraternity is celebrating its sesquicentennial anniversary this year. The hallmark of Odd Fellows is service to their fellow men.

During its history, the Independent Order of Odd Fellows has served the Nation's communities by caring for more than 50,000 aged and orphans in 59 homes across the country. The order has provided for the education of our young people by sponsoring an annual pilgrimage to the United Nations for high school students, and by maintaining a college scholarship fund. It has contributed to the health of fellow citizens by endowing a chair of visual research at Johns Hopkins Hospital.

On Sunday, May 4, the Odd Fellows held wreath-placing ceremonies at the Tomb of the Unknown Soldiers at Arlington National Cemetery. Beginning in 1934, our order has made an annual pilgrimage to the cemetery for this purpose, this being the 36th such pilgrimage. Ours is the only fraternal order given this special privilege by the U.S. Department of the Army.

The Independent Order of Odd Fellows has conferred its Grand Decoration of Chivalry and emblematic jewels upon each of the three Unknowns, and these decorations remain in the custody of the United States, lodged in the trophy room at Arlington. The inspiration for the Independent Order of Odd Fellows pilgrimage and the Grand Decoration of Chivalry is to express gratitude and appreciation for the national and fraternal heroic dead, and for their courageous deeds to preserve the brotherhood of men in freedom, one of the highest principles of Odd Fellowship.

During the ceremonies at the 36th pilgrimage, Brother Chester J. Hunnicutt, Sovereign Grand Master, IOOF, addressed those assembled, paying tribute to those who have given their lives in the service of our country. I include his address in the RECORD as a part of my remarks.

ADDRESS AT THE TOMB OF THE UNKNOWN SOLDIERS BY
CHESTER J. HUNNICUTT, SOVEREIGN GRAND
MASTER, INDEPENDENT ORDER OF ODD FELLOWS, MAY 4, 1969

Brother Chairman, Officers of the Sovereign Grand Lodge and of the International Association of Rebekah Assemblies, all other officers both present and past of this great fraternity, my brothers, sisters and friends:

We have met today for the thirty-sixth consecutive year to pay respect to those unknowns and to those other gallant men whose graves surround us on every side in this beautiful Arlington National Cemetery.

I stand in deep humility before you today, realizing that words are not at my command to express to you my appreciation for what these men have done for me and for the rest of the world in the sacrificing of their lives that you and I should still enjoy the freedoms we now possess.

I know not whether any one of these men were members of this Great Order we represent here today but I do know that they did believe in and died for the great principles upon which this Great Order was founded 150 years ago. Yes, they believed in universal justice for all and they were imbued with a deep sense of responsibility, not only to their own country, but also to the world at large.

In paying tribute to them we are naturally paying tribute also to all those men and women who sacrificed their lives in both our country here and our friends and Brothers and Sisters of that great country of Canada to the north of us, where thousands of men and women in both countries gave their lives in the cause of justice and liberty. Certainly it is fitting and proper that we pause today and reflect upon those great responsibilities that rest upon us because of their sacrifices. At such a moment, I feel it is proper that we take inventory of our own lives and ask ourselves the question: Have I been the kind of Odd Fellow and Rebekah I should have been; have I done my all to prevent future happenings, such as we witness today, from happening again? Am I the proper type of citizen I should be? Am I doing all in my power to help bring peace to the world again by the way I live and teach and think?

This November marks the fifty-first anniversary of the armistice that brought an end to the First World War and that fact reminds us that history is not merely the story of great and famous men; it is also the story of men whose names are unknown, men who gave their lives on the battlefields of history, not to create new knowledge, not to disseminate new ideas, not to invent new machines or to bring about a new way of life, but to preserve from destruction the things that they knew in their own hearts were worth preserving.

When we come to modern times, the names of the wars come very fast: the American Revolution, the Civil War, the First and Second World Wars. But these do not represent contributions to progress by great men who saw deeply into the nature of the universe or invented the machinery that would lighten the burden of human toil or discovered new ways to cure disease. They are the deeds of ordinary men who were willing to defend with their lives the things that they knew were more precious than life itself. It is such men that we honor here today.

Yes, war is evil. It is, I am sure, the most obvious symbol in the world of the sin that infects the whole human race. Where else can one find massive and terrifying evidence of man's alienation from God and of his alienation from his fellow man? If one needs to be reminded of the dimensions of this terrible evil, one only has to look at a military cemetery such as this one here, or the one in Flanders Field or in Pearl Harbor or in any other theater of modern war where the crosses stand, row upon row, sometimes as far as the eye can see. Yes, these crosses are symbols of evil. Each one representing the snuffing out of a young life in the orgy of wholesale slaughter that is twentieth century war.

Nations, like fraternities, are only as strong as their members or citizens. These two nations whose unknowns and dead we pay trib-

ute to today have been built upon the character and ideals of us, their citizens. No country can rise above the ideals which are instilled into the hearts and lives of those who live within its boundaries. We, the members of the Independent Order of Odd Fellows throughout the United States and Canada, are proud of the fact that we are an integral part of two such nations and that the Independent Order of Odd Fellows and Rebekahs throughout the world subscribe to the same high standards and ideals for which we stand in these two great nations where we are privileged to reside.

Power of men as well as of nations can either be a blessing or an evil. How careful we all should be that power does not overcome the better things of life. The results of power of some men and nations are the results of what we are witnessing here today at the Tombs of the Unknown. But power can be just as powerful a factor for good as it can be for evil. We as Odd Fellows and Rebekahs should continue to use our power for the good of all mankind. Wherever want is found, let us be there to relieve it; wherever misfortune has struck, let us minister to the needs found, keeping in mind always that only because we have been given the great principles of Friendship, Love, and Truth, Faith, Hope, and Charity, and Universal Justice to all mankind to work with, have we gained this power needed to help build mankind. Let us use this power to our utmost, ever keeping in mind that in so doing, we are doing our part to help prevent more of what we witness here today, in this silent city of white marble stones. If you and I will do this, our Order will be a more powerful factor for the betterment of mankind and our influence for good will be recognized throughout the world to a greater extent than ever before.

No, it is not enough to honor these men with words alone. The only fitting monument that we can raise in honor of their sacrifice is the monument of peace. Twenty-eight centuries ago the Prophet Isaiah dreamed a dream. He saw the day when men would bend their swords into plowshares and their spears into pruning hooks; when nations would no longer rise up against nation; when there would be no more war. It is for you and me to translate that dream into a reality. Our faith tells us that there is only one God, who demands that our lives shall be ruled not by violence, but by justice. It tells us that there is only one human family and that all men everywhere are brothers because they are the children of the one heavenly Father. It tells us that reconciliation is real and that it can be brought about by means of the practice of love, friendship, truth, self-sacrifice, and forgiveness.

And so while we pay tribute to these heroes here today for what they did and sacrificed for the past, we must remember that it was not for the past alone that they died; indeed, they gave their lives for the future also—a future which can be realized only as we give ourselves as Odd Fellows and Rebekahs and citizens of our country to make secure the peace and freedom for which they died.

Yes, as we leave this silent city of the dead, we, too, must make a decision and pledge to these valiant men that they have not died in vain, that we as members of not only the greatest Fraternity in the world, but also as citizens of our various countries, will accept the challenges as they present themselves and, inspired by the example set forth by these gallant heroes, will do our utmost to maintain the principles for which they gave their all.

In order to accomplish this then, let us pledge ourselves as members of this Great

Fraternity to more effectively discharge our duties to our fellow man. Wherever suffering is found, wherever man is wanting a friend or the downtrodden a champion, there let Odd Fellowship be found and recognized. Only in this way can we do our part to bring peace and love back to a world for which these men died.

My Brothers and Sisters and friends, I am sure this is what these men would expect from us and certainly in my thinking, we owe them every consideration.

May God continue to bless each one of them as they now rest in peace and may we pledge our all to them that we too will do our best, giving our all, if need be, to protect that for which they died, should be our constant prayer. And as we leave this silent city and go our separate ways, may we do so with a greater determination than ever before to live and teach the principles of this Great Fraternity to a greater degree than we have ever done in the past and in so doing, do our part to help bring universal brotherhood to all mankind.

This, I am sure, would be the wishes of those to whom we pay tribute today, could they but speak to us. Let us pledge ourselves anew to those principles and ideals for which they died.

THE SMELL OF SUCCESS?

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. GONZALEZ. Mr. Speaker, the Washington Post this morning reported certain appointments recently made by the administration, and the reaction to those appointments by Texas Republicans. I have my doubts about these appointments, too, not because I expected anyone to consult me about them but because the choices reflect haste and expediency—and the results are beginning to show up.

I offer the following report for the edification of the House:

GOP IN TEXAS IS ANGERED BY NIXON CHOICES
(By Philip Wise)

SAN ANTONIO, TEX., May 14.—Texas Republicans are seething over two of the Administration's top level Mexican-American appointees.

President Nixon may well find one of them, who publicly opposed naming a Negro and Anglo to school posts in this Texas city prior to taking his top-level post in the Department of Justice, named in a civil rights suit.

Targets of the Texas Republicans and many astounded Democrats are Albert Fuentes Jr., special assistant to Small Business Administration Chief Hilary Sandoval, and Gilbert Pompa, just named assistant director of the Community Relations Service of the Department of Justice.

Fuentes has been accused in a sworn affidavit of agreeing to get a loan of up to \$200,000 for a small San Antonio businessman then operating an ornamental iron business out of his garage provided the businessman agreed to give Fuentes "and others" 49 per cent of his business. The sworn statement telling of Fuentes' activities was brought to light by Rep. Henry B. Gonzalez, Democratic Congressman from Bexar County.

Pompa, who somehow jumped over 22 Community Relations Service fieldmen in the Nation to the post paying about \$30,000 a year, came under fire when he led the attack against appointing a Negro and an Anglo to high summer school posts in the Edgewood School District in San Antonio

where he has been vice chairman of the Board.

Fuentes' case is under investigation, and Rep. Gonzalez has asked that he be suspended.

In the sworn statement released by Rep. Gonzalez, small businessman Emanuel Salalz, owner and operator of the E and S Sales Co. of San Antonio said he had been attempting to get an SBA loan to improve his business since early 1967.

He said a week before Easter he was called to a meeting where five other men, including Fuentes, were present. He said he was handed a research report made by assistant SBA administrator W. J. Garvin which saw "excellent prospects" for Salalz' business and recommended a program that would require a loan of \$40,000 to \$60,000 for Salalz. Garvin also included a second plan that would require a loan of \$200,000.

Fuentes, Salalz said, said the report could help him (Salalz) obtain a larger sum of money but that it would be necessary for Salalz to incorporate and "to pledge to them (Fuentes and the four others present at the meeting) 49 per cent of the corporation."

Salalz said Fuentes assured him it was all very legal, that he (Fuentes) was not going "to be here (with SBA) very long, and when I get out I have to have something to fall back on." He said the men present told him that if he didn't incorporate there would be no loan of the type suggested in the report.

The only person who has come to Fuentes' defense was a former liaison man for Rep. Gonzalez, Eddie Montez, who said it was he—not Fuentes—who suggested that Salalz incorporate and go for a bigger loan. Montez said neither Fuentes nor any of the others present was included in the 49 per cent proposal he made to Salalz.

Montez said Salalz came to him in 1968 and asked him to help him get an SBA loan, that he stepped in and asked Fuentes to help out since Salalz was threatening to contact his Congressman and put the pressure on by charging he was being discriminated against because he was a Mexican-American.

Pompa came under heavy fire from Republicans, Democrats, the NAACP and others, when he voiced opposition to putting a Negro vice principal and an Anglo principal on Head Start summer school administrations. Pompa heatedly told the school superintendent a Mexican-American, to find somebody with Spanish surnames.

The weird Edgewood situation happened thusly:

Edgewood School Supt. Joe Leyva, who has since quit, had recommended that Pauline Key, an Anglo principal in the district, and Blanche Russ, a Negro vice principal in the district, be appointed to head up, as they have in the past, summer school programs in the district.

Leyva, in making the routine recommendations, said both were "top-notch, highly efficient people."

Pompa, vice chairman of the board who was sitting in at this meeting as chairman, got the appointments blocked because the two did not have Spanish surnames.

Pompa, under heavy fire the next day when both Mrs. Key and Mrs. Russ announced they would file complaints with the Department of Justice charging their civil rights had been violated, weakly announced he was only interested in getting teachers appointed to summer programs who spoke Spanish and, therefore, could be understood by the children.

Supt. Leyva promptly shot back that neither of the administrative posts has contact with the children, mostly Mexican-American, enrolled in the program.

Gonzalez referred one of the teacher's complaints against Pompa to the Equal Employment Opportunities Commission and to the civil rights compliance sections of the Office

of Economic Opportunity, the Department of Health, Education and Welfare and the U.S. Commission on Civil Rights.

The situation grew so hot after Gonzalez stepped into the picture that the Edgewood School Board called another meeting and pushed through the appointments.

Some say Pompa, who had already tipped off newsmen he was going to a higher calling in Washington, got the emergency meeting called the day before Washington was due to announce his new post and to head off the complaints.

However, Mrs. Key and Mrs. Russ have employed Roy Barrera, a Mexican-American who was Secretary of the State briefly under Texas Gov. John Connally, to carry on the fight.

BECAUSE OF SURNAMES

Both Fuentes and Pompa soared to prominence in the Nixon Administration apparently on the basis of their Spanish surnames.

Fuentes had been a smalltime Democratic figure of sorts prior to jumping to the GOP in the early 1960s. He stepped in to head up the national Viva Nixon movement, apparently on the recommendations of Texas Republican Sen. John Tower.

Pompa has been a civil rights sleuth for the Community Relations Service for the Department of Justice since 1967. Prior to that he was an assistant district attorney in Bexar County for four years and an assistant city attorney for two years prior to that.

Fuentes jumped to the \$19,700 SBA post shortly after Hilary Sandoval, Mexican-American leader from El Paso boosted for the post by Senator Tower, won appointment as Small Business Administration director.

Notwithstanding the fact that both Fuentes and Pompa have been embarrassing to the Republican Party and President Nixon in Texas, Republicans also bemoan the fact that two longtime Democrats, Fuentes and Pompa, have thus far walked off with the only two plush posts steered this way.

The feeling among local Republicans is that there never was any need in Washington for either Fuentes or Pompa, that neither deserved to step over the head of longtime loyal Republican Party workers, that many far better qualified Mexican-American are available.

Telephones in the Bexar County Republican Party headquarters have been ringing away as loyal Republicans and others phone to express their astonishment over the sad state of affairs.

Old-line Democrats are laughing their heads off over all this "togetherness."

LET US UNITE BEHIND PRESIDENT NIXON

HON. ROBERT C. McEWEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. McEWEN. Mr. Speaker, President Nixon, in his quest for peace in Southeast Asia, has outlined a sensible plan which can lead to withdrawal of American and North Vietnamese troops from South Vietnam. It is my firm belief that the President has charted a course which is both realistic and reasonable to the North Vietnamese, the Vietcong, South Vietnam, and all Americans. Let us put partisanship aside, for war is not a partisan issue, and support the President in his dedication toward obtaining peace. It is important that Americans rally behind their President, for without the support of America itself, no U.S. Presi-

dent can effectively strive for the end of fighting and hold the full respect and regard of those foreign powers who can be instrumental in reaching that goal. A united America is a prerequisite for an Asia united in peace.

A GLIMPSE AT THE FUTURE: HOPE FOR "CALIFORNIA TOMORROW"

HON. GEORGE P. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. MILLER of California. Mr. Speaker, the science and technology of existing Federal land and water conservation programs, and existing urban renewal programs, can be utilized to control destructive pollution and to restore environmental quality that will promote healthy metropolitan and regional growth, according to a prominent California planning expert. Dr. Samuel E. Wood, consultant for California Tomorrow, delivered the 1969 T. I. Storer lecture at the University of California at Davis on the subject "Man in Ecological Crisis."

Dr. Wood spoke of the high caliber of the papers presented at the recent panel on science and technology and the cities conducted by our House Committee on Science and Astronautics.

Taking a speculative backward look from the year 1999 at California's current explosive population growth and environmental crisis, Dr. Wood postulates what will happen to our cities and rural areas, and then predicts an enlightenment and solution by coordinated Federal, State, and local action.

The exciting and hopeful story is told in the Sacramento Bee of April 30, and the proposal for legislative correction is outlined in a report of California Tomorrow, both of which I offer for publication in the RECORD:

CALIFORNIA FACES CONSERVATION CRISIS, BUT EXPERT SEES HOPE

DAVIS.—When many California's tomorrows have become yesterdays, what will historians write of the Golden State?

Conservationist and environmental planning consultant Samuel E. Wood advanced his own speculative review of the next 30 years in a talk last night at Davis titled, "The Challenge of the Future: Looking Backward (with hope) from 1999."

The address was the third of the University of California campus' T. I. Storer lecture series, dealing with "Man in Ecological Crisis."

"Although we can speak dispassionately in 1969 about the explosive population growth problems California faced following World War II, at the time they appeared to be almost insurmountable," he proposed.

POPULATION EXPLOSION

The push of rural poverty caused people from all over the country to flood the state, he explained, creating in California the greatest urban growth of any other state in the union. Two giant clusters formed, one in the north and one in the south, as the exploding population spilled out onto open spaces and packed into urban cores.

"One of the problems that caused concern," he claimed, "was the grave loss of open space resulting from unguided location and haphazard development in urban areas—the very

open space that made modern urban living possible."

The shorelines of rivers, harbors and lakes were dredged, drained and filled, bulldozers leveled the hilltop and the San Francisco Bay was threatened with imminent destruction, he observed. Two hundred thousand acres of prime farmland disappeared each year beneath the sprawling cities, forcing the cultivation of less fertile lands and an inflation of prices.

RECREATION PUT DOWN

Wood detailed how the competition for land use relegated recreation to the lowest rung. The Division of Highways, the local "put-it-on-the-tax-roll cult," the real estate developers and the parking lot pavers all coveted potential park sites.

"Californians were standing in line to use boats, surfboards, fishing rods and their campers, trailers or sleeping bags," he visualized. "Families who had traveled all day and half the night ended up in a recreation slum, with overcrowding, water pollution, fire danger, unsanitary conditions, and the general destruction of its recreational value."

Government still refused the responsibility of planning and paying the price of pollution control, according to the environmental planning expert. Pollution was such a characteristic aspect of the state's development that it was accepted as an "inevitable by-product of growth," he commented.

The Great Central Valleys became a huge smog pot, and the capital city was more toxic than Los Angeles because the city fathers and the Division of Highways "routed every freeway in the state directly through Sacramento."

The University of California spent millions in developing pesticides, herbicides and fertilizers, but paid scant attention to the effects of these substances on the landscape or on man himself, he remarked. These poisons were dispersed throughout the environment and concentrated in many organisms with lethal results.

"Bees, cows, prunes, almonds and the investments of their owners were promptly protected, but not man," he asserted.

Unregulated, uncoordinated waste disposal soon overwhelmed the capacity of inland waters and created a menace to public health, he continued.

IRREVERSIBLE FORCE

"We were massively tampering with the world of nature without concern for the biological results until they irreversibly forced themselves upon us," he emphasized.

Wood diagnosed what he felt was the failure of local government to adequately treat environmental issues. He alleged that local leaders were too involved with making money out of their decisions and hid behind self-serving planning commissions. Many of the problems extended far beyond the boundaries of home rule.

Cities were created to serve special purpose, including commerce, tax evasion and luxury. In many cases the white middle class incorporated and zoned primarily to keep the Black man out, he asserted.

TAX SHELTERS

Federal and state policies also favored random, unbridled development, according to Wood, through tax shelters. Federal money was spent on massive military and public works projects with little regard for regional needs, he claimed. Esthetics were simply ignored.

The enlightenment finally came in the 1970's, he proposed. Public reaction to the horrendous effects of uncontrolled growth generated pressure from the neighborhood, metropolitan, state and national levels. The President took up the cause and Congress finally made environmental quality the law of the land.

With the impetus coming from the federal government, comprehensive rural and urban policies were developed, Wood declared. Areas

were reserved for urban open space, agriculture, watersheds and recreation, with all federal grants to the state conditioned upon the protection of these lands, he said.

REGIONAL DEVELOPMENT ACT OF 1969: A PROPOSAL BY DR. SAMUEL E. WOOD, CONSULTANT, CALIFORNIA TOMORROW

The purpose of the legislation is to utilize existing federal land and water conservation and development programs, and numerous federally supported urban programs, in order to develop entire regions. Each regional development program would be funded by long-term, low-interest federal loans following Congressional authorization of the total regional development program. This would combine all existing federal aided or funded programs in an integrated plan to develop entire basins or regions, and in the process to create new and redeveloped urban areas of controlled size, establish and maintain open space and amenities, and use and maintain the regions' natural resources of air, water and land. The total program would be portrayed in a coordinated regional plan prepared by a public regional agency. The functional areas in each regional development program would include land and water conservation and the development and distribution of water; agricultural aid programs; urban planning; urban renewal and redevelopment; new cities and model cities; open space and parks; and pollution abatement and control.

Regional accounts for each functional area, covering total public and private contributions to gain the goals of the development program, would have to be created and maintained. Cost and benefit studies, including present federal grant and loan programs and interest arrangements for each functional program area, would be prepared. Present reimbursable and nonreimbursable cost factors would also be a part of these evaluations.

All the functional areas would be totaled to get a total economic feasibility analysis upon which authorization would be requested from the Congress. Low interest rates, similar to those currently used in federal projects of Interior and Agriculture, and long-term amortization periods related to the determined life of the development program would be provided. Repayment schedules would vary with each functional area in the manner of present repayment policies in that area. But these variations would be explained in the authorizing document. A total repayment schedule extended over the life of the program would also be part of the document. The authorizing legislation would stipulate the contract relationships required by the regional agency and the United States.

The legislation would provide standards on the design and powers of the regional agency which would assure its adequacy to carry out the development program and repay the total reimbursable costs.

Planning and economic evaluations leading to a Regional Development Program and its authorizing document would be funded by a federal loan and included as part of the total cost to be repaid only on program authorization. Each year following authorization of the program, funds would be appropriated by the Congress to further program progress. Initial appropriation should be sufficient to pay total cost of all the land needed by the development program and these lands should be acquired all at one time under mass condemnation. When total development appears to be not justified economically, yet is socially important or economically desired for a depressed area, or vital to the development of the state, the net cost of the program could be shared by the federal government and the state involved, as provided in the authorizing legislation.

The following agencies and their programs could be included, among others, in the land and water conservation and development features of the regional development program:

Soil Conservation Service, Department of Agriculture, Army Corps of Engineers, Bureau of Reclamation, Fish and Wildlife Service, National Park Service, Bureau of Land Management, Bureau of Outdoor Recreation.

The following agencies are among those which could take part in a coordinated urban construction and reconstruction program:

The Department of Housing and Urban Development (programs covering renewal, redevelopment, planning, grants, public facility loans, housing loans, mortgage insurance), the Department of Transportation, the Army Corps of Engineers, the General Services Administration, the Bureau of Public Roads, the Economic Development Administration, the Area Redevelopment Administration, the Small Business Administration, the Atomic Energy Commission, Public Health Service, Federal Aviation Agency, the National Air Pollution Control Administration, and the Federal Water Pollution Control Administration.

JUSTIFICATION FOR THE REGIONAL DEVELOPMENT ACT OF 1969

We have been unable to build new cities and restore old ones because of piecemeal, small-scale approaches, scarcity of money, high interest rates, generally unimaginative and uncoordinated federal programs. None of our urban and resource development programs extends over an entire region, both rural and urban areas, to restore and maintain the best of both, and use full regional accounts to attack simultaneously problems of both the countryside and the city. Some 40 or 50 different federal agencies (and an equal number of state agencies) are now involved in the country and city environments in uncoordinated single-agency approaches.

The legislation we suggest here would provide viable regional agencies which could develop coordinated programs, adequately funded at reasonable interest, to institute integrated programs for entire regions. A consolidated feasibility study covering all the functional areas would permit the better paying elements to help support the financially weaker, yet socially and economically necessary projects. The problems in one part would be tied to the economic resources in another part of a region to solve those problems. Public subsidies such as lower interest rates and grants, now available for special interest projects, would work to the regional benefit and the reimbursable costs, as they are now in most of these programs, would be self-liquidating.

In this proposal, we apply and expand the principle of massive yet reimbursable funding, now utilized in the Departments of Agriculture and Interior mainly to solve agricultural problems, to meet our critical urban problems of growth. These proven programs have built hundreds of multipurpose projects in the West, costing billions of dollars yet repaying the government and returning more than their cost to the regions involved. Loan, grant and repayment plans put hundreds of billions into our rural areas through conservation and crop-guarantee programs. With over 80 percent of our people now living in urban areas, it is time we apply what we have used historically in rural areas to save our urban regions and countryside.

TAX SHELTER IN THE SKY

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. SAYLOR. Mr. Speaker, as the American tax revolt grows, and as more and more people start to wonder how

the superaffluent can get away without paying their fair share of taxes, it was only a matter of time before some enterprising journalist would open up the books on the "ways and means" of avoiding taxes. Mr. Lee Berton, writing in the summer issue of *VIP* magazine, has taken up where the former IRS Commissioner left off, and revealed how easy it is to avoid taxes—if you only know the angles.

Berton's article, "That Great Tax Shelter in the Sky," is probably one of the most fascinating studies in high finance that it has been my pleasure to read. You will recall that we have been continually bombarded with the fact that a number of millionaires avoided personal income taxes altogether, now we can see one way it is done: lease an airplane, or a locomotive or an oil tanker, or a computer. According to Berton:

... In the long run it won't cost you a cent. In fact, investors have made as much as 100 percent return on such an investment every year, and the risk is fairly small.

The intricacies of the deals are explained in the article but more important, and understandably, the author states:

Up to now ... Wall Street hasn't been particularly anxious to bruit about that it is active in this kind of leasing business—nor have members of the accounting and legal fraternities. "There are just so many of these deals around, so why should I give everyone blueprints on how my rich clients reduce their taxes?" growls one C.P.A. in his Park Avenue office.

Those versed in high finance and tax-avoidance schemes will most likely be very sorry that this article has appeared, but, Mr. Speaker, I think the Members of Congress, who must answer their constituents' day-in and day-out pleas for tax relief, should be very thankful that part of the door has been opened on this type of income tax avoidance.

I am particularly hopeful that members of the House Ways and Means Committee and the Senate Finance Committee read this article, with all its implications for tax reform. I have appended the full text of the article to my remarks in order that all Members of Congress can benefit from the lessons it imparts:

[From *VIP* magazine, summer 1969]

THAT GREAT TAX SHELTER IN THE SKY

(By Lee Berton)

Picture yourself relaxing comfortably in a first-class seat on a Boeing 727—80,000 tons of power and luxury gliding easily through the clouds en route to the Bahamas. While you're at it, visualize yourself *owning* the 727; after all, it only costs \$5,000,000. No, the stewardess hasn't given you too many martinis. This is no fantasy, but a hard-headed business deal. You can own a 727—at least part of it—and in the long run it won't cost you a cent. In fact, investors have made as much as 100-percent return on such an investment every year, and the risk is fairly small. All you have to do is work your way up to—or already occupy—a tax bracket somewhat over 52 percent. In the last few years, a handful of smart investment advisors, on Wall Street and elsewhere, have figured out how high-bracket taxpayers can make money buying jet planes or million-dollar locomotives. Admittedly, the schemes call for sharp business acumen—and solid contacts in the executive suite. Ford executive Lee Iacocca is doing it. And so is Rich-

ard A. Smith, president of Boston-based General Cinema Corp., which operates drive-in theaters in fancy suburban shopping centers. Your doctor, if he's a well-off specialist, may also be involved. The wonder of owning a jet or a locomotive (or an oil tanker or a computer), besides its immense value, is that it wears out. The Federal Government permits taxpayers to deduct this wearing out, called depreciation, from their taxable income—it's treated as a cost of doing business. In 1962, to create extra incentive for investment in the expensive machinery that keeps the U.S. economy growing, Congress gave business an added windfall. If a company buys a jet, a locomotive or any other tangible personal property, it is now permitted to deduct 7 percent of the cost directly from its income taxes. Not just from taxable income, mind you: from taxes themselves. It's called a tax credit and it's a very nice thing to be able to attach to your tax form. It's also a big part of the reason you may be able to own an airplane or a railroad car one of these days—or part of one, anyway.

Corporations currently pay about half their profits to the Government in taxes. (They pay even more, counting the "temporary" tax surcharge, which hasn't been included in these calculations, though its effect for individuals is to make leasing deals even more attractive.) The higher-bracket taxpayer—that is, the individual who doesn't have the benefit of the corporate tax limit—must give up to 70 percent of his income back to the Government. Any amount he earns over \$200,000 annually is taxed at this maximum rate.

This sounds like a big drawback to building up a bundle of cash, but the truth is, in the deals we're talking about, where high-bracket individuals own jets or locomotives, it's a decided advantage. Here's why: Depreciation deductions from your income, if you're taxed at the 70-percent rate, give you a much bigger tax saving than a corporation can get. Suppose depreciation on equipment you've bought amounts to \$500,000. You save yourself the taxes on that half-million, which in the 70-percent bracket amounts to \$350,000. A corporation would save only \$250,000 on the same half-million in depreciation, since its tax rate is around 50 percent. The \$100,000 difference—needless to say—is sizable. Typically, you would split the \$100,000 saving with the company you lease to. But that's still \$50,000 a year extra that you could invest in other income-generating projects or securities. It may sound as if you need a huge pile of cash to initiate such a deal, but actually, you don't. Whatever amount is needed, chances are you can borrow most of it. On a million-dollar deal, for instance, you could put up \$200,000 and borrow the rest from a bank or an insurance company, using the solid value of the purchase—and the solid reputation of the company that will lease from you—as collateral. Then the interest you pay on your loan is deductible from your income—so in effect, the Federal Government foots 70 percent of your borrowing costs. If you lack \$200,000, find ten investors like yourself and each could ante up only \$20,000. After the leases expire in 15 years, the machinery, for whatever it's worth, belongs to you and your partners. There are a few hitches, however. In a typical leasing deal, the rent you receive from the lessee begins to exceed your diminishing depreciation and loan interest after about five years, giving you taxable income. You can then go into another leasing deal, again deferring taxes, or you can have built up a kitty of money (perhaps by investing your tax savings in tax-exempt municipal bonds) to pay the taxes you'll owe when the income from the deal begins going into the black. The Internal Revenue Service has begun to attack loan interest deductions for people who invest in tax-exempt municipi-

pals, but this problem can be avoided by investing in ordinary stocks and bonds.

At the end of the leasing period, what remains in the kitty is all yours, plus what you receive from selling the equipment. This can still have enormous value. Although the Internal Revenue Service permits you to depreciate the entire value of a railroad car, for example, over a 14-year period, the Interstate Commerce Commission estimates the same car will last 30 years. So by ICC standards there's a lot of value left in that car after the IRS says it's worn out. Aviation trade papers have reported that some airplanes ten years old (or even older) have been selling for up to 70 percent of their original cost.

Here's how a specific deal works for a Boeing 727. You put up \$1,000,000 in cash, borrow the other \$4,000,000 from a bank at 8 percent (or more—these days the prime interest rate is skyrocketing), and lease the plane (for 15 years) to United Air Lines—which, as it turns out, leases 40 of its 727s, mostly from high-tax-bracket individuals like yourself. United pays you rent of \$460,000 a year for 15 years. This sum covers your payments to the bank for principal and interest on your \$4,000,000 loan, but it still reduces the annual cost of the plane to United to a rate that effectively amounts to 6 percent instead of the 8 percent it would have to pay if it borrowed the entire \$5,000,000 itself. United is thus saving \$80,000 in interest on the 727 and avoiding tying up additional capital.

And you do even better. The "losses" you sustain from depreciation (accelerated in this case, as permitted by accounting rules, so that 15 times more is deducted from your income the first year of the lease than the last), together with the above-mentioned 7-percent tax credit, give you enough red ink on your income statement to return your million dollars to you in four years, in tax savings you would otherwise pay on your ordinary income. The tax-erasing benefits diminish each year of the lease—in fact, in the later years you actually pay more in taxes than you receive in money—but over the 15-year period your original investment could triple if you were able to invest the savings each year in tax-free municipal bonds.

If you continue to enter new leasing ventures each time old ones begin producing taxable income, or if you invest your tax savings in the stock market so as to produce long-term capital gains (which are taxed at only 25 percent), some leasing specialists estimate you can produce combinations that double your investments each year. More conservative arrangers of such ventures prefer to point out that by using the municipal bond-kitty ploy (keeping in mind the earlier warning about IRS attacks on this method), you can earn 4 to 6 percent, compounded annually after taxes, on a 15-year airplane lease. That's without considering the value left in the plane after it's fully depreciated for tax purposes. Counting the proceeds when you sell the old plane, they estimate, you might raise that annual yield to over 7 percent.

If that figure sounds piddling, remember that it's *after taxes* and compounded annually. For a 70-percent-bracket taxpayer, raising the after-tax yield from any investment to a figure over 5 percent (the current yield on most municipal bonds) is a minor miracle.

All this may sound esoteric and complex, but the beauty of these ventures is that experts can set them up for you, do all the figuring, and charge 2½ percent (or less) of the equipment's cost as commission—which is, also deductible from taxable income—so the Government again foots 70 percent of the bill. Several large and well-established Wall Street investment houses—Kidder, Peabody & Co. Inc.; Kuhn, Loeb & Co.; Salomon

Bros. & Hutzler; and Lazard Freres & Co.—have special departments to handle just such deals for special clients. Up to now, however, Wall Street hasn't been particularly anxious to bruit about that it is active in this kind of leasing business—nor have members of the accounting and legal fraternities. "There are just so many of these deals around, so why should I give everyone blueprints on how my rich clients reduce their taxes?" growls one C. P. A. in his Park Avenue office.

William J. Condren, a shrewd New York City attorney who recently moved from a cramped, one-room office on Madison Avenue to palatial five-room digs in the new, all-marble General Motors Building overlooking Central Park, is considered a genius in the field. Flanked by a new partner whom he recently lured away from Lazard Freres, Condren is amiable to visitors but tells them little unless he's convinced they're serious investors.

To avoid too much publicity, Condren fulfills legal requirements that notice of limited-partnership leasing ventures must be published in a newspaper by placing notices in the classified section of the *Manhasset Mail*, a Long Island weekly with a lofty 3000 circulation. Perusal of these notices reveals actual names of participants, such as Dr. Milton F. Gutglass of Milwaukee, who in 1968 was one of 35 partners who purchased 12 diesel locomotives (from General Motors) and 22 other locomotives (from General Electric) and leased them all for 15 years to the Penn Central R.R.

Dr. Gutglass says his accountant told him about such ventures two years ago. He has put up \$50,000 and says he will make "a nice return that is considerably free of risk, and gives me ownership of equipment that, unlike real estate, doesn't decline in value if a gas station opens next door."

Lee Iacocca, the Ford executive who owns part of some railroad rolling stock, says he believes income-tax rates progress so sharply upward in high brackets (the top rate is 70 percent today, compared with only 25 percent in the late 1920s) that it's essential for big earners like himself to seek such tax shelters. And Richard Smith, the Boston movie-theater magnate who with 60 other partners formed Elk Grove Equipment Co. to lease jets to United Air Lines, says his \$50,000 investment will be returned to him in three years through tax savings—and he hopes to make a "healthy profit by the end of the lease term." There are no alternative forms of investment that are as attractive in terms of yield, he says.

The lure of the leasing game is such that the youngest, brightest practitioners of the money game along the Street are getting into it. Two neophyte vice-presidents and an investment analyst with the financial district think-factory of Donaldson, Lufkin & Jenrette Inc., for example, recently struck out on their own to form Harlan, Betke & Myers, a new investment firm to be housed in the prestigious Bankers Trust Building on Park Avenue. They are making the arrangement of leasing ventures one of their specialties. Harlan, a Harvard Business School graduate who is at 32 the oldest of the trio, says his firm "wants to show swingers how to best manage their assets." Some bright young specialists at Lazard Freres, an eminent name in the investment world, named Suemeg Company—a firm they set up to lease highway trailers to trucking firms—after two cute airline hostesses they met on a flight to Chicago.

There's really no way of knowing just how widespread the leasing game has become. United Air Lines notes that it leases 62 of its 330 aircraft, two of them from Elk Grove Equipment. And Penn Central says it leases 912 of its 4128 locomotives. Both concede that rental payments cost less than other types of financing, but provide few details—because such deals are so competitive.

However, it is known that a partnership of 67 investors called Buffalo Grove Air Equipment Corp., formed in 1967 with the investment advice of Bill Condren, bought three jetliners worth \$13,500,000 and is leasing them to United. At the time of the purchase, U.A.L. would have had to pay 5½ percent or more in interest on the \$10,000,000 or so it would borrow from banks or insurance companies to buy the planes, after making a down payment of some \$3,000,000 as Buffalo Grove did. But by leasing the jets, United's annual effective "interest" rate—actually a rental fee in this instance—was, for all practical purposes, reduced to 3.76 percent (a "steal" in the borrowing market). Even so, the 67 partners, who invested from \$25,000 to \$125,000 each, will wind up very big winners in the long run, especially if the three jets retain much of their present value.

One Wall Streeter knowledgeable in the art of leasing, estimates that about 25 billion dollars in personal property (aside from real estate) has been leased to railroads, airlines, oil companies, trucking firms and other corporations in the last five years. More leasing ventures are being put together each month, enabling individuals who would otherwise pay through the nose to defer huge gobs of taxes. As long as taxes are deferred each year, the wealthy investor continues to build his portfolio without being penalized in tax charges. On the distant day of his death, his total holdings are subject only to estate and inheritance taxes—and in the meantime they have escaped the merciless annual bite of the IRS. Besides, there's the prevalent belief on Wall Street that an investor should protect his portfolio *this* year, "because next year is always a bust." If the shelter saves you from paying taxes now, when you're really making it, why worry about next year? Live a little. Take a trip to the Bahamas.

LEGISLATION TO EXTEND THE VOTING RIGHTS ACT OF 1965

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. THOMPSON of Georgia. Mr. Speaker, a subcommittee of the Committee on the Judiciary has begun public hearings on H.R. 4249 and other measures designed to extend the Voting Rights Act of 1965 in its present form without change. I have filed with that committee a statement urging that the committee not approve bills to extend this law 5 more years without amendment, but to consider instead drafting legislation that would provide voting rights protection for all Americans in all States and would treat all States equally in the qualification of their electors.

This matter is of such importance because of the injustice that would be done to my State and others through the extension of this law for 5 years without change, that I ask permission of the Speaker to insert the full text of my statement to the committee into the RECORD with extraneous exhibits attached so that all the Members may have an opportunity to examine it. After doing so, I am convinced that they will agree with me that any voting rights legislation passed by the 91st Congress should give all Americans in all States equal protection in voting rights and treat all States equally under that law.

TEXT OF STATEMENT BY GEORGIA CONGRESSMAN FLETCHER THOMPSON FILED WITH SUBCOMMITTEE NO. 5 OF THE COMMITTEE ON JUDICIARY ON WEDNESDAY, MAY 14, 1969, AT PUBLIC HEARINGS ON H.R. 4269 AND RELATED MEASURES TO EXTEND FOR 5 ADDITIONAL YEARS THE PROVISIONS OF THE VOTING RIGHTS ACT OF 1965

Mr. Chairman and members of the committee: I appreciate the opportunity to file with the Committee this statement to express to you my concern about the need for legislation to protect the voting rights of all Americans and to treat the citizens of each and every state equally under the law in this regard.

In my judgment, as this Committee begins its consideration of H.R. 4269 and related measures to extend the provisions of the Voting Rights Act of 1965 for five additional years, you have the responsibility to give the American people forthright answers to a number of serious constitutional questions. These questions are as follows:

Will the 91st Congress provide full protection of voting rights to every American citizen no matter where he lives?

Will we formulate a statute which treats equally each and every state in this nation with respect to the qualifications of their electors?

Will we draft a bill that recognizes the fundamental presumption of innocence of voting rights discrimination, rather than one which presumes guilt under certain circumstances until innocence is proven?

Will we put together a voting rights law for the future that takes into consideration the presence in many states of large numbers of military personnel who vote by absentee ballot in other states?

Will we draw up a bill which gives to a state's political subdivisions which are innocent of voting rights discrimination the right to remove themselves from the penalty provisions of any law intended to apply only to those who are guilty of discrimination?

Will we draft a bill that recognizes the progress made in voter registration and participation in the states between 1964 and 1968?

And will we, Mr. Chairman, remove from the states and political subdivisions the onerous burden of having to go to the trouble and expense of bringing suit in the federal court in Washington, D.C., to clear themselves of presumed guilt of voting rights discrimination?

Mr. Chairman, I submit that these questions cannot be answered forthrightly by merely extending for another five years in its present form the inadequate, contrived and unfair provisions of the Voting Rights Act of 1965. To extend this law without giving consideration to the injustices being done under its language in the name of protecting voting rights is to sanction the denial of fairness to those states and political subdivisions now affected by it that are innocent of discrimination, and to demonstrate your refusal to provide Americans everywhere equal protection of voting rights under the law.

H.R. 4269, by Mr. Celler, and H.R. 5538, by Mr. McCulloch and others, fail to correct any of the wrongs inherent in the present law. They merely extend all provisions of the law without change for five more years. It is, therefore, my purpose in filing this statement, Mr. Chairman, to endeavor to persuade this Committee to acknowledge in advance the error of approving these bills to extend the law as it is presently written, and to urge you to adopt instead legislation that will give all Americans and all states equal protection and equal treatment on voting rights under the law.

I. PROTECTING VOTING RIGHTS OF ALL AMERICANS

In my judgment, it is fair to state that every Member of Congress will support a

voting rights bill that will protect the rights of every American, if that legislation gives preference to none, provides protection for all and treats each state on the same basis.

Those of you who participated in the debate on the present law four years ago can recall the bitter and acrimonious controversy which arose because the effect of this legislation is to divide the states of this nation into two groups. The first group of states are those which as of November 1, 1964 maintained tests or devices with respect to the qualification of voters and which at the same time had either less than 50% of their citizens of voting age registered to vote or had less than 50% voting in the 1964 Presidential election. The second group of states is made up of all other states. Therefore, Mr. Chairman, when the law first went into operation—and before any state or county brought legal action to be removed from its application—it applied only in the states of Alabama, Alaska, Georgia, Louisiana, Mississippi, South Carolina and Virginia and in one county in Idaho, one county in Hawaii, four counties in Arizona and 40 counties in North Carolina.

The operation of this law has further emphasized the different treatment states in each group receive under the present law. States in the first group must qualify electors based on their completion of a sixth grade education; the second group of states qualifies voters according to local provisions of the law. The second group of states can require literacy tests if more than 50% of their citizens were registered or voting in 1964, but states in the first group cannot. The second group of states can require voters to be of good moral character; the first group cannot. Previously disenfranchised electors in the first group of states have immediate redress under the law, while disenfranchised citizens living in the second group of states do not.

Mr. Chairman, we cannot justify having another five years of the unequal treatment of American citizens and unequal treatment of the states which results from the contrived and artificial formula in this law that effectively ignores the results of the 1968 Presidential election. The simple substitution of the results of the 1968 Presidential election would eliminate from the provisions of this law all but two of the states now affected by it which have not been exempted by court order. Yet, H.R. 4269 and H.R. 5538 do not even give the simple justice of recognizing four years of advancement in voter participation and registration. These bills would punish my own state and the others now affected by its provisions for the Presidential election results of five years ago and would continue that punishment for another five years.

Mr. Chairman, when the Chairman of the Committee on the Judiciary announced the beginning of these hearings, it was stated in the Congressional Record that "there is a substantial danger that if the prohibition of the Act on literacy tests and similar devices is permitted to expire in 1970, the conditions which existed prior to the statute's enactment would return." I deeply resent such a prejudgment of discrimination in voting rights not only on behalf of my own state but on behalf of the citizens of every state who have been or are being victimized by the unbalanced and discriminatory provisions of the present law. Where is the danger of which he speaks? I submit that it exists only in the mind of the speaker. For an individual to prejudge guilt in advance on unrealistic circumstances is bad enough; but for the Congress to presume such guilt and carry that presumption into the written language of the law for five more years is unthinkable. It would be unjust in the extreme to punish my state and those others now affected by this law for another five years.

I say to this Committee with every ounce of strength and conviction in my being that if there is any need for protecting voting rights of American citizens in the future, then that need exists on behalf of every citizen in every state in this nation. If there is to be equality in the eyes of the law, if there is to be equal treatment under the law, then Congress has an obligation to blend that theory of equality into the language of its enactments and never sanction unequal treatment or unequal protection.

II. UNEQUAL TREATMENT OF THE STATES

The Members of this Committee will recall that the "trigger" section of the Voting Rights Act of 1965 involves a combination of two out of three circumstances. If any combination of two out of three circumstances exists, then a state or political subdivision brought under this law through findings of the Attorney General and the Director of the Bureau of the Census is unable to follow practices or provisions of local law which are perfectly legal in other states.

The legislative history of the enactment of this provision, in my judgment, demonstrates that this law was specifically drawn to apply to a few states and to exempt others. We know that a person who sets out to accomplish certain goals through legislation may arrange language in several different ways to accomplish his purpose. The Honorable Howard (Bo) Callaway, who was Georgia's first Republican Congressman in modern times, pointed out in the debate in 1965 one of the alternate formulas which could have been used to make this law apply to all but two of the states now under it. If, for instance, the formula applied to all states with an average altitude of 100 to 900 feet, with an average yearly temperature of between 68 and 77 degrees, with an average humidity at 7 a.m. of 80% to 87%, and with a coastline of between 50 and 400 miles, only Alaska and North Carolina among those states now policed by this law would have been exempted.

Let me demonstrate further the unequal treatment that exists under the present law. In 1964, the State of Texas had only 44% of its citizens voting. However, because Texas had no literacy test or other device in existence on November 1, 1964, Texas escaped the law even though the records of the U.S. Supreme Court show that that state has a long history of voting rights discrimination. The State of Louisiana had a higher percentage of people voting than Texas—47.3%—but because it used a literacy test, Louisiana came under the law.

Texas in 1964 had 137 counties with less than 50% of their citizens voting in the Presidential election. Meanwhile, Alabama, with 67 counties, had only 18 which had less than 50% of their citizens of voting age voting. Yet, because Alabama used a literacy test, the entire state was condemned and Texas again escaped the law.

Further, Texas in 1964 had a poll tax while my own State of Georgia abolished the poll tax in 1945. Texas had a percentage of persons voting in 1964 only 1.6 percentage points higher than Georgia (44.4% to 43.0%) and yet because Georgia utilized a literacy examination whereas Texas did not, my state came under the law and Texas again escaped.

The State of New York in 1964 had a literacy examination. So did my own state, but because New York had 62.3% of its citizens voting in the 1964 Presidential election and Georgia had only 43%, New York escaped the provisions of the law while my state was brought under it.

And no one has ever made the accusation that the State of Alaska discriminated against its citizens on the question of voting rights. But because Alaska maintained a test for the qualification of its electors and because weather and other factors brought

about a low participation of voters in 1964—48.7%—Alaska was brought under the Act. Likewise, no one ever accused Elmore County, Idaho and four counties in the State of Arizona of discrimination. Yet, because of peculiar circumstances which kept down voting participation in those areas, they were presumed by the law to be guilty of discrimination and had to go to court to prove their innocence. One of Arizona's counties—Yuma—is still under the law.

Arkansas had only 49.9% of its citizens voting in 1964, but there was no literacy test and Arkansas escaped. Meanwhile, North Carolina had an overall average of 51.8% of its citizens voting but because she had a literacy test and some counties fell under the 50% figure, they came under the law. Yet, Tennessee had 22 out of 95 counties with less than 50% of their citizens voting but because Tennessee had no literacy test, it did not come under the law. And in South Carolina, where the Attorney General stated "there was not one charge of discrimination" against Negroes, the state came under the law because of the contrived formula that exists.

Mr. Chairman, the most elementary sense of fairness demands that this unequal treatment of the states with regard to the qualification of the electors not be allowed to continue.

III. WRONGFUL PRESUMPTION OF GUILT

How can we justify continuing for another five years a law which ignores one of the most fundamental principles of the American system of jurisprudence, which is the presumption of innocence until guilt is proven? This Committee is asked, however, to extend a law for five more years which presumes guilt based on figures which have already been wiped out by history and which experience shows result in unequal treatment of citizens and states under the law.

At the time of the passage of the Voting Rights Act, 21 states had some form of literacy test or device regarding the qualifications of prospective voters. Those states are shown in Table I attached to this statement in the Appendix.

Also submitted in the Appendix are the specific provisions of the laws of those states which have been deemed to be a test or device within the language of the statute.

At the same time, the Director of the Bureau of the Census determined that certain states or political subdivisions had less than 50% of persons of voting age voting in the Presidential election of 1964. They are shown in Table II of the Appendix.

Shown in Table III is a listing of states or political subdivisions, excluding specific counties in Idaho, Arizona and North Carolina, which had under 50% of their citizens casting votes in the 1964 Presidential election and those percentages.

However, because of the peculiar combination of circumstances required by the law, the Act does not cover the District of Columbia, Arkansas or Texas.

In the 1968 election, some states or political units still had under 50% of their population of voting age casting votes in the Presidential election. They are shown in Table IV. However, two of these four states or political units are exempted from the law.

If the participation in, or registration for, the Presidential election of 1968 was made the basis of the "trigger" section of the Voting Rights Act, then certain states as shown in Table V which had literacy examinations in 1964 would automatically be removed from the provisions of the Act.

IV. PRESENCE OF NONVOTING MILITARY PERSONNEL

During the debate on the passage of the Voting Rights Act of 1965, many Members of Congress tried without success to point out a glaring defect in the law, in that it fails to take into account the presence in

many states of large numbers of military personnel and their dependents who normally do not participate in local elections but who do cast votes by absentee ballot in their own states. Alaska, for example, has approximately 250,000 residents among whom are more than 30,000 servicemen and their dependents. Yet, because the law includes these people among the total number of persons of voting age residing within that state, the percentage of persons counted as voting in the Presidential election is driven down and thus in 1964 Alaska is shown as having only 48.7% of her residents counted as voting in the election, and she was under the law until excluded by court order.

Likewise, Elmore County, Idaho, where Mountain Home Air Force Base is located, had a population in 1964 which included more than 4,900 military personnel, some 2,400 military dependents and 350 civilians who were counted among the citizens of voting age. This resulted in less than 50% of the total number of persons of voting age being calculated as participating in the 1964 Presidential election. Idaho has a provision of law which denies voting rights to prostitutes. The U.S. Attorney General defined it as coming within the provisions of the law regarding literacy tests or devices and, therefore, Elmore County, Idaho was brought under the 1965 Voting Rights Act and had to go to court to gain exemption.

Honolulu County, Hawaii is also a large military area and is likewise affected in its percentage of voter participation by the presence of military personnel who are included in the total number of persons of voting age in the area. And, because the State of Hawaii had a literacy test and because of the low turnout of voters in 1964, Honolulu County, Hawaii—where no charge of voter registration discrimination was involved—came under the law.

It is also significant, Mr. Chairman, that in the entire U.S. the average percentage of military personnel in state populations is 1.6%. Every state which comes under the provisions of the Voting Rights Act as a whole, excepting only Louisiana and Mississippi, has more than the national average percentage of military personnel within their borders. My own State of Georgia, for example, has 3.4% compared with the national average of 1.6%; South Carolina has 3.3%; Virginia has 3.3%; and Alaska 13.9%.

So that the Committee may give consideration to these figures, the listing of the states affected by the law and the percentage of military personnel within the populations of those states are shown in Table VII.

V. TREATING POLITICAL SUBDIVISIONS SEPARATELY FROM STATES

Another glaring defect in the present law is that when there has been a determination made by the Director of the Bureau of the Census and the Attorney General that the necessary factors exist in a whole state to bring it under the Voting Rights Act, then each and every political subdivision within that state comes under the law. This is true even though no discrimination may be involved in each subdivision. There is no way under the present law for those political subdivisions to go to court and remove themselves from the provisions of the law. The states have that right where the state had been treated as an entire unit, but the same right is denied to counties of that state where the determination was made as to the state as a whole unit. I submit to the Committee a letter attached in the Appendix from the Justice Department which verifies that this is a correct interpretation of the law and that there is no way for a political subdivision which is innocent of voting rights discrimination to remove itself from jurisdiction of the law when the initial determination has been made with respect to the state as an entire unit.

Mr. Chairman, I urge that a county or

political subdivision ought to have the same right to prove its innocence of presumed guilt in court as a country or state which had been treated as a separate or whole unit has the right to do so.

VI. PROGRESS SHOULD BE RECOGNIZED

Let me state further, Mr. Chairman, that I recognize each of us is influenced in his judgment by circumstances in the area where he lives. It is with a sense of deep pride that I point out the progress that has been made in my own home county—Fulton County, Georgia—in voter registration and voter participation in elections since 1960. The number of persons registered has jumped from 135,469 in 1960 to 273,339 in 1968. The number of persons voting rose from 55,803 in 1960 to 188,152 in 1968. The percentage of persons of voting age who voted rose from 41% in 1960 to 74% in 1964 and 68% in 1968. But regrettably, Fulton County, Georgia, one of America's most forward-looking local governments in voter registration work, is treated as a criminal; guilt of alleged discrimination is presumed due to the fact that the formula was applied to the state as a whole unit. Because our state was brought under the law as an entire unit, we are denied the right to go into federal court and prove our innocence.

Submitted in the Appendix for the record is a listing of the activities of the Voter Registration Department of Fulton County, Georgia. This is, I contend, one of the finest, most complete and most thorough voter registration efforts in the entire nation. Still, we are prejudged as being guilty of discrimination in the registration of our citizens. This injustice wounds me and the citizens of Metropolitan Atlanta very deeply and the situation cries out for justice.

In addition, any new voting rights law that is passed should recognize the progress in voter participation occurring between the 1964 and 1968 Presidential election. Here again is where the proposed bills before the Committee fail. Alabama had 343,000 more people voting in 1968 and yet these bills would give them no credit. Georgia had 97,000 more people voting any they would be ignored. Louisiana had some 201,000 more people voting in 1968 and these bills would push them aside; Mississippi had some 245,000 additional persons participating and these bills say they should not be considered; South Carolina had 142,000 additional people casting ballots and these bills would give them no recognition. Virginia had 317,000 more electors participating and these bills would ignore them. North Carolina had an additional 162,000 electors participating and yet these bills would treat them as if they did not exist.

Mr. Chairman, I submit the 1964 and 1968 voting statistics in Table VI in the Appendix and I urge the Committee to draft a bill which gives credit for the improvements in the voter registration and participation between 1964 and 1968.

VII. THE BURDEN OF LITIGATION

One of the most unfair requirements under the present law is that after having been presumed guilty, a state or political subdivision although innocent is required to travel all the way from the farthest reaches of the nation to the federal court in Washington, D.C. to clear itself of alleged wrongdoing. The advocates of this law would contend that because a number of states and political subdivisions have gone to this expense and trouble, that the law is working well, that its provisions are vindicated and that they should, therefore, be continued.

But I submit, Mr. Chairman, that it is an injustice in the first place to require a state to go to Washington to prove its innocence instead of allowing that state, as it would in virtually any other case, to bring litigation in its local federal district court.

The State of Alaska brought such a lawsuit in 1966 and it was successful and was

exempted from the provisions of the law by declaratory judgment. Elmore County, Idaho was also successful in such a lawsuit and so were Apache, Navajo, and Coconino Counties in Arizona. Wake County, North Carolina brought a petition for declaratory judgment and it was exempted under the law. However, Gaston County, North Carolina brought a petition which was denied and which has since been appealed to the U.S. Supreme Court. Another North Carolina County—Nash—has litigation pending awaiting the outcome of the Supreme Court decision in the Gaston County case.

Nevertheless, Mr. Chairman, it is entirely unfair to impose on any state the burden of having to come all the way to the Nation's Capitol to clear itself of presumed guilt in voting rights cases. The presumption of guilt where no guilt exists is a serious wrong; but this law raises a further presumption which is an even more serious matter, and that is that local district courts if allowed to do so, might act differently on such cases than the district court in Washington.

If there are to be avenues of legal relief provided, then those avenues ought to be

open in the federal courts located in or nearest to the affected states or political subdivisions. Further, Mr. Chairman, it is unconscionable that this committee which is so vigorous in its defense of the legal rights of the American people and the right of easy access to our courts, would deny justice to a state by extending provisions which deny easy access to the courts and require litigation to be brought in Washington, D.C., rather than in the local federal courts.

VIII. LACK OF UNIFORMITY IN LITERACY TESTS

Finally, Mr. Chairman, the confusion that has followed in the aftermath of the passage of this law has resulted in some states eliminating literacy requirements, others continuing them and still others being in a state of legal limbo. In order to present this Committee with the full picture of what happened following the suspension of literacy tests in those states affected by the law and in those states which had literacy tests at the time this law was passed, we conducted a survey. Specifically, we asked each of the 21 states which had literacy tests or devices in 1964 whether or not they were still utilizing literacy tests.

While we did not receive replies from all the states involved, the variety of answers is indicative of the lack of uniformity which now exists because of the confusion which has been brought about.

The State of New Hampshire answered that literacy tests continue to be used, while the State of Delaware stated that its law provides for literacy examinations but the law has not been enforced for sometime.

The State of New York still requires literacy tests for first voters who cannot demonstrate literacy by proof of at least a sixth grade education. The State of Connecticut still has a requirement for literacy examinations in its statutes and so does the State of Washington.

The State of Oregon has requirements for literacy tests but we are advised that such tests are not universally given.

The State of North Carolina has a statute for literacy examinations, however, 40 of that state's 100 counties were placed under the Voting Rights Act and the tests are only applied in the 60 counties not affected by the law. The State of Maine still uses literacy tests and literacy tests are required under state statute in the State of Wyoming.

*For the State laws at the time of passage of the 1965 act see pp. 42-43, pt. 3, of S. Rept. 162, 1st sess., 89th Cong.

¹ Code of Alabama, title 17, sec. 32. In its 1965 1st extra session, the Alabama Legislature amended Code of Alabama title 17, sec. 32 to require that " * * * Except for physical disability, an elector must be able to read and write any article of the Constitution of the United States in the English language and make proof of the same in the manner prescribed by the legislature." Thus, the good character provision no longer applies. Apparently, no new application forms have been approved by the Supreme Court of Alabama pursuant to title 17, sec. 32(1) since passage of the 1965 Voting Rights Act. However, sec. 32(1) has not been repealed; so the old application forms requiring interpretation, understanding, and knowledge, as indicated in the Senate report, will probably become effective when Alabama is allowed to resume use of its tests and devices.

² The U.S. attorney for the district of Alaska has stated that the Secretary of State believes that anyone who can speak English can vote, even if he cannot sign his name except with an X. Hearings on S. 2750 before the House Judiciary Committee, 87th Cong., 2d sess., p. 315.

³ Alaska Statutes, sec. 15.05.010: "A person may vote at any election who * * * (5) can speak or read English unless prevented by physical disability, or voted in the general election of Nov. 4, 1924."

⁴ The former U.S. attorney for the district of Arizona has stated that an applicant must only attest to fact that he is able to read the Constitution of the United States in the English language, and if there is any question about his ability, the registrar usually asks him to read other printed papers. Letter dated Mar. 8, 1962, to the Civil Rights Division, from Hon. Carl Muecke. See also hearings on S. 2750, supra, p. 317.

⁵ Arizona Revised Statutes, sec. 16-101(A): "Every resident of the State is qualified to become an elector and may register to vote at all elections authorized by law if he * * *

(4) is able to read the Constitution of the United States in the English language. * * *

(5) is able to write his name * * *

⁶ Constitution of California, art. II, sec. 1: "[N]o person who shall not be able to read the Constitution in the English language and write his or her name, shall ever exercise the privileges of an elector in this State. * * * See also California Election Code, sec. 100, implementing this provision.

⁷ Constitution of Connecticut, art. VI, sec. 1: "Every citizen of the United States * * * who is able to read in the English language any article of the Constitution or any section of the statutes of this State, and who sustains a good moral character, shall * * * be an elector." See also Connecticut General Statutes, sec. 9-12, implementing this provision.

⁸ Constitution of Delaware, art. V, sec. 2: "[N]o person * * * shall have the right to vote unless he shall be able to read this Constitution in the English language and write his name. * * * See also Delaware Code Annotated, title 15, sec. 1701, implementing this provision.

⁹ Georgia Code Annotated, sec. 34-617(a): "[The applicant] shall be required to read [the Constitution of Georgia or of the United States] aloud and write it in the English language."

¹⁰ Georgia Code Annotated, sec. 34-617(b): "[The applicant may also] qualify on the basis of his good character and his understanding of the duties and obligations of citizenship. * * *

¹¹ Georgia Code Annotated, sec. 34-618 sets forth a standard list of questions for those who seek to qualify pursuant to sec. 34-617(b) (e.g., "What are the names of the three branches of the United States Government?"). See also Constitution of Georgia, sec. 2-704 which sets forth the above requirements. A comprehensive Georgia Municipal Election Code was adopted on Sept. 1, 1968, that effects some provisions (e.g., conduct of the election) of the 1964 code; but for the qualifications of electors the 1968 code merely adopted the provisions of the 1964 code. See sec. 34A-501 of the Georgia Municipal Election Code. See also Georgia Code Annotated, sec. 34-617(a).

¹² Constitution of Hawaii, art. II, sec. 1: "No person shall be qualified to vote unless he is * * * able * * * to speak, read and write the English or Hawaiian language."

¹³ Idaho Code, sec. 34-404: "No common prostitute or person who keeps or maintains, or is interested in keeping or maintaining, or who resides in or is an inmate of, or frequents or habitually resorts to any house of prostitution or ill fame, or any other house or place commonly used as a house of prostitution or of ill fame, or as a house or place of resort for lewd persons for the purpose

of prostitution or lewdness, or who, being male or female, do lewdly or lasciviously cohabit together shall be permitted to register as a voter or to vote at any election in this State." See also Constitution of Idaho, art. 6, sec. 5, which disqualifies from voting, inter alia, persons who are members of organizations which teach, advise, counsel, encourage or aid persons to enter into bigamy or polygamy.

¹⁴ Louisiana Revised Statutes, title 18, sec. 31(3): "He shall be able to read and write. * * * See also Louisiana Revised Statute, title 18, sec. 35.

¹⁵ Constitution of Louisiana, art. VIII, sec. 1(c): "He shall be of good character and shall understand the duties and obligations of citizenship under a republican form of government." See also art. VIII, sec. 1(d), 18, title 18, sec. 31(2), 36. In addition a requirement that an applicant "shall be able to understand and give a reasonable interpretation of any section of [the Louisiana or United States Constitution]" and related provisions (title 18) secs. 35, 36) was enjoined by a Federal court, United States v. Louisiana, 225 F. Supp. 353 (1963), affirmed by the Supreme Court, Mar. 8, 1965.

¹⁶ Constitution of Louisiana, art. VIII, sec. 18: "The Board [of Registrars] shall * * * issue a uniform, objective written test or examination for citizenship to determine that applicants * * * understand the duties and obligations of citizenship. * * * See also title 18, sec. 191(A).

¹⁷ Louisiana Revised Statutes, title 18, sec. 31(2): "He shall be of good moral character. * * *

¹⁸ Louisiana Revised Statutes, title 18, sec. 31(5): "No registrar or deputy registrar shall register any applicant * * * unless the applicant brings with him two qualified electors of the precinct in which he resides to sign written affidavits attesting to the truth of the facts set forth in the application form. * * *

¹⁹ Constitution of Maine, art. II, sec. 1: "No person shall have the right to vote * * * who shall not be able to read the Constitution in the English language, and write his name. * * * See also title 21, sec. 241, implementing this provision.

²⁰ Constitution of Massachusetts, art. XX, sec. 122: "No person shall have the right to vote * * * who shall not be able to read the Constitution in the English language, and write his name. * * * See also Massachusetts Laws, ch. 51, sec. 1, implementing this provision.

²¹ Mississippi Code, sec. 3209.7. Mississippi appears to be the only State that has substantially changed its constitution and election laws as a result of the Voting Rights Act of 1965. Just prior to the passage of the 1965 Voting Rights Act by Congress, Mississippi amended art. 12, sec. 244, of its constitution to require only that an elector be able to read and write, and at the same time, repealed art. 12, sec. 241-A, which required that an elector be of good moral character. In a special session, the State legislature on June 20, 1965, amended the Mississippi Code (See Mississippi Code sec. 3209.7) to reflect these changes. Sec. 3209.7 provides, "A person shall not be registered unless he is able to read and write."

²² New Hampshire Revised Statutes, sec. 55:10: "[An applicant shall be required] to write and to read in such manner as to show that he is not being assisted and in so doing and is not reciting from memory." See also New Hampshire Revised Statutes, secs. 55:11, 55:12, implementing this provision.

²³ Constitution of New York, art. 2, sec. 1: "[N]o person shall become entitled to vote * * * unless such person is also able, except for physical disability, to read and write English." See also New York Election Code, secs. 150, 168, implementing this provision.

²⁴ Constitution of North Carolina, art. VI, sec. 4: "Every person presenting himself for registration shall be able to read and write any section of the Constitution in the English language." See also General Statutes of North Carolina, sec. 163-23, implementing this provision.

²⁵ Oregon Revised Statutes, sec. 247.131: "[N]o elector shall be registered unless he is able, except for physical disability, to read and write English."

²⁶ Constitution of South Carolina, art. II, sec. 4(d): "Any person * * * shall be registered: Provided, That he can both read and write any section of this Constitution submitted to him. * * * As an alternative to the reading and writing test, art. II, sec. 4(d), provides: "Any person * * * shall be registered: Provided, That he * * * has paid all taxes collectible during the previous year on, property in this State assessed at three hundred dollars (\$300) or more." See also Code of South Carolina, sec. 23-62, implementing these provisions.

California bases its qualifications for voter registration on the ability to read English. If the applicant admits he cannot read English, he is not registered.

The State of Arizona was one of those which had several of its counties brought under the Voting Rights Act and that state's literacy examinations were suspended in the affected counties until three were removed from its jurisdiction by court order.

Similarly, in the State of Hawaii, the County of Honolulu came under the provisions of the law and no tests are allowed in that county although they are allowed in other sections of the state.

I submit for the record in the Appendix the replies from the states mentioned and contend that this shows further that the Voting Rights Act of 1965 should not be extended in its present form because its application only adds to the lack of uniformity in voting rights laws. Either literacy tests or a basic literacy requirement such as a sixth grade education as it is spelled out in the law *should be allowed in all states or no such requirements should be permitted in any state.*

SUMMARY

Mr. Chairman, I believe the material presented clearly demonstrates that it would be unjust to the people and unfair to the states to extend the Voting Rights Act without change for five additional years.

In summary, it does not provide full protection of voting rights for every American in every state in the Union.

It treats states unequally under a contrived formula based on statistics that are now five years old and which, in fairness, should be superseded by the results of the 1968 Presidential election.

It does not recognize the fundamental presumption of innocence but presumes guilt of voting discrimination.

It does not take into consideration the presence in any state of large numbers of non-voting military personnel.

It does not give a political subdivision, innocent of any wrongdoing, the right to remove itself from the provisions of the law where the state has been treated as a whole unit in determinations by the Bureau of the Census and the Attorney General.

It gives no recognition to the progress made since 1964 in voter registration and political participation.

And, it continues to impose on the states the burden and expense of having to bring suit in federal court in Washington, D.C., to clear themselves of presumed guilt rather than in local federal courts.

In fairness and in justice, I urge this committee to lay aside the measures before it to extend the Voting Rights Act of 1965 without change and put together legislation which will correct the inequities cited and give full protection to all individuals in all states and equal treatment to every state in the matter of voting rights.

TABLE I

At the time of the passage of the Voting Rights Act of 1965 twenty-one (21) states had some form of literacy tests for the qualifications of prospective voters for registering. They are:

Alabama	Massachusetts
Alaska	Mississippi
Arizona	New Hampshire
California	New York
Connecticut	North Carolina
Delaware	Oregon
Georgia	South Carolina
Hawaii	Virginia
Idaho	Washington
Louisiana	Wyoming
Maine	

TABLE II

Under the provisions of the Voting Rights Act and under Section 4(b) (2) of said Act, the Director of the Bureau of the Census determined that the following states or political subdivisions had less than fifty (50%) percent of the persons of voting age voting in the Presidential election of November 1964:

Alabama
Alaska
Georgia
Louisiana
Mississippi
South Carolina
Virginia
Apache, Coconino, Navajo, and Yuma Counties of Arizona
Elmore County, Idaho
Honolulu County, Hawaii
Anson, Bertie, Caswell, Cowan, Craven, Cumberland, Edgecombe, Franklin, Gates, Granville, Greene, Halifax, Hertford, Hoke, Lenoir, Nash, North Hampton, Onslow, Pasquotank, Person, Pitt, Robeson, Scotland, Vance, Wayne, Wilson, Martin, Washington, Camden, Perquimans, Beaufort, Bladen, Cleveland, Gaston, Guilford, Harnett, Lee, Rockingham, Union, and Wake Counties of North Carolina

TABLE III

The following states or political subdivisions in the 1964 Presidential election had less than fifty (50%) percent of their population of voting age casting votes:

State or political subdivision:	(Percentage)
District of Columbia	39.4
Virginia	41.1
Georgia	43.0
Alabama	35.9
Mississippi	33.2
Arkansas	49.9
Louisiana	47.2
Texas	44.4
Alaska	48.1

TABLE IV

The following states or political subdivisions had less than fifty (50%) percent of the population of voting age casting votes in the Presidential election of November 1968:

State or political subdivision:	(Percentage)
District of Columbia	33.5
South Carolina	45.9
Georgia	42.9
Texas	48.5

TABLE V

If the participation in or registration for the Presidential election of November 1968 were made the basis for the effectuality section of the Voting Rights Act of 1965, then the following states which had literacy examinations in November 1964 would automatically be removed from the provisions of the Act:

State	Percent in 1968	Percent in 1964
Virginia	50.4	41.1
Alabama	50.3	35.9
Mississippi	50.6	33.2
Louisiana	53.8	47.2
Alaska ¹	53.9	48.1

¹ Removed from jurisdiction of Voting Rights Act by declaratory judgment of U.S. District Court, District of Columbia.

TABLE VI

States or political subdivisions coming under the Voting Rights Act of 1965 had the following changes in voter participation between the 1964 and 1968 Presidential elections:

State	1964	1968	Change
Alabama	689,818	1,033,740	+343,922
Georgia	1,139,352	1,236,600	+97,248
Louisiana	896,293	1,097,450	+201,157
Mississippi	409,146	654,510	+245,364
South Carolina	524,756	666,978	+142,222
Virginia	1,042,267	1,359,928	+317,661
North Carolina (40 counties) ¹	1,424,983	1,587,493	+162,510
Alaska ²	67,259	82,975	+15,716
Arizona (4 counties) ³	327,615	325,762	-1,853
Idaho (1 county) ⁴	292,477	291,183	-1,294
Hawaii (1 county)	207,271	236,218	+28,947

¹ Wake County, N. C. removed from jurisdiction by declaratory judgment.

² Alaska removed from jurisdiction by declaratory judgment.

³ Apache, Coconino, and Navajo Counties removed from jurisdiction by declaratory judgment.

⁴ Elmore County, Idaho, removed from jurisdiction by declaratory judgment.

TABLE VII

Following is an itemization of the number of military personnel for all armed services, not including dependents, located in each of the states or political subdivisions coming under the provisions of the Voting Rights Act of 1965, for which no allowance is made:

State	Military personnel	Percent of State population
Alabama	32,546	1.7
Georgia	106,403	3.4
Louisiana	41,532	1.4
Mississippi	22,584	1.3
South Carolina	67,305	3.3
Virginia	63,595	3.3
Alaska ¹	30,813	13.9
North Carolina (40 counties) ²	105,713	2.4
Arizona (4 counties) ³	29,707	2.4
Idaho (1 county) ⁴	4,386	.7
Maine (1 county)	7,385	.1
Hawaii (1 county)	33,987	7.6

¹ Removed from jurisdiction of Voting Rights Act by declaratory judgment of U.S. District Court, District of Columbia.

² Wake County, N.C. removed from jurisdiction of Voting Rights Act by declaratory judgment of U.S. District Court, District of Columbia.

³ Apache, Coconino, Navajo Counties removed from jurisdiction of Voting Rights Act by declaratory judgment of U.S. District Court, District of Columbia.

Note.—Average percentage of State population made up of military personnel is 1.6 percent. Figures include Army, Navy, and Air Force personnel and are exclusive of civilian personnel.

DEPARTMENT OF JUSTICE,

Washington, April 25, 1969.

HON. FLETCHER THOMPSON,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN THOMPSON: Attorney General Mitchell has referred your letter of March 19, 1969, concerning subsection 4(a) of the Voting Rights Act, to this Division for reply. You state that, under your interpretation of subsection 4(a), a suit to end the suspension of literacy tests could not be brought by an individual county within a state which, by virtue of subsection 4(b), is subject to state-wide coverage by the Act; and you request an opinion as to the correctness of your interpretation.

In our opinion, your interpretation of the statute is correct. As you indicate, the phrase "such . . . subdivision" seems clearly to refer back to the phrase "political subdivision with respect to which the . . . [determination of coverage has] been made as a separate unit." Moreover, this reading of subsection 4(a) is supported by the legislative history. See H.R. Rep. No. 439, 89th Cong., 1st Sess. p. 14 (1965); S. Rep. No. 162, 89th Cong., 1st Sess., pt. 3, p. 16 (1965).

In conclusion, on the basis of the statutory language and the legislative history, we agree with you that subsection 4(a) does not authorize a county brought under the Act by virtue of a state-wide determination to seek a declaratory judgment ending the suspen-

sion of tests. Only if the State prevails in an action for a declaratory judgment would suspension be terminated with respect to such a county.

I hope this information will be of assistance.

Sincerely,

JERRIS LEONARD,
Assistant Attorney General,
Civil Rights Division.

Voter Registration Department of Fulton County, Dec. 31, 1968

The total number of registered voters in Fulton County ----- 273,173

Registration activities for year 1968:

Letters mailed.....	370
Deceased purge:	
Names checked.....	4,580
Names canceled.....	1,286

In accordance with a law passed by the Georgia State Legislature in January of 1968, Fulton County had to be reapportioned before the next general election. This was accomplished through the cooperation of the city clerk's office of Atlanta and the Fulton County elections department. Seventy new voting precincts were added, making a total of 198 precincts in Fulton County. A total of 211,000 registered voters had to be notified that their voting precinct had been changed. The reapportionment of the county was effected to relieve the over-crowded precincts.

A total of 273,339 citizens were registered and qualified to vote in the Presidential election on November 5, 1968. This number is an all-time high for Fulton County and an increase of over 100,000 since 1962 when the voter registration department was set up as a separate department by law.

For the primary and general election this department processed and mailed a total of 14,675 absentee ballots to servicemen, college students, physically disabled, and citizens away from Fulton County due to employment and vacations. Ballots were mailed to all parts of the world. There was a total of 1,529 absentee ballots voted in the office by citizens with emergency problems.

In November this department was visited by Mr. Legessa Bezelou, Prime Minister of Elections in Ethiopia, and in December Miss Yorkio Nakajima, associate professor of political science at the Obirin College in Tokyo, Japan. Both of these distinguished visitors informed us that Fulton County is recognized by the State Department of Commerce in Washington as having one of the most progressive voter registration programs in the Nation.

The year 1968 was a good year for the voter registration department, and we are extremely proud of the manner in which we were able to cope with the many problems that arise during a national election year.

Chief Registrar, Fulton County.

THE STATE OF NEW HAMPSHIRE,
Concord, April 8, 1969.

HON. FLETCHER THOMPSON,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE THOMPSON: This is in reply to your letter inquiring as to whether literacy tests are still being used in this state in view of the Voting Rights Act of 1965.

Our statute (RSA 55:10) provides in part that the supervisor of the checklist shall require a prospective voter "... to write and to read in such manner as to show that he is not being assisted in so doing and is not reciting from memory."

When the question of the constitutionality of this statute was raised in 1968 by the Department of Political Science of the University of New Hampshire, we replied as per the attached copy.

Our election laws also contain a provision (RSA 59:65) permitting a voter "... who declares to the moderator, under oath, that he cannot read, ..." to receive the assistance of one or both of the election officers detailed for that purpose by the moderator. Copies of these two statutes are enclosed.

We have not polled the municipalities on this subject, but believe literacy tests are continuing to be used.

Very truly yours,

Mrs. IRMA A. MATTHEWS,
Assistant Attorney General.

STATE OF NEW HAMPSHIRE

55:10 Reading Test. The qualifications of an applicant shall be determined by the supervisors, who shall examine him under oath relative thereto, and shall, unless he is prevented by physical disability, or unless he had the right to vote, or was sixty years of age or upwards on January first, nineteen hundred and four, require him to write and to read in such manner as to show that he is not being assisted in so doing and is not reciting from memory.

59:65 Assistance in Voting. Any voter who declares to the moderator, under oath, that he cannot read, or that because of his blindness or other physical disability he is unable to mark his ballot, shall, upon his choice and request, receive the assistance of one or both of the election officers detailed for that purpose by the moderator; and such officer or officers shall thereafter give no information regarding the same. Provided that any voter unable to mark his ballot because of his total blindness may be assisted in such marking by any person, who is a qualified voter in the same town or ward, whom he may designate. Such person so assisting shall be sworn, shall mark the ballot as directed by said voter, and shall thereafter give no information regarding the same.

NOVEMBER 22, 1968.

Prof. DAVID L. LARSON,
College of Liberal Arts, Department of Political Science, University of New Hampshire, Durham, N.H.

DEAR PROFESSOR LARSON: The Secretary of State has referred to this office, for reply,

your letter of October 31, 1968 suggesting that an advisory opinion be requested from the Attorney General as to the constitutionality of RSA 55:10. This statute provides in part "that the supervisor of the checklist shall require a prospective voter to write and to read in such manner as to show that he is not being assisted in so doing and is not reciting from memory."

While in the past this office has occasionally rendered opinions of this nature we now adhere to the better practice of referring to our Supreme Court all questions on the constitutionality of a statute. It has been well settled that this is the prerogative of that court. We refer you to *Wyman v. DeGregory*, 101 N.H. 171, 178 (1957) wherein our Supreme Court held that the Trial Court's refusal to rule on the constitutionality of a statute was proper; that the "statute not being clearly unconstitutional on its face ... the Trial Court could properly assume its constitutionality until it was decided otherwise in this court." see also *Velishka v. Nashua*, 99 N.H. 161, 165; *Musgrove v. Parker*, 84 N.H. 550.

Very truly yours,

Mrs. IRMA A. MATTHEWS,
Assistant Attorney General.

STATE OF DELAWARE,
STATE DEPARTMENT OF JUSTICE,
Wilmington, Del., March 27, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
Washington, D.C.

DEAR CONGRESSMAN THOMPSON: Your letter of March 15, 1969, addressed to Honorable David P. Buckson, Attorney General, Dover, Delaware, has been referred to me for reply.

15 Del. C. § 1701 provides for a literacy test. However, the Department of Elections has informed me that it has not been enforced for some time.

Very truly yours,

FLETCHER E. CAMPBELL, JR.,
Deputy Attorney General.

STATE OF NEW YORK, DEPARTMENT
OF LAW,

Albany, April 4, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
Washington, D.C.

DEAR FLETCH: New York law still provides for literacy tests to be administered to first voters who cannot demonstrate literacy by proof of at least a sixth grade education. Of course, we have been required to conform to the Voting Rights Act which permits proof of literacy in a language other than English insofar as citizens educated in Puerto Rico are concerned.

Warm personal regards and best wishes.

Sincerely,

LOUIS J. LEFKOWITZ,
Attorney General.

STATE OF CONNECTICUT,
Hartford, March 24, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
Washington, D.C.

DEAR MR. THOMPSON: In response to your letter of March 15, 1969, Connecticut does use a literacy test pursuant to the Constitution and statutes in determining the qualification of prospective electors for registration.

The statutory requirement is that each citizen of the United States who has attained the age of twenty-one years must show that he "at the time of so applying, is able to read in the English language any article of the constitution or any section of the statutes of the state." Section 9-12, Connecticut General Statutes, Revision of 1958, Revised to 1964.

In addition, under the Doctrine of Supremacy persons who comply with Section 4(e) (2) of the Federal Voting Rights Act of

May 15, 1969

1965, Public Law 89-110, are admitted as electors in the State of Connecticut.

Very truly yours,

ROBERT K. KILLAN,
Attorney General.

RAYMOND J. CANNON,
Assistant Attorney General.

STATE OF WASHINGTON,
Olympia, Wash., September 20, 1966.
Hon. A. LUDLOW KRAMER,
Secretary of State,
Olympia, Wash.

DEAR SIR: You have requested the advice of this office concerning the impact of the federal voting rights act of 1965¹ upon the literacy requirement contained in Article VI, § 1, of the Washington constitution. That section reads as follows:

"All persons of the age of twenty-one years or over, possessing the following qualifications, shall be entitled to vote at all elections: They shall be citizens of the United States; they shall have lived in the state one year, and in the county ninety days, and in the city, town, ward or precinct thirty days immediately preceding the election at which they offer to vote; they shall be able to read and speak the English language: *Provided*, That Indians not taxed shall never be allowed the elective franchise: *And further provided*, That this amendment shall not affect the rights of franchise of any person who is now a qualified elector of this state. The legislative authority shall enact laws defining the manner of ascertaining the qualifications of voters as to their ability to read and speak the English language, and providing for punishment of persons voting or registering in violation of the provision of this section. There shall be no denial of the elective franchise at any election on account of sex."

It is not within the scope of this letter to advise concerning the effect of the voting rights act of 1965 upon the power of the legislature to enact laws "defining the manner of ascertaining the qualifications of voters as to their ability to read and speak the English language . . ." ² Rather, you have requested that we simply concern ourselves here with the impact of this new federal legislation upon the requirement contained in Article VI, § 1, *supra*, that every voter " . . . shall be able to read and speak the English language . . ."

The pertinent provision of the voting rights act is § 4(e)³, the complete text of which reads:

"Congress hereby declares that to secure the rights under the fourteenth amendment of persons educated in American-flag schools in which the predominant classroom language was other than English, it is necessary to prohibit the States from conditioning the right to vote of such persons on ability to read, write, understand, or interpret any matter in the English language.

"No person who demonstrates that he has successfully completed the sixth primary grade in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English, shall be denied the right to vote in any Federal, State, or local election because of his inability to read, write, understand, or interpret any matter in the English language, except that in States in which State law provides that a different level of education is presumptive of literacy, he shall demonstrate that he has successfully completed an equivalent level of education in a public school in, or a private school accredited by,

EXTENSIONS OF REMARKS

any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English."

To the extent that this statute is in conflict with the literacy requirement contained in Article VI, § 1, *supra*, the statute is controlling under Article VI of the United States constitution, which reads, in part:

"This constitution, and the laws of the United States which shall be made in pursuance thereof; . . . shall be the supreme law of the land; and the judges in every state shall be bound thereby, any thing in the Constitution or laws of any state to the contrary notwithstanding."

The extent to which our literacy requirement is affected by section 4(e), *supra*, is revealed by the recent United States Supreme Court decision in *Katzenbach v. Morgan*, 384 U.S. 641, 16 L. ed. 2d 828, 86, S. Ct. 1777 (1966). This case involved constitutional requirements of the state of New York substantially similar to those contained in Article VI, § 1. In upholding the constitutionality of section 4(e), *supra*, the Supreme Court was careful to point out that its position on literacy as a qualification to voting is unchanged. The rule of *Lassiter v. Northampton County Board of Elections*, 360 U.S. 45, 3 L. ed. 2d 1072, 79 S. Ct. 985 (1959) that a state may constitutionally require its voters to be literate, is still the law of the land. Even Justice Douglas in *Cardona v. Power* 384 U.S. 672, 675, 16 L. ed. 2d 848, 86 S. Ct. 1728 (1966), a companion case, dissenting on the ground that the New York statute which affords the right to vote to a citizen literate in English but denies that right to a citizen literate in Spanish is an unconstitutional violation of the 14th Amendment, remarked:

"A state has broad powers over elections; and I cannot say it is an unconstitutional exercise of that power to condition the use of the ballot on the ability to read and write."

The effect of section 4(e) of the 1965 voting rights act, *supra*, is to provide an equivalent to the ability to read and speak the English language for those citizens who fall within the pattern of the section. See the remarks of Senator Jacob K. Javits, 2 U.S. Code Congressional and Administrative News 2577 (89th Congress, 1st session, 1965). As is suggested by a footnote in *Katzenbach v. Morgan*, *supra*, it provides this equivalence to a very limited class of persons: " . . . aside from the schools in the Commonwealth of Puerto Rico, there are no public or parochial schools in the territorial limits of the United States in which the predominant language of instruction is other than English and which would have generally been attended by persons who are otherwise qualified to vote, save for their lack of literacy in English."

By taking note of the limited area in which section 4(e) is effective, we do not mean to intimate that the section need not be scrupulously adhered to. By congressional fiat, the literacy requirement in Article VI, § 1, *supra*, should be regarded as having been amended to read:

"They shall be able to read and speak the English language unless they can demonstrate that they have successfully completed the sixth primary grade in a public school in, or a private school accredited by, any state or territory, the District of Columbia, or the Commonwealth of Puerto Rico, in which the predominant classroom language was other than English."

We trust that the foregoing will be of assistance to you.

Very truly yours,

JOHN J. O'CONNELL,
Attorney General.
RICHARD A. MATTSSEN,
Assistant Attorney General.

12737

STATE OF WASHINGTON,
Olympia, Wash., March 19, 1969.

Mr. FLETCHER THOMPSON,
Member of Congress, Congress of the United States, House of Representatives, Washington, D.C.

DEAR MR. THOMPSON: This is in reply to your letter asking about the effect of the United States Voting Rights Act of 1965 on the use of literacy tests in the state of Washington.

The effect of the federal act in the state of Washington is fully explained in an opinion of the Attorney General 1967-No. 21 and opinion letter of this office to Honorable A. Ludlow Kramer, Secretary of State, dated September 20, 1966, copies of which are enclosed. We understand that the Secretary of State, as Chief Elections Officer, has distributed copies of these opinions to all election officers throughout the state, along with instruction on the necessary changes in procedure where literacy tests have been used. We believe that as a result of these actions, tests of literacy in English are no longer used anywhere in this state.

A bill is presently pending in the Washington legislature to amend our registration laws to eliminate references to literacy tests and to conform the questions required to be asked of applicants to those permitted by federal law. In short, Washington's response to the federal legislation has been not to make literacy tests university, but to eliminate them, relying on the applicants' sworn statement that he can read and write English, or Spanish, if educated in Puerto Rico.

Since you have sent personal regards to John O'Connell, we should say that John chose not to run for re-election as Attorney General, but to run for Governor instead. He was unsuccessful in that race and is now in private practice in Tacoma with the law firm of Gordon, Honeywell, Malanca, Peterson & Johnson, Puget Sound Banking Building, Tacoma, Washington.

We are pleased to be able to provide the information you have requested.

Very truly yours,

SLADE GORTON, Attorney General.
MORTON M. TYTLER,
Assistant Attorney General.

STATE OF WASHINGTON,
Olympia, Wash.

Re Elections—civil rights—voter registration—administration of literacy test to persons registering to vote.

(Persons registering to vote in Washington cannot currently be tested for literacy in the manner provided for in RCW 29.07.070(13), in view of the provisions of the 1965 federal voting rights act (42 U.S.C., § 1971(a)).

JUNE 15, 1967.

Cite as: AGO 1967 No. 21.

Hon. ALFRED E. COWLES,
Executive Secretary, Washington State Board Against Discrimination, Olympia, Wash.

DEAR SIR: You have asked for the opinion of this office on a question which we paraphrase as follows:

May persons registering to vote in Washington currently be tested for literacy in the manner provided for in RCW 29.07.070(13), in view of the provisions of recent federal voting rights legislation?

We answer your question in the negative for the reasons set forth in our analysis.

ANALYSIS

The Washington constitution (Article VI, § 1) provides that:

"All persons of the age of twenty-one years or over, possessing the following qualifications, shall be entitled to vote at all elections: . . . they shall be able to read and speak the English language: . . . The legislative authority shall enact laws defining the manner of ascertaining the qualifications of voters as to their ability to read and speak the English language, and providing for pun-

ishment of persons voting or registering in violation of the provision of this section."

Pursuant to this article, the Washington legislature has provided (RCW 29.07.070):

"Having administered the oath, the registration officer shall interrogate the applicant for registration, concerning his qualifications as a voter . . . , requiring him to state:

"(13) Whether the applicant . . . is able to read and speak the English language so as to comprehend the meaning of ordinary English prose, and in case the registration officer is not satisfied in that regard, he may require the applicant to read aloud and explain the meaning of some ordinary English prose;"

Notably, this is the only Washington statute pertaining to the administration of literacy tests in implementation of the constitutional provision. It is further to be noted that this office has previously advised that the Washington literacy requirement has been modified by the "Puerto Rico" provision contained in the federal voting rights act of 1965, 42 U.S.C. § 1973b (e). See our letter to Honorable A. Ludlow Kramer, Secretary of State, dated September 20, 1966, a copy of which is enclosed. This provision says that literacy in English cannot be a qualification to vote for persons educated in American flag schools in which the predominant classroom language was other than English.

Except for persons who come within the Puerto Rico provision, *supra*, the Washington literacy requirement remains in effect. However, the manner of testing for literacy is now controlled by federal law, as will be hereinafter seen. Preliminarily, though, it should be noticed that the state of Washington is not one of the places where literacy tests have been prohibited outright by federal legislation. The 1965 voting rights act suspends literacy tests and other devices only in those states or political subdivisions where the director of census determines that less than fifty percent of the persons of voting age residing therein were registered on November 1, 1964, or that less than fifty percent of such persons voted in the presidential election of November, 1964. See 42 U.S.C. § 1973b. Washington was not included in the director of census' report on the states that failed these fifty-percent requirements. See 30 Fed. Reg. 9897.

Unlike this more publicized part of the federal voting rights legislation, the part controlling the manner of administering literacy tests applies uniformly in all the states, including, of course, Washington. The pertinent language appears in 42 U.S.C., § 1971(a), as follows:

"(2) No person acting under color of law shall—

"(C) employ any literacy test as a qualification for voting in any election unless (i) such test is administered to each individual and is conducted wholly in writing, and (ii) a certified copy of the test and of the answers given by the individual is furnished to him within twenty-five days of the submission of his request made within the period of time during which records and papers are required to be retained and preserved pursuant to sections 1974-1974e of this title: . . .

"(3) For purposes of this subsection—

"(B) the phrase 'literacy test' includes any test of the ability to read, write, understand, or interpret any matter." (Emphasis supplied.)

The quoted language originated in the civil rights act of 1964. At that time it was limited to federal elections, but the 1965 voting rights act (§ 15(a), 79 Stat. 445) made it applicable to state and local elections as well.

The purpose of this feature of the federal voting rights legislation was explained in the report of the House Judiciary Committee recommending passage of the 1964 Civil Rights Act as follows:¹

"Title I is designed to meet problems encountered in the operation and enforcement of the Civil Rights Acts of 1957 and 1960, by which the Congress took steps to guarantee to all citizens the right to vote without discrimination as to race or color.

"Section 101(a) is designed to insure non-discriminatory practices in the registration of voters for Federal elections. It would amend existing law (42 U.S.C. 1971(a)) by requiring the application of uniform standards, practices, and procedures to all persons seeking to vote in Federal elections . . . These provisions would provide specific protections to the right to vote and would reduce opportunities for discriminatory application of voting standards without in any way lessening or limiting the broad prohibitions against voting discrimination already contained in existing law."

Seven members of the committee expressed additional views as follows:²

"Closely related to the delays in justice are the intricate methods employed by some State or county voting officials to defeat Negro registration . . .

"(T)he basic troubles come not from discriminatory laws, but (as the Civil Rights Commission so well expressed in its 1959 report, p. 133) 'from the discriminatory application and administration of apparently non-discriminatory laws.'"

"It is for these reasons that the committee has amended the 1957 and 1960 Civil Rights Acts to provide that, in Federal elections State registration officials must: (1) apply standards, practices, and procedures equally among individuals seeking to register to vote; . . . (3) administer literacy tests in writing."

The approach of the earlier 1957 and 1960 Civil Rights Acts had been to enforce voting rights by authorizing the United States attorney general to bring civil lawsuits against offending state officers. But the state officers were acting under laws designed to give them an arbitrary discretion which was not easily subjected to judicial review. See, *Louisiana v. United States*, 380 U.S. 145 at 151-52 (1965), in which the court found that interpretation tests, such as Louisiana's requirement that an applicant give a reasonable interpretation of any section of the state or federal constitution, were adopted for the frank purpose of disfranchising Negroes, it being understood that the registration officers would use their discretion for that purpose. And, when the United States attorney general succeeded in having a state literacy statute declared unconstitutional, another slightly different one would be enacted to take its place.

Thus, in 1964, Congress decided to get to the heart of the problem; i.e., the practice of vesting unlimited discretion in state registration officers. Accordingly, the 1964 Civil

¹ House Report No. 914, 88th Congress, 2d Session, 1964 U.S. Code Cong. & Ad. News 2391 at 2394.

² Additional views on H.R. 7152 by Representatives McCulloch, Lindsay, Cahill, Shriver, MacGregor, Mathias and Bromwell, 1964 U.S. Code Cong. & Ad. News, 2487 at 2490.

³ For additional legislative history, see the comments of Representative Rogers of Colorado on the House floor, January 31, 1964, 110 Cong. Record 1548, and of Senator Keating on the Senate floor, April 1, 1964, 110 Cong. Record 6717.

Rights Act prohibited the use of literacy tests unless they met federal standards for uniform application. The basic operative language of the statute (now applicable as to state elections as well) is:

"No person . . . shall . . . employ any literacy test as a qualification for voting in any election unless . . . such test is administered to each individual and is conducted wholly in writing . . ."

In other words, unless a state's system for administering literacy tests meets the standards of the federal law, state officers may not use literacy tests at all.⁴

RCW 29.07.070, *supra*, does not presently require that a literacy test be given to each person who applies to register to vote. Instead, our statute says that a test is to be administered only if the registration officer "is not satisfied" with the applicant's sworn statement that he is able to read and speak the English language so as to comprehend the meaning of ordinary English prose.

In addition, our statute does not require that the test be given in writing; it says that the registration officer—" . . . may require the applicant to read aloud and explain the meaning of some ordinary English prose;"

While Washington is not one of the states with a tradition of discrimination against minorities in voting, our statutory provisions on literacy tests are like those which were in effect where abuse occurred. The federal government has prohibited the discretionary approach, and Washington is bound to obey the law⁵ as much as those states whose misconduct caused it to be enacted.

We reiterate that it is literacy testing, not the literacy requirement, at which 42 U.S.C., § 1971(a) (2) is directed.

Except in cases where the Puerto Rico provision applies, we see nothing in the federal voting rights legislation which prevents a voter registration officer from requiring an applicant to state (RCW 29.07.070) and swear (RCW 29.07-.080) that he is able to read and comprehend ordinary English prose.⁶ A person who falsely swears for this purpose is guilty of a felony. RCW 28.85.200.

To summarize, we have concluded that:

(1) The Washington requirement that a person be able to read and speak the English language in order to vote remains in effect, except for persons educated in American flag schools where the predominant classroom language was other than English.

(2) Except as noted in (1), federal law does not prevent a voter registration officer from requiring an applicant to state and swear that he is able to read and speak the English language.

(3) Until Washington provides for the administration of literacy tests on a uniform basis in conformity with federal law, no

⁴ See note, Federal Protection of Negro Voting Rights, 51 Va. L.R. 1051 at 1192.

⁵ The constitution of the United States says: "This Constitution, and the laws of the United States which shall be made in pursuance thereof; . . . shall be the supreme law of the land . . . any thing in the Constitution or laws of any state to the contrary notwithstanding." Article VI, clause 2.

⁶ For their own guidance, voter registration officers may wish to take note of 42 U.S.C., § 1971(c) which says that in any lawsuit brought by the United States attorney general to enforce voting rights: ". . . there shall be a rebuttable presumption that any person who has not been adjudged an incompetent and who has completed the sixth grade in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico where instruction is carried on predominantly in the English language, possesses sufficient literacy, comprehension, and intelligence to vote in any election."

person may be required to take a literacy test.

We trust that the foregoing will be of assistance to you.

Very truly yours,

JOHN J. O'CONNELL,
Attorney General.
MORTON M. TYTLER,
Assistant Attorney General.

STATE OF OREGON, DEPARTMENT OF
STATE,
Salem, March 20, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
Washington, D.C.

DEAR CONGRESSMAN THOMPSON: Your letter of March 15, 1969 addressed to the Honorable Robert Y. Thornton, our Attorney General, has been referred to this office for our study and reply.

Yes, both the constitution of our state and our revised statutes provide for literacy tests in connection with registration and voting.

Above we are referring to Section 2, Article II, Oregon Constitution and Oregon Revised Statutes 247.131. Copies of both these citations are enclosed for your information.

As a bit of an editorial, we would like to comment to the effect that a literacy test is not universally given in Oregon. To the best of this writer's knowledge, literacy tests have during the past ten years been administered but twice.

If you have any further questions on this subject, please let us know.

Sincerely,

JACK F. THOMPSON,
Assistant Secretary of State.

247.070 Time for registering. (1) No elector may register within 30 days preceding any election held throughout the county in which he resides for the purpose of voting at such election. No elector residing in any precinct in which any election not held throughout the county is to be held may register within 30 days preceding such election for the purpose of voting at such election.

(2) Any elector who will complete his residence requirement or attain the age of 21 years during the period when the register of electors is closed may register within 30 days preceding the closing of the register. [1957 c.608 §30]

[247.080 Repealed by 1957 c.608 §231]

[247.090 Repealed by 1957 c.608 §231]

247.100 Office hours of county clerk on last day for registration. On the last day for registration of electors, including Saturday, the county clerk in all counties shall keep his office open for registration of electors from the time the office is opened in the morning continuously until 8 p.m.

247.110 [Repealed by 1957 c.608 §231]

247.111 Registration of elector absent from county of residence or from Oregon. (1) Any elector absent from the county in which he resides but within the state may register before the county clerk or any official registrar of the county in which he may then be. Such county clerk or official registrar shall mail the official registration card of the elector to the county clerk of the county in which the elector resides and may collect from the elector a fee of not more than 25 cents.

(2) An elector absent from the state may register by:

(a) Signing a statement, under oath or affirmation, containing the same information as an official registration card or by completing an official registration card before a notary public or an official with elector registration functions similar to those of a county clerk or official registrar, and by mailing such statement or card, together with a certificate of such notary public or

official that the elector has satisfied the requirement of ORS 247.131, to the county clerk of the county in which the elector resides; or

(b) Mailing a request for registration to the county clerk of the county in which the elector resides, and the postmark on such request indicates that it was posted not less than 30 days preceding the election. Upon receipt of such request the county clerk shall send to the elector an official registration card. The elector shall complete the card before a notary public or an official with elector registration functions similar to those of a county clerk or official registrar and shall return it to the county clerk, together with a certificate of such notary public or official that the elector has satisfied the requirement of ORS 247.131. [1957 c.608 §33; 1959 c.274 §1]

247.120 [Amended by 1955 c.695 §3; repealed by 1957 c.608 §231]

247.121 Required registration information.

(1) Each elector who requests registration shall supply the following information under oath or affirmation:

(a) His full name and sex.

(b) His mailing address, his residence address or any other necessary information definitely locating his residence.

(c) The period of time preceding the date of registration during which he has resided in the state.

(d) The date and place of his birth.

(e) The full name of his father, the full maiden name of his mother and the full name of his spouse.

(f) His occupation or profession.

(g) Whether or not he is a naturalized citizen. If he is a naturalized citizen and if he has not been previously registered in the county as a naturalized citizen, the elector shall exhibit his final citizenship papers or an authenticated copy thereof.

(h) The name of the political party with which he is affiliated, or that he is not affiliated with any political party or that he does not desire to supply such information.

(2) No elector shall supply any information under subsection (1) of this section, knowing it to be false. [1957 c.608 §34]

247.130 [Repealed by 1957 c.608 §231]

247.131 Literacy test. If he has not been previously registered in this state, no elector shall be registered unless he is able, except for physical disability, to read and write English. The elector may be required to demonstrate such ability by reading a paragraph of his own choosing from any available printed matter and by signing his name. [1957 c.608 §35]

247.140 [Repealed by 1957 c.608 §231]

STATE OF NORTH CAROLINA, DEPARTMENT OF JUSTICE,
Raleigh, March 19, 1969.

Re: Literacy test.

HON. FLETCHER THOMPSON,
House of Representatives,
Congress of the United States,
Washington, D.C.

DEAR MR. THOMPSON: In reply to your inquiry of March 15, 1969, as to whether literacy tests are still being used by registrars in North Carolina, you are advised that 39 counties in this State (out of 100 counties) have been placed under the Voting Rights Act of 1965. Therefore, the literacy test is not applied in the 39 counties, but is applied in the other counties of this State. The literacy test used in North Carolina is a very simple, minimal and uniform test wherein the person may merely copy the material presented to them.

Very truly yours,

ROBERT MORGAN,
Attorney General.
JAMES F. BULLOCK,
Deputy Attorney General.

STATE OF MAINE, DEPARTMENT OF
THE ATTORNEY GENERAL,
Augusta, Maine, March 20, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
House of Representatives,
Washington, D.C.

DEAR SIR: This will acknowledge receipt of your letter of March 15 addressed to Honorable James S. Erwin, Attorney General. You have asked if the State of Maine still uses literacy tests for voter registration. The answer is that we still do. 21 M.R.S.A. §241, subsection 2, provides:

"He must read from the Constitution of the State of Maine in a manner which shows he is neither being prompted nor reciting from memory. He must write his name in English.

"A. Exception. This subsection does not apply to a person who is prevented by physical disability from performing its requirements, but he may be required to supply reasonable proof of his knowledge."

I trust this information is what you are seeking.

Very truly yours,

GEORGE C. WEST,
Deputy Attorney General.

OFFICE OF THE ATTORNEY GENERAL,
STATE OF WYOMING,
Cheyenne, Wyo., March 20, 1969.

HON. FLETCHER THOMPSON,
Member of Congress, Congress of the United States, Washington, D.C.

DEAR CONGRESSMAN THOMPSON: This will acknowledge receipt of your letter of March 15th, wherein you inquired as to whether or not literacy tests are still being required by Wyoming voter registrars in relation to qualification of prospective voters.

Art. 6, Sec. 9 of the Wyoming Constitution provides:

"No person shall have the right to vote who shall not be able to read the constitution of this state. The provisions of this section shall not apply to any person prevented by physical disability from complying with its requirements."

This provision of our Constitution was interpreted by the Wyoming Supreme Court in the case of *Rasmussen v. Baker*, 7 Wyo. 117, 50 Pac. 819 (1897), where on pages 148 and 149 of the Wyoming Report, our Court held: "... in the sense of the constitutional requirement, no person is able to read the constitution of this state who cannot read it in the English language; and consequently is not entitled to vote, unless such incapacity is the result of physical disability, or such person has the right to vote at the time of the adoption of the constitution."

The literacy test is still incorporated in our statutes. (Sec. 22-6 and 22-158, Wyoming Statutes 1957.)

Yours truly,

JAMES E. BARRETT,
Attorney General.

STATE OF CALIFORNIA, OFFICE OF
THE ATTORNEY GENERAL, DEPARTMENT OF JUSTICE,
Sacramento, May 8, 1969.

HON. FLETCHER THOMPSON,
Member of Congress,
Washington, D.C.

DEAR CONGRESSMAN THOMPSON: This will acknowledge receipt of your recent letter requesting information as to whether literacy tests are still being used by voter registrars in the State of California. As you may know, the provisions of Article II, Section 1, of the California Constitution set forth the qualifications for voters in California and provides in part as follows: "... and no person who shall not be able to read the Constitution in the English language and write his or her name, shall ever exercise the privileges of an elector in this State; ..."

Up until 1961, under the provisions of Section 14235 of the California Elections Code, a voter could be challenged at the voting polls on election day on the grounds that he could not read as required by the Constitution but that challenge provision was repealed by the provisions of Statutes of 1961, Chapter 56, Section 3.

Up until 1961, the provisions of Section 14247 set forth a provision that if a person was challenged on the grounds that he could not read, he could be required to read "... any consecutive 100 words of the Constitution of the State selected by the Judges..." That provision was also repealed by Statutes of 1961, Chapter 23.

Actually, registration of voters is conducted by the County Clerks or Registrars of Voters of the 58 counties of the State of California.

The Secretary of State conducts statewide elections in the State of California and H. P. Sullivan, Assistant Secretary of State, and former Registrar of Voters of Santa Clara County, informs us that the statewide practice is as follows: County Deputy Registrars of Voters are usually instructed to question a voter if they have doubts concerning his ability to read. If a voter admits he cannot read English, he is not registered, but if he states he can, he is usually registered or asked to read a few words on the Affidavit of Registration prior to being registered.

We hope this information will be of assistance to you.

Very truly yours,

THOMAS C. LYNCH,
Attorney General.
CHARLES A. BARRETT,
Assistant Attorney General.

PHOENIX, ARIZ.,
September 15, 1965.

Department of law letter opinion No. 65-19 (R-133).

No. 1 requested by: The Honorable Sarah Folsom, Superintendent of Public Instruction.

Question: What effect, if any, does the Voting Rights Act of 1965 (P.L. 89-110) have on local district school board elections?

Answer: See body of opinion.

No. 2 requested by: The Honorable D. L. Greer, Apache County Attorney.

Question: May the present registration form used in Apache County still be used in view of the passage of the Voting Rights Act of 1965?

Answer: Yes.

No. 3 requested by: The Honorable Richard J. Riley, Cochise County Attorney, The Honorable David E. Ellsworth, Yuma County Attorney.

Question: Does the Voting Rights Act of 1965 (P.L. 89-110) effect voter registration in Arizona?

Answer: Yes.

OPINION NO. 65-19 (R-133) SEPTEMBER 15, 1965

The Voting Rights Act of 1965 (P.L. 89-110) was passed to enforce the provisions of the 15th Amendment of the United States Constitution, which reads as follows:

"Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color, or previous condition of servitude.

"Section 2. The Congress shall have power to enforce this article by appropriate legislation."

In the spirit of the amendment, Congress has set forth the purpose of the Act, in Section 2, in these words:

"No voting qualification or prerequisite to voting, or standard, practice, or procedure shall be imposed or applied by any state or political subdivision to deny or abridge the right of any citizen of the United States to vote on account of race or color."

Following Section 2 there are seventeen additional sections of which only one, Sec-

tion 4, has immediate applicability and effect up on our state election laws and the specific questions asked.

Section 4, generally, provides that a citizen's right to vote may not be denied by his failure to comply with any "test or device". This prohibition clearly stated in Section 4 (a), does not automatically apply to all states, or subdivisions of the states, but requires a prior determination to be made by designated officials. In Subsection 4(b) this requirement is set forth as follows:

"The provisions of subsection (a) shall apply to a state which (1) the Attorney General determines maintained on November 1, 1964, any test or device, and with respect to which (2) the Director of the Census determines that less than 50 per centum of the persons of voting age residing therein were registered on November 1, 1964, or that less than 50 per centum of such persons voted in the presidential election of November, 1964."

The express intention of Congress is that Section 4(a) only apply to a federal, state or local election after Section 4(b) facts are ascertained by the Attorney General and Director of the Census. It follows that these provisions are not self-executing and not applicable to state election laws until the determination has been made and communicated by publication in the Federal Register (Section 4[b]). Our immediate information is that such a determination has not been made concerning Arizona.

The only provision of the Act which has immediate application appears to be Subsection 4(e) (1) and (2), which by express terms is also enacted under authority of the 14th Amendment of the United States Constitution. This Subsection makes a demonstrated sixth grade education presumption of ability to read, write, understand or interpret any matter in the English language. Pertinent parts of the Subsection are as follows:

"4(e)(2) No person who demonstrates that he has successfully completed the sixth primary grade in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English, shall be denied the right to vote in any Federal, State or local election because of his inability to read, write, understand or interpret any matter in the English language. . . ."

In its first regular session of 1965, the Twenty-Seventh Legislature amended A.R.S. § 16-921, entitled "Grounds for Challenging Voter," by removing the requirement that a voter be able to read and understand the Constitution. The only element remaining in the nature of a test or device is the requirement that the voter be able to write his name, unless prevented from doing so by physical disability. In addition to this is A.R.S. § 16-101 A(4), which is entitled: "Qualification of Electors" and reads:

"Every resident of the state is qualified to become an elector and may register to vote at all elections authorized by law if he:

"4. Is able to read the Constitution of the United States in the English language in a manner showing that he is neither prompted nor reciting from memory, unless prevented from so doing by physical disability.

"5. Is able to write his name, unless prevented from doing so by physical disability."

It seems clear to this office that the aforementioned Section 4(e)(2) is intended by Congress to have immediate effect and that said section must be read to modify both A.R.S. Sections 16-101 and 16-921 to the effect that where a person can demonstrate that he or she has gone through the sixth grade, in a school as specified heretofore, such demonstration takes the place of Subsections 4

and 5 of A.R.S. § 16-101 A and Subsection 7 of A.R.S. § 16-921.

Our answers to Questions No. 1 and 3 are answered by the foregoing paragraph. The Voting Act of 1965 does have an effect upon the local school board election and voter registration. Its effect in Arizona, however, as pointed out, is slight.

Our answer to Question No. 2 is that the same registration form may be used. When a person demonstrates sixth grade primary schooling, this demonstration replaces the necessity for inquiry into his or her ability to read or understand the Constitution or to write his or her name.

Respectfully submitted,
DARRELL F. SMITH,
The Attorney General.

CITY AND COUNTY OF HONOLULU,
OFFICE OF THE MAYOR,
Honolulu, Hawaii, March 25, 1969.

HON. SPARK M. MATSUNAGA,
U.S. House of Representatives,
Cannon House Office Building,
Washington, D.C.

DEAR SPARKY: I am happy to respond to your inquiry of March 21, requesting information concerning the administration of the Voting Rights Act of 1965 as it relates to the City and County of Honolulu.

As your letter states, Honolulu County was triggered under this Act. This meant that applicants for registration to vote could not be questioned about their literacy for five years or until we obtained a declaratory judgment from the United States District Court that the test had not been used in a discriminatory manner.

In this connection, Mrs. Ione Akana, Deputy Chief of the United States District Court here, has informed our City Clerk Eileen K. Lota on January 10, 1969 that there is no record that Honolulu County has filed suit to obtain such declaratory judgment.

Meanwhile, please be informed that we are not administering any literacy tests in registering voters.

With much aloha,
Sincerely,

JACK F. TEEHAN,
Executive Assistant.

A LETTER FROM A CONSTITUENT

HON. HENRY C. SCHADEBERG

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. SCHADEBERG. Mr. Speaker, in an effort to inform my colleagues of what people back home are thinking, upon occasion I include in the RECORD letters I have received from constituents—some with whom I agree and some with whom I do not agree. I believe we should listen to what our citizens are saying so that, in the decisions we make, their will is reflected. Of course, I receive the consent of my constituents whose letters I wish to share with the Members of the House. Mr. Roger Moon, a resident of the first district who is of American Indian descent, recently wrote to me, reflecting his thinking concerning an unfortunate incident which occurred in April in his community. The full text of his letter follows:

RACINE, WIS.
DEAR SIR: Since everyone else is protesting, here is mine: We are having a riot and property damage to public property. Since some of my tax money is involved, I'm concerned.

First, if these rotten people want to spend the fruit of my labor, they shouldn't interfere with my ability to go to work.

Second, our police have to be paid for the extra hours of work. Since this will cost very much, I think they have used their fair share of my wages. Since I am a non-White, I think I can understand their problems. They need a school attendance law with teeth in it; as unless my history teacher was wrong, there was never a time in history when appeasement made any difference in the militant action.

Third, I don't think I'm special. I get up at 4:30 a.m., drive 20 miles to work, I work 9 hours, and drive 20 miles back home. I'm just a man with seven children and a pregnant wife, so you see I'm not so different from these poor, misunderstood people.

Fourth, I watched the Colored Genocide March on Madison (the capital city of Wisconsin). I wish I could have as new a car as these people. Mine is ten years old and I paid \$20 for it six months ago; so I'm a mechanic, though not by choice.

Fifth, I don't think I have anything to complain about. We are happy in our poverty. Just would you please try to make a better country for these little children of ours. I do fear for their safety.

ROGER MOON.

PILGRIMAGE TO THE ALAMO

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. GONZALEZ. Mr. Speaker, San Antonio, Tex., my district, is the home of the Alamo. Every year now for some time it has become traditional to make a pilgrimage to this historic shrine in order to commemorate the heroes who died there more than 135 years ago.

The official address this year was made by a great American soldier, Lt. Gen. Harry H. Critz, the commanding general of the 4th U.S. Army in San Antonio.

Mr. Speaker, I ask unanimous consent that his eloquent and unforgettable words be placed into the RECORD at this point:

PILGRIMAGE TO THE ALAMO ADDRESS, LT. GEN. HARRY H. CRITZ, COMMANDING GENERAL, 4TH U.S. ARMY, SAN ANTONIO, TEX., APRIL 21, 1969

Thank you, Mr. Garrett (response to introductory remarks).

Mayor McAllister, Mrs. Gerner, ladies and gentlemen, as an American I am greatly honored to have this opportunity to present the traditional address at these ceremonies commemorating the heroes who gave their lives here over 130 years ago. As a native Texan, brought up on the traditions of our State, this occasion has a deeply personal meaning, as I recall the significance of "the Alamo" to the people of Texas.

On March 6, 1836, on this ground where we stand this afternoon, a small group of dedicated men died in triumphant defeat. Defeat, because in a strict military sense they had lost the battle. Triumphant, because in that greater sense of the ultimate in devotion to an ideal, they had won their war for independence. For it was those who fought here who bequeathed to the people of Texas the unity and common purpose epitomized by that rallying cry which has become a part of our national heritage: "Remember the Alamo."

It was this bequest of those heroic men we honor here today which made so invaluable

a contribution to the final victory of Texans on another day on the battlefield at San Jacinto.

But how should we, the Americans of today, "remember the Alamo"?

Not for the military activities of that conflict of years past, violent and deadly as they were. Not for its magnitude, for even by the standards of that time and place it was a little battle in which a small force ultimately succumbed to superior numbers. We "remember" because it was not a piece of ground, not a partially ruined mission, those brave men were defending but rather, a cause—a belief in the right of a people to determine their own destiny—free from the fear and power of the dictator and the tyrant.

It is this belief, held by those Texans and other earlier Americans—and steadfastly maintained by later generations—that has made the United States of America the greatest nation the world has ever known!

But, let us reflect a moment upon those attributes which sustain a great people. Material wealth?—certainly this is important if we are to cope with the problems and dangers of the world we live in. Yet, history has too frequently demonstrated that no nation dedicated solely to material gain will endure. To realize our unprecedented potential for enduring greatness it is vital that we continue to be great in spirit—great in our unswerving dedication to those ideals which made, and have kept, our country free. If we are to insure that future generations of Americans will continue to enjoy the liberties that those ideals have gained we must be constantly alert to threats to those liberties.

A well-known American writer* once made a remark to the effect that those who refuse to study history are destined to repeat it. And, history is replete with the stories of great nations which were destroyed because they had ceased to believe in their own ideals—destroyed by forces from within their societies.

This, I think, is of particular significance to us at this time for we are all aware of the disorders which have taken place in recent years throughout this Nation. While it is true that a very small minority have been actively engaged in this turbulence, it is of considerable concern that a part of this minority is students in our institutions of higher education—a segment of the society to which we must look for our future national leadership.

The reasons given for this disorder are almost as many as they are complex. However, running through the wide spectrum of these disturbances is a highly discernable thread, the thread of a small core of leaders dedicated to an ideology whose stated purpose is explicit—the destruction, by violence, if necessary, of our American social institutions.

The contention of this leadership is that the principles which have guided the moral and spiritual, as well as material, development of the United States are no longer valid because they have not produced "the perfect society."

Much propaganda carries in it, as in this case, a grain of the truth, enough to impress the unwary or the unthinking.

Of course we cannot deny that our society is imperfect. I doubt that it is within human capability to be perfect. But, I submit that this society is the best that has been produced throughout man's history. It will continue to be a viable society, capable of the adjustments necessary to make it the best society man can produce in the future only if we remain steadfast to those values and ideals which have brought us further along the road to social perfection than mankind has ever come before.

* George Santayana: Poet, educator, philosophical writer. Born in Spain; came to US in 1872; studied at Harvard; taught History of Philosophy in Berlin; died in Europe.

But, as we continue up that road we must not be misled: We must be aware that the tyrant and the aggressor are still with us, inside as well as outside our borders. They are armed with new weapons of subversion and new techniques of terror, but their ultimate objective is as old as history—the domination of mankind.

The preservation of the freedoms we hold dear dictates that aggression and subversion must be stopped when and where they appear. As history has so tragically recorded, the greater the delay in acting against them, the higher the price that must be paid to subdue them.

As the patriot Thomas Paine wrote during dark days in the founding of our country, "tyranny . . . is not easily conquered; yet we have this consolation with us, that the harder the conflict, the more glorious the triumph. What we obtain too cheap, we esteem too lightly . . . it would be strange indeed if so celestial an article as freedom should not be highly rated."

The price of liberty has always been high—it is still high.

Freedom is ours to enjoy only because dedicated Americans earned and defended it—and paid the price. Freedom will be our children's to enjoy only because those Americans who defend it throughout the world today are willing to pay that price.

The men who fought here at the Alamo understood the cost of liberty when they chose "never to surrender or retreat"—and died to a man for the cause in which they believed. They knew that freedom must be dearly bought—and this each generation of Americans must know if the ideals we cherish, and this great Nation built on those ideals, are to endure.

THE FATHER OF COLUMBUS DAY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ANDERSON of California. Mr. Speaker, it has recently come to my attention that the California Knights of Columbus are sponsoring a program for a commemorative postage stamp for the founder of Columbus Day, Mr. Angelo Noce. Mr. Noce, a native Californian, devoted most of his life to having Columbus Day made a national holiday.

Mr. Speaker, I would like to urge President Nixon and Postmaster General Blount to issue such a commemorative stamp and presidential proclamation for the late Angelo Noce, "The Father of Columbus Day."

I would also like to include for the RECORD a copy of a resolution to this effect which has been introduced in the California State Assembly.

Resolution follows:

ASSEMBLY JOINT RESOLUTION 4

Joint resolution relative to the issuing of a commemorative postage stamp and a presidential proclamation regarding Angelo Noce, "The Father of Columbus Day in America"

Whereas, During his life, Angelo Noce gave unselfishly of his time to make Columbus Day a legal holiday; and

Whereas, Columbus Day was first officially proclaimed by Colorado Governor Jesse F. McDonald as a legal holiday in the State of Colorado; and

Whereas, Two years later in 1907 Colorado's Governor Henry A. Buchtel signed the Co-

lumbus Day Bill, inspired and written by Noce, into law making Columbus Day a state holiday; and

Whereas, Angelo Noce devoted most of his life to making Columbus Day a national holiday, and when he died in the year 1922 at the age of 74, 35 states had adopted his worthy proposal; and

Whereas, Angelo Noce should be known as the "Founder and Father of Columbus Day in America," and proper tribute should be given by the United States of America; and

Whereas, Angelo Noce contributed to the history and color of the State of California by working in the "Mother Lode" goldfields, attending school in Jackson, enrolling in the first class at St. Mary's College in 1863, studying printing and journalism at Santa Clara University, and working on the Amador Dispatch in Jackson; and

LEGISLATIVE COUNSEL'S DIGEST

AJR 4, as introduced, Chapple (H.A.D.). Angelo Noce Week.

Urges Post Office Department to honor Angelo Noce, "Founder and Father of Columbus Day" with commemorative stamp and urges President to proclaim Angelo Noce Week.

Whereas, Angelo Noce contributed greatly to the history and color of the State of Colorado by becoming deeply involved in politics and civil affairs in representing Denver's growing Italian-American community, as deputy county assessor, as constable, as deputy sheriff, as clerk in the Colorado House of Representatives, and as nominee in 1898 for a seat in the Legislature; and

Whereas, Angelo Noce also enjoyed renown as a prominent Fourth Degree Knight of Columbus, Catholic Lay Apostle, an outstanding citizen and patriot; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California recommend that the Post Office Department of the United States of America print a commemorative stamp honoring Angelo Noce as the "Founder and Father of Columbus Day"; and be it further

Resolved, That Richard M. Nixon, President of the United States of America, be requested to proclaim October 5 to October 12, 1969, Angelo Noce Week; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President of the United States and the Postmaster General of the United States

NIXON'S STAND ON STUDENT UNREST

HON. HALE BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. BOGGS. Mr. Speaker, I attach hereto, so that other Members of the Congress may read it, a copy of an editorial recently broadcast by WDSU-TV and WDSU-Radio in New Orleans, with respect to student unrest.

More and more people throughout our country are becoming alarmed over the sheer anarchy which, unfortunately, is prevalent on many of the campuses of our country.

The editorial follows:

NIXON'S STAND ON STUDENT UNREST

(NOTE.—The following editorial was broadcast over WDSU-TV and WDSU Radio on Monday, March 24, 1969.)

A recent poll revealed that Americans are not as deeply concerned over Vietnam, the Middle East, inflation or the missile race, as

they are disturbed by growing student unrest and, often, violence.

This weekend President Nixon publicly took a stand which was, we feel, both firm and fair. On one hand, he pointed out that "freedom—intellectual freedom—is in danger in America." He also said: "Violence is becoming an accepted element in the clash between students and university officials."

He acknowledged the need for legitimate reforms . . . the "impersonalization" of teaching in many schools . . . the "need for student involvement" in certain areas.

But he also stressed the obvious if we are to avoid anarchy. Assault and counter-assault (lack of communication) break down any rational attempts to solve real problems.

Into the vacuum have stepped the nihilists, the Marxist-Maoists-Communist self-styled guerrilla revolutionaries . . . and those who simply call themselves "Crazies."

"Violence," the President said, "must never be permitted to influence the action of judgments of the university . . . or it will cease to be a university." One does not burn down the barn to "roast a pig." It is easy to pout and shout if one has no solutions to offer.

The same logic must apply, in a democracy, to all those who use illogical methods—such as the adults who ransacked a Dow Chemical Company office this weekend because Dow manufactures Napalm.

No matter how righteous one feels his cause, no one has the right to make up his own laws, destroy another's property, or interfere with the rights of others who observe the laws, and whose rights also must be considered. This is anarchy—not a democracy.

WILTON MCKINNEY WINS MARLBORO AWARD

HON. JAMES R. MANN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. MANN. Mr. Speaker, it is my privilege to pay tribute to an outstanding citizen of my district, Mr. Wilton J. McKinney, of Greenville, S.C.

Mr. McKinney is noted as one of Greenville's most active civic and community leaders, but apart from this he has earned a great deal of respect and recognition through his long-standing work with the young people of the community. As a tennis coach at Greenville Senior High School for 20 years, he guided his teams through successive years of winning seasons and helped to produce a number of regional and national honor players from these teams. During these years, he has devoted a substantial part of his vacations annually to assist in the direction of tennis tournaments in South Carolina and has continually made his home a second "home" to his players and any other sports-minded youngsters interested in playing tennis.

His outstanding service to youth was recently recognized at a special presentation banquet in his honor attended by over 200 of his friends and fellow citizens. At the banquet, Mr. McKinney received as a gift from the citizens of Greenville a trip to see the Wimbledon championships in England this summer.

Mr. Donald Dell, captain of the U.S. Davis Cup team, was also present at the

banquet to give Mr. McKinney the Marlboro Award, a national award recognizing outstanding contributions to the game of tennis.

Mr. McKinney's dedication and devotion in serving, coaching, and guiding the young people of the Greenville area has truly been remarkable. I welcome this opportunity to commend Mr. McKinney on these achievements and insert the following article from World Tennis magazine and a letter from the Honorable Robert E. McNair, Governor of South Carolina, along with my remarks:

[From World Tennis magazine, May 1969]

WILTON MCKINNEY WINS MARLBORO AWARD

The 20th Greenville High School tennis team that Wilton McKinney coached scored the greatest sports achievement in the school's history, and when they had finished Wilton couldn't even applaud. In 1968 the Greenville team in South Carolina won the Southern Championships and finished third in the nation in the National Interscholastics at Chattanooga. Most players would have wrung their coach's hand off, but McKinney's hand was in a cast. He jokes about it:

"I broke my wrist in a car accident in January and I wasn't able to demonstrate one thing for this team. Before that, I hurt my knee playing tennis in November and was out of action for two months. Then my players had their greatest achievement. Do you think they are trying to tell me something?"

If they are trying to tell him anything, it's that he started them on the championship route with too much momentum for a plaster cast to stop. How can a boy malingering under a coach who is giving the school 20 hours per week without a cent in return?

McKinney is not and never has been paid for coaching the Greenville team. He doesn't charge them either for using his house as a luxurious locker room, drugstore, tea room and council chamber where free soft drinks, free advice and free encouragement are offered. His home is directly across the street from the Greenville Country Club, where the team practices. He dashes to the courts after work and stays until 9 P.M. when the last pupil of the day has had a hit. New faces are seen at the backboard each year, along with a few old ones whom McKinney has resurrected from a premature retirement from tennis. Wilton and his good friend Paul Scarpa, the Greenville tennis pro, are too persuasive to allow a man to hang up his rackets permanently.

Among the 20 high school proteges of McKinney who have gone to college on tennis scholarships are Keith Stoneman, who won the Atlantic Coast Conference doubles; Tee Hooper, who took the singles and doubles in the Southern Conference as a sophomore at The Citadel; Brad Wyche, No. 1 on the Princeton freshman team; and Peyton Watson, No. 3 on the University of Miami team. Whenever his players, whether as a team or as individuals, won an event, Wilton had a celebration dinner at the most expensive steak house in town.

In the spring, McKinney averages three hours a day, five days a week on the court. In the summer he takes it relatively easy. One year he spent a week of his vacation at the National Juniors, another week at the Southern Juniors and the third at the State Closed in Columbia. But Wilton is more than just a hard-working guy; he is a delightful man whose remarkable sense of humor and inspiration have won for him the friendship of everyone who has ever met him. He has often been the best man at weddings of his former pupils and he has also been Godfather to the children of his proteges.

The Marlboro Award recognizes the extraordinary contributions of this wonderful man to the sport of tennis.

STATE OF SOUTH CAROLINA,
OFFICE OF THE GOVERNOR,
Columbia, S.C.

Mr. WILTON MCKINNEY,
Greenville, S.C.

DEAR WILTON: I am pleased to add my words of congratulations on this auspicious occasion. I know of no one more deserving of this tribute, and it is an honor for me to be included among those who count you a friend.

It is appropriate that World Tennis Magazine has selected you as the Marlboro Award recipient. Your work with young people in tennis has distinguished you in many ways. Your reputation as a teacher, counselor and friend to the hundreds of youngsters you have helped, both on and off the tennis court, has won for you many admirers, as well as many honors. Your contributions to your community, your church and your fellow man have been a source of inspiration for those who have tried to walk in your footsteps.

At this time of commendation, I am proud to join World Tennis Magazine, the Greenville community and all those who participate in and observe the game of tennis in paying tribute to one who has given more than he has received, but who, in giving has won the respect and admiration of hundreds of friends throughout the nation.

Warmest congratulations and kindest regards, I am

Sincerely,

ROBERT E. MCNAIR,
Governor of South Carolina.

SMALL SHIPMENTS MORE DIFFICULT TO MOVE

HON. W. S. (BILL) STUCKEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. STUCKEY. Mr. Speaker, Commissioner Rupert L. Murphy of the Interstate Commerce Commission stressed the mounting difficulty of small shippers to obtain adequate service when he addressed the Freight Forwarders Institute last week.

Commissioner Murphy, a distinguished son of Georgia, is one of our most learned experts in this area of concern and, under unanimous consent, I include his speech in the RECORD, as follows:

TODAY AND TOMORROW

(Remarks of Rupert L. Murphy, Interstate Commerce Commissioner, before the annual meeting of the Freight Forwarders Institute, Washington, D.C., May 7, 1969)

I appreciate the opportunity of having a small part in your program and of meeting with you today. This is my first appearance before your group, and I have come primarily for the purpose of becoming better acquainted with you. However, I recognize some of you as old friends with whom I have worked in a highly important industry—transportation. You represent one of the several modes making up our national system, and you have contributed greatly to that system which, despite its imperfections, still is the envy of the world.

The Commission's regulation of carriers under its jurisdiction is subject to the Congressional pronouncement of the most recent National Transportation Policy in 1940. Our power to regulate in the light of the Policy has been brought to bear with but one goal—the development and maintenance of a sound carrier system geared to the public interest and designed to meet the Nation's transportation needs. To this end, there must be an adequate supply of transportation to

handle both volume and small shipments. Rates and charges must be just and reasonable, and non-discriminatory. At the same time, they must provide the shipper with fair and efficient access to raw materials and markets, as well as provide the carriers with sufficient revenues to continue in business and improve their service to the public.

Regulation of surface transportation by the Commission has been in effect for many years. This might lead the uninformed observer to conclude that our goal surely must have been reached by now, but those familiar with transportation know differently. The transportation picture refuses to remain static. In the past decade the rapid economic growth of our country has brought changes in all aspects of transportation with greater frequency and rapidity than in any other time in the past. If we are to retain the best transportation system in the world, the Commission, the carriers, and the shippers must cooperate in meeting the changing conditions.

Today the motor carriers have come of age. The railroads are gearing their efforts to new transportation ideas and to obtaining new sources of traffic, and to put themselves on a sound financial basis. The water carriers are out to retain their position as the low-cost carrier mode and to grow and prosper. The freight forwarders are seeking to improve their place in the sun. And the air carriers are seeking ways and means to divert freight to air service.

In today's arena there is much controversy. Each mode is out to better itself. Congressional leaders and carrier interests are continually calling for changes in this or that transport policy or method. The shippers are becoming better organized and more effective in their efforts to protect their interests. The total picture is awesome, troublesome, and potent with complex challenges. No doubt, there will be many changes in the next decade in regulatory laws and in methods and means of meeting the country's swiftly changing transportation requirements.

With such a stage setting, it is easy to forget or brush aside the individual problems that beset the transportation industry today. Included is one that concerns us all—the small shipments problem. Some may look on this matter as a sideshow to the three-ring circus going on in the big arena. Yet, to the person seeking small shipment transportation it represents a big problem and oftentimes means his continuation in business. Efficient and expeditious transportation of small shipments always will be required.

In addition to our decisional function, the Commission constantly is engaged in investigative proceedings and studies relating to the practices of regulated carriers. As many of you know, a Commission Ad Hoc Committee, which it was my privilege to chair, issued a report last year with respect to its small shipments study. A separate staff study has been completed and is available with the Commission report. This report is confined to the motor carrier industry and contains a number of immediate and long-term recommendations directed at the correction of a broad area of service failures.

Incorporated in the proposals is the recommendation that Congress enact legislation imposing a duty upon motor common carriers of property to enter into reasonable through route arrangements and to establish joint rates with other motor carriers and with rail, express and water carriers. Such legislation would, in our opinion, clearly improve intramodal trucking coordination, and coordination of trucking with the other modes. Although the small shipment study is confined to the role of the motor carrier, it is hoped that the many hours of investigation, conferences, and research underlying that report will be beneficial in the development of future overall Commission policy as to all transport modes.

We are, for example, fully aware that the

wholesale granting of new and additional operating authority is not the solution. It is not uncommon for successful applicants, upon initiating operations, to forget shipper commitments and to institute traffic selectivity in the quest for more desirable profit margins. This observation, however, is not intended to isolate any one segment of shipper need as we are equally concerned with freedom of entry wherever required by the public interest.

On the other hand, I realize that the freight forwarders also are substantial handlers of small shipments, and that they desire to play an increasing role in the movement and distribution of the traffic in this country. I also know that you are seeking to initiate new ways by legislative and other means to meet the small shipments problem. May I say that your efforts are appreciated. But since Commission policy may be involved, I am not in a position at this time to advocate any particular position in these matters or to express my views in what may be said to be a controversial area.

Still it may be helpful to briefly state a few of the factors involved in the present regulatory framework governing freight forwarders. As early as 1908, the Commission was called upon to determine whether railroads had any right to assess less-than-carload rates on traffic assembled into carloads by forwarding agents. The Commission found that a carrier may not properly look beyond the transportation to the ownership of the shipment as a basis for determining the applicability of rates. It thus was concluded that forwarding agents were entitled to quantity rates on aggregated shipments.¹ The findings of the Commission were fought through the courts and in 1911, the Supreme Court provided an authoritative answer in the following terms:

"The contention that a carrier * * * may discriminate in fixing the charge for carriage, not upon any difference inhering in the goods or in the cost of the service rendered in transporting them, but upon the mere circumstance that the shipper is or is not the real owner of the goods is so in conflict with the obvious and elementary duty resting upon a carrier, and so destructive of the rights of shippers as to demonstrate the unsoundness of the proposition by its mere statement."²

In the years that followed, the cost of transporting less-than-carload traffic spiraled upward and the business of freight consolidation grew accordingly. However, in 1930, the Commission began to express concern relative to the domination by railroad companies of the more important forwarding companies and certain practices engaged in by such companies.³

As a result of this concern, a formal investigation was instituted for the purpose of considering the lawfulness of the practices of freight forwarders.⁴

In its report on the investigation, a majority of the Commission found that the forwarding industry was primarily an instrumentality of the railroads through which rail carriers engaged in discriminatory and other undesirable practices. At page 303 of its decision a majority of the Commission also opined:

"Should the rail lines be invested with authority to enter into contract or divisional arrangements with the forwarder as a common carrier similar to the present arrange-

⁴ Freight Forwarding Investigation, 229 I.C.C. 201 (1938).

ment with express companies, such contracts or divisions should be subject to investigation and revision by Federal authority. Moreover, in order to adequately regulate the forwarder it is imperative that the rates, charges, rules and practices of the forwarder be filed with Federal authority and strictly observed."

The forwarding industry and for that matter several members of the Commission considered that the harsh criticism of forwarders by the majority was unwarranted. Be this as it may, many of the recommendations of the majority in the investigation case have been enacted into law and some are still the subject of intensive debate.

Finally, in the Commission proceeding⁵ wherein it was determined that freight forwarders were not subject to regulation as motor carriers or brokers under the provisions of Part II of the Interstate Commerce Act, Chairman Eastman in a concurring expression at page 558, incidentally observed:

"I agree, also, with the conclusion that the forwarding company must pay the same rates as other shippers must pay for similar transportation but in so agreeing I emphasize the words 'similar transportation.' The transportation performed by common carriers for forwarding companies is not necessarily similar to the transportation performed on local shipments of the same commodities between the same points, and usually it is dissimilar. Where such a dissimilarity can be established, a difference in rates can be justified and is lawful."

As you know, the *Acme* case led to the enactment in 1942 of Part IV of the act and the regulation of freight forwarders essentially as we know it today.

In tracing this simplified history of forwarding, I am fully aware that conditions today are different from those which existed during the formative period of freight forwarder regulation. However, whether there has been such a reversal of conditions as to warrant a different legislative approach is a matter requiring the attention of all concerned. This is particularly true since a showing that other carriers have statutory rights, which forwarders do not, may in itself, be insufficient to establish a need for new legislation.

Another subject about which I have spoken many times, and perhaps with little success, is shipper-carrier cooperation. Transportation problems cannot be solved by the Commission alone. Something more is needed, and that something, in my opinion, is greater contributions and cooperation by shipper and carrier interests. There is a rising shipper impatience with any failure of the total transportation network to accommodate him to his complete satisfaction. Transportation history is replete with the penalties that time in the market inflict upon transporters who fail in their broad commitment to serve. A tremendous volume of traffic moves every day with mutual satisfaction of shipper and carrier. It should be possible to gain accord on the troublesome remainder. Yet the cold bare fact remains that, if existing carriers do not provide the required transportation, you may be sure that somebody else will. Here is where the existing carriers, including the freight forwarders, come into the picture, and here is where carrier-shipper rapport also assumes importance.

As I have indicated, the Commission's role in resolving many transportation problems is limited. On the other hand, shipper-carrier cooperation is without limitation and can and should be a potent instrument to resolving basic transportation difficulties. I submit that increased efforts in this direction would well lead to less resort to the regulatory processes of the Commission, with substantial benefits to all concerned. As I

have said elsewhere, it is important to remember that in many instances Commission action represents only a public alternative to what could have been voluntary private action.

Throughout history man has expended more energy in moving things from one place to another than in any other endeavor. Every new world, as well as the extension of civilization, has awaited an instrument of transportation necessary for discovery and expansion. There is no question but that the dynamic growth of our economy has created greater demands for more efficient and expanded distribution facilities. While a number of new variations have been devised to keep transportation ahead of the stampeding economy, others are needed. The time is right for new technological methods, for initiative and progress, and for just plain common sense transportation thinking.

There are many areas for exploration in this age of the jumbo jet, the unit train, the superhighway, and the computer. There is also a seemingly simple box known as the container which is promising to revolutionize transportation. It provides a modern and simple way of transporting cargo, both foreign and domestic. Obviously, those engaged in transportation should take advantage of it.

Finally, I am sure that what you are really interested in is expanded operation, in increased revenue, and in a bigger spot in the sun. To achieve these goals in today's competitive world of transportation is not easy. It will require determined effort, and, above all, fertile and productive imagination. This nation is on the move, and only those who can keep up with the fast pace of changing conditions will succeed in their endeavors.

I am grateful for the opportunity to discuss these matters with you here today and I thank you for your courtesy and hospitality.

FUZZY THINKING BEHIND ANTI-ROTC HULLABALOO

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. BEVILL. Mr. Speaker, a very timely and interesting editorial appeared in the April 26 edition of the *Gadsden, Ala., Times*, a newspaper in my congressional district. This is, in my opinion, a thoughtful, well-written article which presents some very good and logical reasons why we should keep the Reserve Officers' Training Corps as a part of our college and university programs.

Having received permission, I offer this article for publication in the *Extensions of Remarks of the CONGRESSIONAL RECORD* and urge each of my colleagues to read it.

[From the *Gadsden (Ala.) Times*,
Apr. 26, 1969]

FUZZY THINKING BEHIND ANTI-ROTC HULLABALOO

"ROTC off campus!" seems to be the latest crisis call of the student activists.

The administrations of a number of universities have moved either to abolish Reserve Officers' Training Corps programs at their schools or to cease awarding them academic credits. Whether this is at the behest of the radicals or whether it merely reflects a growing reaction against the military among the intellectuals, it may not necessarily be the peace-promoting thing its advocates think it is.

One of the principles by which this nation has operated from its founding is civilian

control over the military. That principle is served not only by the fact that the president is commander-in-chief and that a civilian is head of the Defense Department but by the leavening effect obtained by drawing into the services masses of civilians through the draft and the ROTC.

Should the services be denied this leavening, should they no longer be able to fill the officer ranks with thousands of ROTC graduates yearly, should they be completely isolated from civilian America, the antimilitarists could find in the end that instead of striking a blow for humanitarianism and individual liberty they have only succeeded in creating in this country a Prussian-type military elite infinitely more inimical to their ideals.

This possibility, not the question of money, is also the most cogent argument against proposals to abolish the draft and make military service entirely voluntary.

An anti-ROTC editorial which recently appeared in 29 college newspapers around the country contended that "training soldiers whose ultimate aim is to kill is hostile to the principles of Academia."

The same kind of fuzzy-headed thinking was behind a demonstration at Kent State University in Ohio awhile back in which radicals drove recruiters from the Chicago Department off the campus. As if the police, or the military, are to be humanized by cutting them off from access to the best young minds in the country.

The ultimate aim of soldiers, like that of policemen, is not to kill but to protect the nation and its citizens.

As long as that protection is necessary, as long as we must have soldiers, sailors or airmen, service in and watchful support of the armed forces should be the obligation of all.

We may not like the military, we may agonize over its demands upon our lives and our national resources, we may be convinced of the unredeemable obtuseness of the military mind, we may dream of the time when the only soldiers we see are pictures in history books, but we delude ourselves if we think that wars are made by generals and not by statesmen.

Asked to comment about the campus editorial, Col. Everett Stoutner, chief of the ROTC Division of the Pentagon, said:

"Thank God we have a country where an article like this can appear."

Amen. And thank God we have a country that can produce a soldier capable of such a statement.

FIFTH DARTMOUTH CONFERENCE

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RARICK. Mr. Speaker, in my remarks of May 7, 1969 at page 11599 I commented on the current oversight of the Nation's legitimate news media to report to the American people on the "private and unofficial" meeting between private American citizens and Soviet officials.

I have since obtained a list of the participants of the Fifth Dartmouth Conference from the Saturday Review of February 8, 1969, which I submit for inclusion in the *RECORD*, accompanied by the magazine's account of the meeting according to the American cochairman, Norman Cousins:

PARTICIPANTS, FIFTH DARTMOUTH CONFERENCE

Taking part in the Rye Conference from the Soviet side were: Nikolai Blokhin, direc-

⁵ *Acme Fast Freight, Inc., Common Carrier Application*, 17 M.C.C. 549 (1939).

tor of the Institute of Oncology, president of the International Association of Cancer Specialists, president of the Institute for Soviet-American Relations, Deputy to Supreme Soviet of the U.S.S.R. (Soviet Co-Chairman); Yuri Zhukov, *Pravda* political commentator, deputy to Supreme Soviet; (Soviet Co-Chairman); Yuri Arbatov, director of the Institute of American Studies of the U.S.S.R. Academy of Sciences; Igor Belayev, Asia and Africa specialist for *Pravda*; Yuri Bobrakov, chief of Department of Economy, Institute of American Studies; Anna Bolkova, deputy mayor of Leningrad, Deputy to the Supreme Soviet of the Russian Federation; Konstantin Bochkarev, mayor general, master of sciences (philosophy), author; Viktor Karpov, senior research associate, Institute of American Studies; Daniel Kraminov, editor-in-chief of *Za Rubezhom* ("Life Abroad") weekly, secretary of the Union of Soviet Journalists; Igor Blischenko, professor, Chair of International Law, Institute of Foreign Affairs; Nikolai Mostovets, historian, member of Scientific Board, Institute of International Labor Movement; Boris Polevoi, author, editor-in-chief of *Youth* magazine, deputy chairman, Soviet Peace Fund; Vladimir Trukhanovsky, corresponding member of U.S.S.R. Academy of Sciences, editor-in-chief, *Voprosi Istorii* ("Questions of History") magazine; Nikolai Orlov, director, Scientific Research Institute, U.S.S.R. Ministry of Foreign Trade.

American participants attending two or more sessions were: Norman Cousins, editor, *Saturday Review*, (American co-chairman); Arthur Larson, director of the World Rule of Law Research Center, Duke University (American co-chairman); Merle Fainsod, director, Harvard University Library; R. Buckminster Fuller, professor, Southern Illinois University; James M. Gavin, chairman of the board; Arthur D. Little, Inc.; Patricia R. Harris, Professor of Law, Howard University; George Kistlakowsky, professor of chemistry, Harvard University; James Linen, chief executive officer, Time-Life, Inc.; Arthur Miller, playwright; Dr. Franklin D. Murphy, chairman of the board, *Los Angeles Times-Mirror*; Glenn Olds, educator, campaign advisor to President Nixon; Leslie Paffrath, president, The Johnson Foundation; Rosemary Park, vice chancellor, University of California at Los Angeles; David Rockefeller, president and chairman of the Executive Committee, Chase Manhattan Bank; Stella Russell, vice president, Norton Simon, Inc.; Norton Simon, director, Norton Simon, Inc.

[From the *Saturday Review*, Feb. 8, 1969]

THE FIFTH DARTMOUTH CONFERENCE

President Dwight D. Eisenhower believed strongly in the need for human contacts on every level between this nation and other nations. He was especially interested in cultural exchanges between Americans and Russians. It was under this program that *SR's* editor was sent to the Soviet Union in 1959 for the purpose of speaking on American life and institutions. After his return, he proposed that private citizens from the two nations meet—in conference—for the purpose both of widening contacts and exploring outstanding questions between the two governments. The suggestion was accepted by the Soviet Peace Committee. A conference was held in October 1960 at Dartmouth College, in Hanover, New Hampshire, with its President John Dickey as host. The Ford Foundation provided the funds. Each side had twelve representatives who were prominent in the fields of science, education, philosophy, industry, government, and the arts.

One of the principal achievements of the Dartmouth Conference was that the conferees were able to develop a frank and open relationship. George F. Kennan, former U.S. Ambassador to Moscow, put it vividly when he said that he had to come to a college town in New England to have the kind of candid and friendly exchange of views that

he had been unable to experience in twenty-five years inside the Soviet Union. The conferees were able to discuss issues of mutual concern that until then had not yet been fully explored across the table between their two governments. At the conclusion of the conference, a full account of the meeting was transmitted to Washington.

The second conference in the series was held the following summer in the Crimea, with many of the same participants. The range of subjects was broadened somewhat, although most of the progress was registered on those topics previously considered at Dartmouth. As before, there was a direct and open exchange of views.

A third Dartmouth Conference was held in October 1962 at the Phillips Academy at Andover, Massachusetts. The backdrop could not have been more ominous or inauspicious. The beginning of the conference coincided precisely with the start of the Cuban missile crisis. The participants readily discovered that their identity cards belonged not just to their own nations but to the human species. For if the Cuban crisis came to full force, all men on earth would be the victims, as Pope John had warned. To be sure, there was the sharpest debate at Andover over the issues involved in the Cuban missile crisis, but the sense of being joined together in a common peril helped the group to develop a valuable perspective for viewing their other differences and problems.

The fourth Dartmouth Conference was held in Leningrad in July 1964. Some of the major questions raised at previous Conferences—a ban on nuclear testing and limitations on the use of weapons in space—by the time had largely been resolved. But two of the three men who had formed one of the most unusual triumvirates in history and who were identified with the new thrust for peace—President John F. Kennedy, Premier Nikita Khrushchev, and Pope John XXIII—were no longer on the world scene. Much of the discussion in Leningrad, in fact, was directed to the need to create new initiatives for meeting outstanding world problems. The Johnson Foundation of Racine, Wisconsin, joined the Ford Foundation as sponsor for the American participants in the Leningrad meeting.

In January 1965, an invitation was extended to Soviet Chairman Alexander Kornelchuk and his colleagues to attend a fifth Dartmouth Conference in the United States. We received no formal reply but were privately informed that the bombing of Vietnam made direct contacts unlikely. We replied through the same channels that the Soviet Union was sending arms to North Vietnam and that it was precisely at a time of threatened confrontation that the Dartmouth meetings had their greatest potential value. The purpose of the conferences was not to celebrate successes in the reduction of tensions but to face up to existing problems affecting the maintenance of world peace. Twice a year for the next three years, the invitation was renewed. Then, last June, David Rockefeller, one of the Dartmouth conferees, spoke in Washington to Soviet Ambassador Dobrynin, assuring him that the American group was still ready to proceed with a fifth meeting. At that time, the limited bombing of North Vietnam was in effect and the Paris preliminaries had begun. A month later we were informed by Ambassador Dobrynin's office that the Russians were ready to proceed.

This, then, is the background of the conference just completed at the Westchester Country Club in Rye, New York. In many ways, the Rye meeting was the most productive of the five conferences. The Soviet representatives came with specific proposals on a wide variety of issues, including the Israeli-Arab crisis in the Middle East; the future of Germany; the world arms race in general; and the full spectrum of U.S.-

U.S.S.R. relations, with special emphasis on the importance of enlarged trade between the two countries.

One question of prime concern to the Conference was the world arms race. This race not only consumes resources more urgently needed for human betterment, but poses a growing threat to world peace and stability. The participants attached the highest priority to halting and reversing this arms race. Both sides stressed the need for ratification by all nations of the nuclear nonproliferation treaty and its full implementation. They also called for a prompt beginning of U.S.-U.S.S.R. talks on the limitation of strategic offensive and defensive weapons.

On the Middle East, the Soviet delegates felt the chances for a durable peace depended in large part on the United States and the Soviet Union acting jointly to help maintain stability in the area. The participants in the Conference recognized that urgent measures should be taken to implement the U.N. Security Council resolutions dealing with the Arab-Israeli conflict, which constitute the basis for a just settlement, taking into account the interests of all the countries of that area.

Comments by the Soviet conferees on the Vietnam war were free of acrimonious rhetoric. The feeling seemed to be that nothing should be done to becloud the atmosphere now that the full Paris negotiations were getting under way.

As might be imagined, the American participants made known their strongly critical views on the action against Czechoslovakia, especially in private, person-to-person conversations. There were spirited rejoinders from the Soviet side.

In general, an American at the meeting had the impression that, to the extent the Soviet delegates reflected the official position, a wide area for fruitful talks between the two governments may now be opening up—assuming, of course, a continued easing of the Vietnam war. There appeared to be considerable flexibility on some issues, as on the Middle East and the arms race, but a hardened stand on other issues, particularly on the developing military strength of West Germany. There was genuine eagerness to clear away existing roadblocks in the way of substantial trade between the two countries. In sum, the tone was good and seemed to augur well for comprehensive official talks, if President Richard M. Nixon should wish to pursue them.

There were some extra dividends for the conference. Dr. Nikolai Blokhin, one of the leading cancer research specialists in the Soviet Union, reported on new laboratory findings in his field. He said that poor nutrition was a far greater factor in causing cancer than was generally realized—and that most ideas of what constituted good nutrition were in need of updating. He said that Soviet research proved that the incidence of lung cancer in non-smokers was directly traceable to the inhalation of cigarette smoke from others. He told of the time bomb ticking away in the lungs of children as the result of repeated exposure to smoking parents.

On the American side, Buckminster Fuller introduced his dymaxion map, which revises conventional theories of north and south, east and west, up and down. Bucky, as he was affectionately known to the group, put his large map on the floor and gave us the sensation of being in a spaceship and seeing the earth whole.

The conferees went to dinner receptions at the homes of Mr. and Mrs. Richard Lombard and Mr. and Mrs. David Rockefeller. Mr. Lombard is president of the Kettering Foundation, which this year joined the Ford Foundation and Johnson Foundation as sponsor of the conference. A feature of the evening at Mr. Rockefeller's home in Tarrytown was concert entertainment provided by talented music students from the International House in New York.

After the Conference, most of the Russians stayed for a week in New York City, where they took in some Broadway plays and concerts at Lincoln Center. Other Russians went on to California where they saw the art collection of Mr. Norton Simon, one of the conferees. Through UCLA Vice Chancellor Dr. Rosemary Park and Dr. Franklin Murphy, former chancellor of UCLA and now chairman of the board of the Los Angeles Times-Mirror Publishing Company, the Russians met a number of Californians who were prominent in education, communications, and the arts. Both Dr. Park and Dr. Murphy were Conference participants.

What did the fifth Dartmouth Conference accomplish? Very little, if measured by the ability of the participants on either side to change the minds of the others on basic issues. But such was not the purpose of the conference. The purpose was to obtain the fullest possible view of the respective positions of the two countries in order to avoid misunderstandings, misassessments, or miscalculations. Also, it was hoped that reducing the dangers produced by faulty appraisals might lead to mutual efforts in behalf of a less troubled world. In this sense, the meetings have been reasonably fruitful. It is too early to talk about a sixth meeting. We are hopeful that the Soviet Committee, whose turn it is to do the inviting, will want to have another round. If so, an affirmative response is virtually certain.

A SALUTE TO OUR FALLEN COMMANDER

HON. B. F. SISK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. SISK. Mr. Speaker, although some time has now passed since the death of General Eisenhower, a tribute to him which appeared in a newspaper in my district was recently called to my attention.

This tribute, written from the heart by Mal Johnson, publisher of the Clovis News and Pinedale Local, is a moving expression of admiration for the man who led this Nation through perilous times in peace and war.

Under unanimous consent I include Mr. Johnson's article in the RECORD, as follows:

A SALUTE TO OUR FALLEN COMMANDER (By Mal Johnson)

Dwight David Eisenhower, October 14, 1890 to March 28, 1969: Five Star General of the United States Army, Chief of Staff, Supreme Commander of Allied Forces, Commander of NATO, President of Columbia University, and 34th President of the United States.

All these titles belong to one man, Dwight D. Eisenhower.

His accomplishments would fill a book. Probably the most outstanding are: His victory over the German forces of World War II. Stopping the Korean War and his landslide Presidential Victory of 1956.

But these do not tell the personal story of Dwight D. Eisenhower. He was a religious man. He had read the Bible through two times before he was eighteen years old. He was presented with the Bible used by George Washington when he took his oath as the first President of the United States. He used this Bible when he took his oath of office as the 34th President of the United States.

He will be remembered for many things but few people knew that he loathed war,

hated military oppression and hoped the world would put the professional soldier out of business.

To me his greatest act went unheralded. He put God in our Pledge of Allegiance to the Flag of the United States—"Under God, Indivisible, with Liberty and Justice for All."

Now, when I finish saying the Pledge I automatically want to add, "Amen".

This is one evidence of the greatness of a great man.

No other President had the foresight, courage or humility to publicly express his opinion and demand action.

Now that "Ike" is gone over a hundred million Americans will be reminded of him every day when they Pledge Allegiance to the Flag of the United States of America.

"Under God, indivisible, with liberty and justice for all."

TAX REFORM

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. BENNETT. Mr. Speaker, I am today introducing a comprehensive tax reform bill which seeks to eliminate inequities inherent in our Federal tax system. My bill does not seek solely to raise the total revenue flowing into the Federal Government, but primarily to redistribute the taxload and make it more equitable for all. This objective is one of the major issues of the 91st Congress.

It has now been over 8 years since President Kennedy advocated a comprehensive reform of our tax laws, and corrective measures in this are long overdue. Recent public opinion polls show that a vast majority of the American people want some type of tax reform. I am pleased that this is also a major proposal of the Nixon administration. Treasury Secretary Kennedy, speaking for the President, recently said:

The American people are saying something and it is getting through. . . . They are reading in the papers that a lot of rich people are getting away with not paying much in taxes.

My constituent mail mirrors this point.

My bill is in two sections. The first deals with expenditures and the second with revenue. On the expenditure side, my bill provides for increasing the deduction of personal exemption from \$600 to \$1,200. This is one of the greatest humanitarian needs of the country and will provide tax relief to every taxpayer in an amount proportionate to the size of each family. This provision seeks to give consideration to the tremendous increase in the cost of living and to families with students.

The revenue provisions of my bill would:

First. Repeal depletion allowance for oil and gas. This allowance should be eliminated because its size is greatly disproportionate to any cost incurred in most cases. A recent survey of the Nation's 20 largest oil companies showed that they pay an average tax of 8.3 percent on earnings and therefore are very able to pay a fair tax.

Second. Repeal unlimited charitable deduction. The provision of law which al-

lows persons to avoid all tax payments by unlimited charitable deduction is discriminatory against the average taxpayer in an unfair way and should therefore end.

Third. Eliminate tax avoidance on interest received on industrial development types of local and State bonds. These bonds are considered against public policy in some States as they pledge government assistance to special private interests and they should not therefore be assisted by Federal tax advantages.

Fourth. Establish a minimum 10-percent tax on income of individuals who have an income over \$25,000 per year. The need for this provision is clear because there are incomes which after the passage of this bill could still evade all taxes otherwise; for instance, a person whose income is derived 100 percent from municipal, nonindustrial bonds.

Fifth. Repeal the provision allowing groups to elect multiple surtax exemptions. This provision would eliminate the ability of a group or chain of corporations to claim more than one surtax exemption. When Congress originally provided for this exemption, it was intended to apply to small businesses. Recently many large conglomerates have established a number of separate corporate units which are arranged so as to produce an income of less than \$25,000 for each unit and thereby qualify for a lower tax rate.

Other tax reform measures which I have pending are H.R. 112, which I introduced with 40 cosponsors to provide tax credits for hiring the unemployed; and H.R. 962 which reduces to \$5 the tax on individuals with very low incomes and give corresponding but less help on a sliding scale to those better situated. A copy of the bill I am introducing today follows:

H.R. 11353, THE TAX REFORM ACT OF 1969

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—GENERAL PROVISIONS SHORT TITLE, ETC.

SEC. 101. (a) SHORT TITLE.—This Act may be cited as the "Tax Reform Act of 1969".

(b) TABLE OF CONTENTS.—The titles and sections of this Act are as follows:

TITLE I—GENERAL PROVISIONS

Sec. 101. Short title, etc.

TITLE II—INCREASE IN PERSONAL EXEMPTIONS

Sec. 201. Increase from \$600 to \$1,200.

Sec. 202. Changes in optional tax.

Sec. 203. Changes in amount withheld.

Sec. 204. Effective date.

TITLE III—TAX REFORM

Sec. 301. Repeal of percentage depletion for oil and gas.

Sec. 302. Repeal of unlimited charitable deduction.

Sec. 303. Removal of exclusion from gross income for interest on State and local industrial development obligations.

Sec. 304. Minimum 10 percent tax where income is over \$25,000.

Sec. 305. Repeal of privilege of groups to elect multiple surtax exemptions.

Sec. 306. Effective date.

(c) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to or repeal of, a section or other provision, the reference shall be considered to be made to a section

or other provision of the Internal Revenue Code of 1954.

TECHNICAL AND CONFORMING CHANGES

SEC. 102. The Secretary of the Treasury or his delegate shall, as soon as practicable but in any event not later than 90 days after the date of the enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives a draft of the technical and conforming changes in the Internal Revenue Code of 1954 which are necessary to reflect throughout such Code the changes in the substantive provisions of law made by this Act.

TITLE II—INCREASE IN PERSONAL EXEMPTIONS INCREASE FROM \$600 TO \$1,200

SEC. 201. (a) The following provisions are amended by striking out "\$600" wherever appearing therein and inserting in lieu thereof "\$1,200":

(1) Section 151 (relating to allowance of deductions for personal exemptions);

(2) Section 642(b) (relating to allowance of deductions for estates);

(3) Section 6012(a) (relating to persons required to make returns of income); and

(4) Section 6013(b)(3)(A) (relating to assessment of and collection in the case of certain returns of husband and wife).

(b) The following provisions are amended by striking out "\$1,200" wherever appearing therein and inserting in lieu thereof "\$2,400":

(1) Section 6012(a)(1) (relating to persons required to make returns of income); and

(2) Section 6013(b)(3)(A) (relating to assessment and collection in the case of certain returns of husband and wife).

SEC. 202. (A) CHANGES IN OPTIONAL TAX

Section 3(b) (relating to optional tax if adjusted gross income is less than \$5,000, in the case of taxable years beginning after December 31, 1964) is amended—

(1) by inserting in the heading before the period the following: "And Before January 1, 1970";

(2) by inserting "and before January 1, 1970," after "beginning after December 31, 1964,"; and

(3) by inserting after "After December 31, 1964" each place it appears in the tables the following: "And Before January 1, 1970".

(b) Section 3 is further amended by adding at the end thereof the following new subsection:

"(c) TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1969.—In lieu of the tax imposed by section 1, there is hereby imposed for each taxable year beginning after December 31, 1969, on the taxable income of every individual whose adjusted gross income for such year is less than \$5,000 and who has elected for such year to pay the tax imposed by this section, a tax determined under tables which shall be prescribed by the Secretary or his delegate. The tables prescribed under this subsection shall correspond in form to the tables in subsection (b) and shall provide for amounts of tax in the various adjusted gross income brackets approximately equal to the amounts which would be determined under section 1 if the taxable income were computed by taking the standard deduction."

(c) Section 4(a) (relating to number of exemptions) is amended by striking out "the tables in section 3" and inserting in lieu thereof "the tables in section 3(a) and 3(b) and the tables prescribed under section 3(c)".

(d) Paragraphs (2) and (3) of section 4(c) (relating to husband or wife filing separate return) are amended to read as follows:

"(2) Except as otherwise provided in this subsection in the case of a husband or wife filing a separate return, the tax imposed by section 3 shall be—

"(A) for taxable years beginning in 1964, the lesser of the tax shown in Table IV or Table V of section 3(a).

"(B) for taxable years beginning after December 31, 1964, and before January 1, 1970, the lesser of the tax shown in Table IV or Table V of section 3(b), and

"(C) for taxable years beginning after December 31, 1969, the lesser of the taxes shown in the corresponding tables prescribed under section 3(c).

"(3) Table V of section 3(a), Table V of section 3(b), and the corresponding table prescribed under section 3(c) shall not apply in the case of a husband or wife filing a separate return if the tax of the other spouse is determined with regard to the 10-percent standard deduction; except that an individual described in section 141(d)(2) may elect (under regulations prescribed by the Secretary or his delegate) to pay the tax shown in Table V of section 3(a), Table V of section 3(b), or the corresponding table prescribed under section 3(c) in lieu of the tax shown in Table IV of section 3(a), Table IV of section 3(b), or the corresponding table prescribed under section 3(c), as the case may be. For purposes of this title, an election made under the preceding sentence shall be treated as an election made under section 141(d)(2)."

(e) Section 4(f)(4) (cross references) is amended by striking out "and Table V in section 3(b)" and inserting in lieu thereof "Table V in section 3(b), and the corresponding table prescribed under section 3(c)".

(f) The last sentence of section 6014(a) (relating to election by taxpayer) is amended to read as follows: "In the case of a married individual filing a separate return and electing the benefits of this subsection Table V of section 3(a), Table V of section 3(b), and the corresponding table prescribed under section 3(c) shall not apply."

CHANGES IN AMOUNT WITHHELD

SEC. 203. (a) Section 3402(b)(1) (relating to percentage method of withholding income tax at source) is amended by striking out the table and inserting in lieu thereof the following:

"Percentage method withholding table

Payroll period:	Amount of one withholding exemption
Weekly -----	\$25.00
Biweekly -----	50.00
Semi-monthly -----	54.20
Monthly -----	108.30
Quarterly -----	325.00
Semi-annual -----	650.00
Annual -----	1,300.00
Daily or miscellaneous (per day of such period) -----	3.60".

(b)(1) Section 3402(c)(1) (relating to wage bracket withholding) is amended to read as follows:

"(1) At the election of the employer with respect to any employee, the employer shall deduct and withhold upon the wages paid to such employee a tax determined in accordance with tables prescribed by the Secretary or his delegate, which shall be in lieu of the tax required to be deducted and withheld under subsection (a). The tables prescribed under this paragraph shall correspond in form to the wage bracket withholding tables contained in this paragraph prior to 1970 and shall provide for deducting and withholding at any time amounts of tax in the various wage brackets approximately equal to the amounts which would be determined if the tax were deducted and withheld under subsection (a) at such time."

(2) Section 3402(c)(6) (authorizing the Secretary to prescribe certain withholding tables) is repealed.

(c) Section 3402(m)(1) (relating to withholding allowances based on itemized deductions) is amended by striking out "\$700" and inserting in lieu thereof "\$1,300".

EFFECTIVE DATE

SEC. 204. The amendments made by sections 201 and 202 shall apply only with respect to taxable years beginning after December 31, 1969. The amendments made by section 203 shall apply only with respect to remuneration paid on and after December 31, 1969.

TITLE III—TAX REFORM

REPEAL OF PERCENTAGE DEPLETION FOR OIL AND GAS

SEC. 301. Section 613(b)(1) (relating to percentage depletion in the case of oil and gas) is amended to read as follows:

"(1) zero percent—oil and gas wells."

REPEAL OF UNLIMITED CHARITABLE DEDUCTION

SEC. 302. Sections 170(b)(1)(C) (relating to unlimited deduction for certain individuals) and 170(g) (relating to application of unlimited deduction) are repealed.

ELIMINATION OF EXEMPTION ON MUNICIPAL INDUSTRIAL DEVELOPMENT BONDS

SEC. 303. (a) IN GENERAL.—Section 103(c) (relating to industrial development bonds) is amended to read as follows:

"(c) INDUSTRIAL DEVELOPMENT BONDS.—

"(1) SUBSECTION (a)(1) NOT TO APPLY.—Any industrial development bond issued after June 30, 1969, shall not be considered an obligation described in subsection (a)(1).

MINIMUM 10 PERCENT TAX WHERE INCOME IS OVER \$25,000

SEC. 304. Part I of subchapter A of chapter 1 (relating to tax on individuals) is amended by adding at the end thereof the following new section:

"MINIMUM TAX

"SEC. 6. (a) ALTERNATIVE 10-PERCENT TAX.—In the case of an individual, if the taxpayer's minimum tax taxable income for the taxable year exceeds \$25,000, the tax imposed by section 1 or 1201 (as the case may be) shall not be less than 10 percent of the taxpayer's minimum taxable income for the taxable year.

"(b) MINIMUM TAX TAXABLE INCOME.—For purposes of this section, the taxpayer's minimum tax taxable income for the taxable year shall be determined—

"(1) on the basis of the method of filing (whether joint or separate returns) used, and

"(2) by taking into account those items of income and deduction properly taken into account in arriving at taxable income, except that the following provisions shall not apply—

"(A) section 103 (relating to interest on certain governmental obligations), and

"(B) section 1202 (relating to deduction for capital gains)."

REPEAL OF PRIVILEGE OF GROUPS TO ELECT MULTIPLE SURTAX EXEMPTION

SEC. 305. Section 1562 (relating to privilege of group to elect multiple surtax exemption) is repealed.

EFFECTIVE DATE

SEC. 306. The amendments and repeals made by this title shall apply to taxable years beginning after December 31, 1969.

NEED FOR AND BENEFITS TO BE GAINED FROM THE BILINGUAL EDUCATION ACT

HON. GEORGE BUSH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. BUSH. Mr. Speaker, "Bilingual Education: A Psychological Helping Hand," an article by Bertha G. Trevino in Texas Outlook, does an exceptional

job of portraying the need for and the benefits to be gained from the Bilingual Education Act.

I have long been interested in the problems of the Mexican-American in my State and am particularly interested in seeing that every child from this background has the opportunities of his white counterpart. So that every Member of Congress may have access to it, I submit the article for inclusion in the CONGRESSIONAL RECORD, as follows:

BILINGUAL EDUCATION: A PSYCHOLOGICAL HELPING HAND

(By Bertha G. Trevino, chairman of the department of mathematics at Laredo Junior College)

Currently attention is being focused on a century-old problem. How should one teach English to a non-English-speaking child?

The results of teaching him in English are most disappointing. According to the figures in the 1960 U.S. Census, the average scholastic achievement level of the Spanish-speaking minority in Texas is 4.7 percent, the lowest of any other ethnic group in the nation.

A failure of such magnitude cannot be investigated without analyzing and questioning the school's philosophy, curriculum, and practices. The fact that a school policy has been followed for decades does not in itself make it pedagogically, psychologically, or sociologically valid. The Spanish-speaking child has been attending a school geared to teach English-speaking children.

The practice of bilingual teaching is under investigation. Basically it involves using the language the child speaks to teach him subject matter content, to communicate with him, and to introduce English to him, going from the old and familiar to the new.

There are a variety of methods, time schedules, materials, and procedures; but the one element all the research programs have in common is the use of the mother tongue for communication and instruction.

The writer investigated the results of the practice of bilingual teaching at Nye Elementary School in United CISED in Webb County. In this district the school population is about evenly divided between English monolinguals and Spanish monolinguals.

The scores obtained by all the children on the California Achievement Tests administered during a three-year period (September 1964-May 1967) were the basis of the investigation. The effectiveness of the program was investigated by a one-way classification analysis of variance with two independent groups, the children taught bilingually and those taught exclusively in English in 1963.

In all comparisons, both the English-speaking and the Spanish-speaking children taught bilingually had higher scores; and in several cases the difference of the means was statistically significant.

The fact that all the differences were in the same direction indicates that the use of both languages encourages, promotes, facilitates, and accelerates academic achievement.

The results of this analysis make a closer look at the present method mandatory, since the low scholastic achievement of the Spanish-speaking minority constitutes a tremendous educational problem. Teaching in a foreign language, in this case English, has failed. Could it be that basic psychological principles have been ignored?

It is an accepted principle that the curriculum must fit the child, who is the most important factor to consider in educational planning. Perhaps some have not realized the tremendous gap between what they professed to believe and what they actually practiced.

As a noted educator has said, "We have tried to fit the child to the pants." The self-confidence of a child is a fragile thing.

Should he be forced into a situation where bewilderment and frustration are bound to happen to him?

One has been admonished, "Take the child where he is." It must inevitably follow that if he comes to school speaking only Spanish then this means of communication must be utilized.

How can anyone say we strive to meet the needs of the individual child when we ignore his need to be instructed in a language he understands? His needs are not the same as the needs of an English-speaking child.

How can anyone say we consider individual differences when we label the Spanish-speaking child a failure because he cannot do as well as English-speaking children in a school where learning experiences are given to both in English only?

"Enable him to acquire a positive self-image," we are told. The school provides ample opportunities for initial success for the English-speaking child by using his mother tongue and his background of home experiences. Could the school provide these opportunities for the Spanish-speaking child?

A feeling of competency is the best self-motivation. Repeated failure destroys the personality, but success breeds success. If a child has this feeling of competency, he will try day after day; it is well known that motivation comes from within.

"Establish rapport with the student." To what degree can this be accomplished when the teacher and the child speak different languages? Children are highly perceptive. The verbal and nonverbal signs of rejection are not lost on a child who has to sit and listen to unintelligible sounds from a teacher clearly understood by the English-speaking children.

Recent studies like the one in San Francisco reported by a Harvard professor have indicated that, if the teacher thinks the child cannot learn, he will not learn. In some subtle, or perhaps open, way the teacher conveys his judgment and the child accepts it; he will not even try, much less succeed. "Relate the new to what the child already knows." The Spanish-speaking child has lived six years when he enters school. He has had the usual childhood experiences and has acquired enough command of his native speech to communicate with those in his community.

He has names for the concepts acquired, but these words are Spanish ones. He has refinements of concepts which it is not possible to convey pictorially.

We think with words. The Spanish words the child knows were learned in a particular setting. Lists of English words cannot immediately replace them, for they do not relate to the concepts the child already has firmly established in his mind.

In summary, a child's language is part of himself; it is the essence of his being and mental processes. To suppress his means of communication is to close the door to mutual understanding. Without communication there cannot be genuine understanding, trust, and cooperation.

This dialogue between the teacher and the child is imperative. Psychologists state that the success of teaching depends on the understanding the teacher has of the individual child's needs, and on his ability to communicate to the child his personal concern and desire to help him as an individual.

Bilingual teaching conforms to accepted principles of psychology. Its practice should inaugurate a dramatic improvement in the scholastic achievement of the Spanish-speaking child.

The recent passage of the Bilingual Education Act, with its first \$7.5 million for research and pilot programs in bilingual education, should produce evidence of its worth and effectiveness.

I was pleased to learn from the Department of Health, Education, and

Welfare recently that 19 school districts from Texas have been asked to submit formal proposals for participation in the bilingual education program.

CONGRESS NEEDS TO ACT NOW TO AVERT AN ABSURDITY

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. DULSKI. Mr. Speaker, I am gratified by the favorable reaction which I am receiving to my legislative proposal for setting standards for future congressional redistricting.

In its several decisions, the Supreme Court has decreed that districts must be as even as possible in population. With this conclusion, no one can argue.

But the practicalities of the matter are that the districts cannot be identical in size without drawing lines that would be utterly ridiculous—cutting into the middle of blocks, and, conceivably, through multifamily buildings in heavily congested metropolitan areas.

Any variation from strict equality would leave open the way for endless challenges in the courts. And these would be just a further mark of futility because today's mobile population means that even a head count or census really is valid only on the day that it is taken. The figures are outdated before they are validated and published.

Since the court has set no rule of thumb, it is up to Congress to establish standards for redistricting. With established standards in law, the States will know exactly how much variation is tolerable.

I introduced legislation in the House this week—H.R. 11128—to set standards for congressional redistricting. I hope that the House Committee on the Judiciary will arrange for early consideration.

Mr. Speaker, my home city newspaper, the Buffalo, N.Y., Evening News has endorsed my plan in an editorial as follows: [From the Buffalo (N.Y.) Evening News, May 13, 1969]

TO AVERT AN ABSURDITY

Lots of luck to Buffalo's Rep. Thaddeus J. Dulski in his effort to negate, by sensible legislation, the latest judicial decree for another costly and foolish reapportionment of New York's 41 congressional districts. Mr. Dulski would simply have Congress prescribe its own population standard, one allowing a maximum 10 per cent variance above or below the average district population.

This strikes us as an eminently reasonable way to assure substantial population equality while still permitting states to pay some heed to practical geographic lines in drawing districts. Whether it would satisfy the high court's fetish for strict adherence to one-man-one-vote as the only tolerable basis for redistricting is another matter, but it is certainly worth the try in Congress.

What is so utterly asinine about the latest judicial decree in the New York case, however, is its insistence on a 1970 redistricting based on a 10-year-old population count that is completely out of date. Here Mr. Dulski has only to cite his own case as a particularly "glaring example."

His 41st district, it seems, had a 1960 census population of 435,858, and the neighboring 40th and 39th districts had almost exactly the same. But this new court order would now require all three of them to lose population because they exceeded the average district size by about 26,000 each. But, says Mr. Dulski, "today my district is estimated to comprise only about 375,000 persons—nearly 61,000 less than in 1960. . . . In contrast, the 39th District is now estimated to contain 515,000 persons."

Thus, under the Supreme Court's new edict, which compels reliance on the absolute 1960 census for the electing of New York's 41 congressmen in 1970, the Dulski district will have to be reduced to an estimated present population of about 349,000, while the neighboring Richard D. McCarthy district will be cut to a mere 490,000. And this in the mocking name of "one man one vote!"

ADDITIONAL JUDICIAL DISTRICT URGED FOR OHIO

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ASHLEY. Mr. Speaker, I am being joined today in the introduction of legislation to provide that the western division of the northern judicial district of Ohio shall constitute an additional judicial district in Ohio and to authorize two district judges for such judicial district.

We are taking this action, Mr. Speaker, because the unprecedented growth in the caseload of Toledo's Federal district court makes it imperative that this new district be created as quickly as possible. Last year alone the court received a record 358 new civil cases and 104 criminal cases—an increase of 25 percent more filings than in 1967.

In the area of civil law, which represents the biggest growth in the court, there is a delay of at least 6 months to a year for persons wanting trials in civil cases. And the records show that new cases are being filed at an even faster rate this year than last.

To handle this caseload the court has one full-time judge, the Honorable Don J. Young. However, the Honorable Frank L. Kloeb who retired as a full-time jurist in 1965 has continued on a part-time basis to assist Judge Young with this heavy docket. Judge Kloeb recently remarked that in his 32 years on the bench the most trials he ever conducted in 1 year was 27. Yet last year he and Judge Young tried 43 civil cases alone.

"No one man could try anywhere near 43 cases a year," Judge Kloeb said, noting that the number did not even take into account the disposition of the 104 criminal cases filed last year.

Mr. Speaker, the need for another full-time judge is abundantly clear and the need is now. The court in Toledo handles Federal cases in 21 northwestern Ohio counties with a total population of 1,439,716. The nearby Cleveland court covers an area with three times the number of residents and handles three times as many cases but it has six full-time judges to Toledo's one.

Twenty-two court districts in the United States had fewer cases filed than the Toledo district court during the first half of the current fiscal year and no less than 12 of these have at least two full-time judges. Five other separate districts with fewer filings than Toledo have a full-time judge and also share the services of a full-time judge with another district on a permanent basis.

Two other districts had the same number of cases filed during the first half of this fiscal year as the Toledo court and each has two judges.

It is urgent that we act now to create an adequate number of judges for northwestern Ohio, Mr. Speaker, before a backlog of cases becomes so large that the court is unable to provide for speedy criminal trials and before persons seeking trials in civil cases are forced to wait a year or more to vindicate their rights.

TOM O'CONNOR—AN EXTRAORDINARY WRITER

HON. L. MENDEL RIVERS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RIVERS. Mr. Speaker, from time to time I have had the pleasure of placing the works of my favorite writer in the RECORD. The writer of whom I speak is Tom O'Connor, of Allendale, S.C.

Tom is the publisher of a couple of county papers down in South Carolina—one paper in Allendale County and one in Hampton County. Superb though these papers are, Tom's writings transcend what is local and approach that which is common to all men. Such a piece is the one that I am today placing in the RECORD for others to share.

By way of explanation, Tom lost his only son in Vietnam last year—shortly before he was to return to this country. I think the following column should be required reading for a lot of people—especially for some of our so-called "students."

THE TIME HAS COME

(By Tom O'Connor)

Somewhere along the line I probably failed him and so my son grew up to be a man who held some ideas peculiar and outmoded in this day. I try to believe that the blame in no way attaches to me.

Yet, I let him take it for granted that he owed the world something, he owed his country something, he owed other people something, and he, unequipped with the type of mentality which refuses to believe what seems very apparent, indeed, absorbed what he found and so became forever young.

I failed when I did not make an effort to keep him out of military service. I knew he was subject to being drafted; I knew he wanted to enlist and I did nothing to discourage him or to protect him.

I didn't suggest Canada as a fine new frontier where he would not have to serve in anybody's armed forces. I did not suggest tearing up a draft card, even risking a few months in prison, as a means of dodging what some men stupidly called duty.

I guess I cannot dodge my own responsibility for letting him go on thinking that honor and duty and patriotism are more than emotional ideas harbored by morons.

I never told him that those heroes of the past for whom he expressed admiration were fools for being where they were when they were. They could just as well have been safely at home, selling shoes, or groceries, or pumping gas.

When he spent a day wandering across the battlefield at Gettysburg, I failed to tell him that those rows upon rows of stones marked the resting places of men who did not rebel against a system, or an establishment, of which they were part and who were too spineless to flee from their nations in the hour of need.

He thought each marker spoke of a man with a special place to be held secure forever in the hearts and minds of his fellowmen of any and every age.

He did not agree that one had a right to rebel against what was plainly a life amenable to one's ability to live it. In other words he did not have a clarity of vision, sometimes drug induced, to see that cutting off his own hand was a cure for ills and inequalities and injustices. He saw only in such case, a man who had stupidly handicapped himself and made even less even the uneven struggle.

There are perhaps 60,000 or even 100,000 men and women on earth today who share my blame. For they too have failed sons, or husbands, who served in Vietnam.

They haven't become involved in dodging duty, in slandering honor, in demanding changes they want regardless of what others might want.

They haven't burned flags to show how involved with life they are. They haven't degraded heroes of the past with obscenities, and foul-mouthed curses. They haven't opposed forces which are dedicated to the well-being and safety of all men.

They haven't cried and fought and been bloodied in order that they might impose their wills upon others.

They haven't succumbed to the argument that if they fight hard enough, blast enough buildings, burn enough homes, destroy enough business houses, harass the authorities to desperation, they can win and make the World do what they want it to do.

I can't do that. My son stands in the way. The sons and husbands stand in the way. The path to irresponsibility is barred to us by our dead.

They fought, they were bloodied, they died, because to them honor, duty, integrity and patriotism were more than words. They were expressions of man's need to rise above himself if ever he is to accomplish the ultimate goodness and achieve the perfect civilization.

I shall not take the blame nor seek the credit for my son. He was his own man and a man in his own right. What he died for are things I too hold dear and in so holding I do not see how I in anywise diminish any other man, his rights, his privileges, his opportunities.

I grieve for the son who is lost, but in my heart I am now able to sometimes be a little glad that in his death he has added something to the stature of mankind and that from hence my own involvement in life will be affirmation of man's need to cherish honor, to foster integrity and to stand to duty in any circumstance.

HAPPY BIRTHDAY, MR. PRESIDENT

HON. ROBERT N. GIAIMO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 8, 1969

Mr. GIAIMO. Mr. Speaker, it is truly a pleasure and a privilege to rise today to pay tribute to one of our country's

greatest Presidents, the Honorable Harry S. Truman, on his 85th birthday.

During his time in office, President Truman did many things which will always be remembered by an appreciative Nation. He is remembered for the Truman doctrine, the Marshall plan, the creation of NATO and the United Nations, the Berlin airlift, and desegregation of the Armed Forces, to name but a few.

In addition to these magnificent contributions, however, Harry Truman will also be remembered as the President who "told it like it is." He never minced words with anyone. He had the courage and the strength to overlook political implications when making his decisions. Harry Truman came from a humble background, and throughout his career in public service he continued to be a man of the people. He once wrote:

My own sympathy has always been with the little people, the man without the advantages, and these have always been the people who responded to a politician named Harry Truman.

Mr. Speaker, the people of this country were blessed to have this great man as their leader during the turbulent period of 1945-52. He had the courage, the fortitude, and the foresight to plot a course which saved much of the world from Communist domination, while helping to create an organization dedicated to world peace, the United Nations. We are truly in his debt.

Happy birthday, Mr. President.

ST. BONAVENTURE PRESIDENT
LAUDED FOR BANNING SDS

HON. JAMES F. HASTINGS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HASTINGS. Mr. Speaker, last Sunday, the Very Reverend Reginald A. Redlon, president of St. Bonaventure University which I am proud to say is located in my hometown of Allegany in the 38th Congressional District of New York, banned the Students for a Democratic Society from the school campus.

He did so in a special Parents' Day address, heard by an audience of 2,000—about half of which were mothers and fathers of students.

Speaking in the university center following Mass, Father Redlon declared that he was banning SDS from the campus because the organization is "antidemocratic, anti-American, and anti-Christian."

Two recent incidents prompted Father Redlon to act. One happened about a week ago at the university's annual Press Day, which was attended by several hundred high school students engaged in the publishing and editing of their school newspapers. SDS, Father Redlon said, had set up a table and was distributing SDS recruitment literature to the high school students.

The other incident was a burglary last Friday. The office of the academic vice president was broken into and several confidential files were stolen.

I think it is significant to know that Father Redlon's declaration barring SDS touched off a 4-minute standing ovation and when he left he had to almost fight his way through a crowd of people with outstretched arms wanting to congratulate him.

Mr. Speaker, this is the kind of forthright action that is expected and should be taken by our college administrators if radical minorities are to be prevented from making a shambles of our educational system.

Father Redlon deserves the highest praise for standing firm on disciplinary principles which must prevail if our colleges and universities are to remain a lofty symbol for learning.

Mr. Speaker, under unanimous consent I include the full text of Father Redlon's Parents' Day talk in the RECORD:

ADDRESS BY FATHER REDLON TO PARENTS

It is May; it is Mothers' Day; it is Parents' Weekend. And so I am pleased in the name of all to welcome you, particularly you who are parents, to St. Bonaventure University. I trust that your weekend has been and will be, in spite of the weather, pleasant and profitable.

There is so very much I would like to say to each of you, and I apologize for the fact that last evening, though I was here for two hours, I'm certain that there were many parents I did not have the opportunity even to greet personally. But I want to tell you how much we respect and reverence your presence here, especially in so far as it reveals your desire to give to your son and daughter—in many cases at great sacrifice—an opportunity to realize the beauty and loveliness as also the discipline, and, at times, the suffering of a truly adult Catholic life. In a word, that you have sacrificed to provide for your son or daughter a Catholic college education.

I would like to begin these remarks by making something abundantly clear, not only to you who are parents but to the students who are here as also to any faculty member or to any other member of this community or of this institution. To do this, may I quote a recent editorial:

"Today's students are bright, imaginative, energetic, idealistic; they are thinking and they are acting about the war in Vietnam, the draft, the Negro's place in society, fairness to all minorities, the rights of people everywhere to the good things of life: justice, dignity, freedom, democracy—these are not mere words in a book to our young today, they are banners flying in a breeze inspiring action here and now. Confronting the evil of the world, and the world is full of it as it has always been, students strive for change and for improvement. And above all, no student should leave a campus without the sure knowledge that his mind and heart are precious to America and to our Church. Out of such assurance will come later, as other have discovered, that with all of its shame and drudgery and broken dreams, ours is still a beautiful world."

I endorse those words. I believe they represent the truth. I have enormous respect—indeed, affection—for the students on this campus. My entire life and the lives of so many of the faculty and the administration—indeed, of this staff—have been devoted to education. And that means, therefore, to many students and over a long period of time.

It is not difficult to dialogue with most students, even those with whom I most seriously disagree. And this was demonstrated in this very hall, in this very gymnasium, Palm Sunday night.

What then has happened? What is the problem? Believe me when I say that it is not due process—a much used and abused term. In so far as it means fair and just

treatment and indeed with an attitude that involves considerable compassion for the members of this community or any similar institution—that I assure you has been and is, and always will be, the policy here. But the issues, I believe, are much deeper. They reflect the phenomena that are so well known to all in our country and, indeed, in our Church.

Simply and honestly, I believe there are principles that are either differently understood, misunderstood or denied. And they cannot in any way be compromised, for they touch deeply the lives of all of us, not just here, but really anywhere.

For example: There is the principle of authority and its responsible exercise. To address myself to this, may I quote from an article that appeared in last Sunday's New York Times, specifically the magazine section:

"Each campus is entitled to be as radical or conservative as it desires, but students are the ones to decide; not the faculty, not the administration. If a fringe have an idealism, indeed even a fanaticism, in which one man's personal force is equal to that of ten apathetic opponents, who is to declare that the minority do not determine the history of the school? Democracy is the free and fair play of human forces. We can remember a minority of early bearded Christians who proved eventually an ongoing force for better or worse. But the point behind all the points is that civilization has lost the way, and we may not find it until we recognize that the vote of the man who would not commit himself to his ideals is not necessarily equal to that of the man who would."

To speak very softly, I trust, I find these words strange, if not very confusing and, indeed, dangerous.

In the first place, on the one hand tribute is paid to the democratic ideal of the free and fair play of human forces and then says it is better, indeed, maybe the only salvation of our western civilization at least, that a radical minority or a revolutionary group that is committed should find that its attitudes and its actions prevail. I ask very simply, is this democracy?

In the second place, it seems presumptuous to say that the ten voters or the opponents are apathetic. It could very well be that they too are very committed, but they are committed to the basic values of our republic, of our Church or of any institution and they do not want to see any of these destroyed. Why should we presume without proof that the majority is apathetic?

In the third place, reference is made, and somewhat snidely, to the early bearded Christians. What mattered then and what always matters is not whether or not someone is committed to an ideal, but to what ideal one is committed. And I venture to say that the early bearded Christians who proved to be an ongoing force, did not do so because they were few in number or because they were bearded but because the ideal to which they were committed was the truth—the truth makes us free. And it still remains the truth that will make us free.

And I challenge the S.D.S. and any other radical group to prove that the ideal to which they are committed is constructive and involves respecting the rights and the freedoms of others.

So much time on this campus—I am certain that it is true of others—has been wasted. So much energy has been dissipated because we have allowed ourselves to forget our goals.

If the Ku Klux Klan were to request to organize on this campus, it would be imperative for myself and everyone here to acknowledge that such an organization, because it is racist, is opposed to everything for which we stand and it could not be allowed to exist—no matter how you might appeal to the constitutional right to assemble. And I am convinced, that the S.D.S. is not only anti-democratic, anti-American and

anti-Christian, but also that it is opposed to everything for which this University stands. It was finally proven within the past few days when that organization distributed literature on this campus to numberless young people which unquestionably is, as I have just said, opposed to all that our republic and our Church and this institution stands for.

And therefore, I am banning that organization from existence on this campus.

Finally, with respect to the quotation, I find it incredible that anyone would say that the character and spirit, however you would describe it, of any campus should be determined by the students alone and not at least by the students and faculty and the administration.

I want to make it very clear again, and I'm sure I'm speaking now to the vast majority of the administration and the faculty, if not the entire administration and faculty, I believe firmly in community government in so far as that means everyone's voice should be heard (and I will make additional efforts to listen to each and every student on this campus). And that they should be effectively heard in accord with their competency. But I do not believe that this institution or anyone similar to it can be governed democratically insofar as that means each member of the institution has an equal vote.

I do not above all believe that we will promote the common good or preserve the purposes of this institution if we hand it over to the students. Maybe what we are witnessing right now, however, is that such thinking, which has been around for sometime, is just now beginning to pass from the realm of ideas to that of action. And let us never forget that one man with the wrong idea published a manifesto in February 1848 in London. And the ideas contained in that document have revolutionized our world though it took several decades, if not a century, and the man's name was Karl Marx.

To return to the deeper issues, there are other principles and other truths, which means we have, I believe, reached a certain critical moment in the history of St. Bonaventure University. For it is a moment that reveals to us the need to be more clear and more articulate in our understanding of our basic philosophy of Christian education. In a word, our future does not involve Bona's becoming some sort of nebulously religion-orientated school, but a real, genuine Catholic University.

Those who would refashion our society, the Church indeed even the Franciscan Order, or very specifically this university into something of their own image no matter how sincere or well-intentioned they may be must be confronted with the fact that there are real, basic principles which we do not intend to compromise.

And included among them is this: That we reverence and respect and accept the authority and office of the Holy Father.

We cannot allow ourselves to become lost or submerged in a sea of contemporary anxiety, frustration, confusion and romanticism. It is for us to accept and to continually rediscover these truths and then to proclaim them for all to hear and understand. And we cannot stand back unconcerned because we are talking about the future of the youth of America and our Church and the truths by which they must live.

Now I wish briefly to refer to certain very unpleasant events that have recently occurred on this campus. I do this because I feel it is necessary to inform all of you, the parents as also the students.

A week ago an attempt was made to break into my office during the night. There have been several instances of vandalism and robbery of departmental offices, as also the Maintenance Department, and yesterday, in the early morning, sometime after one a.m., the office of the Academic Vice President was

entered by breaking a window. His confidential files were stolen, including faculty evaluations that had been prepared by appropriate academic officers over a period of months. All of his correspondence between his office and that of other members of the administration as also with members of the faculty and others has been destroyed or at least stolen.

Police have been informed; an investigation is underway. We intend to use every available means to apprehend those responsible for this reprehensible action. And the University is prepared to offer a substantial reward to anyone who can assist successfully in the apprehension and conviction of such persons.

I have, therefore, ordered the hiring of additional day and night security for this campus, for we will not allow anything whatsoever to interfere with the orderly termination of this semester's activities, including those of senior week and the commencement exercises.

To that end, I serve notice that anyone who in any way disrupts the ROTC awards ceremony—which is an academic function—on Friday, May 16th, will be immediately suspended or expelled.

We will not allow any protests or demonstration, except those which are in accord with the regulations contained in the Student Manual, or in accord with directives that have been issued by the Office of the Vice President for Student Affairs.

And I need not remind those of you who know that during the past few weeks there were demonstrations that did violate these regulations and they will *No Longer Be Tolerated*.

It grieves, I am certain, the vast majority of people here or who are associated with this school, that these latter remarks are necessary. I appeal to the understanding and loyalty of all to assist us in our individual responsibilities to promote the welfare of this venerable and much loved institution.

These are hard sayings indeed. I look forward to difficult but, I pray, happy days, and eventually a great—certainly challenging—future for St. Bonaventure. As Catholics and as Franciscans we will continue to honor, reverence and respect those who dissent. And above all, we intend to love those who choose to walk away.

How I hope and pray, that each Bona graduate will be, by the way he talks and the way he walks through life, someone of whom others will say when they are gone: "The world is poorer because of their departure, and the sources of inspiration run more thinly for all of us." But even more significantly, and even more heart-felt, is my prayer that others will say of them what Robert Kennedy said of his Brother John, quoting Romeo and Juliet:

"When he shall die, take him and cut him out in little stars and he will make the face of heaven so fine that all the world will be in love with night and pay no worship to the garish sun."

Good Bye, and a safe journey home. Thank you.

ISRAEL'S INDEPENDENCE

HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. DADDARIO. Mr. Speaker, on May 15, the State of Israel celebrated the 21st year of its independence. Because of its long and close relationship with the United States, it is fitting that we should note this event and that we should take the occasion to reflect upon the growth

and the achievements of this young and vital nation.

In the few short years of its existence Israel has successfully absorbed countless thousands of immigrants from lands as diverse as Yemen and the Soviet Union. Under conditions of extreme physical hardship, a state has been built that rivals any in the world for its industry, its creativity, and the dedication of its people. Three times this nation has fought to preserve its very right to exist.

The relations of the State of Israel with its Arab neighbors, however, seem at present once again to be deteriorating in a spiral that could eventually lead to yet another Mideast conflagration. Goaded and prodded to the brink of endurance by Arab threats and guerrilla attacks, Israel must show patience in exploring steps which, while fully consistent with Israel's undeniable right to a future prosperous existence, must be the basis for a future just and mutually agreeable lasting peace.

THE 200TH ANNIVERSARY OF DARTMOUTH COLLEGE

HON. THOMAS J. MESKILL

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. MESKILL. Mr. Speaker, it has come to my attention that the 200th anniversary of the founding of Dartmouth College will be celebrated in Columbia, Conn. Mr. Robert L. Bennett, the commissioner of Indian Affairs, is scheduled to give the major address of the celebration on the "Educational Needs of the American Indian."

From all indications, the Dartmouth Alumni Clubs of Connecticut have planned a gala celebration for their alma mater. A brief description and a schedule of events follow:

On Saturday, May 17, 1969, the Dartmouth Alumni Clubs of Connecticut will sponsor a celebration of the birthplace of Dartmouth College at the original site where Rev. Eleazar Wheelock started and supervised an Indian charity school at Columbia—then Lebanon—Connecticut. From 1755 to 1769, the Reverend Mr. Wheelock carried out his dream of educating Indian youths in the colonies. The original schoolhouse and Reverend Wheelock's home still exist and are maintained by the Columbia Historical Society. In 1769, Reverend Wheelock moved his school to Hanover, N.H., and with the help of Rev. Samson Occom, the most outstanding Christian Indian of that time, started Dartmouth College.

This year, 1969, 200 years after the founding of Dartmouth, the college and the Dartmouth Alumni Clubs of Connecticut have planned to commemorate this charity school and the town of Columbia. This is part of a bicentennial celebration that Dartmouth will continue throughout the world during 1969. The schedule of events is as follows on May 17:

10 A.M. Exhibits (On the Green): Moor's Charity School. The original building on the

Green will be open from 10-4. The Scotford Exhibit of Colonial educational material and artifacts will be displayed. Adjacent buildings, under the guidance of the Columbia Historical Society will be open to the public. Also participating are the Historical Societies of Mansfield and Lebanon.

10 A.M. (At a nearby auditorium): Movies, produced by Dartmouth College and dealing with the origin of Dartmouth and the College today, will be in continuous showing from 10 A.M. to 1 P.M. and again from 3 P.M. to 4 P.M.

11 A.M. (On the Green): The Dartmouth Outing Club will sponsor competitions with other outstanding College Outing Clubs in chopping, wood splitting and crosscut, and buck sawing.

12 P.M. (On the Green): Lunch will be prepared and sold by the Women's Guild of the Columbia Congregational Church. Many Dartmouth families plan to attend and make this an old-time picnic outing on the Green.

1 P.M. (During the Picnic): The Dartmouth Band will present a Concert in front of Moor's Charity School with marches and Dartmouth Songs.

2 P.M. At the Platform on the Green: Edwin T. Rice, Dartmouth '52 and Chairman of the Events will introduce the President of Dartmouth College, John Sloan Dickey. President Dickey will present, to the town of Columbia and the Columbia Historical Society, a bronze plaque to be placed at Moor's Charity School, commemorating this as the birthplace of Dartmouth College.

2:30 P.M. At the Platform on the Green (The Principle Speaker): Following this, Commissioner of Indian Affairs, Robert L. Bennett from the United States Department of Interior will speak on the Educational Needs of the American Indian. This will be a most timely and important address as we, as a nation turn our eyes and our hearts to those less privileged in our society. No more fitting site could be found to speak on this subject than at Columbia, where the Reverend Wheelock's dream first came to life.

The Dartmouth committee sponsoring this event hopes that the plaque may be brought from Hanover to Connecticut by the Ledyard Canoe Club in its annual canoe trip down the Connecticut River. They believe this would be a most appropriate vehicle for a commemorative plaque of this nature, paralleling, perhaps, part of the danger and excitement that the Rev. Eleazar Wheelock felt as he moved his Indian school up into the then wilderness of Hanover, N.H. The Canoe Club will put on a demonstration and a race on the beautiful Columbia Lake. The competitors are to be announced later.

One of the most significant developments to come from the organization of this celebration is a recent word that the people of Columbia are investigating how they may rededicate themselves to Reverend Wheelock's dream of education of the American Indian. Under the leadership of Mr. George Evans, today's successor to the Wheelock Parish, the town is studying the Dartmouth ABC Program—A Better Chance—for underprivileged students with the possibility of supporting A Better Chance Indian program. How very fitting, as 200 years are rolled back, for this town to once again take on the noble purpose of its early white and Indian ancestors.

Invited to the ceremony as a guest is a descendant of Eleazar Wheelock, the Rev. Arthur S. Wheelock of the Congrega-

tional Christian Church, 14 Beacon Street, Boston. Also invited is a descendant of Samson Occom, the Indian who helped Reverend Wheelock; this is Mrs. Robert H. Fawcett of Uncasville, Conn. Mrs. Gladys Tantaquidgeon, of Uncasville, and of the Mohegan Tribe—of which Samson Occom was a leading member—will have, on display, museum pieces from this most famous of the New England Tribes.

The committee from the Dartmouth Alumni Clubs of Connecticut is as follows:

Chairman: Edwin T. Rice, 4 Carver Circle, Simsbury.

Program: Richard A. Watson, 317 Dug Rd., Glastonbury, and Peter Schwartz, 145 Natchaug Dr., Glastonbury.

Arrangements: Joel B. Alvord, 85 Chestnut Hill Rd., Glastonbury.

Liaison: Robert B. Foster, 96 Preston St., Windsor.

Publicity: Dr. Donald G. Russell, 73 Cedar St., New Britain.

Commemorative Booklet: Raymond J. Buck, Jr., Storrs, Conn.

Committee Members: H. Russell Burgess, Jr., 170 Prospect Hill Rd., Noank; Robert Adnopolz, 111 Carmalt Rd., Hamden, and Culver A. Modisette, 65 Highridge Rd., West Simsbury.

From Columbia, Conn., the following have been instrumental in making arrangements for this celebration:

Mr. George K. Evans, congregational minister.

Joseph Szegda, first selectman.

Donald R. Tuttle, school board chairman.

Albert B. Gray, president, Columbia Historical Society.

Dr. R. Gene MacDonald, director, Columbia Historical Society.

Mrs. Wilbur Fletcher, president, Women's Guild of Congregational Church.

Mrs. William J. Murphy, director, Columbia Canoe Club.

The committee expects attendance of over 1,000 people, including children, as Dartmouth families and friends plan to make this a spring picnic with band concert on the green. The college has sent a mailing to all Southern New England Dartmouth alumni and all clubs in the area, including Massachusetts and Rhode Island, have instituted their own publicity programs. A special commemorative program will be distributed free of charge.

PRESIDENT NIXON'S APPROACH TO VIETNAM SITUATION LAUDED

HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. QUILLEN. Mr. Speaker, the President has made a truly constructive move toward achieving peace in Vietnam and, indirectly, fulfilling another pledge he made to America—to "bring us together."

He made our goals clear—free choice for the Vietnamese people and an end to violence. He then offered the most workable program yet to achieve these goals—a program all sides can find reasonable and acceptable.

President Nixon's approach also cleared the air of a lot of useless talk

about how and why we got into Vietnam. As he pointed out, that is not important now. What is important is what to do with the situation we have now.

By showing the world a true desire for peace and a workable program to attain peace, the President has put it squarely up to Hanoi and the NLF. Now, more than ever, they have nothing to gain by delaying on this offer.

AMERICA'S FORESTS: CHAOTIC CONSTERNATION OR CONSTRUCTIVE CONSERVATION?

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. JOHNSON of California. Mr. Speaker, night before last I was privileged to attend the 67th annual meeting of the National Forest Products Association. The speaker for the evening was Mr. James D. Bronson of Yakima, Wash., who currently is serving as president of the NFPA. Mr. Bronson has served with this association for more than 15 years and is a veteran of more than 40 years in the forest products industry, having started his career as a logger in Yakima with the old Cascade Lumber Co. He worked up through the ranks until he became president of the company in 1946; and with a merger of his company into the Boise Cascade Corp., became a director and he still heads the lumber operations center in the Yakima area.

Mr. Speaker, I was tremendously impressed with Mr. Bronson's remarks concerning the problems of the forest products industry today and his discussion of some of the efforts which those of us representing the timber areas, and the Federal agencies responsibility for growing the timber, and the industry itself are making to meet the timber needs of the Nation.

I believe that it would be of interest to all of my colleagues, and I insert Mr. Bronson's "America's Forests: Chaotic Consternation or Constructive Conservation?" in the RECORD at this point:

AMERICA'S FORESTS: CHAOTIC CONSTERNATION OR CONSTRUCTIVE CONSERVATION?

(Speech by James D. Bronson)

Mr. Secretary, Distinguished Guests, Fellow Americans: There are those in this nation who think of forests, both public and private, as a paradise—a portion of our natural surroundings which are far removed from the humdrum world and which warrant continued separation from realities.

There are others of us who think of forests as a vital and replenishable concentration of miraculous fibers which can serve the needs of mankind.

The extremes of these two interpretations of the meaningful forest have imposed upon our nation, through its lawmakers and its administrators, a patchwork of philosophies and management practices which satisfy few. As a result, the vast majority of us who value order and tranquility tend to find ourselves being pushed to one side or another of this sylvan confrontation.

Faced with a choice, whether we are by nature hikers or loggers, we find ourselves "strangers in paradise". We are uncomfortable with the restraints imposed upon us

by the current policies governing particular forests and, regardless of the side we may find ourselves on in a given situation, we are all deeply concerned.

A CONSEQUENCE OF DIFFERENCES

American forest management, for its many values, has become a chaotic situation wholly as a consequence of human differences. Those of us obliged to provide a continuous and increasing flow of wood fiber from our forests view with alarm contemporary trends toward land withdrawal for non-economic use. Men and women who are dedicated to the out-of-doors as a retreat for contemplation and wholesome recreation are equally alarmed at the threat they consider commercial forest management and the nation's wood needs may be to their interests.

And, when the nation is faced with a crisis in housing requiring vast quantities of wood—as it presently is—both sides of the forest controversy dissolve in chaotic consternation.

Each sees his own paradise threatened or forever lost to him. Chaos reigns.

John Milton described the circumstances in his "Paradise Lost":

"Chaos umpire sits,

And by decision more embroils the fray

By which he reigns: next him high arbiter
Chance governs all."

We have, I fear, reached that state in the responsible management of our forest resource for all the people. We have submitted our differences to umpire Chaos and have appealed chaotic decisions to Chance for arbitration.

This is a luxury of indulged whimsy which we as a nation can no longer afford.

That is why I intend to speak out today for a new concept in forest management—a second chance, if you will, to establish orderly fulfillment of the needs and desires of all of our people. I propose that the United States embark upon an era of constructive conservation, an era of enlightenment when all the inherent and intrinsic values of the forest are realized in the interest of the people.

As concerned citizens there is none of us who does not recognize the urgent need to improve the environment for human life. This is just as true of lumbermen as it is of outdoor recreationists. The forests of America are in a unique position to bridge the void between the daily needs of citizens for improved housing as an element of environment and the desire of men to flee the cities and enjoy the beauties and solace of the out-of-doors. Both of these purposes can be accomplished at the same time—if we all have the will to make it happen.

ESSENTIAL INGREDIENTS

The essential ingredients of "constructive conservation" are simultaneous realization of all the benefits of the forest and development of a national point-of-view which favors compatibility over exclusivity in terms of forest use.

There may be some who will consider that what I am espousing is already provided in the Multiple Use Act of 1960 which stipulated that National Forests should be managed for timber, fish and wildlife, watershed, grazing and recreation. This is not so.

Multiple Use Act implementation has ignored the second ingredient of "constructive conservation" . . . compatible use rather than exclusive use of given areas for given purposes. Multiple Use has been attacked by the recreationists because it permits the harvesting of timber: it has been attacked by individuals in the forest industries because it requires them to adjust or abandon harvesting operations to the recreationists. It has been honored in the breach by the Forest Service which has increasingly tended

to set aside areas for exclusive use of recreationists, sometimes without regard to the timber values involved. Multiple Use has been criticized as a meaningless term—"the people don't understand it", "the people don't want it", "the loggers can't live with it", "the Forest Service declines to impose it"—all these things have been said.

BROADER VIEWS NECESSARY

But each of those statements has been made by someone expressing disdain from a single use point-of-view without regard to the interests of others and with, in the final analysis, total disregard for the best interests of all the people.

I am persuaded that we cannot, as a nation, prolong the series of monologues which have tended to constitute the bulk of our literature on forest use.

If we are to achieve understanding and respect of varying views it is essential that there be constructive leadership demonstrated by the single element of our society which has the strength and the responsibility to accommodate public opinion and public interest. In our system this power is assigned to the Federal government. It is from the government that we have the right to expect attentive consideration of all sides of the forest management issue and objective evaluation of the course which will best serve the nation.

Federal forest management policies today tend to vacillate with the winds of public and private pressures. This is not surprising and is no indictment of the public officials involved. The Forest Service of the U.S. Department of Agriculture, for instance, is the principal manager of the Federally-owned commercial timber lands of the nation. We are honored, as was pointed out in presenting our head table, to have the distinguished Chief of the Forest Service, Ed Cliff, with us. He is a highly responsible official. He is eminently qualified to bear the burdens imposed upon him and he is assisted in his undertakings by other dedicated Americans of the Forest Service—many of whom are with us today.

MR. CLIFF'S IMPOSSIBLE TASK

But Ed Cliff has been assigned an almost impossible task by the public policies with respect to forest management which respond to changes in administration, legislative response to public pressures, and local or regional accommodation to special situations. In addition, his is a head which must wear an almost constantly changing series of hats. He is regularly obliged to wear two and three hats simultaneously and I would guess that he is subject to frequent headaches since the headbands tend to shrink or expand depending upon the particular block upon which they have been shaped.

This fluctuating pressure to which Ed Cliff must respond would not be tolerated by the business executives in any corporation represented here.

It is intolerable that a business executive—and the Chief of the Forest Service operates a timber growing business which returns \$300 million in sales receipts to the Federal Treasury every year—he operates a land area twice the size of the State of California—half of which is commercial timber growing land—it is intolerable that such a business executive is denied enduring long-range policy which will enable him to improve his product, broaden its market, and increase its annual sales.

But this is the condition which exists and the Federal government—in both its legislative and executive branches—is the only agency which has either the authority or the responsibility to alter it.

THE NATIONAL TIMBER SUPPLY ACT

Senator Sparkman told us in some detail yesterday the means to this end which re-

sides in the National Timber Supply Act. Our industry considers the reinvestment of Federal timber sale dollars in improved management of Federal commercial timber lands a logical and wholly responsible means to guarantee the nation's future wood needs. It is, we believe, the only feasible way to respond with speed and efficiency to the urgent demands for softwood lumber and plywood imposed upon our industry and upon the nation by the projected housing goals of 26 million units in the next decade.

We intend to work for the speedy passage of this measure, along with the National Association of Home Builders, the United Brotherhood of Carpenters and Joiners, the National Lumber and Building Material Dealers Association, the National-American Wholesale Lumber Association and the many other organizations directly concerned with fulfilling America's housing needs. We are most heartened by the spontaneous support which has been generated in the Senate and the House of Representatives on both sides of the aisle. Sponsors of this bill reflect a true cross-section of our nation and demonstrate that our legislators recognize that timber availability holds the key to adequate housing for all our people.

The National Timber Supply Act affords a dramatic demonstration of the interdependency of social progress and natural resource management. It has been heartening to see dedicated preservationists, who have been traditionally antagonistic to timber harvest measures sought by the forest products industry and the Federal forest management agencies, endorse the concept of high yield management of the National Forest commercial timberlands.

RESPONSIBLE ACTION BY ALL

The positive response of the Sierra Club witnesses before the Senate Banking and Currency Committee is a sign, I believe, that where the national interest is clearly revealed and the social need is obviously compelling, natural adversaries can act responsibly together. The Sierra Club, properly, stipulated that intensified management of the National Forests for timber harvest should be undertaken with full consideration of the other forest values. The forest products industry fully endorses this stipulation and asks that the Forest Service fully emulate the practices which have been pioneered in this regard on better managed industrial forest lands.

This mutuality of positions between the Sierra Club and the forest industries is, I am convinced, the first glimmer of what can be achieved under the concept of "constructive conservation." There will, no doubt, be confrontations on specific issues in the future. There will be extremists on both sides who will indulge in invective.

But, it is my earnest hope that in the great middle, the center, if you will, of the dedicated men and women heretofore on opposite sides of the conservation fence, there will be enlightenment and understanding. It is only when the common interest of all the people is properly served that "constructive conservation" can be a reality.

WHO WILL DECIDE?

Who will decide what the policy should embrace? How should the scales be balanced equitably if a choice must be made between areas where timber harvest should be encouraged and areas where other forest use should be emphasized? When should community dependency on timber harvest take precedence over potentialities which might develop as a result of emphasis on recreation and tourism?

These are difficult questions which I am not prepared to answer.

But they must be answered. And they must be answered always in terms of the identifiable needs of all the people of the United

States where public lands are involved. And they must, further, be answered on a foundation of logic and reason and judgment so firmly established that the long-term process of growing timber is not subject to the vagaries of temporary expediency of momentary clamor.

It occurs to me that where issues of public policy affecting the nation's timberlands are concerned the people must look to the responsible public agencies for expertise. In turn, the public agencies must apply their expertise without regard to the pressures from one side or another of the controversy. The Forest Service timber management function, for instance, should not be susceptible to stop-and-go restraints imposed by speculative consideration of realignment of area uses. Growing a crop, and timber is a crop, must be governed by the duration of the time from planting to maturity and harvest. Land committed to a crop must be reserved for that primary use and all other uses must be coordinated with that rather than superior to that use.

This is simply one example of the kind of decision which must be made binding upon the nation if it is to realize the potentials of modern forest management.

WE CAN IMPROVE

And these potentials are remarkable, as most of this audience knows. It is possible to improve timberland through fertilization; it is possible to increase the yield and quality of timber by genetic selection; it is possible to accelerate growth through thinning and spacing; it is possible to maximize the timber harvest through orderly salvage operations. All of these things are being done with great success on industrial forest lands. They should be done on all forest lands so that there need never be any shortage of timber in the United States.

I believe that they will be done as a matter of national policy within the life-times of many of us in this room. I am hopeful that the passage of the National Timber Supply Act, coupled with the assumption of leadership in "constructive conservation" by the Forest Service, will make them happen this year on the commercial timberlands of the National Forest system.

LET THE FORESTERS DO THEIR JOB

The leaders of this crusade towards "constructive conservation" must, of necessity, be professional foresters. The forester—while the nature of his work and his surroundings tend to identify him with rough clothes and rugged physical strength—is a professional man like a doctor or lawyer or a nuclear scientist. He is a highly trained specialist in dealing with the needs of trees from gestation through harvest. He is, if you will, a forest agronomist and ecologist dedicated wholly to the creation of a flourishing balance among trees, wildlife, watershed, recreation and forage. He is a planner and a protector. He is the fundamental factor in determining whether a forest is to become an asset to our society or a curiosity fit only for occasional visits and contributing little to our human material requirements.

The public has for too long viewed foresters as gamekeepers and fire watchers when they should be equated with surgeons, engineers, attorneys, and scientific agriculturists. There has been a tendency on the part of the public at large to respond to preservationist appeals for the *status quo* in the forests when, without the practice of scientific and technical forestry the forest is doomed to eventual decline through age, fire, storm, insect attack, disease, decay and neglect.

I cannot urge strongly enough that everyone in this room, in this capital city, and in the nation at large, rely in the future upon the professional forester to conceive and

execute our long-range plans for use of the forests in the United States. This is the only way in which we as a people can have any assurance that the forests of our land will flourish and be replenished in a scientific and wholly contributive way.

TECHNOLOGY CONTRIBUTES

Our industry believes in science and technology, and professionalism as a means to greater productivity—not only in the woods—but in the mill and at the jobsite as well. In recent years our industry, through mechanization and product line diversification has been able to increase log utilization remarkably. Saw lumber is simply a primary product of timber as is plywood—bits and pieces, chips, bark, culls, and other odd parts of the logs are converted into pulp and paper, particle board, hardboard, glued laminated assemblies of various kinds, on through the final composite fireproof log. Little is wasted at the mill any longer—and this advancement contributes to "constructive conservation" of our timber resource too.

Construction techniques have been advanced to reduce waste on the jobsite as well. Pre-cut members for modular framing are an example. The elimination of bridging between floor joists is another. Research studies have demonstrated the concept of load-sharing among members in wood frame construction and have thus led the way to reduced dimensions which perform well but reduce the volume of wood fiber necessary to do the job. The long sought-after improved standard will be a major breakthrough in improving the quality and performance of lumber. The new dimensions will save an estimated eight per cent in every stud and larger dimension lumber and that represents a tremendous amount of wood fiber nationwide. In effect, adoption and application of the new American lumber standard will mean that a log which would produce twelve studs today will produce thirteen tomorrow.

BOTH ENDS OF THE LINE

So, we in the industry are working towards "constructive conservation" from both ends of the line—in the woods and on the construction site.

We are determined that our industry will not fall the American people by being unable to meet the wood fiber demands of the nation today, tomorrow and forever.

But to fulfill this commitment we will need help. We will need the help of the Congress in passing the National Timber Supply Act so that the National Forests can assume an appropriate share of wood fiber production; we will need the help and guidance of the Department of Agriculture in doing a better woods job on both public and private lands; we will need the enthusiasm of public and private foresters and those who own the lands of America; we will need the understanding of our purposes and our performance from the people who want to use the out-of-doors for purposes other than wood production; we will need the patience and cooperation of communities, counties, and states.

Most of all we will need the help of Nature itself and of the Creator of all growing things. Blessed with both sunshine and rain, free from storm and destruction, inspired by the wonderment of the seedling, the sapling, and the sturdy forest giant and their endless regeneration we will serve our America.

If we assume and carry forward the promise of "constructive conservation" against all odds, it may be our chance to realize in our own time the words of Isaiah 35:1:

"The wilderness and the solitary place shall be glad for them; and the desert shall rejoice, and blossom as the rose."

God will it shall be so.

Thank you.

MEDICAL MISSION TO DOMINICAN REPUBLIC INSPIRING FOR ATTLEBORO'S DR. RODGERS

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mrs. HECKLER of Massachusetts. Mr. Speaker, the Attleboro Mass., Sun recently contained an article which described a medical mission to the Dominican Republic, under the auspices of the Christian Medical Society. Dr. Theodore Y. Rodgers III, of Attleboro, his son, Ted, and Miss Gail Bunce, R.N., of the operating room staff of Sturdy Memorial Hospital, participated in this visit. In the face of extreme discomfort and primitive conditions, the group brought medical attention to village clinics and provincial hospitals in the Dominican Republic. This type of selfless, charitable venture is truly inspirational, in an age where few of us find time to give of ourselves for the benefit of others. I know that my colleagues will share my interest in the Attleboro Sun's account of Dr. Rodgers' trip. The article follows:

MEDICAL MISSION TO DOMINICAN REPUBLIC INSPIRING FOR ATTLEBORO'S DR. RODGERS

Although it took almost five months to prepare for a medical mission that lasted only two weeks, Theodore Y. Rodgers III, M.D., of this city considers the personal benefits greater than any inconvenience that may have been incurred.

It was last October that Dr. Rodgers made a firm commitment to join a medical caravan of 75 from the United States and Canada to work under the auspices of the Christian Medical Society on its annual visit in the Province of Puerto Plata, Dominican Republic. Volunteering to go with him were his son Ted, a senior at Attleboro High School, and Miss Gail Bunce, R.N., of the operating room staff at Sturdy Memorial Hospital.

SOME 180,000 INHABITANTS

"There are 180,000 inhabitants in a peripheral 50 or 60 miles from the capital," says Dr. Rodgers, "and, as travel is mostly by burro, they look to an itinerant team to meet some of their needs. Yet, through the efforts of five medical teams traveling into the villages, care was given to only some 10,000."

Members of the caravan reported that they went to the Dominican Republic to be of service to those less fortunate than themselves, "but many times we were rewarded with kindness and expressions of appreciation that made us feel we had received far more than we had given."

In the village clinics, where diseases associated with malnutrition and parasitic infestations were encountered, villagers were instructed on the importance of boiling their drinking water and milk, proper disposal of waste products, and use of food-stuffs for proper nutrition.

At the provincial hospital, surgical procedures were performed for hernia repairs, bleeding gastric and duodenal ulcers, tendon injuries, revisions of scar contractures due to burns, and acute and chronic bone infections. There were also caesarian sections and procedures for the correction of gynecological disorders.

All equipment and supplies, including drugs, were brought by the caravan under the auspices of the Christian Medical Society.

Dr. Rodgers says, "In addition to the practice of medicine—ministering to the body—the members of the Christian Medical So-

clety believe that they also have a responsibility for spiritual ministry to the souls of those with whom they come in contact through their medical mission.

"In order to accomplish this purpose, the caravan distributed religious literature, held special Gospel services, and showed a series of motion pictures produced by the Moody Institute of Science. These films were the same ones viewed by millions at both the New York World's Fair and at Expo under the title "Sermons from Science." These films had been produced with a Spanish text so that all could understand the message.

"Aware of the words of Christ found in the Scripture in St. John 5:24—'Verily, verily, I say unto you, He that heareth my word and believeth in Him that sent me, hath everlasting life and shall not come into judgment, but is passed from death unto life'—the caravan considered it a special privilege to see lives helped physically as well as spiritually. The experience has helped to develop a new outlook and purpose in life."

CONTINUED EXCELLENCE IN JOURNALISM BY THE LOS ANGELES TIMES, RECENT WINNER OF TWO MORE PULITZER PRIZES

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. CHARLES H. WILSON. Mr. Speaker, I would like to call to the attention of this distinguished body the outstanding record of public service and excellent journalistic achievement which has been compiled by one of the finest newspapers in the country, the Los Angeles Times. The Times has recently been the recipient of two Pulitzer Prizes for their superb journalism.

This fine newspaper has consistently maintained a high interest in civic affairs and in championing honest and responsible local government for the city of Los Angeles. I would like to offer the following article from the Los Angeles Times describing the awards and those responsible for these high journalistic honors:

TIMES HONORED WITH TWO PULITZER PRIZES—EXPOSE OF WRONGDOING IN CITY GOVERNMENT, COVERAGE OF VIET WAR EARN COVETED AWARDS

(By Richard Dougherty)

NEW YORK.—The Los Angeles Times won two Pulitzer Prizes Monday, one for exposing wrongdoing in Los Angeles city government and the other for coverage of the Vietnam war.

The gold medal for meritorious public service was awarded to the newspaper for its city government articles, while the international reporting award went to staff writer William Tuohy.

Tuohy, now assigned to Beirut, formerly headed the Times Bureau in Saigon.

The public service award was in recognition of more than two years of investigations into various city commissions.

The Times' findings led to the indictment of five city commissioners appointed by Mayor Sam Yorty. Three have been convicted of bribery and criminal conflict of interest. Two are awaiting trial.

RESIGNATIONS FOLLOWED

The articles also led to the resignations and transfer of other commissioners, the

cancellation of questionable contracts and the launching of steps toward municipal reform.

Several members of The Times' metropolitan staff participated in the municipal investigations.

George Reasons, The Times' chief investigative reporter, began the assignment in 1966 with a study of planning and zoning irregularities. He later was joined by staff writer Art Berman as the investigation continued and expanded into the Harbor Commission and Recreation and Park Commission.

Staff writers Gene Blake, Robert L. Jackson and Ed Meagher also assisted in portions of the investigations.

Tuohy, 42, is the fourth American correspondent to win a Pulitzer Prize for his Vietnam war reporting. In recognizing Tuohy, the trustees of Columbia noted that "few correspondents have seen and written more about the war in Vietnam than William Tuohy of the Los Angeles Times. . . . Mr. Tuohy has known . . . what it means to be in danger and sometimes under fire. He has been in every part of South Vietnam, from the delta to the DMZ, and he has reported virtually every major operation since President Johnson's decision to escalate the war in February of 1965."

Among Tuohy's prize-winning dispatches were reports from the Marine battle to liberate Hue from the North Vietnamese during the Tet offensive, on the surrounded American garrison at Khe Sanh, and on the court-martial of Marine Pvt. Robert J. Vickers. The only one of seven marines who pleaded innocent to a murder charge, Vickers received a life sentence at hard labor while his co-defendants received light sentences. Following Tuohy's article, Vickers was freed.

Tuohy served as The Times' Saigon bureau chief from July, 1966, to last October, when he was assigned to head coverage of the Arab world.

A native of Chicago, Tuohy entered journalism as a copy boy for the San Francisco Chronicle in 1952, serving later as a reporter and night city editor until 1959, when he joined Newsweek magazine.

WIDE EXPERIENCE

In seven years with Newsweek, Tuohy was successively a reporter, writer, assistant national affairs editor, and national political correspondent. His cover stories for the magazine included articles on Presidents John F. Kennedy and Lyndon B. Johnson, the Cuban missile crisis and the 1964 national elections.

His Vietnam experience dates from his assignment to Newsweek's Saigon bureau in December 1964.

Tuohy served two years in the Navy in World War II, spending time in China and the Philippines. Afterward he entered Northwestern University and was graduated with honors in 1951.

He is married to the former Johanna Iselin and they have a son, Cyril.

EXPOSE BRINGS PRAISE

The Public Service Award given by the trustees to The Times cited it for its "expose of wrongdoing within the Los Angeles city government commissions, resulting in resignations or criminal convictions of certain members, as well as widespread reforms."

As a result of the Planning and Zoning Commission inquiry, two commissioners resigned and two others were transferred.

In the Harbor Commission Investigation, two commissioners were convicted of bribery, one was found guilty of conflict of interest, and a \$12 million city contract was canceled. One commissioner is awaiting trial.

In the Recreation and Park Commission investigation, two commissioners resigned and a golf course contract was canceled.

One of the commissioners named in the articles was indicted for bribery.

Overall, the Times investigations led to a study of the whole structure of the Los Angeles city government with a possibility of eventual city charter reforms.

ACTION NEEDED TO HALT GUN REGISTRATION BY PROXY

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ASHBROOK. Mr. Speaker, in an effort to rectify a runaway interpretation by the Treasury Department last year of its authority under the Gun Control Act of 1968 to issue rules and regulations pertaining to the sale of ammunition, I am introducing today a bill to curb this bureaucratic excess and reflect the will and intent of Congress.

My bill would exempt ammunition from Federal regulation under the Gun Control Act.

Action by the Congress to halt what has become registration by proxy is essential to correct the insidious form of registration required by the IRS regulations. These regulations are in direct contravention of the intent and purpose of the Congress and are but another example of the continuing erosion of the individual's right to privacy when no public good is served by requiring such disclosure.

The provision approved by the Congress in section 922(b)(5) requires the licensed importer, manufacturer, dealer, or collector to record only the name, age, and place of residence of each person to whom he delivers or sells any firearm or ammunition. Form 4473, the "Firearms Transaction Record" required under the Treasury Department regulations calls for the following information: date, manufacturer, caliber, gauge or type of component, quantity, name, address, date of birth, and mode of identification—driver's license—other, specify. We see then that the three original requirements have grown to eight already.

Clearly the Secretary has misconstrued the intent of Congress. The gun buyer, in completing this form, is in fact registering himself and his firearm. The Congress specifically and decisively defeated an amendment last year that would provide for gun licensing and registration. I have consistently opposed registration and did so then, as did a majority of my colleagues. Consequently, I cannot stand idly by and countenance this flagrant departure from the will of Congress and, I feel confident, the will of the people. Simply put, the Treasury Department action amounts to a repudiation of this intent.

We have made the mistake in the past of making broad delegations of power to executive departments and agencies, and the trend in the past few years has been to grant virtually every power conceivable. Perhaps our delegation of powers was too broad in the Gun Control Act of 1968. Either that or the Secretary be-

lieved he was given much broader discretion in this matter than the Congress intended to vest in him.

In any event, we have an executive agency of the Government hamstringing law-abiding citizens and gun dealers with burdensome, costly, and time-consuming redtape. You would be hard pressed to make them think they had not just gone through a registration procedure. This is a result that the Congress not only did not intend but, more important, expressly rejected. I do not believe the Congress should condone the action of the Internal Revenue Service which accomplishes by regulation what the Congress would not sanction by law.

By exempting ammunition from recordkeeping requirements amounting to registration, the dealer and law-abiding sportsman would not be encumbered by a lot of unnecessary redtape which does not serve to keep firearms out of the hands of criminals. No one should be so naive as to think that regulations making it difficult to purchase firearms for legitimate purposes would in any way impede the unlawful conduct of the criminal or prevent him from securing a gun.

I have on numerous previous occasions expressed my vehement opposition to efforts to register firearms and this opposition extends to de facto registration. The present IRS regulations, if not modified now to reflect the will of Congress, might well lead to de jure registration requiring completion of a form that resembles the proposed 1970 census questionnaire.

PRESIDENT'S NIXON'S VIETNAM TALK

HON. JAMES F. HASTINGS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HASTINGS. Mr. Speaker, President Nixon's address to the Nation last night was a clear enunciation of perhaps the most agonizing problem confronting the Nation today.

He carefully spelled out the complexities of Vietnam and the need for establishing a durable peace instead of temporary truce. His call for a mutual withdrawal of troops is certainly fair and reasonable and leaves leeway for negotiations.

And once again he has emphasized to the world that the United States is concerned only in assuring that the South Vietnamese people will be able to choose their own government in a freely conducted election.

I was happy to hear the President stress again the need for unity here at home. To me, this is so important to our peace efforts in Paris. Hanoi cannot understand that in a democracy such as ours it is possible to have differing points of view but still be united when it comes to the common good and safety of our country.

But Hanoi must be made to understand that bearded, bead-wearing, sign carrying minorities do not speak for the

great majority of seriously concerned and loyal Americans. As President Nixon said, we must remain firm in our goal to secure a meaningful end to the war without abandoning the ideals for which so many of our young sons have already given their lives.

CHICAGO'S WBBM EXPLODES INACCURACIES BY THE NEW STATESMAN OF LONDON

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. PUCINSKI. Mr. Speaker, on May 9 and 12, radio station WBBM, a Columbia Broadcasting affiliate in Chicago, performed a most noble and public service by editorially exposing a series of falsehoods which appeared in an article written about Chicago by a young lady named Victoria Brittain. Her scurrilous attack on Chicago's mayor appeared in the April 18 issue of the New Statesman published in London.

Mr. John Madigan, public affairs commentator for CBS in Chicago, deserves the highest plaudits for bringing to electronic journalism the highest standards of fair play.

Mr. Madigan's scathing denunciation of Miss Brittain's shameful inaccuracies brings to mind an old saying by Damon Runyon that an irresponsible reporter at a typewriter is more dangerous than a drunk doctor in an operating room. Damon Runyon obviously must have anticipated Miss Victoria Brittain's scandalous irresponsibility as a journalist. I hope that if Miss Brittain even returns to the United States that those in public office will remember well her total lack of credibility and treat her with the scorn she has so deservedly earned in her irresponsible article about Chicago.

Mr. Madigan's excellent editorial follows:

EDITORIAL BY JOHN MADIGAN

The April 8 issue of The New Statesman . . . published in London . . . has been sent to me.

A prominently displayed article is titled: "Whatever happened to Mayor Daley?"

It bears the by-line "Victoria Brittain." Indiana Congressman John Brademas ran interference for Miss Brittain . . . who showed up at police headquarters some weeks ago saying she wanted to do an article on the managerial process of the force.

She wanted to talk to Capt. Pat Needham . . . executive assistant to Superintendent Conlisk. Capt. Needham was attending a funeral . . . so Miss Brittain left the building without picking up anything more than a couple of "hellos."

This seemingly routine background is important . . . because Miss Brittain's article isn't about managerial process . . . but is another in a long list of scathing attacks on Mayor Daley appearing in foreign newspapers since the Democratic convention.

If it were just another attack . . . fine. Mayor Daley made some serious mistakes in planning for the street demonstrations . . . so did the police.

But Miss Brittain's article is loaded with errors of fact . . . compounded by erroneous conclusions based upon them.

The thrust of the article is that Mayor Daley is no longer "Lord God" . . . that the skids are gradually being put under him . . . but the erosion isn't as fast as desired . . . so he'll be around for a while.

He is described as a "proud . . . choleric . . . almost illiterate . . . yet cunning man" . . . who rules through patronage and favor . . . using the blacks . . . buying Republican business support through federal programs . . . and directs a head-cracking police force.

Errors abound in filling out this skeleton. A few examples: The impression that Negroes . . . particularly Catholic black . . . are moving away from the regular Democratic organization en masse. Not true. Ask Independent Alderman Fred Hubbard.

Blaming Mayor Daley for losing the aldermanic race in the 44th ward! Not true. It was a ward matter. The independent won because the Jewish vote stayed with him solidly . . . while Republicans voted for him just to be anti-city-hall.

Identifying Ab Mikva as completely independent . . . and beating Daley's nominee for congress. Mikva was the regular organization's choice this time because he couldn't be beaten. But the incumbent he defeated wasn't downtown's selection. He was asked to step out gracefully . . . and be taken care of . . . and he refused.

Lauding Adlai Stevenson as having "total contempt" for the machine. Well . . . he used it . . . its money . . . and his father's name . . . or he wouldn't be where he is today. And right now he's seeking power.

Implying the Daley Machine put Dick Gregory in jail. Not true. And yes he is black and a pacifist . . . but he is not much loved.

The errors run on . . . as to why Republican businessmen support Daley . . . on branch banking and currency exchanges.

On the circumstances under which an FBI man used walkie-talkies at the trial of a convention demonstrator . . . on the status of Governor Ogilvie's reform bills.

Telling of policemen being screened for duty at the assassination anniversary of Martin Luther King . . . when it was actually for an anti-Viet Nam march the next day.

Chicago's American (now Today) isn't raising a defense fund for the indicted convention cops. Its Columnist Jack Mabley is . . . and he and his paper differ strongly on Mayor Daley's convention role. Mabley criticizes him and the police . . .

Complaints that Daley is olympian to newsmen. The truth is he has had more news conferences in office than most other important officials in government. And his people are not spreading the word he'll run again. They don't know a thing.

Most vicious is the description of him as "illiterate and cunning." He's a lawyer with extensive knowledge of government and finance . . . and amazingly frank . . . except to dishonest news people like Victoria Brittain.

John Madigan . . . WBBM Newsradio 78.

RETIREMENT OF MATTHEW DEMORE, GENERAL VICE PRESIDENT OF THE INTERNATIONAL ASSOCIATION OF MACHINISTS

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. VANIK. Mr. Speaker, on Saturday, May 31, 1969, Matthew DeMore, retiring general vice president of the International Association of Machinists will be honored with a testimonial dinner by his "home" IAM District 54. The testimonial

committee is chaired by Mr. James N. Iafelice, president of IAM District 54 and cochaired by Mr. Ed Moss, secretary-treasurer of district 54.

Few people within public service or in the labor movement in this country can point to the devotion and wholehearted involvement which Matt DeMore has shown in his work with the machinists and with our Greater Cleveland Community and the Nation.

Matt is blessed with a fine wife, Mary, whom he married in 1923. They have five children and 14 grandchildren.

Matt was born in 1903 in Cleveland and attended Murray Hill and East high schools. Working as a newsboy at age 9 and as a part-time hardware store clerk at age 11, Matt left school at age 16 to become a blacksmith's helper with the Michigan Central Railroad in Detroit. He returned to his native city to work with Electric Vacuum Cleaner Co. as a maintenance machinist.

In 1935, Matt joined IAM Lodge 439 serving as shop steward. In 1936, he was elected president. By 1938, Matt was elected president of IAM District 54 and served as president of the district for 22 consecutive years. During these critical years in the labor movement, Matt also served as vice president of the Ohio State AFL-CIO and as legislative director of the Ohio State Council of Machinists.

By 1961, Matt's talents were fully at work and he was elected IAM general vice president assigned to the northeast territory during 1961-64. Since the middle of 1954, Matt has been assigned as resident vice president at IAM Washington headquarters.

Besides all of the obvious achievements which have marked Matt's extensive career in the labor movement, those of us who have been privileged to work with him know him as a fair, just, and good man. I know no higher praise that can be paid to any man.

The entire community is grateful for the exemplary leadership of this fine citizen.

FATHER MICHAEL HREBIN

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. GAYDOS. Mr. Speaker, on May 8, at Ascension Auditorium in Clairton, Pa., I had the privilege of attending a parishioner-sponsored banquet honoring Father Michael Hrebin on the 20th anniversary of his ordination to the holy priesthood and 10 years of pastoral service to the Ascension of Our Lord Byzantine Catholic Church.

Father Hrebin is an exemplary man of the cloth, who, in addition to his spiritual guidance, has engendered a spirit of unity among his parishioners which has resulted in many physical renovations and a warm, cooperative family spirit.

I include herewith for the RECORD and invite the attention of my colleagues to a brief historical sketch from the banquet program.

FATHER MICHAEL HREBIN

Father Michael Hrebin studied at St. Procopius Seminary in Lisle, Illinois and was ordained to the Holy Priesthood on May 8, 1949 at St. Mary's Church in Whiting, Indiana by Bishop Daniel Ivancho. Thereafter he served in two assignments as assistant pastor, to Father Joseph Hanyulya of Holy Ghost Church in Cleveland and to Father Alexander Papp of St. Michael's Church in Gary, Indiana. In 1952 Father Hrebin became pastor at Holy Spirit Church in the Oakland district of Pittsburgh. On November 1, 1959 he was assigned to his present position as pastor of the Ascension of Our Lord Church in Clairton, Pennsylvania.

Father Hrebin was born in Swoyersville, Pennsylvania, a son of Anna, nee Pauley, and Michael Hrebin, Sr. His sisters are Ann and Theresa (Mrs. John Depcymski). His brother, Joseph, is a physician in Bridgeport, Connecticut. A second brother, Daniel, died while studying for the priesthood.

The spiritual success of Father Hrebin is reflected by increases in attendance at Mass and in the number of communicants. In addition he has encouraged, cultivated and strengthened other beneficial spiritual programs. Among these are the Confraternity of Christian Doctrine which provides religious training from the first through twelfth grades, a large and well trained group of altar boys, a very active Sodality and an enthusiastic choir.

Father has also been involved in extra-parochial programs, including the Catholic community lenten lectures and activities of the Catholic Youth Organization. In the areas of ecumenical and community affairs, he was one of the founding group of the Clairton Mayor's Prayer Breakfast and he serves on the city's Human Relations Commission.

Father Hrebin's musical interests originated in his youth. He was taught piano, violin and music principles by the late Father Francis Jevnik. With this background and influenced by a family tradition of seven cantors—his father, maternal grandfather and five uncles—he became cantor at the Lyndora parish at the age of sixteen, serving for two years before entering the seminary.

As a seminarian, Father Hrebin directed the St. Procopius Choir. While at St. Michael's in Gary he directed the two hundred voice Mid-West Byzantine Catholic Chorus. Among other activities publicizing our Rite, the group sang at Notre Dame University and at the Holy Name Cathedral in Chicago. Similarly, in the Pittsburgh area he directed the five hundred voice Western Pennsylvania Catholic Chorus. This group sang frequently at the annual pilgrimage to Mount St. Macrina and at other religious and social functions. It was at Mount St. Macrina in 1953 that the Most Reverend Bishop Fulton Sheen celebrated the first English Mass using music arranged by Father Hrebin. To help preserve our music, Father has served as Choir Director and Professor of Chant at SS. Cyril and Methodius Seminary and as first Director of the Diocesan Cantors Institute. At Ascension Father has trained the choir and encouraged its participation in parish and local programs.

In addition to his parochial spiritual duties and his musical interests, Father has participated in Diocesan affairs as Director of Retreats, Notarius on the Matrimonial Tribunal and member of the planning committee for the first Diocesan newspaper. Early preparation for this work involved summer classes in Catholic action and social action at Catholic University in Washington, D.C.

A major accomplishment of Father Hrebin's pastorate at Ascension is the growth of a cooperative family spirit. Soon after his arrival this growth began as energetic and talented parishioners donated time to repair and renovate the Church basement and the rectory. If a single project can be cited as the

focus of such activity, it is the parish auditorium. From the beginning Father has encouraged the voluntary sacrifices of the people which have made the program a success, from the fund raising stage through the present operational phases. It is on this foundation that much of the future progress of the parish can be based.

As a center for parish social activities Ascension Auditorium reflects the dedication of the people whose support makes it possible. Parish social nights and holiday programs foster a warm family atmosphere in which young and old can participate. In attracting diocesan and community functions the Auditorium serves to highlight the spirit of Christian hospitality and co-operation which Father Hrebin encourages.

TWENTY-FIRST ANNIVERSARY OF ISRAEL'S INDEPENDENCE

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ROONEY of New York. Mr. Speaker, in spite of the unrest and uncertainty presently prevailing in the Middle East we can join happily with all our Jewish friends and neighbors in observing the anniversary of Israel's independence. Jews throughout the world give pause to offer prayers of thanksgiving for the little nation which becomes 21 years old today and they extend warmest congratulations and greetings to the leaders and people of Israel on reaching this historic national milestone.

American Jewry is particularly happy on this day and proud to pay tribute to Israel, for in a large sense they look upon this strong young nation with justifiable paternal pride. Without the continued and unflagging help of the officers and workers of the United Jewish Appeal there would be no Israel today. Without the help of many other fine Jewish organizations and without the generous and selfless help of thousands of individual Americans of Jewish extraction there would be no national homeland for Jews today.

I take great pride in having worked closely with these great leaders for well over 20 years. I prize the cooperation which they extended to me and to many of you in helping to secure the enactment of legislation which helped to create Israel. I am grateful for this help to those of us in Congress to assure the extension of U.S. assistance to this brave new nation. For coupled with the magnificent contributions of private funds and resources, the Federal Government has made available enormous economic aid in grants and loans. It has supplied military assistance and furnished generous contributions of food, medicines, building supplies, as well as aid to schools and colleges.

It seems hardly possible that 21 years have elapsed since so many of us here today were beginning to realize success for our years of effort to bring about the establishment of a sovereign nation to be called Israel. But it is even harder to realize the truly miraculous accomplishments which the people of Israel and

her leaders have made in such a short time. In visiting Israel today one has difficulty in believing what his own eyes behold when he sees about him throbbing cities, a network of modern highways, fertile farms and orchards fed by thoroughly up to date irrigation projects.

If one's visits to Israel have spanned the full 21 years of statehood as mine have, it is difficult to overcome the memory of barren wastes and uninhabited desert vastness which are now no longer visible. Instead what might be termed a "continuous oasis" makes a mockery out of memory.

I have taken real pride in visiting the schools and colleges established and maintained by funds appropriated by this body. I have talked with students and have marveled at their earnestness and their zest for learning. I know that from their ranks will come many of the future leaders of Israel.

Mr. Speaker, these 21 years have wrought many changes in Israel, for in her early infant days I saw great relentless pride fully adequate to protect and safeguard the independence which these pioneers had struggled for so long and so ardously.

I have met heroes on every visit—heroes who have distinguished themselves on the battlefield, heroes who have won battle after battle in the halls of international diplomacy and heroes who have conquered the elements and the ravages of nature as well as man's corruption of a once fertile area.

On the farms and in the city, from young and from old, I caught the contagious fever of progress. I sensed the national pride of achievement and I sensed, too, the nationwide impatience to get things done not today or tomorrow but yesterday. So I have found on each successive visit to Israel less suffering, less poverty and more happiness—happiness that comes from doing and achieving.

All of us are mightily concerned with the position into which Israel has been projected in the extremely delicately balanced scales of the Middle East. We shudder at the thought of even the slightest tipping of these scales which could set off the flame igniting the powder keg which would jeopardize the promise of peace not only in that area but throughout the world. Some of us have even stronger fears that the well meaning but shortsighted attempts being generated to soothe the frayed nerves and reconcile the deep-rooted differences in that area might result in a disastrous peace at any price—even at a price of national honor and the impairment of the sovereign status held so dear by our friends in Israel.

Mr. Speaker, it would be well for all of us to realize how serious are the problems confronting the world—major powers and lesser powers alike—in and around the youthful state of Israel. They are far more significant than border clashes or occasional head-on collisions of competing military units serious as these may be. These problems are a part and parcel of the real and political conflict of our concept of man's right of advancement by means of self-determin-

nation in contrast to the Kremlin's long recognized aim of obtaining and retaining political and economic domination by utilizing puppet regimes to maintain a vassal state.

It ill affords Americans, particularly those of us in this body, to allow our anti-Communist defenses to deteriorate or to permit the siren songs of coexistence to fall upon unplugged ears in these days when the Kremlin seems more preoccupied with maintaining its control over its squirming, protesting, and unhappy puppet states than with more active attempts to achieve worldwide expansion of communism. We must keep ourselves constantly informed and ever alert to meet this awful threat hovering over the future of Israel.

Once more I congratulate the people of Israel and their leaders for their remarkable achievements for the past 21 years. I congratulate them upon reaching their majority. I wish them many years of solid growth and prosperity devoid of the tensions and peril to which they have so long been subjected. I congratulate, too, our fine Jewish organizations for the efforts they have made over the years to permit us to share today in the observance of Israel's 21st birthday.

BALANCE OF PAYMENTS

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. O'KONSKI. Mr. Speaker, on April 23, Mr. Edward Littlejohn, director of public affairs for Chas. Pfizer & Co., testified before the Subcommittee on Foreign Policy of the Committee on Foreign Affairs.

Mr. Littlejohn is one of the most eloquent spokesmen of the business community on balance-of-payments problems. I commend his statement to my colleagues:

My name is Edward Littlejohn. I am Director of Public Affairs of Chas. Pfizer & Co., Inc. In the past eighteen years since Pfizer International has existed, we have established Pfizer organizations in 56 countries, including manufacturing facilities in 32 countries. Slightly under 50% of the sales and earnings of Chas. Pfizer & Co., Inc. come from operations abroad. Pfizer is among the very few, that is some 15, U.S. companies with foreign sales in the neighborhood of 50% of total sales. In 1968 our sales abroad amounted to \$333 million.

Mr. Chairman, we support Congressional Resolution No. 85. We believe that the foreign direct investment controls should be promptly removed. We believe that they are not a cure for our basic payments problem and that in fact they work in the other direction.

International business is basically no different from domestic business. International business operations are a natural outgrowth of domestic operations. One can no longer separate the two. Just as the railroad, the automobile, and finally the airplane created the U.S. continental market, so jet aircraft and electronic communications are uniting vast areas of the world in one market with similar tastes and similar business possibilities. American business is reaching out to

serve those markets with exports, licensing arrangements, marketing organizations, and production facilities as conditions require.

I emphasize the phrase "as conditions require." Prior to World War II international business was done largely through exports but under changed conditions, including the worldwide desire for the development of industry, companies have found it necessary to establish local marketing and production facilities. The result is that whereas exports are currently running at about \$33 billion, deliveries from production facilities abroad probably amount to a figure of four or five times this amount or some \$150 billion.

Since 1950 the amount of funds sent abroad annually to establish and feed international business operations has been growing at the rate of 10% a year. In the years 1950-1967 these dollar outflows amounted to \$30 billion, a sizeable amount, but—and this is the important point—they resulted in dollar inflows amounting to \$53 billion, leaving a positive balance of \$23 billion. These outflows represent business investments not significantly different from investments in our domestic businesses. American businessmen have made these investments abroad because they believed that they were necessary not only to maintain but to increase market shares and contribute to the profitable growth of their companies. Their judgments have been confirmed in the substantial dollar returns these investments have generated. They are investments made with the expectation of good returns, and let me emphasize good returns in dollars to the parent company and hence to stockholders in the United States. An automatic balance of payments guideline is necessarily built into the objectives of international business management. The dividends of the U.S. parent company are paid in dollars, and it expects its international subsidiaries to contribute their share of them.

In these circumstances businessmen find it difficult to understand how restrictions on the freedom to expand profitable operations abroad can be regarded as a means of strengthening the balance of payments. One wonders where we would be today if these investments had not been made. And in fact we do know where we would be. From 1965 the favorable U.S. trade balance has been steadily falling:

	Billion
1965	\$4.8
1966	3.7
1967	3.5
1968	0.09

Admittedly 1968 was a very abnormal year, but the trend is unmistakable. For 1969, we might get the trade surplus up to \$2.5 billion, but even that is uncertain. On the other hand the net inflow on direct investment maintains a steady and continuous contribution to the balance of payments:

	Billion
1965	\$1.5
1966	1.6
1967	2.6

Though the foreign direct investment program has abnormally boosted these inflows, the pattern was established before they were instituted. I should add that these figures do not include the inflow from exports to affiliates. It has been officially estimated that these exports generated by direct investments abroad represent some 25% of U.S. exports. Indeed if we also deduct from the trade balance government-financed exports and deduct an estimate of the exports due to direct investments, there is no doubt that the contribution of direct investments to the balance of payments has in recent years been considerably greater than that of trade. Without the investments that American business has made abroad since 1950 and the returns generated by them, the condition of

our balance of payments would surely be catastrophic.

The question is continually asked, "Has business been hurt by the controls?" I have not access to the data on the experiences of individual companies. It is clear that some companies have been hurt and gained some relief. Some have been hurt and not gained relief. On the other hand, many mature businesses are flexible enough and have a sound enough credit position to be able to increase net inflows for a year or two without suffering liquidity problems. In some cases it is possible that cash and inventories can be reduced without harm to operations, but obviously there is a limit to this kind of adjustment and that limit is reached in short order.

There has been a tendency to regard the great increase in borrowings abroad by American companies as a welcome result of the direct investment regulations. Undoubtedly they have to an extent increased the development of European capital markets. There is, however, another side of the coin. American companies are being forced by the regulations to increase their debt equity ratios and not for sound business reasons. In floating convertible debentures we are potentially placing a greater proportion of the ownership of our companies in the hands of foreign investors. In increasing our bank loans similarly we are increasing the claims of foreigners on the earnings of our business operations abroad. The effect of the vast borrowings by the overseas affiliates of U.S. companies is in a sense therefore disinvestment. The United States is reducing its creditor and increasing its debtor position when it is clear that it is precisely the opposite trend that is needed for the strengthening of the payments position of the United States.

There are other effects of the program which by their nature cannot immediately be observed but are bound to become visible in the near future. In the years since World War II the United States has until recently given an example of leadership in the freeing of international trade and investment from regulations and controls. In the past few years, however, the signs have multiplied of a change in U.S. policy. There is the exchange equalization tax, controls over bank lending abroad, the voluntary direct investment program, the mandatory program, and the discrimination against foreign income in the surtax legislation. In the past official spokesmen have reiterated that there is no change in U.S. policy. The record of these actions must, however, speak louder than words. The fact is that by these measures the United States is encouraging a return to the days of stifling controls over international transactions and progressively increasing the uncertainties confronting American businessmen.

I said earlier that the effects of these uncertainties were bound to become visible. I would like to correct that statement. These effects are already visible. According to a story in the New York Times of March 25th describing a recent report of the Department of Commerce, the rate of increase of U.S. investment abroad is slowing sharply. The Department of Commerce has now reported that nearly final figures for 1968 indicate an increase of only 3% over 1967 which if confirmed by final figures later this year will be the smallest rise since 1960. For 1969 the report projects an increase of 7% over 1968 in total investment in plant and equipment abroad—a figure as large as 1967 and more than 1968 but still far below the growth in the years up to 1966. Moreover, these figures refer to total investment. In 1968 investment in manufacturing actually declined. It declined by 6% and only a small increase is being planned for 1969.

There is another element in this situation that it is important to mention. The rapid increase in U.S. investments in foreign markets could hardly have taken place without

imposing some significant challenges to the diplomatic skills of American businessmen. We must remember that the business operations which are the source of such significant inflows into the United States are under foreign jurisdictions. Our foreign affiliates are in effect foreign companies, employing foreign nationals, using foreign land, foreign labor, and to some extent foreign capital, and they are often significant elements in the local economy. Management has thus obligations to local jurisdictions which in the final analysis can be enforced by local law. It is clear then that the security of these dollar earning assets depend upon the prudence with which we fulfill these obligations and the degree to which we are successful in reconciling the interests of the investor and the host country. It is hardly necessary to point out that this delicate situation is seriously aggravated by the U.S. direct investment controls. They declare in effect that these foreign registered companies are American companies whose earnings are subject to the extraterritorial jurisdiction of U.S. laws and regulations and that at any time they will be regulated to serve U.S. purposes. In a world in which the spirit of nationalism has been intensified with the multiplication of nation states there could be no policy more calculated to threaten the climate for American investors abroad. Reactions have already occurred in some countries, where limitations have been placed on the freedom of banks to lend to U.S. affiliates, and in other ways all over the world there is evidence of an increasing sensitivity to the potential dominance of American companies. The "American challenge" in the sense of management and technological skills is unfortunately being exacerbated by the political challenge expressed in the foreign direct investment controls.

In summary then, this is our position. The business operations abroad of American companies have developed in response to the growing opportunities of the world economy. They are the necessary business response to the conditions in individual markets. The investments now represented by these operations were made, as are other business investments, in order to generate returns—returns to finance future growth and also, and just as important, returns to the parent companies in the United States. These latter returns have now grown to the point that they represent a major source of the foreign exchange necessary for the strength of the U.S. payments position. The foreign direct investment controls strike at the continuing expansion of these operations, and by their extraterritorial claims, threaten to generate reactions which will worsen the climate for U.S. trade and investment abroad. On both scores, the maintenance and increase of the net inflows referred to above will be adversely affected. For all these reasons the controls are presently counterproductive and will become more and more so as time goes on. In the interests of international business and the growing contribution it can make to our balance of payments, in the interests of the United States and a growing world economy, I urge support of Concurrent Resolution No. 85 as an expression of the sense of Congress that the foreign direct investment controls should be promptly terminated.

EUGENE KINNALLY

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 6, 1969

Mrs. HECKLER of Massachusetts. Mr. Speaker, I join my colleagues in mourning the loss of our dear friend Eugene

Kinnally. A dedicated and distinguished public servant, Gene Kinnally loyally assisted our beloved Speaker for many, many years. And, as the trusted aide of the leader of this body, Gene Kinnally, at one time or another assisted everyone of us here. He was devoted to his official duties, but he was also the sort who always walked the extra mile in behalf of his fellow man.

A person of true humanitarian impulse, Gene Kinnally's presence was felt and appreciated on Capitol Hill—and throughout the Commonwealth of Massachusetts as well.

He enjoyed the universal respect of all who knew him because of his comprehensive abilities, tireless efforts, and great compassion. Friendly and warm, trustworthy and sincere, devoutly religious, Gene Kinnally was the epitome of virtuous conduct. These qualities were acknowledged by all who knew him. Let the records of this body always show a tribute to Eugene Kinnally, whose outstanding abilities and lifetime dedication will never be surpassed.

MARYLAND GOVERNOR URGES RESOLUTION TO PISCATAWAY PROBLEM

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HOGAN. Mr. Speaker, I wish to call the attention of my colleagues to an intolerable situation which desperately needs correction. Prince George's County, one of the counties in Maryland which I represent, needs an effluent line from its sewage disposal plant at Piscataway Bay to curb water pollution and solve a serious health hazard. Local officials have requested a permit from the National Park Service to run an effluent line underground across Piscataway Park for the purpose of discharging effluent into the Potomac River. This would reduce the current pollution of the Potomac as well as Piscataway Bay. Here are the essential facts in the situation:

In 1962 a sewage disposal plant site was selected on the shores of the Potomac upon the recommendation of consultants. However, the Secretary of the Interior at that time, Stewart Udall, objected to the plant being located on the river because it would be an eyesore from Mount Vernon.

The Washington Suburban Sanitary Commission agreed to move the site inland to the present location if Secretary Udall would agree to the issuing of a permit. He assured the WSSC that the Interior Department would cooperate.

The plant was moved inland and constructed, but the Department of the Interior refused to issue the permit to cross National Park Service land.

Reluctantly, the Maryland Department of Health permitted the WSSC to discharge the effluent into Piscataway Bay. The tidal flow and depth of the bay are insufficient to assimilate the effluent. This results in a polluted bay with the accompanying threat to the

health of the community, and interferes with the shoreland of the park. The present restricted operation of the Piscataway plant, because of the lack of the effluent line, requires the WSSC to pump sewage to the Blue Plains plant which is already overtaxed. Consequently, the Blue Plains plant discharges effluent into the Potomac at a higher rate of pollution than at Piscataway. A recent study reported that the Blue Plains plant is one of the three major sources of pollution of the Potomac. Still the Park Service refused to issue the permit.

On February 13, 1969, I called all interested parties from the local, State, and Federal Governments together in my office. After discussions, Nash Castro of the Park Service agreed to issue the permit and so informed the press. The State health department agreed to vigorously enforce water quality standards at the plant.

A group of disgruntled citizens in the southern part of the county who want residential development near them halted, secured the ear of some members of the Interior and Insular Affairs Committee and succeeded in getting the Park Service to hold up issuance of the permit.

Because WSSC cannot get the permit to run the effluent line to the river, it has not been possible to increase the capacity of the plant from 5 million gallons per day to 30 million gallons per day to handle the sewage needs. Consequently, the county has been forced to declare a moratorium on sewer permits. Further, because there have been a great number of septic tanks improperly constructed, the county has declared a 90-day moratorium on septic tank construction. This means that not a single house can be built in southern Prince Georges County. This, of course, is the homebuilding season, and the local economy cannot stand the loss of this revenue. Not only is it impossible to handle the current volume of sewage, but there is no way to plan the orderly development of the county, because the National Park Service refuses to issue a permit to cross park land with the effluent line as promised by Secretary Udall, and as more recently promised by the Park Service itself in my office. The line would be buried underground and the Park Service admits it would not interfere with the park.

Federal Water Pollution Control officials agree the effluent line is needed.

The WSSC is in line for a grant for the construction of a demonstration tertiary plant at Piscataway and this, of course, is also stalled.

Mr. Speaker, the Park Service has indicated its willingness to issue the permit; the Federal Water Pollution Control Administration has indicated that the sewage line is needed; the only reason that this has not been accomplished is that some members of the Interior and Insular Affairs Committee have persuaded the National Park Service to withhold the permit.

The State of Maryland is not in violation of any Federal laws. The question of constructing sewer lines is not a Federal problem. Maryland has qualified under the Clean Rivers Act. There is no legal or substantial reason why the permit by

the National Park Service should not be issued except that "congressional pressure" has been applied where, in my opinion, it ought not to have been. In the final analysis, the failure to issue the permit will not stop the construction of the sewer line. It will only increase the cost to the State of Maryland and Prince George's County.

The Maryland congressional delegation has sent a letter to Secretary of the Interior Hickel urging him to have the permit issued. I would now like to insert into the Record a letter from the Governor of Maryland, Marvin Mandel, which was sent to Secretary Hickel urging that the permit be issued:

There exists a serious problem in Prince George's County of our State because the National Park Service has failed to issue a permit to run a sewage line across park land from the Piscataway Sewage Disposal Plant to the Potomac River.

I have met with our Congressional delegation and share their concern that the delay in issuing this permit is causing undue hardship to residents and business people in the area affected. Our delegation has written you in more detail about this situation, and I would like to emphasize the urgency of the problem.

The National Park Service should be required by the Secretary of the Interior to issue the permit as soon as possible, so that we can begin immediately to solve the problem. If there is a question of adhering to the water quality set by the Clean Rivers Act, that should be taken up separately by the Pollution Control Administration. The two matters are simply not related.

THE ASIAN DEVELOPMENT BANK AND THE U.S. COMMITMENT TO THE PACIFIC COMMUNITY

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HANNA. Mr. Speaker, increasingly, over the last three decades, our Nation's time and attention has been directed to the East. World War II saw over a million of America's young men spend 5 years fighting in the Pacific theater. Five years later, we found ourselves embroiled in a second major conflict in Southeast Asia. The Korean war served to emphasize, once again, the critical importance of Asia to American foreign policy. More recently, the Vietnam conflict has seen our Nation involved in a long, bitter, and costly exercise of asserting vital interests on the Asian subcontinent. Our interest in the Pacific basin is not only reflected in our military involvement in this area over the past 30 years, but it may also be seen by our increasing commitment to economic development and improvement of the lot of peoples and nations of this region. Our involvement is evidenced also by the increased investment by the U.S. business and industry in the countries of this area. Our interests are also evidenced by the increased trade and commerce between the United States and countries

of the Pacific. Finally, the influence in Asian culture on American living cannot be ignored. One need only look to the influence that oriental art, architecture, and drama has had upon the counterpart art forms in our society to perceive the importance of Asian culture on our ideas and concepts of living. I offer these comments as evidence of the profound effect that the affairs of the Pacific basin have upon modern American life.

In recognition of the increasing importance of the Pacific basin to our country, we did, in 1966, approve legislation authorizing U.S. participation in the Asian Development Bank. On March 16, 1966, the Asian Development Bank Act, Public Law 89-369, was signed into law by President Johnson. This bill cleared the way for our country to participate in an international bank, corporate in form, whose capital stock is owned by the member nations. The Bank's original membership was made up of 31 countries, 19 of which were in the region and 12, including the United States, from outside Asia.

THE ADB CONCEPT

As conceived, the Bank was to offer loans on conventional terms, what are often called "hard loans," to finance economic development projects in the region. The loan funds were to be derived from subscriptions to stock in the Bank by member nations. The bank was authorized to issue \$1.1 billion in capital stock. In addition to its role as a conventional lender in the Pacific region, it was anticipated from the very beginning that the Bank would play an important role in spreading the burden of development assistance by serving as a channel for this form of additional financing from donor countries. Consistent with this aim, the Bank was given authority to earmark up to 10 percent of its paid-in capital as special funds that might be used to make or to guarantee loans of longer than usual maturity, longer grace periods, and lower than ordinary interest rates. Such loans are normally referred to as "soft loans," distinguishing them from the conventional "hard loans." Three countries, Japan, Canada, and Denmark, have pledged funds to the special "soft loan" fund. These pledges total \$130 million.

THE U.S. COMMITMENT TO THE SPECIAL LOAN FUND

In 1968, the administration pledged \$200 million as the U.S. commitment to this soft loan fund. The House Banking and Currency Committee, reacting to President Johnson's persuasive call for full funding of the American commitment to the soft loan fund of the Asian Development Bank, reported H.R. 13217, a bill to amend the Asian Development Bank bill and provide an authorization for the appropriation of \$200 million for the U.S. contribution. This contribution which was to span the period of 4 years, was designed to enable the Bank to more effectively finance regional programs and projects in the areas of agriculture, transportation, communications, Mekong development and other priority areas on terms which were not appropriate to the Bank's ordinary lending activities. I

regret to say that this measure never went to the floor for action, and as a consequence, the United States was already tardy in meeting its commitment to the Asian Development Bank when the Nixon administration took office last January.

It was with the hope that action could be completed promptly on our commitment to the Asian Development Bank that myself and several members of the International Finance Subcommittee of the Banking and Currency Committee, including the subcommittee's distinguished chairman, Congressman RUESS, introduced legislation to make good on our \$200 million moral commitment to the special fund of the Bank. It is most regrettable that our example of prompt action was not followed by the Nixon administration. It is also most regrettable that Treasury Secretary Kennedy after over 3 months in office and after having attended the annual meeting of the Asian Development Bank, has not seen fit to announce the Nixon administration's position on this legislation.

THE PERFORMANCE OF THE ADB

One might ask: Why it is that our Government has been so slow to extend a firm commitment to the special loan fund of the Asian Development Bank? The record of the Asian Development Bank certainly shows no basis for our inaction. The record is an eminently good one. A brief synopsis of the activities of the Bank during its first year and a half of operation will serve to demonstrate that. A look at the effect the Asian Development Bank has had on the countries of this region over the last 18 months, will provide an insight of the important role the Asian Development Bank is playing. Therefore, I am including a brief extract of the activities of the Asian Development Bank in several of the countries of this region:

OPERATIONS BY COUNTRIES

Seven loans were extended in the year under review amounting in aggregate to US\$41.6 million. In addition, four technical assistance proposals were sanctioned for the formulation of feasibility reports or detailed project reports for later consideration for possible Bank lending, and seven technical assistance proposals were approved for non-loan purposes. The total cost of these eleven projects, spread over seven of the Bank's developing members, will amount to US\$1,137,000.

CEYLON

A loan of US\$2 million was made to the Central Bank of Ceylon to assist in financing the first phase of the *Tea Factory Modernization Program*. It was approved on 2 July 1968.

The loan is for a term of 15 years including a grace period of three years. The loan documents were signed on 17 July 1968 at the Bank's headquarters.

The tea industry in Ceylon is predominantly owned by the private sector and is the most important source of foreign exchange, contributing over 60 per cent of the annual foreign exchange earnings of the country. While world tea prices declined continuously in the decade ended 1967, Ceylon's tea prices have declined relatively more than those of its competitors. In order to ensure the industry's viability, the Government of Ceylon launched in 1959 the *Tea Rehabilitation Program* to increase the yields of areas under tea. This Program has already raised productivity on an average from 875 pounds of tea per acre in 1955-57 to 816 pounds in

1967; the Government is pursuing the Program and augmenting it as necessary. Deficiencies in factories that process tea have resulted in a reduction of foreign exchange earnings on the one hand, and a higher cost of production on the other. Against this background, the Government, as a complement to its Tea Rehabilitation Program, introduced a Tea Factory Development Scheme in 1966 aimed at rehabilitating and modernizing tea factories in order to raise their capacity for processing green leaf.

The investment program contemplated by the Government of Ceylon for the modernization of tea factories covers a period of five years, beginning in 1966, and is planned to be implemented in two phases. The total cost of the first phase was estimated at Rs. 29 million (US\$4.9 million), including a foreign exchange element equivalent to US\$2 million. The local cost will be met by resources raised by the factory owners and by loans from credit institutions refinanced by the Central Bank. The Bank's loan covers the foreign exchange needs for the first phase. The loan was declared effective on 18 September 1968 and is programmed for utilization within 30 months.

CHINA

Two assistance projects have been approved for the Republic of China. They are:

1. On 19 November 1968, the Bank approved the request of the Republic of China for technical assistance in the conduct of (a) a feasibility study of the proposed *North-South Freeway* in Taiwan and (b) a detailed project preparation for one section thereof. The amount involved is US\$500,000 representing the foreign exchange cost involved. Of this sum, US\$100,000 is being provided as a grant, and the balance of US\$400,000 as a loan to the Republic of China for a period of 10 years (including a grace period of 2 years). The agreement was signed on 30 November 1968 in Taipei.

The use of highway transport in Taiwan has risen markedly in recent years. During 1953-67, the volume of passenger traffic by highways increased at an annual average rate of 12 per cent and freight traffic by 18 per cent. During the same period, the growth of rail transport averaged annually 7 per cent for passengers and 5 per cent for freight. The further development of highways and railways in Taiwan is considered essential to cope with the rising tempo of growth in the fields of commerce, industry and agriculture.

The proposed four-lane Freeway is intended to facilitate fast-moving, long distance traffic through the western plain of Taiwan and it is envisaged in four sections. The first two sections in the north and the fourth section in the extreme south will serve three important cities—Taipei, Tainan and Kaohsiung; the third segment which will pass through more sparsely populated areas will account for the greatest length of the highway.

The feasibility study for the proposed Freeway will be undertaken by a team of engineering experts and economists who will assess the traffic potential of the entire project, the routing and type of highway needed, the anticipated economic and financial returns and the patterns of priorities and phasing. The engineering study will be in respect of the northern section between Erchung and Chungli.

2. A loan of US\$10.2 million to the Chinese Petroleum Corporation (CPC) was approved on 19 December 1968. The loan is intended to meet the major part of the foreign exchange requirements of a plant for the production of *Dimethyl Terephthalate (DMT)* and is guaranteed by the Republic of China. The relevant loan documents were signed at the Bank's headquarters on 27 December 1968.

The loan is for a term of 12 years, including a grace period of three years.

The CPC, which is a wholly-owned govern-

ment corporation, was established in 1946 for the purpose of supplying various petroleum products. The activities of CPC include the exploration and production, the refining and manufacturing, and the distribution and marketing of gas, petroleum products and petrochemicals. CPC has been entrusted by the Government with the main task of developing petrochemical complexes based on oil and natural gas. The development of the petrochemical industry is closely linked with overall industrial development and export promotion programs. The Government's policy stresses the production of feedstocks and intermediates which are used in the manufacture of synthetic fibers and other upgraded petrochemical products.

The project to which the loan has been applied comprises the construction and start-up of a plant for the manufacture of 26,400 metric tons per year of DMT—an intermediate for the production of polyester fiber. The installation, which will be sited at CPC's Kaohsiung refinery, will also have built-in provisions for future production (with minimum plant additions) of 12-13,000 metric tons per year of a second product known as Pure Terephthalic Acid (PTA). Both DMT and PTA are intermediate chemicals used in the production of polyethylene terephthalate, a polyester which can be spun into synthetic fibers known by their trade names of Dacron, Terylene and Tetoron. The project is expected to be completed by December 1970 and commercial operations are scheduled to start by January 1971.

It is estimated that, of the total project cost of US\$23 million, about US\$15.5 million represents the foreign exchange component. The Bank's financial contribution will be US\$10.2 million. The balance of the foreign exchange component and the local cost component will be made available by the Government.

CPC plans to organize a subsidiary to be responsible for the operation and management of its petrochemical business including the proposed DMT Project. The relationship between the borrower and its subsidiary will be established in a manner satisfactory to the Bank.

The project, economically viable in itself, is expected to aid in the promotion of certain avenues of regional co-operation decided upon by the Republics of China and Korea at the Fourth Sino-Korean Ministerial Level Economic Co-operation Conference held in July 1968. Under the proposed co-operative effort, both the Republic of China and the Republic of Korea will seek to develop economic and mutually complementary productive capacity in respect of petrochemical-based intermediates for synthetic fibres and to develop joint markets for these products between the two countries. This project and a caprolactam plant planned for Korea are the first projects involved.

INDONESIA

A Mission was sent to Indonesia in October 1967 to study and make recommendations on appropriate measures to improve food production and food availability during the current stabilization phase in that country. In January 1968, the Mission's report was made available to the Government of Indonesia. Subsequently the Government initiated action in several areas, including establishment of an appropriate ratio with respect to cost of rice production inputs and price of outputs, steps for stockpiling of rice, the progressive decontrol of rice mills, the provision of greater funds to extend credit to farmers and the adoption of a modified price policy for the urban distribution of rice.

In June 1968, acting on other recommendations in the Report, the Government of Indonesia requested the Bank for further technical assistance in the field of agricultural development, and for a technical mission to study the Indonesian rural credit system. On 30 July 1968, the Board of Directors ap-

proved the furnishing of the technical assistance requested, at an estimated cost of \$230,000.

The technical assistance program involved action by the Bank in three directions. First, the Bank has provided an agricultural economist as Advisor to the Department of Agriculture for a period of approximately eighteen months. He is advising the Department on economic policies pertaining to the production and distribution of foodstuffs, especially rice, and the inputs required for production of foodstuffs, and on the formulation and evaluation of project proposals in the Department, especially those for submission to other agencies including potential foreign contributors.

Second, a team of two experts—one crop expert familiar with soil fertility problems and with integrated high-yield rice production techniques and one water management expert with proficiency in irrigation and rice agronomy—is advising the Department of Agriculture on specific aspects of its program to raise food production. These experts are to render technical advice over a period of eighteen months specifically to the Director of Extension on the planning, preparation and operation of the rice production program.

Third, a team of five experts was provided to conduct a survey of the Indonesian rural credit system, including the role of co-operatives. This team completed its field work in December and its Report was forwarded to the Government of Indonesia in January 1969.

KOREA

Two projects have been approved for the Republic of Korea.

1. A loan of US \$6.8 million was made to the Republic of Korea for the purpose of financing the foreign exchange cost of the *Seoul-Inchon Expressway* was approved on 3 September 1968. The loan is for a term of 15 years with repayments commencing in February 1972. The loan documents were signed at the Bank's headquarters on 16 September 1968.

Due to rapid expansion of the national economy in recent years, a major bottleneck has developed in the transportation field in Korea. The present highway system in the Republic is underdeveloped, with only 1,934 kms. of paved road or 6 per cent of the total highway system. The Government increased the annual highway budget for the Second Five-Year Plan period (1966-1971) from the original Won 6 billion (US \$21.9 million) to Won 18 billion (US \$65.7 million). Highway passenger and freight traffic during the 1956-66 period increased by 19 per cent and 16 per cent respectively. It is expected that this combined traffic will increase at an annual rate of 15-20 per cent during the Second Five-Year Plan period.

The purpose of the Seoul-Inchon Expressway is to meet the needs of road transportation between the nation's capital and largest city, Seoul, and its primary port, Inchon. Seoul, Inchon and the area along the Expressway route contain some 16 per cent of the nation's population, and 36 per cent of the nation's industrial area, and further concentration in the region is expected to occur in the future. In view of the limited capacity of existing roads and the fact that the railway is already operating at full capacity, the Expressway is well located to meet a rapidly growing need for increased road transportation facilities. In addition, extra road transport demand will be created by the modernization and expansion of Inchon port facilities now in progress.

The loan from the Bank is intended to finance the foreign exchange component of the Expressway, which is designed as a 29.9 kilometer, four-lane, limited access highway, to be operated as a toll road. The total cost of the project is estimated to be \$18.1 million. The toll structure at present proposed is de-

signed to repay the construction, operation and maintenance costs over a seventeen-year period. The annual financial return on investment for a twenty-year period is estimated at 9 per cent.

The Expressway was partly opened for traffic on 21 December 1968 and is expected to be completed by June 1970.

2. A request by the Government of the Republic of Korea for technical assistance to the *Agriculture and Fishery Development Corporation (AFDC)* was approved on 6 February 1968. The AFDC was set up in November 1967 with a capital of Won 5 billion (US \$18.5 million) to be subscribed entirely by the Government over a period of time.

The technical assistance mission was to render advice and assistance regarding the institutional framework and organization of the AFDC and to assist in identifying and formulating projects which could be developed to appraisal standards in the fields of fish marketing with particular reference to refrigeration; livestock development including the development of marketing facilities; vegetable production and marketing; and other projects which might hold out prospects for immediate development in agriculture and fisheries.

Mission members were also asked to assist the AFDC in the preparation of appropriate proposals for consideration by the Bank for financing of specific projects in the field of agricultural and fisheries development.

The foreign exchange cost of this assistance as approved was estimated at US \$66,000. The local cost incurred is being borne by the Government of Korea.

As a result of this technical assistance effort, a proposal for a refrigeration project for fisheries has been developed and is under consideration by the Bank. Other projects which may prove suitable for consideration by the Bank or other external financing sources are in the course of preparation. The institutional aspect of this technical assistance effort and the work of individual specialists are expected to be completed by the end of March 1969.

LAOS

In April 1968 the Royal Government of Laos drew the attention of the Bank to the need for the preparation of a program for the *integrated development of agriculture in the Vientiane Plain* to enable the full utilization of the benefits expected from the construction of the Nam Ngum hydro-electric and irrigation project. Following discussions between the Bank and the Laotian authorities, a technical assistance program was approved on 3 September 1968 at a cost of approximately \$221,000.

The Nam Ngum project involves establishment of a dam on the Nam Ngum river which will create a reservoir of approximately 8.5 billion cubic meters in gross capacity and 3.8 billion in net storage. The reservoir will promote irrigation, flood control and navigation improvement and, further, will serve to generate power. A distribution network will supply energy from the power station to pumping stations and irrigation systems located throughout the Vientiane Plain. With international assistance, the construction of the Nam Ngum project is expected to be completed by 1972.

The technical assistance program approved by this Bank is intended to aid the Laotian authorities in planning the utilization of the benefits from the Nam Ngum project. Experts in various disciplines relevant to integrated agricultural development will study the conditions in the Vientiane Plain. The experts will submit appropriate recommendations and specific projects which will have to be elaborated, studied or implemented by stages in an integrated manner prior to 1972 as well as during a 10-year period thereafter. Field work commenced in January 1969 and the various reports are expected to be completed by June 1969.

MALAYSIA

A loan of \$7.2 million was made to the Government of Malaysia for financing the foreign exchange cost of the development of *Penang State Water Supply* was approved on 19 September 1968. The loan documents were signed at the Bank's headquarters on 23 September 1968. The borrower is the Federal Government of Malaysia and the State of Penang acts as executing agency. The loan is for a term of 20 years with repayments commencing after five years.

The present water supply system of the State of Penang serves about 75 per cent of its present population of 803,000 which includes the City of George Town, the second largest city in the country (population 370,000). In spite of recent improvements and additions to the system, the present reliable supply of approximately 30 million gallons per day (MGD) is falling short of demand. The population of Penang has been increasing at 4 per cent per annum in recent years; at the same time, industrial development is having an increasing impact on the demand situation. On the basis of a feasibility study commissioned by the State in 1966 and completed toward the end of 1967, a long-range development plan has been prepared which proposes to meet the anticipated increase in demand up to the year 2000 in three stages.

The works to be designed and constructed in the first stage include a barrage across the River Muda, intake works and pumping stations, supply canal, water treatment works and pumps, transmission mains including a separate line for connection to the island of Penang and a storage reservoir. Water will be transferred from Butterworth on the mainland to the island by means of submarine pipelines. The various structures will be built so as to facilitate future economical increases in capacity in the second and third stages. The works are expected to be in operation by 31 December 1971.

The construction, operation and maintenance of the water supply system in Penang is the responsibility of the State Public Works Department, except within the City of George Town which is responsible for its own water supply, and has its own City Water Department. Approximately two-thirds of the water supply produced by the State from its own system will be sold in bulk by the State to the City.

The total cost of the project is estimated at \$13.7 million of which approximately half will be in foreign exchange and will be financed by the Bank loan. The local currency costs will be financed by the Federal Government which has agreed to make loan funds available to the State on terms and conditions satisfactory to the Bank. The proceeds of the Bank's loan will be relet by Malaysia to the State. Disbursement of the loan is expected to take place over the period 1969-71.

NEPAL

Two projects of assistance to the Government of Nepal have been approved. They are:

1. A request by the Government of Nepal for technical assistance in preparing a project for the *development of its air transport system* was approved on 21 November 1968, involving a grant of US \$66,000.

This technical assistance, which was requested with a view to seeking a loan from the Bank in the future, covers the formulation of an investment program during 1969-71 for the improvement of airports, airfields, ground communication and navigation aids; for the technical examination of the best manner of replacement of aircraft; and for the related organization improvements that may be necessary. In view of the very specialized expertise required for this type of study, the Bank arranged with the International Civil Aviation Organization for its collaboration in carrying out the study,

which began in January 1969 and is to be finished in about five months.

Transport constitutes one of the weakest links in Nepal's primarily agricultural economy, with the difficult terrain setting a limit, both in terms of financial outlays and time involved, to the expansion of roads and railways. Although successive studies by international agencies and foreign consultants have underlined the crucial importance of air transport in Nepal's economy, the domestic airline has been seriously handicapped by the lack of well-equipped airports and modern terminal facilities, and by the problem of rising operational costs due to difficulty in replacing its fleet of old-model aircraft. It is expected that projects based on this study will yield substantial economic and social benefits to Nepal.

2. In response to a request from the Government of Nepal in June 1968, the Bank approved on 3 September 1968, a technical assistance program involving a grant of approximately US \$35,000 to study the organization and operation of the *Agricultural Development Bank of Nepal* and to advise the Government on measures necessary to strengthen the Bank in the discharge of its functions.

The Agricultural Development Bank, which formally came into existence in January 1968 through the reconstitution of the former Co-operative Bank, is the main source of agricultural credit and finance in Nepal. The future of agriculture in the country is therefore closely linked with the Bank's sound organization and healthy growth.

A mission consisting of four experts in various aspects relevant to agricultural development banking carried out the field work involved in this program over a period of two months beginning in October 1968. The experts studied the credit needs for the development of agriculture in Nepal, the role of the Agricultural Development Bank vis-a-vis other sources of credit in the country, the requirements of staff and organization of the Bank, the improvements necessary in accounting, training and branch management and the improvement of procedures for the appraisal and processing of loan applications and for supervision of implementation. The report of the mission was completed in December and sent to the Government of Nepal.

PAKISTAN

A loan equivalent to \$10 million to the *Industrial Development Bank of Pakistan* (IDBP) was approved on 12 December 1968. The loan is guaranteed by the Government of the Islamic Republic of Pakistan. Loan documents were signed at the Bank's headquarters on 16 December 1968.

The loan is for a maximum period of 15 years, including a grace period not exceeding three years from the date when the corresponding amounts are credited to the loan account. The loan is expected to be fully committed within a period of two years from its effective date and to be disbursed in three years.

The IDBP, an institution in which the Government of Pakistan has a 51 per cent shareholding, is one of the two principal industrial development banks in Pakistan. After a rapid growth during 1961/62-1965/66, the rate of increase in the IDBP's foreign currency loans progressively diminished in 1966/67 and 1967/68, due chiefly to inadequate loanable resources in foreign currency. In this context, the IDBP obtained a loan from the Bank to augment its foreign exchange resources to meet the medium and long-term credit requirements of small and medium-scale industries in the private sector for the coming two years.

The authorized capital of IDBP is \$12.6 million, of which \$8.4 million has been paid-in. IDBP's lending resources in rupees are derived from capital and reserves, advances from the Government, credit from the State Bank of Pakistan, term deposits received, and

funds available from repayments of outstanding loans. Foreign currency resources at IDBP's disposal come largely from the Government in the form of allocations from lines of external credit arranged by the Government.

PHILIPPINES

The Bank's assistance to the Philippines has taken two forms.

1. On 25 July 1968, the Bank approved a technical assistance grant of US\$225,000 for site selection and project formulation for a fisheries port in Manila Bay.

The decision to provide technical assistance derived from a review by the Bank of a request from the Government of the Philippines late in 1967 for a loan for the construction and equipment of a fisheries port at North Harbor in Manila Bay. Examination of the request indicated that, on economic grounds, there was *prima facie* justification for a fisheries port as an integral part of the development program drawn up by the Philippine Fisheries Commission. However, there were some uncertainties regarding the location of the fisheries port and the ancillary facilities. Accordingly, the Government of the Philippines agreed with the Bank that, before coming to a decision on the proposed investment, the technical alternatives available should be fully explored. The Bank, thereupon, was requested to make available technical assistance for the examination of the alternatives and for the formulation of a project based on the results of the examination. Consultants have been engaged for carrying out the technical examination and project formulation and the services of a supervising engineer have also been made available to help in carrying out the study. The work is expected to be completed by the end of November 1969. In light of the Government's review of the results of the study, proposals may come up for Bank financing for a fisheries port facility in Manila Bay.

2. A grant of \$105,000 to the Philippine Government for technical assistance to the National Irrigation Administration (NIA) in the field of *irrigation water management improvement* was approved in June 1968.

Out of 3.1 million hectares under rice in the Philippines, only 680,000 hectares (22 per cent) during the wet season and 280,000 hectares (9 per cent) during the dry season are irrigated. This reflects both the inadequacy of irrigation facilities and the need for improvements in water management. The Philippine authorities have recently strengthened their efforts to increase both service areas and efficiency in the existing irrigation systems in the country. The Government has provided financial resources sufficient to complete twenty-two unfinished projects and also to start eight new irrigation projects. The NIA also has been actively engaged in an extensive rehabilitation program to improve water conveyance in deteriorated systems. In addition, the NIA has undertaken a pilot project scheme to improve the existing water management and water use in eight representative irrigation systems located in different parts of the country. The results of the pilot project scheme will subsequently benefit other NIA irrigation systems. It was recognized that there would be a shortage, during the initial stage of the pilot project, of well-trained and experienced specialists in the field of water management to participate in the planning of the field operations and in the training of local technical personnel. The technical assistance program of the Bank is intended to meet this shortage.

The technical assistance activity is concentrated in two selected areas in the Angat River Irrigation System and the Pefaranda River Irrigation System, both in Central Luzon, and covers water management planning and operation, technical field studies and demonstrations as well as training of technical personnel. In the other six pilot areas, the

scope of assistance will be limited to general technical advice on planning, field operation and extension of the regular local programs.

The technical assistance mission, which began its work in August 1968, is composed of a senior irrigation engineer, a water management expert, an irrigation agronomist, an irrigation economist and a soil and land use expert. The duration of the project has been fixed at one year in order to cover both the wet and dry seasons.

THAILAND

A loan of \$5 million to the *Industrial Finance Corporation of Thailand* (IFCT) was approved on 23 January 1968. The loan is guaranteed by the Government of Thailand and is repayable in full on or before 31 December 1983. Loan documents were signed on 25 January 1968 at the Bank's headquarters.

The IFCT was established in 1959 under the Industrial Finance Corporation Act to assist industrial activities in Thailand mainly by extending medium and long-term loans, underwriting shares and securities and guaranteeing loans. In 1964, the IFCT secured loans from Kreditanstalt fuer Wiederaufbau of Germany amounting to DM 11 million and from the International Bank for Reconstruction and Development in an amount of \$2.5 million.

The rate of economic growth of Thailand has been impressive in recent years and the scope of industrial development is being enlarged. The share of industry—practically all private—in the GNP is expected to increase from 12.8 per cent to 21.4 per cent over the period 1966-1971. Apart from the Governmental Small Loans Board, the IFCT is the only institution in Thailand which provides medium and long-term loans for private industrial investment. The rising demand for medium and long-term loans is bound to cause expansion of the IFCT's operations.

The Bank's loan is designed to help the IFCT augment its foreign exchange resources and is available for utilization until 31 December 1972. As of 31 December 1968, seven subloans aggregating \$1,152,575 had been approved and \$700,608 had been disbursed by the Bank. The approved subloans include financing for ice factory and cold storage plants, a cardboard and a strawboard factory, a cotton mill and a kaolin processing plant.

VIETNAM

In response to a request from the Republic of Viet-Nam, the Bank agreed on 2 July 1968 to provide technical assistance in two parts to *development financing institutions* in Viet-Nam at an estimated cost of \$89,000.

The institutions primarily concerned are the Industrial Development Center (IDC), the Société Financière pour le Développement de l'Industrie au Viet-Nam (SOFIDIV), and the Refinancing Fund for Industrial Development (RFID) of the National Bank of Viet-Nam.

The first part of the program provides for a team which, taking into account the need to promote over a period of time industrial growth in the country, is to study and report on:

(a) the Government institutional framework and the procedures for handling investment projects, together with the possibilities for improvement of the investment climate in the context of the overall economic setting;

(b) the work of the IDC and the desirable steps to be taken to strengthen its role as a development financing institution;

(c) the work of the SOFIDIV and the steps which should be taken to strengthen its role as a financial institution;

(d) the work of the RFID, especially in terms of its relationship with the other institutions;

(e) the division of labor among the financial institutions; and

(f) the possibility of advising the Agricultural Development Bank on the establish-

ment of a system of rural banking similar to that established in the Philippines, if such a scheme proves advisable and feasible in Viet-Nam.

The team is to be composed of four members with expertise in development banking, industrial economics, agricultural and rural banking and legal and administrative matters and is scheduled to begin work early in January 1969.

The other part of the program covers the provision of three senior operational advisors, each to be assigned to one of the three above-mentioned industrial financing institutions, with the following functions in respect of the institution concerned.

(1) help the Management in its project appraisals, in particular in respect to the overall economic and financial evaluation of project proposals;

(2) advise and train the staff on project appraisal techniques, on security requirements, on procurement and disbursement procedures, on end-use supervision of the utilization of loans and investments and project implementation.

(3) advise and help the Management in taking necessary action in cases where the end-use supervision and follow-up of loans

and investments suggest that such action is called for; and

(4) advise the Management on policy matters and on any day-to-day work as appropriate.

These advisors will be assigned for a period of one year, subject to extension if necessary. They are expected to take up their assignments in April/May 1969.

The record of contributions to the development of these countries is indeed an impressive one and serves as affirmative evidence of the fact that the important program of technical assistance envisioned in the Bank's articles of agreement is off to a good start. This service has been furnished both on grant and loan basis, not only in the context of helping formulate projects, but also in that of furthering the studies of specific economic problems of national and regional concern.

A summary of the activities of the Asian Development Bank during its first 18 months of operation is reflected in the table below:

LOANS APPROVED DURING 1968

(Dollar amounts in millions)

Borrower	Project	Amount (US\$)	Date approved	Term ¹ (years)	Interest (percent)
Industrial Finance Corporation of Thailand	Financing industrial enterprises	\$5.0	Jan. 23	12	(0)
Central Bank of Ceylon	Modernization of tea factories	2.0	July 2	15	6½
Republic of Korea	Seoul-Inchon Expressway	6.8	Sept. 3	15	6½
Malaysia	Penang water supply	7.2	Sept. 19	20	6½
Republic of China	Feasibility study of North-South Freeway ²	.4	Nov. 19	10	6½
Industrial Development Bank of Pakistan	Financing small and medium-scale industries in private sector	10.0	Dec. 12	15	(0)
Chinese Petroleum Corporation	Dimethyl terephthalate (DMT) manufacture	10.2	Dec. 19	12	6½

¹ Inclusive of grace period.

² Carries interest at the rate prevalent at the time of crediting the loan account.

³ In addition, a sum of US\$100,000 was provided as a grant (see Republic of China next page).

TECHNICAL ASSISTANCE APPROVED DURING 1968

Country	Project	Amount (US\$)	Date approved
Project preparation:			
Republic of China	Feasibility study of North-South Freeway	\$100,000	Nov. 19
Nepal	Air transport system development	66,000	Nov. 21
Philippines	Fisheries port construction in Manila Bay	225,000	July 25
Advisory and operational:			
Indonesia	Advisers to Ministry of Agriculture	170,000	July 30
	Rural credit survey	60,000	Do.
Republic of Korea	Agriculture & Fishery Development Corporation	66,000	Feb. 6
Laos	Integrated agricultural development program for Vientiane Plain	221,000	Oct. 15
Nepal	Advisers to Agricultural Development Bank of Nepal	35,000	Sept. 3
Philippines	Water management	105,000	June 20
Republic of Viet-Nam	Development financing institutions:		
	(a) Technical assistance mission	19,000	July 2
	(b) Assignment of advisers	70,000	Do.

¹ Includes project preparation (see p. 14).

OUR ROLE IN AND RESPONSIBILITY TO THE ADB

It was through our initiative, in large measure, that the Asian Development Bank's concept, first articulated in 1963, became a reality in 1966. The able efforts of Eugene Black, former President of the World Bank, played an immeasurable part in the formation of this organization—unique in the history of Asia—in its concern for the collective solution of regional problems. It was through Ambassador Black's able efforts and those of our present representative, Bernard Zagorian, that we were successful in initiating expansion of the soft development loan program. Speaking through these two able representatives,

our country took a very affirmative posture in urging the need for such a program. Because of our initiatives in this field, it is most embarrassing, in my judgment, that we now find ourselves in the posture as a laggard in implementing our own recommendations. Our embarrassment is compounded by the fact that other nations have already made commitments to the "soft loan window." We are in the position of having been fast with the rhetoric but very slow with the delivery. It raises a very serious question, I think my colleagues will agree, as to the sincerity of our country in meeting its commitments.

Nowhere is this question more seriously

raised than in the case of Japan. The Japanese and ourselves were prime instigators in the creation in this Bank. We pledged an equal sum to the Bank's initial capitalization. I think it is fair to say that the Japanese and ourselves were the leaders in encouraging the expansion of the "soft loan" concept and in pledging support to it. As many of my colleagues may know, it has been over a year since the Japanese made their initial pledge of \$100 million to this special fund. Their pledge was not unrelated to their belief that our country would make good on our agreement to pledge \$200 million to the capital structure of this special loan fund. The Japanese have, since their initial pledge, put up \$40 million of the \$100 million or 2 years of their 5-year commitment. As I indicated earlier, our country has not as yet made the first step toward making good on its commitment to participate fully in an effort to bring about the type of participation required to make the "soft loan" fund program viable. I do not believe that I overstate the situation when I say the Japanese are more than a bit concerned by our niggardliness in making good on the moral commitment which our Government made to the special loan fund. The President has now been in office over 3 months. His representatives have traveled to Australia for the purpose of participating in the Asian Development Bank meetings. To date, no definitive commitment has been made by the Nixon administration.

STEREOTYPE THINKING

I would certainly hope that the failure to move on this vital matter is not reflective of a view that all forms of foreign assistance are suspect. Such shallow stereotype thinking has no place in such serious deliberations. No doubt it is very attractive and, of course, quite easy to use the criticisms properly leveled at a unilateral foreign aid program founded principally on grants to indict a multilateral loan program, such as that embodied in the Asian Development Bank. While this may be done quite easily, its ease is not at all commensurate with its accuracy. Quite the contrary, such a blanket indictment of all participation and efforts to assist other nations in nation-building, dis-serves both our national interest and the collective intelligence of this body. My travels and experiences in the Pacific Basin, which I believe my colleagues will acknowledge are not inconsiderable, cause me to conclude that the form of multilateral aid represented by the Asian Development Bank makes a great deal of sense in this region. I think above and beyond our experience in Asia it is safe to say that in general, these forms of loans and technical assistance which enable other nations to help themselves have gained not only great success in furnishing a large return on the dollar invested, but also a promise to continue to do so.

In this era of concern for economy in government, it would seem to me that there is no better form to be adopted for the solution of economic development problems than the loan concept. Where-as it is, because a multilateral loan program makes it possible to increase the leverage which the American dollars can

secure, they buy more economic assistance. For example, a foreign aid program requires a dollar of American expenditure for every dollar of activity which takes place in the recipient country; in the case of American participation in the Asian Development Bank, \$1 of American participation can lead to an expenditure of over \$3 in the recipient country. In addition to giving us this leverage we, at the same time, secure the advantage of having our participation in the form of a loan rather than in the form of a grant. This, of course, means that there is a probability that the funds loaned will eventually be repaid with interest. These funds can then be used once more for the purpose of financing additional development activities in the recipient countries.

INACTION: A GRAVE MATTER

I find our present inaction on the ADB special fund distressing. Not on the basis of partisan politics, but rather on the basis of my grave concern for the corrosive effect that this delay is having upon our relationships with Japan and the other countries who have already provided funds based on their expectation of our participation in the special loan fund. I am also fearful that this reluctance on our part to participate actively in this important undertaking may be interpreted as a reflection of an increasing reticence on the part of Americans to help the countries of Southeast Asia in their efforts to overcome the continual menace of poverty, the constant threat of Communist aggression, the ever-present threat to the health and well-being of the society resulting from an inadequate capital structure. It is my conviction that we must make clear our commitment to the removal of the barriers to economic development which retard efforts to realize a satisfactory rate of economic growth. Because progress toward prosperity is necessary to insure the continued existence in this region of nations in which informed people collectively and democratically decide the destiny of themselves and their nations.

COWLES SUBSIDIARY SOLICITS ROONEY AIDE WITH "FREE MAGAZINES" SALES PITCH

HON. FRED B. ROONEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ROONEY of Pennsylvania. Mr. Speaker, for many weeks I have been discussing the widespread use of deceptive and fraudulent sales practices within the magazine subscription sales industry.

In speaking of the "industry," of course, all companies engaged in magazine subscription sales are encompassed. There is, I believe, a degree of abuse of fair sales practices which can be laid at the doorstep of each of the companies engaged in magazine subscription sales. But certainly some of the sales organizations have done a far more effective job to rid their own sales organizations

of such abuses than have other competitor sales organizations.

Very soon after I made my first statement on this subject back in February, I was contacted by representatives of Cowles Communications, Inc., publishers of Look magazine and the parent organization of five major subscription sales organizations operating hundreds of franchised dealerships across the country. A short time later Mr. Joseph Kelly, an attorney for Cowles Communications, visited my office in the company of another attorney to discuss unscrupulous sales practices.

Mr. Kelly explained at some length the sincere efforts he said the Cowles organizations were making to stamp out deceptive and fraudulent practices. He said that many of the unscrupulous practices I had been attacking were not to be tolerated by Cowles of its subsidiary sales organizations. In response to his claims, copies of actual Cowles subsidiary sales documents were produced to demonstrate for Mr. Kelly that some of his good intentions had not filtered down through the sales organizations.

Since February, I have amassed a staggering number of complaints and reports pertaining to unscrupulous magazine sales practices from virtually every part of the United States. I have surveyed the attorneys general of every State in the Nation and have received responses from most. Never before in my experience as a legislator have I ever filled an entire drawer on a single subject in so short a period of time.

It is somewhat revealing, then, I believe to find that approximately 80 percent of all of the complaints and reports of deceptive and fraudulent sales practices are directed at six companies engaged in magazine subscription sales. These six companies are the five Cowles subsidiaries, which Mr. Kelly had insisted were trying to stamp out sales abuses, and an organization known as International Magazine Service of the Mid-Atlantic which has an affiliation with the Hearst organization.

The Cowles sales organizations are known as Home Reader Service, Civic Reading Club, Educational Book Club, Home Reference Library, and Mutual Readers League.

The gimmicks and schemes they devise to sell magazine subscriptions are almost endless. Despite denials to the contrary, their sales technique generally involves an oral offer of magazines for "free," with no cost involved except postage, or wrapping, or handling. Such offers are blatantly fraudulent. The postage or wrapping or handling costs add up to staggering sums which clearly cover the full subscription costs for the magazines supposedly being offered the consumer at no cost.

Nevertheless, the deception goes on as a member of my staff can attest. Within the past few weeks, a member of my staff was solicited by Home Reader Service in the Washington area and offered "free" 5-year subscriptions to seven magazines, including Look. Three different members of the sales organization joined in assuring this wary consumer that the magazines, indeed, were "free." The free offer, they explained, was the result of Look's

campaign to boost circulation in the metropolitan area.

The sales approach, in virtually every respect except one, clearly violated the code of fair practices administered by Central Registry of Magazine Subscription Solicitors with endorsement of the Federal Trade Commission. The Cowles organization supposedly supports and subscribes to this code, and in fact, was among the organizations which approached the FTC seeking the Commission's endorsement of a magazine subscription sales industry self-regulatory code. Obviously, the Cowles subsidiaries which sell magazine subscriptions are associated with the code in every way possible except that they do not seem to pay any attention to their own obligations to uphold it and abide by it.

Central Registry's own record of enforcement of the code during its first year of operation—1968—is a further example of the attitude of the Cowles subsidiaries toward compliance. Central Registry, throughout all of 1968, levied 96 fines totaling \$39,000. Of these fines, 72 were levied upon the various Cowles subsidiaries in the total amount of \$28,450.

Mr. Speaker, organizations which show no higher regard for the American consumer than do the five Cowles magazine subscription sales companies deserve to have the book thrown at them. I have passed along to each of the individual members of the Federal Trade Commission and to the administrator of Central Registry an account of the solicitation of a member of my staff by Home Reader Service and I certainly urge that both the FTC and Central Registry do throw the book at their entire operation. I personally am convinced that it is the officers of the parent sales corporation who are responsible for these abuses and that they not only tolerate but encourage this type of sales practice by personnel in the field.

To the consumers across the country who are accosted by telephone solicitors or door-to-door solicitors of the five Cowles subsidiaries, I can only say, "Beware."

At this point, I would like to insert in the RECORD a description of the Home Reader Service sales approach as recorded by a member of my staff, as well as several letters of complaint describing other sales tactics being utilized by some of the Cowles subsidiaries. Of particular interest, I believe, is the "green stamp" offer of Mutual Readers League.

The material follows:

ROONEY AIDE DESCRIBES HOME READER SERVICE SALES PITCH

(By Richard D. Henderson, legislative assistant)

On Wednesday evening, April 16, 1968, I received a call from the Look organization in New York City telling me that I had been selected to receive three magazines free for the next 60 issues; I asked whether there was any obligation at all and the answer was "no"; I asked "not even mailing charges?"; and the answer was "no".

With that I said that I may as well select my three magazines—which were *Argosy*, *Esquire*, and *Sport*. Then the gal said that I automatically got *Look* with the three which I had selected; then she muttered something about .59¢ per week for wrapping charges; when I said that I thought that

this was all for free, she said that she had better get her supervisor on the line; so on came the supervisor.

She said that she just got on to verify what I had accepted because she knew that I would still be so stunned by this great deal. She went on to explain that all I had to pay was .59¢ per week wrapping charges, or \$2.36 per mo. At this point I asked about method of payment and her only answer was that they had several methods of payment. The total would of course be .59¢ per week or \$2.36 per mo. to cover expenses for the next five years as she indicated.

Then she said that of course you know that you will receive *Venture* along with the three magazines which I had selected along with *Look* thrown in.

I can't recall what the reply was to whether I would be getting *Venture* for free (which I guess sells on the magazine stands for \$3.00 per mo.). And, unfortunately, I can't remember what her answer was when I said that *Look* is bi-monthly, and so, would I get *Look* actually for less than five years.

Jumping the gun a bit, I asked when the route man would be coming out to verify the offer, and made arrangements for the following evening (Thurs.).

One thing both gals emphasized was that the whole point of this was to increase the circulation of these magazines in my area—(several other tenants in my building got the same type of calls from "New York")—that's why I was getting so much at the bargain rate.

The next evening the field man arrived to obtain my signature on the verification slip. He told me that I would also be getting the Washingtonian and Hi Fidelity too—for nothing. He did specify that I had to accept the payment plan of \$5.90 now and \$5.90 for the next 25 months—rather than \$2.36 a mo. for the full five years. He explained nothing else—about cancellation etc. just had me sign; he said he was an employee of the Dept. of Labor—taught psychology in the evenings (somewhere) and was trying to make a little extra money working for one of his students.

The following day I phoned Home Reader Service in Arlington, the sales company identified on the contract form, to ask to cancel the subscriptions. The cancellation was accepted since it was within the 72-hour cancellation period subscription sales companies are supposed to observe.

I questioned the payment plan of \$5.90 per month and asked why I couldn't pay \$2.36 per month for the full period of five years. They explained that was the agreement they had with *Look* (Cowles Publications). She tried to dissuade my cancellation by pointing out that a single copy of *Look* on the newsstand costs 50 cents and that at my price of 59 cents I would have nine cents left over and no other magazines. But I was to pay 59 cents each week and *Look* is published twice a month. And I was to pay at the rate of ten weeks a month, or 10 times 59 cents, every month for 25 months. My suggestions that I pay 59 cents each week or \$2.36 each month were rejected.

NANTICOKE, PA.,
March 17, 1969.

EDITOR,
Easton Express,
Easton, Pa.

DEAR SIR: I read your article appearing in the Times-Leader-the Evening News, Wilkes Barre, Pennsylvania, dated March 12th, 1969.

This article was warning the public about telephone calls promising free prizes, like magazine subscriptions.

My wife has been taken in by such a deal as described in your recent article.

My wife received a telephone call promising her two-hundred (200) S & H green stamps. She received the stamps and a salesman, representing the Mutual Readers League, Des Moines, Iowa, came to our home. He asked her if she received the stamps.

When she told him she had received the stamps, he asked her to sign a paper in recognition of their receipt. This recognition of receipt was actually a contract for magazines. He then asked her where I work, how long and if she knew anyone else who reads magazines. Now my wife's sister-in-law and her mother receive magazines that we are billed for at (\$3.00) three dollars a month. This is for (25) twenty five months.

He told my wife that it would only cost her (\$3.9) thirty nine cents for postage. The mailman has been informed to return the magazines.

Today I received a call from the Mutual Readers League, Des Moines, Iowa, telling me I am (2) two months in arrears for a total of (\$7.00) seven dollars. That is (\$6.00) six dollars for the magazines and (\$1.00) one dollar fine.

I wrote and told the company I would not honor this contract. They insist they have a valid contract even after I expressed and explained how it was acquired.

Is there any way I can get out of this mess? I still will not honor this contract. Can they have this money taken out of my pay? Do you consider this to be a legal, binding contract under the circumstances explained in this letter? I can't afford an attorney for his advice.

I thank you for your kindest consideration in this matter.

Sincerely,

CHESTER ZDZARSKI.

CALIFORNIA RURAL LEGAL ASSISTANCE,
San Francisco, Calif., March 24, 1969.
Re nationwide magazine subscription frauds.
Hon. FRED B. ROONEY,
The House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN ROONEY: Our organization, which represents migrant workers and farm workers, throughout California, has been inundated with magazine subscription fraud problems. Primarily, the frauds are assisted by, if not encouraged by, Cowles Communications, Inc. (*Look Magazine*).

Look Magazine operates through various franchises in California such as "Mutual Readers League of Northern California," "Home Readers League," etc.

Our Salinas Office, for example, has been involved in a substantial amount of litigation with *Look* and/or its franchisers.

We filed in Hollister Justice Court, San Benito, California, on behalf of *Nacho Gonzalez v. Look Magazine*. *Nacho Gonzalez* had never previously purchased any magazines, had eight children, and had a third grade education. *Look Magazine* settled the case by rescission, restitution, and \$100.00 in what might be termed punitive damages.

In other case, filed in Superior Court (Salinas) *Look Magazine*, through its franchiser, sold an elderly, uneducated and ill woman \$125.00 worth of magazines. Subsequent to the complaint being filed, the franchiser settled for rescission, restitution, and \$150.00 in punitive damages.

Presently, in the case of *Miramontez v. Mutual Readers League, et al*, No. 25795 in the Municipal Court for the Salinas Judicial District, we are seeking \$1,051.00 damages. Our client, a mother of three, was sold a \$125.00, five-year magazine subscription. This included subscriptions to magazines such as *Gourmet*. She cannot read English and so informed the door-to-door salesman. In addition, she barely completed the first grade in Mexico. She had previously never purchased any magazines. She was informed that if she signed a piece of paper (the contract) she would receive a gift. She did not even receive the gift.

I believe it would be fair to say that legal aid offices throughout the state of California have had similar experiences. If our organization can be of any assistance, please feel free to contact us.

Sincerely,

ROBERT L. GNAZZA.

CIVIL WAR AHEAD?

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. BURKE of Florida. Mr. Speaker, Is it not becoming apparent that there is a movement in this country intended to fuse together the militants in America regardless of color or creed for the sole purpose of pushing America into a civil war?

This movement which some of the more outspoken radicals call the third world movement has as its specific aim the destruction of the capitalistic system and is aimed at the freedom-loving nations with the direct intent of converting them to socialism, or communism under the guise of liberalism.

Even the militant reactionaries that have been plaguing our campuses and pushing dissenters in other areas can, as far as I can determine, be divided into three distinct groups, namely: the Black Militants; the White Militants usually under the heading "S.D.S.," the so-called Students for a Democratic Society, a liberal, radical group; and more recently the supporters of Al Fatah, the anti-Semitic terrorist organization dedicated to the destruction of Israel and all pro-Western regimes.

Although these three groups have different leaders, they are linked together in one goal and that is to change our basic institutions and ultimately destroy America. How? By dissention and terrorism from within.

The black militant groups more and more are following the line of hate, preaching antisemitic lines and calling for destruction, among other things, of Israel as a nation. We also see these groups rapidly linking up with some Arab students in our country who are dedicated to their homelands and are following the terrorism of Al Fatah.

What is the ultimate goal of this so-called third world movement? President S. I. Hayakawa of the beleaguered San Francisco State College, who testified recently before a House Subcommittee on Education, said:

Some militants in our country are genuine in their desire to improve the educational system, but there are others, especially those in the Black Student Union, who are more concerned with personal power than with education. The BSU leaders keep saying they want absolute control with no accountability to anyone except their own members, constituents ruled by force, intimidation, and gangster tactics.

He further states:

The White militants are now as explicit as the Blacks. Their story is now familiar on every major campus. They believe our society is so corrupt that there is no hope except to destroy the entire structure and rebuild from the ground up.

It is interesting to note, however, that these groups in most instances back most causes dealing with communism.

They support the Arab cause in the Middle East which also has strong Communist backing; they support Ho Chi Minh in Southeast Asia, who is a Communist puppet; they pay homage to the slain Cuban Communist revolutionary

Che Gueverra; and they are constantly calling for the destruction of our Government charging us with being capitalist imperialists while at the same time they are promoting the Communist ideologies of Marx and Mao.

It is time for all of us in America to wake up. Our Nation today is facing the most serious planned internal subversion that we have been confronted with and it will take strength and courage by each of us to recognize the dosage of subversive poison that is being fed to us bit by bit.

Our Government officials cannot possibly curb this movement alone. We need backing and support of everyone, of all who know that our country and our way of life has given more people, more of the good things in life and yet has allowed us to live with dignity as free men, than has any other system of government in the world's history.

Last year Congress passed a bill which would limit Federal funds to students convicted of rioting on campuses, but it is apparent that this bill alone just will not do the job. It is necessary now that we must reach our college and university administrators.

There is now evidence indicating that some administrators have failed or refused to discipline militant students and teachers involved in radical activities on the campuses, and have instead meekly capitulated to outrageous demands.

Recently, I introduced a bill in the House which I hope will help to rectify the situation to some extent. This bill, if passed, will withhold Federal funds from any university whose administration fails or refuses to suspend students engaged in campus rioting.

I have also called on the Justice Department to investigate the tie between foreign students linked to Al Fatah and have demanded that the visas for any so-called student who may be involved in this revolutionary guerrilla movement in our country be immediately revoked.

But neither the President nor the Congress alone can end the move toward anarchy in this country.

Remember, our freedom was not given to us but is something we inherited from our forefathers who fought and died to make us a free people. Today's anarchists are not fighting to liberate the American people, but are instead dedicated to enslave us under an alien form of government to keep the promise made by Nikita Khrushchev that our "grandchildren will live under communism."

DR. CHARLES BRADFORD HAILS
FALLEN LEADER, PRESIDENT
EISENHOWER

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. PHILBIN. Mr. Speaker, under unanimous consent to revise and extend my remarks in the RECORD, I include therein an excellent tribute to our great, beloved, and late friend, President Eisen-

hower, written by my dear friend, Dr. Charles H. Bradford, outstanding doctor, medical and civic leader of Boston.

This lovely, inspiring poem is composed with rare sensitivity and charm, and it impressively portrays the rugged character, great ability, extraordinary spirit of dedication and marvelous achievement for the Nation and the American people of our illustrious world and national leader and friend, Ike, as we knew him here on the Hill.

Certainly, no one is more qualified by reason of background, patriotism, learning and talent to pay this tribute, than this great son of Massachusetts, Dr. Bradford, because he and his family spring from the early sources and very foundations of American freedom, democracy, and the spiritual values and beliefs upon which they rest.

He and his brother, Robert, another distinguished friend and outstanding former Governor of the Commonwealth, and family, trace their lineage to a long line of ancestors, including the first Governor, whose wise leadership and magnificent contributions helped so greatly toward the origin, development and glory, which peculiarly belong to the Bay State.

Many tributes have been and will be paid to our fallen leader, President Eisenhower, but most assuredly, none could be more sincere, more feelingly expressed, or more appropriate than this stirring poem by Dr. Bradford, which reaches such a high pitch of eloquence and emotional truth.

This timely, well-written verse will continue to inspire generations of future Americans and give them full understanding of the rare components of character, ability, training, and unselfish dedication, which made it possible for President Eisenhower to take his place as one of the truly great leaders of the Nation and the world.

We may all prayerfully join Dr. Bradford in his beautiful poem, and reflect upon his closing lines:

But our affection follows on his name,
And never fading laurels crown his fame.

I am sure that our beloved general would have liked this great poem and these words, and his gracious wife and family, and all of us who knew and loved him for the great American he was, will always cherish them. The poem follows:

TRIBUTE TO GENERAL EISENHOWER

At our great General, let us look again
As once we knew him in his wartime days
When battles waited on his word, and when
The thunder of great guns echoed his praise.
Soldiers from every land and every race
Served under him in Freedom's vast crusade,
When the world's armies struggled to dis-

place
The Empire of Evil, Hitler made.
From every race, indeed, and every land,
These soldiers gathered to sustain the Right;
While over their array, he held command,
And marshalled them in their heroic fight.
To Africa and Italy, they went
By Eisenhower's conquering orders, sent.

At Fortress Europe, next he aimed a blow
To free the peoples who were there enchained
Under a reign of slavery and woe
That Nazi terror-tactics had ordained.
Wickedness, unparalleled before,
Such as no other nation ever knew,
Kept millions, who were victims of the war,

In death camps, where the stench of horror
grew.

Murder and frightfulness and torture ruled,
Like beasts of prey that through the jungle
ranged;

And in a cult of vicious hate were schooled
The leaders, from all decency estranged.
'Twas this that Eisenhower sought to free
From the blackout of crime and misery.

With armies centered in the British Isles,
He carefully prepared plans to attack
The foe's defences, where for miles on miles,
Huge gun emplacements lay, to hurl him
back.

His word unleashed the storm of blood and
war

That like a tempest struck the coast of
France.

There, under sweeping shellfire, his troops
bore

Their banners in a conquering advance.
With fearful fighting, then, they battled on
And step by step, they breached the German

wall,
And victory after victory they won
Until the rule of Hell was forced to fall.

Tragic, the cost in wounds, and blood, and
death;
But free men, now, once more, might draw
free breath.

As Peace returned, it showed the greatest
need

Was for strong men to bear the nation's
cares;

Then Eisenhower once more took the lead
In civil life and government affairs.

For eight long years, as President, he served,
Meeting each strenuous crisis as it rose.

He never from the path of duty swerved,
Nor failed in tasks his office might impose.

Around the world, his influence was felt,
Establishing a sound, straightforward

course;

While in his policies, he ever dwelt
On principles of reason, not of force.

By a wise use of his authority,
He led the nation with firm dignity.

His character, above all else, we prize
For throughout life, he made his life worth

while:
Gazing on all mankind with friendly eyes,
And greeting every new task with a smile.

Wholesome and hearty was his attitude,
With skill in making men cooperate;

His judgment keen, intelligent, and shrewd,
And in his manner, friendly, yet sedate.

Despite his great fame, he was humble still,
And to life's simple duties, remained true;

Genial at heart, and with sincere goodwill,
His soul was filled with honor, through and

through.

As he departs, we offer this great man
Our tribute, as a true American.

L' Envoie

Gone are the mighty armies that he led;
Faded, the grandeur of his lofty place;

And down the highways of the Past have fled
The great events he was called on to face.

But our affection follows on his name,
And never fading laurels crown his fame.

THE JUDGE REACHES A VERDICT
AFTER HEARING THE EVIDENCE

HON. DAVID N. HENDERSON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HENDERSON. Mr. Speaker, my colleague from Greensboro, N.C., the Honorable L. RICHARDSON PREYER, a member of the Committee on Interstate and Foreign Commerce, is a freshman Member of this body. Nevertheless his

background and qualifications are such that his opinions are worthy of respect and unbiased consideration.

An able and distinguished attorney, he served for a number of years as a Federal district judge. His ability to weigh and consider evidence and arrive at a reasonable and impartial decision based on the weight of the evidence was widely known, both among the lawyers in North Carolina and the general public.

"RICH" PREYER has probably sat through more of the hearings of the Commerce Committee on legislation to extend the tobacco labeling act than any other Member of that body and has heard the testimony, both pro and con. His conclusions, based upon his hearings of this testimony, are worthy of special and unusual consideration and I consequently, for the benefit of my colleagues here offer for the RECORD a copy of a news release he recently issued:

THE JUDGE REACHES A VERDICT AFTER HEARING THE EVIDENCE

Congressman Richardson Preyer today called for the re-opening of the Surgeon General's study of cigarette smoking and health declaring that recent evidence raised serious questions about the validity of conclusions in the 1964 Report.

"Experimental research conducted since the Surgeon General's Report of 1964 and brought out in the recent tobacco hearings before the Committee on Interstate and Foreign Commerce, raises the most serious doubts about the conclusions reached in that report," the North Carolina Representative stated. He asked, in a letter to Secretary of HEW Robert Finch, that Finch include a re-evaluation of evidence on cigarette smoking and health in a research program the cabinet member recently announced. "Evidence reveals it is at least as likely that constitutional factors other than cigarette smoking are the cause of lung cancer, heart disease, and emphysema. Not a single witness for the anti-smoking forces testified to any research which he himself had done, while 18 witnesses testified that their own research cast serious doubts on the theory that cigarettes cause disease," Preyer declared.

He commended HEW Secretary Finch for his announcement of a cooperative research program on the problems of tobacco and health. "Mr. Finch has recognized that there are gaps in our knowledge about tobacco and health and has urged that these be attacked through cooperative research," he said. Preyer suggested that this should lead to a new Surgeon General's Report, one recognizing the fact that our knowledge is incomplete, and one based on hearing evidence from all sides, not on an ex parte "review of the literature" which ignores new experimental evidence.

Preyer decried the "bandwagon effect" of repeating over and over a number of false and misleading statements which give the impression that the case against tobacco has been strengthened since the Surgeon General's 1964 Report. "Actually, the experimental and statistical evidence has seriously undermined the conclusions of the 1964 report," he said. Among the "myths" that anti-smoking witnesses repeated at the hearings—even though scientific evidence has destroyed their validity—were these:

(1) Myth: "Every smoker is damaged by his smoking."

Fact: Most smokers suffer no impairment or shortening of life. For example, the disease most closely connected with smoking is lung cancer. The lung cancer incidence among smokers is 5/100 of 1%.

(2) Myth: "There is an epidemic of lung cancer."

Fact: There has been a tremendous reduction in overall respiratory disease since 1900, when respiratory death rates were over five times what they are today. It is particularly misleading to say lung cancer is an "epidemic" in view of the declining rate of increase (indicating that the incidence will level off in the next few years).

(3) Myth: "Cigarette smoking causes 300,000 premature deaths a year."

(This was the testimony of the Chairman of the Federal Communications Commission. The Chairman of the Federal Trade Commission testified to "500,000 deaths" and also claimed that smokers miss "33 1/3 % more working days than non-smokers.")

Fact: These claims have no basis in fact. (The two Chairmen based their statements on findings of the Surgeon General's Advisory Committee but this Committee did not attempt to estimate so-called excess deaths.)

(4) Myth: "Cigarette smoking turns the lungs black," or "Doctors can tell cigarette smoker's lung from a non-smoker's lung."

Fact: It is impossible to tell a smoker's lung from a non-smoker's lung upon examination either grossly or microscopically.

(5) Myth: "Heavy smoking will shorten your life by 8 years."

Fact: This statement is based on a statistical study by Dr. Cuyler Hammond who has refused to disclose the raw data in his studies so as to permit independent evaluation. To the contrary, recent "twin studies"—where one smokes and the other does not—indicates there is no difference in their death rate.

(6) Myth: "Giving up smoking makes one healthier."

Fact: According to the Public Health Service "Morbidity" report former smokers have more ill health than present smokers or those who never smoked! This may only show how misleading statistical information can be.

(7) Myth: "There are 77 million excess work days lost each year by smokers."

Fact: The study on which this claim has been based has recently been found to contain such unbelievably large errors that it is worthless. These new analyses have been made available to the Public Health Service with no result.

In addition to replacing "myths" by facts, Preyer said there are many areas of scientific disagreement which additional research can help clarify. For example, testimony relating to nicotine in the recent tobacco hearings was that: (1) nicotine constricts blood vessels; (2) nicotine expands blood vessels; (3) nicotine has no effect on blood vessels. This is the kind of question which Secretary Finch's Committee can help resolve.

UMPIRES SHOULD BE REINSTATED

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. UDALL. Mr. Speaker, two American League umpires were fired last year by American League President Joe Cronin on grounds of incompetency.

This came very shortly after the two men—Al Salerno and Bill Valentine—had contacted their fellow umpires about setting up an organization of American League umpires, similar to the organization that had been in existence for some time among National League umpires.

I want to add my voice to those protesting this rather high-handed action by Mr. Cronin that is a slur on all orga-

nized baseball. The organization that these two men sought to form has since been formed, and the substandard pay American League umpires had gotten has been raised on about a par with the National League. I think that organized baseball, and especially the American League, should at least remove some of the blight on its record by reinstating these two men as umpires.

Without objection, I will include the following article that sums up the situation:

ERROR CALLED ON CRONIN: RHUBARB POPS UP IN CONGRESS OVER THUMBED-OUT UMPIRES

Three Members of Congress from New York are still battling for American Baseball League umpires Al Salerno and Bill Valentine, who were fired last September for advocating an umpire's union.

Senators Jacob Javits and Charles E. Goodell (R-N.Y.) and Rep. Alexander Pirnie (R-N.Y.) are pressing for resolution of their cases now.

The umpires were fired after they sent letters to their fellow American League umpires suggesting the formation of an American Baseball League Umpires Association similar to the National Baseball League Umpires Association.

American League Pres. Joe Cronin said that both umpires were dismissed on grounds of incompetency.

"If Salerno and Valentine are incompetent," Pirnie asked on the floor of the House recently, "what are the grounds for judging their incompetence?"

He wanted to know why they were not dismissed earlier—one had six years of seniority and the other seven—instead of three days after they proposed the union.

Pirnie said that baseball managers and writers have answered the question, including:

Al Dark, veteran American League manager: "I don't know the whole deal, but I'll tell you these guys were two pretty good umpires. I'll take both of them on the field every game and feel I'm going to get a good, honest, hustling effort—and that's all any manager can expect."

Dick Williams, manager Boston Red Sox: "I had several jams with them, but I consider both of them good umpires and I'd like to see them have their jobs back."

Shirley Povich, Washington Post: "When asked what qualifications his two unfrocked umpires lacked, Cronin said they were 'just inefficient, that's all.' To Cronin's credit, this was not a snap judgment. In Salerno's case, it took the AL president seven years to arrive at it; in Valentine's case, six years."

Red Smith, syndicated columnist: "If they were never good enough, as Cronin says, it took him a hell of a while to find out. Joe has to be one of the least perceptive or most indulgent employers this side of Utopia."

Since the two umpires were fired, American League umpires have joined the National League umpires group which was organized in 1963.

Offers have been made to Cronin to reinstate Salerno and Valentine on a provisional basis but he has rejected them. Then, through an intermediary, Cronin contacted Salerno and offered him a post as scout for umpires in the minor leagues, Salerno, wishing to continue his umpire career, rejected the offer.

"How pungent could irony be?" Pirnie asked, "A man is told he is incompetent to umpire in the American League, yet he is told his incompetency qualifies him to scout for competent American League umpires."

Salerno and Valentine have filed their cases with the National Labor Relations Board. The case is pending before the regional office in Boston.

"Even assuming the NLRB hears their case," Pirnie said, "and decides favorably, a baseball season will probably have long since passed."

"Precedents in similar labor union organization cases do not offer good omens."

Pirnie said that "justice warrants and the image of baseball demands" that both men be immediately reinstated.

BATTLING PORNOGRAPHY

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. WYATT. Mr. Speaker, there is a tremendous concern in our society about the growing amount and availability of pornography. The youth of our Nation is particularly susceptible to the degrading influences of smut.

I and many other Members of this body have introduced measures designed to combat this insidious menace to our youngsters. It is of personal concern to each of us to see that our Nation's youth is not subjected to the vile perverting nature of the spreading wave of pornography.

In Portland, Oreg., the newspaper, the Clarke Press, recently performed a fine public service by printing a well-written series of articles about a local effort to combat the spread of pornography.

Whether one agrees or disagrees with the tactics of the organization outlined in the following articles, I believe the Clarke Press has done an excellent job of presenting the little-known side of a growing movement in a usually passive segment of our population against the tide of filth.

I would like to commend the Press for their outstanding service in reporting this movement. Public apathy is pornography's greatest shield, and the series in the Press has helped to pierce this shield. At this time I would like to present the series of articles published in the Clarke Press about Portland's "Pornography Revolt":

[From the Clarke Press, Apr. 9, 1969]

"CARRIE NATION" LEADER: PORNOGRAPHY FOES
MOVE UNDERGROUND

There's a new type of underground forming here.

Pornography fighters are dropping out of sight—but not out of hearing.

They are bombarding purveyors of smut anonymously. Nobody knows exactly who they are or—more importantly, how many people are involved.

And partly because of their anonymity, they are achieving startling results.

For instance—already several major Metro Portland retailers, have removed so-called "sexy" publications from their news and magazine racks.

The movement is said to have achieved its start when an unsuspecting wife and mother was passing a supermarket magazine rack and noticed a small boy studiously examining a Playboy centerfold. At her approach the lad turned, displayed the nude cutie's photo and said:

"Isn't that something?"

When the woman recovered her composure, she learned the boy was seven years old.

Operating mostly by telephone, the same woman now functions as titular head of a "secret" organization known only as Carrie Nation and Her American Crusaders.

Carrie claims she's not trying to put any publishers out of business—nor is she guilty of suppressing freedom of speech. Her Crusaders aren't particularly interested in the hard core stuff associated with cigar store backrooms. Nor are they trying to make sex unpopular with the masses.

Rather, they want to "save" youngsters from exposure to what they believe is blatant indecency in many magazines today—magazines too widely displayed and too readily obtained at sources within reach of small children.

In a sense, the Crusaders hope to deter as many boys as possible from growing up to be dirty old men. And they've pretty well given up on the adult population segment that already fits the category.

"I do know one supermarket manager, however, who subscribes to Playboy," she told The Press. "He has removed the magazine from his news rack and told me he is losing interest in it himself."

A talk-show devotee, Carrie and her Crusaders get on the phone and call managers of businesses displaying girlie magazines on racks accessible to children. Their pitch is simple and to the point.

"Get rid of the books or we boycott your store!"

By remaining unknown, the hapless merchant isn't certain the caller represents one or a hundred present or potential customers.

And, of course, the final test is the merchant's cash register.

But few businesses in today's competitive hustle are eager to wait for that kind of result. In many cases, it's easier to get rid of the books!

The insidiousness of the scheme is apparent. And as long as it's channelled in the "right" direction for "good" causes, Carrie and her girls (and men, too) are probably safe from investigation.

But say they are successful in the sexy book campaign. What happens if they decide to flex their muscles against other things?

Sexy movies would be next. Then violence on television. Then cigarettes? How about homogenized milk? Diet drinks? High cholesterol margarine? Eggs with albumen? And a host of things repugnant to or disliked by some?

In order to live up to the example of her namesake, there are many who fear the modern Carrie must eventually get around to booze!

Levity aside, the wishes of Carrie's Crusaders are being heeded in the campaign against smut. And lots of people who have been fighting the same battle without success in the open—are quietly enlisting in her ranks.

Any merchant who doesn't want to face the decision has only two choices:

1. Beat Carrie to the punch and drop the books before she calls.

2. Don't answer the phone and ignore her open letter that reads:

"Would you ever forgive yourself if you came home and found that your daughter had been raped and murdered and the man who had done it had just bought a girlie or sex magazine that aroused him, and she was the first one he met?"

"Think of this—the Boston Strangler admitted he had read girlie magazines before all 13 rapes and murders."

[From the Clarke Press, Apr. 16, 1969]

"CARRIE" HELPS: ANTI-SMUT CAMPAIGN
EFFECTIVE

Carrie Nation is making progress in her underground fight against pornography.

The anonymous woman and her American Crusaders report the removal of magazines they term objectionable from several

supermarket and drug store newsstands. And the ranks of Carrie's Crusaders are swelling.

Since the Press last week reported Carrie's telephone campaign to remove girlie magazines and other publications from racks accessible to small children, people have been telephoning to learn how they can help.

Carrie remains completely anonymous and won't even reveal her own phone number. But people wanting to contact her can leave their numbers with the Press and they are referred to her when she "checks in" by phone.

Carrie and her followers threaten to boycott any business that persists in displaying the objectionable literature.

She complained to Paul Miller, manager of Pay 'n Save at Eastport Plaza about Playboy magazine and he quickly "pulled it." Other stores have responded similarly and a spot check of area markets revealed the majority are cooperating.

A spokesman for Safeway said publications are constantly policed for anything that might be objectionable to customers and that firm has even barred certain issues of Life, True and Coronet.

Albertson's also has a strict policy and polices all magazines appearing on racks of its 33 stores.

Fred Meyer's anti-smut policy is one of long standing and rigidly adhered to, said a spokesman.

Bob Dieringer of Disco Mart Stores spoke for a chorus of store operators favoring Carrie's campaign. "More power to her," he said.

At Baza'r all magazines are banned and employees carefully screen paperbacks on display.

[From the Clarke Press, May 7, 1969]

SMUT FIGHT STILL RAGES

While controversy increased locally concerning anonymous tactics used by "Carrie Nation," the fight against smut achieved regional and national significance.

Carrie, an unidentified Metro Portlander, has enlisted followers who telephone businesses displaying offensive books and magazines. They threaten store owners with boycott unless offensive publications are removed from reach or view of children.

As a result of recent publicity, Carrie reports she has been contacted by and recruited some 14,028 followers, in her American Crusade. Sizeable portions of that total, she said, are members of organizations which have joined her crusade en masse.

Some letter-writers and callers object to Carrie's anonymity and "blackmail tactics." Others continue to phone this newspaper and leave telephone numbers in hopes Carrie will contact them so they can join her movement.

Meanwhile, Pay-Less Drug Stores, multi-state Northwest retail chain, joined other retailers in denouncing objectionable literature and announced a policy of stringent policing regarding material displayed in its stores.

And at week's end Pres. Richard Nixon called for new laws to combat sex-oriented smut mail bombarding homes across the nation.

[From the Clarke Press, May 14, 1969]

BOOMERANG CLAIMED: ANTI-SMUT DRIVE
BOOSTS SALES OF SOME MAGAZINES

Carrie Nation's crusade to remove objectionable literature from supermarket newsstands is bearing fruit—in more ways than one.

Increasing numbers of retailers are removing specific magazines. But other outlets report zooming sales of Carrie's targets.

Carrie this spring launched an anonymous telephone campaign aimed primarily at food and drug stores which display objectionable literature on stands accessible to children.

In a matter of weeks the ranks of her crusaders swelled to an estimated 15,000 persons, many of whom phoned this newspaper to leave their numbers so Carrie could sign them up.

She now reports formation of "chapters" in Portland, Wilsonville, Tigard, Milwaukie, Oswego, Scappoose, St. Johns and Gresham.

She describes her anti-smut crusaders as peace-loving—with not a hatchet-carrier in the bunch.

"And," she declared this week, "the vast majority of store managers we call are just lovely and want to cooperate."

Meanwhile, a telephone poll of magazine subscription services, smoke shops and magazine suppliers indicate Carrie's campaign is having its effects.

Said Fred Wunderlich, 12-year operator of Fred's Smoke Shop, 911 SW Taylor:

"Sales automatically increase any time someone starts a campaign. I've told that to the District Attorney and the Legislature.

"If you want to squash something, keep it out of the newspapers."

Said Norman Bay, manager of Bay News Company, 3155 NW Yeon, "We supply about 675 outlets in the metro area. We send them what we think they want and they return what they don't want.

"There's been a change in the supply of confessional-type magazines and semi-nude stuff. But what one dealer rejects, another will pick up."

Mgr. Dwain Wolfer, Your Candlelighter (subscription service), 6323 SE Holgate said:

"Boy, I've sure sold a slug of Playboys this month."

Asked if he knew if his customers were ages 7 or 70, he replied:

"Don't let it fool you. Most of them are ordered by the wife for her husband. And for Father's Day. And the women sign themselves 'Mrs.'"

GALLAGHER STATEMENT ON THE 1970 CENSUS

HON. CORNELIUS E. GALLAGHER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. GALLAGHER. Mr. Speaker, on May 8, 1969, I had the privilege of testifying before the House Subcommittee on Census and Statistics on the issue of the 1970 census. Because the census strikes so directly at the interrelated issues of privacy, citizen respect for the Federal Government, the constitutional balance of powers, and the necessity for accurate information, I am taking the liberty of inserting my complete testimony into the RECORD at this point:

TESTIMONY OF CONGRESSMAN CORNELIUS E. GALLAGHER BEFORE THE SUBCOMMITTEE ON CENSUS AND STATISTICS, MAY 8, 1969

I am very pleased to have the opportunity to testify for the third time before the Subcommittee on Census and Statistics of the House Committee on Post Office and Civil Service. The constant demonstration of your concern over the issue of the Census reflects the fact that it touches every single American family and is, therefore, a problem which must be probed by the Congress. Our responsibilities to our constituents demand no less and we have already seen that this Subcommittee will continue to meet those obligations under you, Mr. Chairman, in the same dedicated and skillful manner that it did under those who preceded you.

When I was the sole Member of Congress to testify on the proposed 1970 Census ques-

tions during your 1966 hearings, I made the following statement:

"The Census Bureau perhaps deserves the highest commendation for protecting those who supply them with information. On the aspect of confidentiality of the Census Bureau, it seems to me it is unimpeachable."

On October 24, 1967, when the very able Congressman Jackson Betts and I were the only two Members who appeared to testify, I said:

"I might point out that the Census Bureau has one of the finest records of protecting the information it receives."

Today, I would like to go a step further in praising the Bureau of the Census on its commitment to confidentiality by disclosing a story which puts, in the most graphic terms, Census's ability to defend its respondent's identity. This true event suggests that fears of invasion of privacy may be groundless when data are in the hands of the Bureau of the Census.

Shortly after the attack on Pearl Harbor, our Nation felt there might be a dangerous potential for internal subversion because of the large number of Japanese-American citizens. Intense excitement, even frenzy, was exhibited by many people and the result of overemotionalism represents a rather sorry page in our history.

The Bureau of the Census did not succumb to the prevailing mood of hysteria. The Bureau resisted pressures to make known to other branches of the Executive the names and addresses of every Japanese-American citizen of the United States. The loyalty of Japanese-Americans was proven conclusively by their performance in the European Theatre of Operations. I know by personal experience that no group made better soldiers than those with whom I had the privilege of serving in Europe.

Mr. Chairman, there may be times when invasions of personal privacy are justified by a soberly determined and tightly reasoned sense of National priorities. In the months immediately after Pearl Harbor, however, no sober evaluation was possible. To its everlasting credit, the Bureau of the Census demonstrated a higher devotion to the Constitution than did many of those who were responsible for the creation of detention camps for our fellow citizens who happened to be of Japanese ancestry.

It is in times of great stress that the true character of a man, an institution, or a government can be ultimately determined. By its adherence to its legal guidelines in a time of National fervor, the Bureau of the Census set a high mark which should be emulated by other Federal agencies.

The only criticism I have ever heard about violations of the strict confidentiality restrictions at the Bureau of the Census is an occasionally expressed suspicion that temporary enumerators spread certain interesting facts about their neighbors. The new procedure to be used in 1970—mail out, mail back—should largely remove even this area of doubt from the minds of our people.

Mr. Chairman, as one who has closely identified with the issue of invasion of privacy, I want to say as strongly as I can that fears about the misuse of responses by Americans to the Census do not have a basis in fact. Individuals are protected by law from having their identities disclosed and, what is equally important, they have a solid tradition at the Bureau of the Census to rely upon. One must conclude that the abuses which have aroused justifiable fears of invasion of privacy in other areas of the Federal establishment do not exist at Census.

The mail out, mail back procedure for questionnaires does intensify another problem, however. We must be realistic about human nature when we legislate and it must be acknowledged that some of our citizens will ignore their responsibilities to fill out the Census forms unless they are required, by

law, to do so. Previously, the mere presence of the enumerator was an effective reminder of the job to be done. In 1970 this pressure may not be present and I frankly do not think we should alter the mandatory nature of the Census.

But the threat of jail is out of place. The threat of imprisonment to gather information which is so vital to our Nation seems to me to escalate a subtle urging toward good citizenship into outright coercion. I would favor retaining fines for a failure to comply, but the provisions for a jail sentence should be removed.

Mr. Chairman, this Subcommittee has made a splendid record. The Bureau of the Census now seems committed to submitting questions for you to review. Commerce Secretary Stans put the imprimatur of his Department on this practice when he wrote to all Members of Congress on April 17, 1969:

"... the proposed questions will be submitted to the appropriate Committee of the Congress two years in advance of future censuses..."

I believe that this formal recognition of Congressional responsibility will have an extremely important and beneficial impact on a fact of modern life which distresses me more deeply than the specific problem of Census questions. What we are now witnessing is a two pronged attack on the prerogatives and the privileges of the Congress. On the one hand, we frequently act as a merely ceremonial confirming body, supinely acquiescing to Executive Branch dicta. On the other hand, we are becoming the focus of those who are increasingly alienated from government itself. Because we must stand for re-election every two years, we are particularly vulnerable to failures of Federal programs, and yet we have had little opportunity to influence meaningfully their formulation.

And so, Mr. Chairman, what could rightfully be hailed as a victory for your Subcommittee is in reality a reassertion of the most basic feature of our Constitutional government—an effective balance of powers.

The absolute necessity for public men to make public decisions was highlighted in testimony presented to the other body by my good friend, Professor Arthur Miller of the University of Michigan Law School. On April 25, 1969, he made the following thoughtful statement:

"... the breadth of concern over the dehumanization of modern society and the animus directed at the information activities of the government cannot be ignored. The omnipresence of data collection activities and the computer cannot help but have a numbing effect on the congeries of values we subsume under the heading of 'personal privacy' and debilitate the citizen's conception of the government as a relatively benevolent or protective institution. The climate or atmosphere of suspicion engendered by an accumulation of invasions of privacy is of far greater concern than the direct harm caused by the particular incidents themselves."

As usual, Professor Miller strikes directly at the heart of the question. Since the 1966 hearings of the Special Subcommittee on Invasion of Privacy on The Computer and Invasion of Privacy, I have received thousands of communications from Americans of all walks of life protesting Federal data collection practices. While the basic thrust of those hearings was the suggested National Data Bank, a deeper concern was expressed. This is, quite bluntly, fear of big government, out of the hands of elected public officials, and a sense of individual powerlessness. The ordinary American—that most extraordinary of humans—is beginning to feel suffocated under a sense of surveillance and he is in the process of losing faith in and respect for his government. In fact, a sense of fear, failure, and frustration has replaced

confidence in life, liberty, and the pursuit of happiness for some Americans.

The achievements of the investigations and hearings of this Subcommittee have helped to allay those fears somewhat. My very able and extremely effective colleague, Congressman Jackson Betts, has spearheaded a campaign to make those in the Executive Branch more responsive to altered social and political conditions. My own investigation of invasions of privacy has helped to move the Executive Branch to a clearer understanding of the rising tide of public discomfort and disenchantment.

It is just at this point that the omnipresent whirl of the computer must again be injected into the discussion. The computer can be used as a tool to satisfy what seems to be a passion to record every single human transaction and keep it, subject to instant recall, in the bowels of the Federal establishment. Mr. Friend, Dr. Alan Westin of Columbia University, probably knows more about this subject than any other man. He is an advisor to the New York State law enforcement computerized information system; he is a member of at least three academic groups considering the computer an invasion of privacy; and he heads the American Civil Liberties Union privacy panel. Please permit me to allow his words to carry my argument forward:

"Once computers are installed, they acquire a momentum of their own . . . The result is that individuals and organizations today are being asked more detailed questions about themselves than was even possible or desired before computerization. Case studies of organizations adopting computers have shown that their information base is enlarged two or three fold, and that the new information sought is in areas, reporting sources, life, or activities that were previously immune from inquiry because of the physical or cost limits on acquiring, digesting, and using such information."

Dr. Westin's accurate analysis of computer potential is yet another reason why the Congress must be especially vigorous in exercising its mandate to oversee the operations of the Executive Branch. This necessity leads me to two specific recommendations:

1. I believe that the Subcommittee on Census and Statistics should undertake a review of information policies within the Federal establishment and should seek ways to extend the excellent confidentiality safeguards of the Bureau of the Census to other Federal agencies. This Subcommittee and others have assembled a body of data which I believe compels the conclusion that such an extension is essential to the public interest.

2. The advisory committees and the blue-ribbon Commission recently announced by Commerce Secretary Stans must include strong representation from people disinterested in the day-to-day operations of the Bureau of the Census. By this I mean that the panels and advisory groups must include civil libertarians, Constitutional lawyers, and individuals closely attuned to the public mood.

Perhaps most importantly, a professional writer or two should be at the call of the Bureau of the Census. The insensitive manner in which some of the 1970 questions were originally phrased is, in my opinion, a major cause of the public's distress. Commerce Secretary Stans recognizes this when he said in his letter of April 17, 1969:

"Questions relating to the adequacy of kitchen and bathroom facilities have been reworded to remove any implications that the government is interested in knowing with whom these facilities may be shared."

Better late than never!

In addition, one question which I understand will still be asked seems to have been created by a master privacy invader. To ask a woman how many children she has had, as will be done for a 20% sample in 1970,

seems a virtual celebration of insensitivity. This cannot help but put many people in an extremely embarrassing position within the family group. One of the concerns expressed by the Special Subcommittee on Invasion of Privacy has been that the machine can neither forget nor forgive. With my apologies to Madalyn Murray O'Hare, I believe that redemption, renewal, and, yes, even resurrection of an individual's personality are basic features of the American experience.

I believe that this question is certain to cause pain in many homes around our Nation and I am sure it could either have been better phrased or else eliminated.

If I may be slightly facetious, this question may also be in violation of the Civil Rights Act of 1966 which prohibits discrimination by sex. I would suspect that no one dreamed of asking 20% of American men how many children they had fathered!

Mr. Chairman, the Bureau of the Census is not made up of faceless, soulless bureaucrats devoted to the collection of personal information so that they may live vicariously. From personal experience, I can report to you that they are reasonable and rational. When a good case is presented for dropping a proposed question, they will remove it. During the lengthy discussions I have had with Dr. Eckler and his associates, I was able to point out compelling reasons for not requesting the Social Security number and for excluding a question regarding religion.

I would like to conclude this morning by observing that the innocent collection and storage of data can have monstrous effects. For centuries, European nations have had a system of records surveillance, primarily in the noble pursuit of efficiency and economy. We must never forget that these naively assembled data facilitated the mass murders of Nazi Germany. The hated, infamous "Fragebogen" was, after all, merely a Census which disclosed who had Jewish blood and who practiced the Jewish faith. By tying such information to the Social Security number and projecting what some Americans fear may be a turn to a Fascism of either the left or right in our country, similar "impurities" in the American strain could be weeded out by some future government. Perhaps our government will continue to be run by men who will only use this information for benevolent purposes, but I continue to be troubled by the great temptation we are placing in path of the 2nd and 3rd generation of data users. We need to do everything we can by law to forestall the possibility of a police state in order for our children and their children to continue to enjoy a free America.

This was a basic reason why I opposed the National Data Bank in the form it was presented to the Special Subcommittee on Invasion of Privacy in 1966. It is a basic reason why I would oppose any additional questions which elicit larger amounts of strictly personal information on a future Census.

Mr. Chairman, it is apparent that the problem over questions for the 1970 Census is but another skirmish in the continuing struggle of democratic government: how to find a balance between competing interests. Our Nation needs a valid and reliable basis of fact in order to meet the legitimate needs of our people. The Census plays an indispensable role in collecting those essential data. Every American has a stake in an accurate poll in 1970; particularly those of us in Congress whose Districts will be drawn in accordance with Census figures. A mandatory Census has fulfilled those Federal obligations in the past.

On the other hand, the Congress must continue to take the lead in protecting Americans from unwarranted invasions of personal privacy. We must be alert to the kind of insensitivity I have mentioned, a kind of insensitivity which occurs frequently in the rather cloistered confines of the Executive Branch. In short, we in the Con-

gress must continue to assert the voice of the people in the halls of government.

Mr. Chairman, the hearings and investigations of the Subcommittee on Census and Statistics have been invaluable in directing our Nation toward the middle road in this controversy. The balance of competing interest, is what Democracy does better than any other system of government and by continuing to assert the rights of the Congress in this struggle, you have had conspicuous success. I believe that in the area of Census questions we are on the reasonable road, the responsible road. I am delighted to have had the opportunity to present my views before you today.

FORTAS STORY UNFOLDS

HON. H. R. GROSS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. GROSS. Mr. Speaker, the developments of today in the case of Associate Supreme Court Justice Abe Fortas, make it more imperative than ever that the Justice Department empanel a Federal grand jury immediately to make a sweeping investigation of Fortas' activities.

Among the statements that have been made is that of Alexander Rittmaster, former business associate of Louis Wolfson, the financial manipulator, now serving a sentence in a Federal prison in Florida. Rittmaster turned State's evidence and was a key witness in the trial which found Wolfson guilty of violating the Federal Securities Act.

According to Life magazine, Rittmaster said Fortas, while serving on the Supreme Court, visited Wolfson's palatial home in Florida to "take care of the SEC—Securities and Exchange Commission—matter." This is in direct conflict with Fortas' statement to the public before his resignation that he did not then or at any time while on the Supreme Court bench become involved in Wolfson's SEC matters.

Also, according to Life magazine, Rittmaster said Wolfson told him his—Wolfson's—prosecution for violation of the securities act would be taken care of "at the top"; that it would not get out of Washington. The public is entitled to know the truth of this statement and, if true, who "at the top" gave such assurance.

Mr. Speaker, I am advised that there is documentary and other evidence showing that Mr. Fortas made contact with Government officials in connection with the Wolfson criminal investigation, and made an effort to intervene in the case.

This information, together with the known facts on the \$20,000 fee arrangement with Wolfson and the Wolfson Family Foundation demonstrates that this is more serious than unethical conduct by a member of the Supreme Court. The reports of the arrangement for a \$20,000-a-year fee from the Wolfson Family Foundation for the period of Fortas' life and for the life of Mrs. Carolyn Agger Fortas, is inconsistent with the purported reason for receiving the

fee. Only the naive would believe that a fee of this size, on a lifetime arrangement, would be paid for giving advice and doing research on how to dispense money to create harmonious relations on civil rights and religious matters.

This was a "fix" and it makes no difference what else it is called by Mr. Fortas. There are criminal laws that cover this type of operation, and I hope they will be enforced without fear or favor for the former Associate Justice.

Mr. Speaker, as a background of information dealing with this subject, I insert in the record at this point an article from the Des Moines Register of May 11, 1969; an article from the Washington Post of May 15, 1969, and another article from the Des Moines Register of May 7, 1969:

[From the Des Moines (Iowa) Register, May 11, 1969]

READY TO IMPEACH FORTAS—EXPECT STEP TO BE TAKEN THIS WEEK IF JUSTICE DOESN'T RESIGN POST

(By Clark Mollenhoff)

WASHINGTON, D.C.—Impeachment action will be brought against Supreme Court Justice Abe Fortas this week.

Representative Robert Taft (Rep., Ohio), Representative H. R. Gross (Rep., Ia.) and Representative Richard Poff (Rep., Va.) have discussed such an action with the House Republican leadership and approval has been given with assurance of firm backing.

G.O.P. congressional leaders have had discussions with Justice Department and White House officials, and have been told that the facts in the Life magazine article are correct relative to the \$20,000 fee that Fortas received from the Wolfson Family Foundation in January, 1966, and deposited in his personal account.

AN 11-MONTH LAG

They have also been told that the story is correct in stating there was an 11-month lag before Fortas made out a check to repay the money to the foundation.

In addition, there is believed to be substantial corroboration of stories of key figures who have given testimony and affidavits of Justice Fortas.

Gross said Saturday he has an impeachment resolution prepared and will file it this week, or will co-operate with others in forcing immediate action in the House.

"It will be filed this week unless Fortas resigns," Gross said.

A simple majority of the House can impeach a federal judge and send the charge to the Senate for trial. The actual trial requires a two-thirds vote to oust a judge.

Members of the House and Senate have spoken out publicly in criticism of Fortas, including Senator Jack Miller (Rep., Ia.), Senator Harold Hughes (Dem., Ia.), Representative William Scherle (Rep., Ia.), Representative Wiley Mayne (Rep., Ia.), Representative Neal Smith (Dem., Ia.) and Representative John Culver (Dem., Ia.).

NO DEFENSE

No members of the House or Senate have made a public defense of Fortas and editorial comment is almost all critical.

A few—including Gross, Miller and Scherle—have said Fortas should resign his \$60,000 lifetime job on the Supreme Court, but many have said they want to see if there is further explanation by Fortas that might modify their judgment.

Only a few, including Republican Senator Everett Dirksen of Illinois, have said they do not believe the Fortas-Wolfson relationship is an impeachable offense.

However, Representative Taft and Senator Robert Griffin (Rep., Mich.) state they have examined the precedents and have concluded

that "bad behavior and failing to live up to proper ethical standards" is sufficient grounds for ousting a Supreme Court justice.

Perhaps the key figure is Alexander Rittmaster, former business associate of financial manipulator Louis Wolfson. Rittmaster, who had an intimate role in Wolfson's handling of the Merritt-Chapman & Scott stock, turned states evidence and was a major witness in the trial that resulted in conviction of Wolfson for violation of the Federal Securities Act.

According to the Life magazine article written by associate editor William Lambert, Rittmaster "said that the justice (Fortas) was there (at Wolfson's Harbor View Horse Ranch near Ocala, Fla.) to 'take care of' the SEC matter."

The Fortas visit to the Wolfson ranch was on two days in mid-June, 1966, at a time when Wolfson, Rittmaster and other business associates were concerned about a Securities and Exchange Commission (SEC) investigation that had been in progress for more than a year.

Lambert also reported in February, 1966—a month after the \$20,000 fee was received by Fortas—Rittmaster met with Wolfson, expressed concern, and was told by Wolfson that the investigation would be taken care of "at the top" and would never get out of Washington.

Rittmaster has told Justice Department lawyers that it was in that February meeting with Wolfson that Wolfson first told him that Fortas was joining the Wolfson Family Foundation.

The Rittmaster version of the Fortas-Wolfson relationship is on record in the Justice Department, because it was essential to establish the credibility of Rittmaster before the prosecutors in New York could use him as a witness in the prosecution of Wolfson. At the time of the Wolfson trial, there was no direct interest in Rittmaster's comments about the alleged involvement of Fortas.

DIRECT CONFLICT

The statements that Rittmaster has made to the government prosecutors are in direct conflict with the brief statement that Fortas made last Sunday in denying that there was any impropriety involved in his relationship with Wolfson, or in receiving the \$20,000 check and depositing it to his account.

Fortas said he received the fee with the idea it would be an advance for advice to the foundation on how to use its money "in the field of harmonious racial and religious relations."

The justice said that he has no reason to believe "that the tender of the fee was motivated by or involved any hope or expectation that it would induce me to intervene or make representations on Mr. Wolfson's behalf."

It would have been a violation of federal law for Fortas as a federal judge to have received any money for the purpose of intervening in any government agency on behalf of Wolfson.

"At no time have I spoken or communicated with any official about Mr. Wolfson, whether with respect to a pardon or his criminal cases or his SEC matters," Fortas said. "At no time have I given Mr. Wolfson or any of his family, associates, foundations, or interests any legal advice or services, since becoming a member of the court."

Atty. Gen. John Mitchell and Asst. Atty. Gen. Will Wilson, who heads the criminal division of the Justice Department, have been making every effort to obtain all information that will be helpful in determining if the Rittmaster or Fortas version is correct.

Wolfson, who less than a month ago started serving a federal prison term, is one of those whose testimony would be important in that respect.

HAD "CONNECTION"

In an interview with the Wall Street Journal in the days just before he went to prison,

Wolfson said that he had such an important political connection that could have gotten a pardon from President Johnson in December if he had asked for it. He said he received the assurance "from someone who is as close as anybody could be" to Mr. Johnson.

There were indications in Washington late last week that Mitchell and Wilson were seeking to make arrangements to question Wolfson to determine if he would testify on his relationship with Fortas.

Reports from reliable sources indicate that Wolfson has been willing to co-operate, but that his lawyers are opposed to it unless there is some firm assurance that the millionaire industrialist will not end up in further troubles with the law.

Although indications are that no firm arrangements have been made for Wolfson to testify, a number of Republican congressmen have been told that there is "firm evidence" beyond the facts presented by Life magazine that make the Fortas case "even more serious."

It is reported by a reliable source that Attorney General Mitchell has been in communication with Chief Justice Earl Warren with regard to this additional information. Mitchell has told the chief justice that President Nixon is hopeful that the members of the Supreme Court will find a way to handle the Fortas matter without delay.

[From the Washington (D.C.) Post, May 15, 1969]

WOLFSON AIRS FEE TO FORTAS—\$20,000 SET AS ANNUAL FEE, HE TELLS FBI

(By John P. MacKenzie)

Convicted stock manipulator, Louis E. Wolfson emerged yesterday as a prime source of the Justice Department's case of alleged financial impropriety on the part of Supreme Court Associate Justice Abe Fortas.

From the minimum security prison at Elgin Air Force Base, Fla., where he is serving a one-year prison term, Wolfson has told the Government that the \$20,000 fee paid to Fortas in 1966 was the first installment in a planned annual fee arrangement.

In his brief explanation May 4 of charges that he accepted money improperly from the Wolfson Family Foundation, Fortas stated that a fee was "tendered" for a writing and research project in civil rights and human relations but returned "with thanks" when Fortas found he could not undertake the assignment.

Evidence obtained through Wolfson, apparently in an effort to reduce his prison term and a consecutive term of 18 months he faces in another case, indicated that Fortas's involvement was much deeper than the Justice implied in his statement.

[The Los Angeles Times reported that documents in the Government's possession, plus Wolfson's statement to FBI agents, are being interpreted to mean that Fortas was willing to assist Wolfson in an investigation by the Securities and Exchange Commission.

[Wolfson told the FBI last Thursday that his written agreement with Fortas provided for a \$20,000 lifetime annual retainer that would go to his wife in the event of Fortas's death, the Times said.

[Before talking to the agents last week, Wolfson attempted to strike a bargain with the Government, the Times was told. But Justice Department officials are believed to have rejected Wolfson's offer. However, as a result of the FBI interview the Government was able to obtain the documents by means of subpoena.]

Fortas, meanwhile, remained silent in his Court chambers while the first steps were taken toward a House inquiry that could lead to his impeachment.

Apparently puzzled by Fortas's refusal to capitulate, the Justice Department turned up the heat with an announcement that it was prepared to cooperate, within limits,

with an investigation by the House Judiciary Committee.

The Justice Department move came after more than a week of Nixon Administration efforts to keep eager House Republicans from rushing ahead with impeachment proposals. It appeared to be a measured further step to force Fortas to resign and avoid a Capitol Hill donnybrook over the Court.

Among those claiming knowledge that Fortas intended to resign, there were persistent reports that he wants to stay three or four more weeks—until the end of the term—and then quit without further fuss.

Others pointed out that a resignation under fire—unprecedented in Supreme Court history—would be construed as an admission of guilt and would not end the Justice's ordeal, especially if the Government actually has evidence to back up hints of more serious involvement with Wolfson, the imprisoned stock manipulator.

A major question mark was the potential role of Wolfson, one time corporate wonder boy and a Fortas client and friend who could become the Justice's principal accuser.

Wolfson entered the prison contending, in statements, interviews and advertisements, that he could have used high-level influence to stay out of jail. His lawyer, William O. Bittman of Washington, refused to comment on the case or say whether Wolfson was offering evidence in hope of shortening his prison term.

The tempo of events, climaxed by Fortas's sudden cancellation of a speaking date Tuesday night, had fed expectations that he might break his 10-day silence, either amplifying his May 4 response to a charge he accepted \$20,000 from Wolfson, or announcing his decision to resign or to fight attempts to oust him from the Court.

Instead the first move came from Rep. Clark MacGregor (R-Minn.), who told newsmen and the House that he had conferred by telephone with Attorney General John N. Mitchell about avenues the House might pursue.

MacGregor delivered a letter to Judiciary Committee Chairman Manuel Celler (D-N.Y.) asking for an investigation starting next Tuesday with Fortas and Mitchell as the first witnesses.

With the independent-minded Rep. H. R. Gross (R-Iowa) listening intently and still ready to file an impeachment resolution, Celler said he and William M. McCulloch (R-Ohio), the Committee's ranking Republican, had agreed on a course of action "to be taken in the not-too-distant future" that would satisfy Gross.

Later in the day Celler and McCulloch were believed to have conferred with the Attorney General at the Justice Department. At day's end McCulloch indicated that the plan of House action was not firm in detail but he would not elaborate.

A Judiciary Committee proceeding could result in an impeachment resolution submitted for floor action, but it could also be the burying ground for such a proposal. If a House majority voted impeachment, Fortas would be tried in the Senate, where a two-thirds vote would be needed to convict and remove him from office.

Shortly after MacGregor called for Committee action, the Justice Department issued a statement affirming that it had "no objections" to such a course and indeed could take no position for or against it under the customary separation of governmental powers.

Noting that the Department had not yet received any "formal communication" about Committee action, the statement concluded with a warning that the Administration could invoke executive privilege and refuse to tell the Committee—as it has refused to tell the public—all it knows about the Fortas case.

A spokesman said, "Any possible cooperation between the Department of Justice and the House would be guided on statutory and

constitutional powers and obligations imposed upon each branch."

Mitchell has been under pressure himself to divulge what "certain information" he has conveyed about Fortas to Chief Justice Earl Warren, information that apparently clinches the case against Fortas in the Department's view.

While Sen. Edward M. Kennedy (D-Mass.) was calling again for disclosure and Sen. Robert C. Byrd (D-W. Va.) came out for Fortas's resignation, Majority Leader Mike Mansfield (D-Mont.) joined others in calling for caution by Senators in their public statements in case they should later sit in judgment on Fortas.

Asked last night about Kennedy's call for disclosure, Mitchell said he was not going to respond to each individual criticism of his handling of the Fortas case.

Meanwhile Gov. Ronald Reagan of California, who was in New York to accept a Horatio Alger award, said at a news conference that public confidence in the Supreme Court would be enhanced if Fortas resigned.

[From the Des Moines (Iowa) Register, May 7, 1969]

GRAND JURY PROBE WILL INCLUDE ACTIVITIES OF HIS LAW FIRM—UNDER INVESTIGATION BY JUSTICE DEPARTMENT

(By Clark Mollenhoff)

WASHINGTON, D.C.—A federal grand jury will investigate the activities of Supreme Court Justice Abe Fortas and the operations of the politically active law firm of Arnold, Fortas and Porter, it was learned here Tuesday.

Usually authoritative government sources said a Justice Department investigation has been underway for several months, and that the scope of the investigation is much broader than the \$20,000 check that Justice Fortas allegedly received from the Wolfson Family Foundation while serving on the United States Supreme Court.

NOTE OF THANKS

Fortas says he returned the money with a note of thanks, but Life magazine asserts that the repayment of the money did not take place until 11 months after it was received and after the indictment of Louis Wolfson, the Florida financial manipulator, on charges of violations of the securities laws.

Attorney General John Mitchell and all of his top assistants are declining any comment on the investigation, but it was learned that Justice Department inquiries have involved the following:

1. The relationship between Fortas and Wolfson, whose reputation as a free-wheeling political operator goes back to the days when he was called before the Kefauver Crime Committee to explain his contributions and his role in the campaign of Gov. Fuller Warren.

2. The activities of the Arnold, Fortas and Porter law firm before and since Fortas resigned in 1965 after President Lyndon B. Johnson named him to be an associate justice.

3. The activities of the law firm on tax matters during the Johnson administration. Mrs. Fortas, who practices tax law under the name of Carolyn Agger, arranged to have two of her proteges appointed to the two top tax decision spots in the Johnson administration. Sheldon Cohen, a former member of the law firm and her assistant in tax matters, was named commissioner of internal revenue. Mitchell Rogovin, former head of the tax division of the Justice Department, admitted to The Register that he owed his appointment to that job to the support of Mrs. Agger Fortas.

4. A mysterious burglary and safe-cracking at the Arnold and Porter law firm last Aug. 26 that resulted in the loss of \$22,160 in jewels owned by Fortas, and the discovery of documents in the law firm's office that had been reported to have been destroyed at the

time they were important in a Toledo, Ohio, criminal case.

CRITICAL COMMENT

The operations of the Arnold and Porter law firm have been the subject of much critical comment in Congress over a period of years, but there was no noticeable activity on the investigations until after the Nixon administration took office in January.

Independent of the Justice Department activities, Senator Robert Griffin (Rep., Mich.) said it "is inevitable that a number of congressional committees will make inquiry into the relationships between Fortas and Wolfson."

The Michigan Republican, the key figure in blocking President Johnson's promotion of Fortas to chief justice, said he is confident "there will be an airing of a substantial amount of the information in this matter even if Justice Fortas does not resign or declines to appear before congressional committees."

"There are a number of inquiries into problems of ethics in government, administration of the federal judiciary, and the possibility of reforming the laws dealing with tax-exempt foundations," Griffin said.

NO KNOWLEDGE

Griffin said he had no personal knowledge of the Justice Department investigation of Fortas or the justice's former law firm.

"Our investigations last year left many unanswered questions for Justice Fortas declined to appear for further questioning," Griffin said.

At the time, Griffin said that what was revealed about the \$15,000 fee that Fortas received for several lectures at American University was "only the tip of the iceberg."

The fund for the Fortas fee was collected by Paul Porter, Fortas' former law partner, from a number of former clients of the Fortas law firm.

LONG OVERDUE

Senator John McClellan (Dem., Ark.) said that even before the recent revelation by Life magazine, "Justice Fortas should have resigned from the court."

"In view of the facts developed in the Senate Judiciary Committee hearings, and the Senate refusal to confirm Fortas as chief justice, he should have resigned from the Court," McClellan said.

"His departure is long overdue, and the new information simply makes his resignation more urgent."

DOUBLE STANDARD

In the House, Representative H. R. Gross (Rep., Ia.) said the Justice Department should investigate Wolfson's complaints that he was the victim of a "double standard" of justice, and that he could have had a pardon from the Johnson administration.

Gross said that Wall Street Journal reporters interviewed Wolfson and stated that he claimed he could have secured the pardon from Johnson. Wolfson reported he received the assurance "from somebody who is as close as anybody could be" to Mr. Johnson.

The Iowa Republican said Wolfson's statement makes it incumbent upon the Justice Department to establish if someone did give Wolfson such assurances, and if that person had a position as close to President Johnson as was indicated.

NUTRITION AND HUMAN NEEDS

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ROYBAL. Mr. Speaker, on May 8, the Senate Select Committee on Nutri-

tion and Human Needs held field hearings in Los Angeles as part of its continuing investigation into the serious problems of malnutrition and unmet human needs in the United States today.

I believe we all owe this committee a debt of gratitude for the outstanding manner in which it has conducted surveys in various sections of the country, brought out the real facts on the extent of hunger and human need in our Nation, and focused public attention on what has now become recognized as America's No. 1 domestic problem.

Through its work, the committee has performed a significant public service in the highest traditions of the legislative branch of our Government—and one, I am confident, that will result in positive and effective action by the Congress and the administration to help remedy the critical inadequacies in our public assistance programs revealed by the committee's diligent efforts.

During the Los Angeles hearings, Mr. Ellis P. Murphy, director of the Los Angeles County Department of Public Social Services, presented, on behalf of Chairman Ernest E. Debs and the other members of the county board of supervisors, a comprehensive statement on the welfare program in Los Angeles, together with a series of suggested recommendations for substantial revisions in our public assistance programs to improve their effectiveness in dealing with the urgent needs of America's disadvantaged citizens.

Because of the importance of this subject, and the timely and thoughtful comments presented by Mr. Murphy, I include, in the CONGRESSIONAL RECORD at this point, the full text of his statement to the Senate Committee:

STATEMENT FOR THE U.S. SENATE COMMITTEE ON NUTRITION AND HUMAN NEEDS, BY ELLIS P. MURPHY, DIRECTOR, LOS ANGELES COUNTY DEPARTMENT OF PUBLIC SOCIAL SERVICES, LOS ANGELES, CALIF., MAY 8, 1969

I am Ellis P. Murphy, Director of the Los Angeles County Department of Public Social Services, appearing to testify on behalf of Ernest E. Debs, Chairman of the Board of Supervisors, and all other members of the Los Angeles Board. Supervisor Debs is very sorry that he could not appear here today to testify before you as his schedule required that he be out of town. I want to thank you for the opportunity to talk with you about hunger and malnutrition as seen from my viewpoint as the Director of a large county welfare department.

Prior to a discussion of specific areas on which I would urge this Committee to give serious thought, I would like to share with you some information regarding the welfare program in Los Angeles today.

We are beyond the half-million mark in the number of persons receiving public assistance in Los Angeles County. During each eight-hour work day, an aged person applies to us for Old Age Security every five and one-half minutes. Every four minutes we take an application from an adult for Aid to the Disabled. Thirty families apply for AFDC each hour. When you add up the number of applications we receive for all programs, Los Angeles County registers an application every thirty seconds of each eight-hour work day throughout the year.

When we look at past and projected caseload trends, we are startled to learn:

In the past ten years, the number of persons aided per month in Los Angeles County

has increased by over a quarter of a million or 144 percent.

In the past five years, the number of Aid to Families with Dependent Children cases has more than doubled.

If this trend continues, by 1971-72 more than one-half million persons, men, women and children, will be aided by AFDC alone.

In the past 10 years, welfare expenditures in Los Angeles County have increased by 182 percent. Our current 1968-69 budget, which totals \$522 million, reflects an expenditure of nearly \$1.5 million every twenty-four hours, 365 days a year.

Our anticipated need for the next fiscal year budget already indicates an increase of more than \$100 million.

If the expenditure rate continues, in five years or less, the Los Angeles County welfare budget alone will exceed one billion dollars.

Hunger and Malnutrition—In spite of the many constructive efforts Los Angeles County and our Department make, I regret to inform you that evidence indicates that hunger and malnutrition still exist in this County. Some reasons for our statements in this regard are as follows:

1. In our Aid to Families with Dependent Children Program, we approve over 1,000 therapeutic diet requests each month. Such requests are made by staff in cases where there is medical evidence that dietary deficiencies exist among AFDC families and children.

2. Out of the more than 1600 cases served last year by our program for protective services for children, 36% of the cases were identified as having as their primary problem the absence of food, clothes, or shelter.

3. We found from our pre-school compensatory education program, which is designed for disadvantaged children between the ages of 3 and 5 years, that around 500, or 8% of the total 6,000 children served suffered from gross nutritional neglect. Seven of the children were found to be suffering from advanced stages of rickets.

4. Our Department provides funds to purchase school lunches for public assistance children who, on the recommendation of a school physician or nurse, appear to be malnourished or suffer from other serious health conditions that might be related to nutrition. We find that approximately 210 children are being served daily through this program.

5. Nationwide experts testify that 5% of all Americans are born mentally retarded; and a lack of protein in the expectant mother's diet or an acute shortage of protein in children under the age of five is almost certain to cause mental retardation. A preliminary review of the Los Angeles County AFDC caseload revealed that about 10%, or double the national average, of children in our AFDC families are believed to be developmentally retarded. It is believed that this situation undoubtedly is at least partially related to inadequate nutrition in the families involved.

6. In California, the State has assumed responsibility for aiding families who are unable to support themselves. The County administers this program for the State. We find that approximately 53% of all the families in Los Angeles County being aided under the State program are receiving less than what the State itself says they need to live on at a minimum level of decency and health.

7. The Department has created what we term "severe neglect" caseloads in our Aid to Families with Dependent Children Program. The purpose of these caseloads is to give specialized attention to families who may be having difficult problems in money management or other fields related to adequate care of the children. We have some 167 of these caseloads which average about 38 cases each or a total of 6,275 cases. Though this is a small portion of our AFDC caseload, we do find that the problems of mal-

nutrition and hunger are common in regard to these cases. The problems in these cases sometimes relate to inadequate funds to meet the food needs of the family as will be explained later on, but also may be related to the inability of the parents involved to adequately manage available funds.

I am as much concerned about the problem of "creeping malnutrition" in welfare cases in this County as I am with respect to cases of outright hunger. In the latter situation, we usually have some way of meeting the needs in the family, at least temporarily, if they are brought to our attention.

I want to point out, however, as indicated above, that approximately 160,000 of the approximately 350,000 children we are aiding in Los Angeles County on the State's Aid to Families with Dependent Children Program do not get enough money to meet their minimum needs for food, clothing, and shelter. This is because the State law creating this program arbitrarily cuts the grant off in individual cases at a certain level depending on the number of children in the case. This results in the following:

1. 55% of all families in this State program, which we must administer, are receiving less than the State itself says they need to live on.

2. The total AFDC caseload averages \$12 per case per month below cost schedule, or 5 cents out of a dollar is not allowed by the State Maximum, and remains an unmet need.

3. The maximum allowed for rent for a family of four is \$63.

4. The average allowed for food is \$25 per person per month based on a four-step scale, according to age and ranging from \$19.10 a month for an infant to \$31.15 a month for a male adult.

It is difficult for us to understand how the State can on the one hand determine that a family needs so much to meet its minimum needs for food, clothing, shelter, etc., and on the other hand, continue to operate its program under a law that deprives 55% of the families of the need which the State itself says they need to live on. I would like to point out that the basic law which limits family aid grants in this State has not been changed since 1952, which means the State is almost 20 years behind in adjusting its grant structure upward to correspond to yearly studies which the State conducts that are designed to establish the amount of aid that families actually require to live at a minimum level of decency and health.

Our County Board of Supervisors, the Public Social Services Advisory Commission, and this Department have been extremely concerned over this matter. We have adopted several resolutions and reports urging the State to do something about this miserable situation and are currently sponsoring legislation to try to get the State law changed. It appears, however, that our chances for doing this are practically nil.

We believe that the Federal Government should establish a minimum national assistance standard that all states will have to adopt and that this standard should be adequate to meet the needs of families. We also believe that it is imperative that the Federal Government provide financing for the greatest portion of this minimum standard.

Resources for Meeting Needs Related to Hunger and Malnutrition—The Department of Public Social Services has the following resources for meeting the needs of persons who might be experiencing hunger or malnutrition:

1. **Federal financial assistance programs**—we administer all of the Federal categorical financial assistance programs including Old Age Security, Aid to the Blind, Aid to the Disabled, Aid to Families with Dependent Children, and a Medi-Cal program. In addition to this, we have an entirely locally-supported County General Relief program

on which we are spending around \$20 million a year.

2. *Emergent aid*—we have a system for getting emergent aid immediately to any person applying to our Department who is in need of such aid and who is eligible. Such aid may be issued either in cash or in kind for up to seven days at a time to meet a specific need for food or other emergent necessities pending receipt of an initial assistance check.

3. *Cash and in-kind supplemental aid*—no State or Federal regulations require that the full basic needs of welfare recipients be met. As a matter of fact, the laws and regulations have built-in provisions that usually result in failure to meet the full needs of many cases in the community. For this reason, it is often necessary for the local county to meet supplemental or emergent needs out of its own resources. In this County, we are spending approximately \$3½ million a year for emergent cash aid and supplemental aid to meet emergent and other hardship needs in the State aid programs, particularly in the AFDC program. This expenditure is coming entirely from the local property tax dollar and is necessary because the State is not fulfilling its legal responsibility to meet the needs of families.

4. *Special needs over the State maximum*—Los Angeles County is spending another million dollars a year to meet what we call special needs of families in unusual or emergent situations where State grants are inadequate in the individual cases involved. This money is for items such as therapeutic diets, beds, stoves, and refrigerators.

5. *Accelerated issuance of warrants (AIW)*—Since 1964, Los Angeles County has had a system to accelerate issuance of initial checks to persons presumed to be eligible for aid and in need of assistance pending receipt of their first aid check. Teletype and high speed computers provide the Department the ability to issue a check the day following application, if this kind of a family emergency exists.

In the past 12 months, the Family and Children's District Offices in Los Angeles County processed over 40,000 accelerated requests. This figure represents those persons who were in immediate need and would have faced severe financial hardship if they had been required to wait the 15 to 30 days for eligibility verification and issuance of the initial aid check.

6. *Check writing in the district office system*—On February 27, 1969, our Department initiated a new experimental system of writing checks in district offices. We feel the use of this system for issuing emergent aid has great merit and is working well. It effected significant reductions in the number of emergency grocery orders and clothing orders. There was also a reduction in the amount of cash issued. We found in this district that almost 80% of all emergent aid issued was for food.

This again is a progressive program in Los Angeles County to try to meet immediately the very basic food and other needs of our clients. We hope to expand this system to a county-wide program in the near future.

7. *Food stamp program*—The Food Stamp Program was implemented in Los Angeles on December 1, 1965. By January, 1968, Los Angeles County had the largest Food Stamp Program in the United States. Stamps are now sold by 101 sales outlets (95 banks, 1 credit union, and 5 Brink's mobile truck routes). Almost all food store chains and many independent markets are certified to accept food stamps for food purchases.

In December, 1968, 21.2% of all public assistance recipients received Food Stamps in Los Angeles County. Of these, 33.6% were AFDC families (approximately 47,000 families or 158,000 individuals) and 14.5% were Adult Aid recipients. \$30,700,000 was the value of Food Stamps issued in the year

1968 for which the recipients paid \$21,600,000, and bonus stamps of \$9,100,000 were issued.

Even though Los Angeles County has the largest food stamp program, less than 3% of the entire County population participates, while about 7% of the population is receiving some type of public assistance.

Despite its continual growth, the Food Stamp Program is not presently reaching the vast majority of low-income households who need more food. Although most public assistance recipients are automatically eligible, only 21% are enrolled in the program. An even smaller percentage, about 10% of potentially eligible non-assistance households, use food stamps. It is the belief of our Department that there are certain inequitable features in the Food Stamp Program which discourage client usage and also fail to provide adequate amounts of food for those families who are participating.

Some of these are as follows:

a. To qualify for food stamps, a non-assistance applicant must pass an income means test which is very low. In many instances, a non-assistance or mixed household is ineligible for food stamps even though the total household income may be less than that of an equivalent public assistance family.

Property limits are also more restrictive for non-assistance cases than for a public assistance adult aid case.

b. The Food Stamp Program is based on the concept of expanding a family's normal food expenditure as determined by net family income. Although expanding a normal food expenditure does increase the amount of food available, it does not mean that the increased food allowance is sufficient to meet a family's food need. We have very low-income families forced to spend almost half their total income for an insufficient amount of food. The more fortunate families with relatively large incomes spend less than one-fourth of their income to purchase a sufficient amount of food.

c. The Food Stamp Program is available only to households who purchase food stamps regularly. Families who show a repeated pattern of non-usage without "satisfactory" reason are terminated by regulation from the program.

This requirement is unrealistic in its expectation that there is constant buying power and money-management ability in limited income families who have no financial or social resources. It is also a severe limitation of the client's right to decide when and how often he will take advantage of a Federal program to which he is eligible. We believe this regulation is a primary reason for the low participation of public assistance recipients.

d. We also believe many potential non-assistance food stamp recipients do not enroll in the Food Stamp Program because they do not wish to be investigated and are fearful of potential social embarrassment. The unnecessarily complicated application and investigation procedures of the intake process tend to reinforce this negative feeling on the part of the client. When he goes to the store with stamps instead of cash, he is immediately identified by others as a member of the poor and probably on aid.

e. Despite vigorous recruitment by our Department, Los Angeles has only 101 sales outlets in the entire county. Some clients must travel long distances by public transportation and stand in lines for several hours to buy stamps. This problem has severely limited food stamp usage by the aged, disabled, and mothers who need to care for small children at home.

We have submitted several recommendations to the Department of Agriculture for improvement in this program.

Evidence of malnutrition and hunger has been noted in regard to the following programs which the Department operates:

1. *Day Care Centers*—Child care centers have been established by our Department to provide supervised child care thus enabling parents to pursue training or employment opportunities. Almost immediately we found ourselves becoming involved in meeting the basic needs of children brought to the center. What started out as a mid-morning and mid-afternoon snack and lunch turned into three full meals a day. The following are examples of observations made by staff at the centers:

Many children had never been served food at a table before.

The taste and texture of "ordinary" foods such as juices, fresh fruit, and meat other than hot dogs, hamburgers or broiled meats, were new experiences for the children.

Parents "borrowed" the sample menus from the center.

Some of the children initially grabbed at their food and had to be restrained to avoid overeating to the point of sickness.

2. *Protective Services for Children*—Social services for the parents of children who are alleged to have been neglected or abused are available through our agency to all families in the Los Angeles community. A careful look at the program servicing families not on public assistance reveals that:

66% of all protective service referrals for 1968-69 were found to be former or current welfare recipients or persons with income below the poverty level.

Out of the 1622 cases served last year, 36% were identified as having as their primary problem the absence of food, clothes, or shelter.

Research done in conjunction with a Brandeis University study in 1968 revealed that both in California and nationwide, over 4% of the children reported under the mandatory child abuse reporting laws were suffering from malnutrition.

3. *Pre-School Compensatory Education Program (Head Start)*—This joint State Department of Education-State Department of Social Welfare program provides enriching experiences and training for disadvantaged children between the ages of 3 to 5 to help compensate for differences in their background and to hopefully avoid future failure in school. The Los Angeles County Department of Public Social Services determines the eligibility of all children in this program. Children receiving aid make up approximately 4,000 of the total 6,000 capacity.

Each child entering the program has a complete medical and dental checkup and provisions are made for necessary corrective action. The following problems are only some of the many revealed by these tests:

Almost 500 children, or 8% of the total 6,000 suffered from gross nutritional neglect.

Over 50% of the 6,000 children required extensive dental repair work.

7 children were found to suffer from advanced stages of rickets.

All of these conditions are believed to be directly attributable to inadequate or deficient diet for these children from birth to age 3.

4. *School Lunch Program*—Under a long-standing order of the Los Angeles County Board of Supervisors, the Department of Public Social Services will reimburse P.T.A. Districts or School Districts for milk and lunches which they provide to selected children at various schools. The child selected must be a member of a family currently receiving public assistance and the school physician or nurse must recommend the child receive milk and/or lunches because of malnutrition or other serious health conditions.

The Los Angeles County Department of Public Social Services acts as fiscal intermediary for the County in providing reimbursement for milk and lunches to the participating P.T.A.'s.

Approximately 210 medically certified children were served daily through this program. This amounts to over 4,000 lunches

served during a month at a cost to the County of \$1,500.

Recommendations—The Welfare system is complex and, I feel, much more complex than it needs to be. We do need to accomplish two things. We must provide a just and reasonable income to those who cannot secure it for themselves through the mainstream of employment; and we must provide money as accurately and quickly as we possibly can. I believe that the great majority of Americans desire their government to provide adequate food, clothing, shelter, medical care, and appropriate social services to dependent children, the aged, and disabled. Our present system would appear to be incapable of dealing with our current problems. No one—recipients, workers, welfare administrators, legislators, taxpayers—is happy with the present welfare structure and system.

Although the recommendations listed below, if carried out, would do much to bring about improvements in the system, they would still be only patchwork approaches. Some of these changes require Federal legislation, some State, and some could be implemented by administrative action at one level or the other. I reiterate, however, that in my opinion a totally new approach must be developed in order to meet the basic needs of people in our country, and the following seven suggestions are offered only as interim measures:

1. Establishment of financial need as the only criteria for income assistance with full Federal financing.
2. Elimination of the State maximum and establishment of a welfare standard based on current prices and payments of full need.
3. Expansion of the Day Care Center program with primary emphasis on meeting the needs of the children for three meals a day and supervised child care.
4. Increase the number of sales outlets for Food Stamps with consideration of new sources including use of governmental agency facilities such as the Post Office and the Social Security offices.
5. Revision of the Food Stamp Table to provide that the amount of food needed for families is based on the size of the family rather than on family income. It is difficult to understand how the minimum food needs of families would vary by the amount of money they have.
6. Experimentation in our urban center with the distribution of free Food Stamps to selected low-income groups, and the certification and issuance of food stamps by mail. We hope to start a pilot project in this method soon.
7. My seventh recommendation for your consideration is Federal participation in a General Assistance program aid payment and administrative costs. Program gaps in the Federal categorical programs have necessitated state, county, and city financial welfare programs. The costs keep rising as sources of local revenue are shrinking. The problems creating the need for GA programs are regional and national. The greater availability of revenue sources and the broader tax base at the Federal level warrant Federal assistance in their resolution. The character and adequacy of present GA programs in our country are subject to interstate and intrastate diversity in eligibility criteria, methods of administration, and benefits levels. Some states have virtually no GA programs; a few have programs as liberal as their Federal categorical aid programs. But generally, benefits are lower. Such discrepancies are unfair to clients as well as to responsible state and local governments and their taxpayers. Counties such as Los Angeles which have attempted to liberalize their programs must do so at the expense of disproportionately taxing the local property holder. Federal financial involvement is conducive to program coordination, standardization, and liberalization; and would more equitably dis-

tribute the costs and burdens of GA programs within and among the States.

In conclusion, I would like to express my appreciation for the opportunity to talk with you today and for your interest and concern over this very serious national problem.

THE COMMUNIST TECHNIQUE

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RARICK. Mr. Speaker, possibly no clearer statement on the Communist movement, their infiltration tactics, and their exploitation of well-meaning causes and people can be found than the report in the *Herald of Freedom* of May 16, 1969, entitled "The Untouchable Communists."

Under unanimous consent I submit the *Herald of Freedom* for inclusion in the CONGRESSIONAL RECORD, as follows:

[From the *Herald of Freedom*, May 16, 1969]

THE UNTOUCHABLE COMMUNISTS

Typical college activities were described in a recent newspaper: "Guard Ordered to Negro Campus," "Court Order Is Read to C.C.N.Y. Rebels on the Campus," "Students Accuse Cornell of Bias," "Bronx Community College Students Occupy Building 12 Hours," "40 Sit in 4 Hours at N.Y.U. Office," "Fire Scars Harvard Room," "240 Held in Alabama, R.O.T.C. Office Fires," "3 Fires at Temple," "Students Assail R.O.T.C.," "Oswego Picketed," "Teachers on Hunger Strike," "Wesleyan Students Protest," "Pratt Plans To Arrest and Expel Disorderly Students," "Marshall Warns Negro Militants" (at Dillard University). This was one day's digest of college news and was one of the milder days with no kidnappings or hostages held at gunpoint, no buildings destroyed.

This is the harvest now being reaped from seeds sown by the International Communist Conspiracy. Under the guise of "academic freedom" and "spontaneous dissent," the Communist Party advances its plans for world-takeover. Enthusiastic but inexperienced and misinformed (about Communism, at least) students make the ideal vanguard for their revolution to overturn the existing order in the United States and other parts of the world where they have not yet gained complete control.

Dr. Bella V. Dodd, whose recent death was a great loss to the free world, left behind her words of wisdom and advice which should be heeded by all who would avoid being drawn unconsciously into the Communist net. Dr. Dodd was especially well informed concerning the Communist machinations in the field of education and politics. She herself had been fooled by their high-sounding humanitarian slogans and seeming interest in bettering living conditions and helping the "poor and the oppressed." She was gradually drawn into the Communist Party through working with them for "causes" in which she was interested and finally going all the way by becoming an open Communist. Once on the inside, however, she discovered what a fraud all the Communist interest in human welfare really is and was honest enough to realize that she had to break from Communism.

After going through a long and painful period of cutting her Communist ties and finally being expelled with a resolution by the Communists designed to ruin her reputation and credibility, Bella Dodd spent the rest of her life combatting the evil forces working for the destruction of the United

States. She testified before Senate and House committees and gave information to the F.B.I. Much of her testimony was given in executive hearings and has never been made public. Some of this testimony was so damaging to important figures that even the stenographic notes have disappeared. In open hearings she was warned again and again not to mention names, so careful were the legislators to protect the "innocent."

Bella Dodd lived to see many of the programs planned by the Communists in the 1940's for the purpose of establishing a Soviet America becoming a reality. She testified that, after many years of careful planning, the Communist Party was able to plant secret members in the teaching profession, in universities, colleges and high schools. As of 1949 Dr. Dodd knew of 1500 actual Communist Party members in the teaching profession but there was a much larger number of sympathizers and fellow-travellers working with them. Through the underground apparatus, these professors were made aware of which students could be counted on to help promote the formation of Communist cells and the taking over of student organizations already in existence or the formation of new controlled ones.

To understand what is going on in the United States today, it is necessary to understand Communism; and to understand Communism, it is necessary to learn from one who has lived it. Such a person was Dr. Bella Visono Dodd. She was highly intelligent, personable and sympathetic to people so that she wanted to dedicate her life to helping mankind. Her first efforts were in organizing teachers, since she was one herself and was therefore personally interested in their welfare, so that their jobs would be safe and they would have "tenure." She next became an active anti-Fascist, having seen Fascism in action on a trip to Europe. She testified:

"I came back in 1932 with a sense of pending disaster, the feeling that fascism and nazism was something which was to be deplored. I saw students on the University of Berlin campus beating each other up. I saw knives, guns, stones being used. I came back in the United States as a confirmed anti-Fascist."

When her aversion to Fascism became known she was approached by a Communist, asked to cooperate with the Communists in their anti-Fascist activities and taken to meet Earl Browder, head of the Communist Party, U.S.A. Dr. Dodd testified:

"I raised the question of whether I should or should not belong to the Communists with this woman, Harriet Silverman. She said, 'No, it is not advisable for people like yourself, who are in strategic positions, to become members of the Communist Party, to have a card, or to attend meetings. We will bring literature to you. We will have you attend private meetings. We will instruct you personally.' . . .

"From 1935 on, I was invited to Communist Party meetings, secret meetings, and caucus meetings, unit meetings. I was invited wherever the work I was doing, whether it was the A.F. of L. trade-labor council, State federation of labor, or in the American Labor Party, of which I became an active leader, or in the teachers' union, of which I became an officer. Wherever the work which I was doing was going to be discussed by the Communists at their meetings, I was invited and I was made part of the movement."

Although not as yet a Communist (officially) Bella Dodd was used by the Communists to carry out their plans. She stated her value to the Communists when testifying in hearings on "Subversive Influence in the Educational Process:"

"I was one of the people used by the Communist Party to help control the mass organizations. There are three different levels, you know. There is the party functionary,

the person in unions or mass organizations who is just aware of the do-good principles of the Communist Party; and then there is the underground spy apparatus and police apparatus, with which I had nothing to do and knew nothing about. I learned much later that even in my union (Teachers Union) there were contacts with the teachers on the part of people like J. Peters, who later on I learned was an international spy. I knew him as a mousy little man who was active in the New York County unit of the Communist Party. I did not know him as an international spy, nor did I know his name was Peters. I knew him by the name of Steve Miller."

By the end of 1943 the Communist Party was ready, however, to have Bella Dodd move out of the "do-gooder in mass organizations who is secretly controlled by the Communists" class, and into the party functionary class. She was one of 30 or 40 secret Communists to be brought out into the open. She testified:

"I was therefore given a card, assigned to a unit, and began to pay dues and to be a member in an official sense. My name, however, was not announced to the public until the convention of 1944, which was the so-called convention for establishing the Communist Political Association of the United States, which did away with the Communist Party. . . . The same people ran it and the same literature, only they were getting ready for this program of the integration of democracies." (The Communists had been told that the Teheran Conference would provide the program of unity of England, France, the Soviet Union and the United States, the great "democracies" which were going to run the world.)

It was only when she became a Communist Party functionary, a salaried employee of the Party, that Bella Dodd learned the true story and realized she could no longer serve this evil conspiracy:

"I walked into the State office of the Communist Party in 1946, in the fall of 1946, and said that I refused to work for them any longer because what I had seen in the period, particularly 1945 and 1946, made me realize that I was face to face with something which I had never bargained for. I was face to face with brutality, cynicism, and with an organization which said one thing and did another. There within the party I saw things which I did not and could not have seen as a trade-unionist or as a member of a mass organization or as an intellectual or as a person who believed in the welfare of my fellowman. It was only when I got within the sacred precincts of the party that I actually saw the things which are abhorrent not only to decent people but to anyone who has any feelings for his fellowman."

Dr. Dodd found that it was not possible to just walk out on the Communists; she was informed that she could not drop out, she had to be "expelled." This took place finally on June 19, 1949 accompanied by a resolution of expulsion which stated that she was anti-Negro, anti-Puerto Rican, anti-Semitic, anti-working class and degenerate. Bella Dodd described the Communist attitude toward herself or any person who might seek to escape from the Communist clutches:

"It is the same attitude as you have toward anyone who is an apostate, a person who is no longer with you. Everything has to be done to destroy that particular person. What you do is gather information and use it to affect him emotionally, you try to drive him into a breakdown, you try to destroy him economically by making it impossible for him to be employed, and you also destroy his personality as a person."

She asked a Party member the reason for the vicious resolution expelling her and was told:

"Bella, we had to make it impossible for you ever to have any credence or support

from anybody. We had to make it impossible for you ever to rise and talk against us."

The Communists failed and Bella Dodd did rise and did talk against them, but it took a long time. She explained:

"It takes you a long time to become a Communist, and it takes you an equally long time to unbecome a Communist. Your thinking processes become sort of a reflex action. It takes a conscious struggle with yourself and an understanding of what Communism is in order to disentangle yourself."

"Also, you have to find a doctrine, since Communism is an all-embracing philosophy which embraces everything you do, which determines the kind of marriage you have, your relations with your children, your relationship to your community, your relationship with your profession. It decides and makes decisions for you. Once you are out of it you are left in a vacuum."

"Communism is not just a belief in economics or in politics or in foreign affairs; it is not just the support of the Soviet Union. Communism is a whole philosophy of life. It permeates everything that you do. It permeates your family life, your relationship with your friends, your business relationships, the professional relationships. It has to do with your own thinking of what the importance of man is. . . ."

"Now, many people break with the Communist Party—because the Communist Party has a tremendous turn-over; people come in and go out—but do not find any new philosophy to substitute for it. Therefore, they live as vacuums, and many of them disintegrate. I mean just become morose people, or people who are just lost to a decent living. . . ."

"The Communist Party in America is a conspiracy. It is both a legal and an extra-legal and an illegal apparatus. It is a mechanism for bringing about the preconditions for a Marxist-Leninist victory in America."

Now we are asked to believe that a teacher can be a Communist and still be an efficient and satisfactory teacher, separating the two parts of his life. Bella Dodd has explained that this is impossible:

"No Communist who knows he is a Communist can be a free agent. He is a soldier in the international army of world communism, and he has a devotion to that principle over and above anything else there may be. It is not like just being an ordinary liberal or an ordinary radical. You are part of an international organization. You meet at least once every 2 weeks with the people who are the party apparatus. There is no such thing as freedom for a Communist college teacher. . . ."

"The Communist teacher has a very definite function to perform. He must not only make himself an agent of the class struggle; he must indoctrinate other teachers in the class struggle, and he must see that their students are indoctrinated in the class struggle. . . . the student is considered to be in rebellion against the bourgeois state. It is the function of the teacher to fan that rebellion and to make the student recognize that only by establishing a Soviet system of government will you be able to be free. . . . There is no doubt about it. This was the function of a Communist teacher: To create people who would be ready to accept the Communist regime."

At the present time the head (Michael Klonsky) of the Students for a Democratic Society, the "student" organization causing most of the campus disorder, is the son of an open Communist. At the present time one of the most active of "Catholic" activists (James Forest) is the son of an open Communist. The do-gooders whom these people have fooled, however, always rush to their defense. The Communist Party is well prepared also to defend and protect its own. Dr. Dodd testified:

"The Communist Party knew how to fight very effectively against anyone who touched the Communist movement. If anyone tried to attack the Communist movement, the Communist Party immediately went among the liberals, among its allies, and on various bases got the support and help of these people to smear and to isolate the person who was hurting Communists. . . . It was a very common technique. You then used all the facilities which the party had. It had representatives, for instance, in the press, representatives in the magazine world, in the radio world. If everyone is concentrating upon one particular person, you get the cumulative effect of a party working on many different levels. . . . There is absolutely no doubt in my mind that anyone in America who dares to buck the Communist conspiracy is going to receive very rough treatment from the Communists, who learn how, unfortunately, to utilize many unsuspecting people, who think that they are supporting freedom of thought but who in reality are the best protections for the Communist conspiracy."

The threat of Communism is minimized (a Communist technique) to the point where every conceivable reason is advanced for the disorder and lawlessness in the United States except Communism; and anyone who dares to suggest the involvement of Communism or Communists is subjected to the treatment outlined above. Bella Dodd has warned, however:

"Communism is the challenge of our times, and until that challenge is actually met and resolved, nothing else is important. The teachers who talk freedom, either academic or otherwise, must understand that there will be precious little freedom if this conspiracy is not overcome. . . ."

During her career as an active anti-Communist (which is what the sincere former Communist must become) Bella Dodd revealed to us much information about the inner workings of the Communist Conspiracy which government hearings did not bring out publicly. She has stated that the real strength of the Communist Party is in its underground, the total membership of which is known to very few people, even within the Party itself; and those who do know are on the highest level. The really important Communists are kept in the underground and not permitted to attend meetings nor even to associate with known Communists.

Trusted secret Communists are assigned to special "sleeper" posts. They must be free of Communist taint and be able to withstand careful investigation. Some are deliberately built up in the public image as anti-Communists; some are promoted through other hidden Communists for public office, and still others are assigned to make deep penetration into the military forces and police departments. Certain select secret Communists maintain contact with others employed in the various communications media—radio, television, newspapers, magazines, book publishing, motion pictures and entertainment. The underground-contact individuals pass along important objectives of the Communists to their counterparts and are often used for character assassination.

So powerful was the Communist influence in Hollywood as a result of Marxist-minded executives, producers, directors, and writers, that Hollywood actors and actresses were required to give benefit performances for fund raising purposes for Communist-front organizations. Failure to cooperate meant the finish of a promising career. Important individuals, particularly those who came from wealthy or influential families, were frequently brought into the Communist underground movement on the personal recommendation of a member of the National Committee of the Communist Party under a fictitious name. Their true identities were

never made known to the members, not even to functionaries. No more than four or five people in the entire country would know who they were.

The Communist Party has had hundreds of special committees which undertook assignments from the central or executive committee of the Communist Party. These committees are for the most part unknown to the general membership and the very existence of such committees would be denied. These units engaged in such activities as comprising individuals to get them under Communist control; getting important Communist Party members to commit illegal acts so that in the future they would never be able to defect, and other such activities. Special committees studied and planned programs of vilification, character assassination, and immobilization of anti-Communist organizations and individuals. These committees maintained through "cut-outs" liaison with "sleepers" or underground members in the communications media.

Within the Communist underground there is a full military structure: trained saboteurs, demolition experts, guerrilla warfare experts and assassins. There is, in fact, a complete shadow or duplicate-type government ready to go into operation if and when the occasion calls for it. These individuals are trained and assigned posts similar to our military-civil government personnel. The Communist Party, through sleepers and underground members, owns and operates many businesses throughout the country. Some of these include office buildings, hotels, import and export firms, nightclubs, restaurants, book publishing firms and numerous other ventures. The Party maintains bank accounts and investments in the names of private individuals who are under discipline of the Party. They also maintain numbered bank accounts in Swiss banks.

Bella Dodd has stated that, of the approximately 2 million living former members of the Communist Party, at least one million can definitely be counted on to help the Communists when the final revolution breaks out.

The present failure of the U.S. government agencies to take action against what is obviously a pending revolution (college disorders and Negro riots) is unquestionably the result of Communist influence, as only the Communists have had revolution as their goal for years. The hidden revolutionary string-pullers are the most dangerous of all the "Untouchables" as they are seeing to it that the revolution keeps going when it is within their power to stop it.

I. F. STONE LOOKS AT THE BUDGET

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RYAN. Mr. Speaker, in examining the Nixon administration's budget cuts for fiscal year 1970, the question arises as to where the cutbacks in Government spending are actually taking place and which agencies are really being deeply affected. Is the proposed reduction in the Department of Defense budget requests really going to lessen military spending? Or is the administration hiding the real impact of the budget cuts by making illusory cuts which have no real effect? The actual cutbacks for the most part are in domestic programs, and the publicized defense cut of \$1 billion must be evaluated in the light of the fact that it is a reduction in a projected \$4.1 billion increase.

Several gimmicks indicate the administration's priorities. By means of padding, making cutbacks on planned increases, and making increases on planned cutbacks, is the administration twisting facts about the spending of Federal funds.

A glaring example is the budget surplus. Both President Nixon and former President Johnson pointed to a surplus as necessary to curb inflation. The surplus is actually used to make up for accumulated deficits, or it is used as an emergency fund to fill in the gaps of the "uncontrollable factor" in the budget. These "uncontrollable factors" are for the most part military budget items resulting from the war in Vietnam and the high cost of research and development of projects such as the ABM. However, if the \$10.2 billion in the trust fund reserves were deducted from the \$5.8 billion projected budget surplus, there would be a deficit of \$4.4 billion.

Lumping trust funds with general revenues exaggerates the Government's contribution to health and welfare programs, while at the same time it makes the defense budget seem smaller in proportion to the overall budget.

I. F. Stone examines this problem in the May 5 issue of I. F. Stone's Weekly. In the lead article, "Uncle Sam's Con Man Budget," I. F. Stone states:

The Cut in military spending came out of a lot of fat, whereas the cut in health, education, welfare, and domestic services, came close to bone and gristle.

His article describes how the apparent military cuts do not represent any real change in the expanding military budget. I have continuously stressed the need for a reordering of our national priorities, bringing the military budget under control in order to reallocate our resources to urgently needed domestic programs. The runaway spending of the Pentagon must be stopped.

I hope my colleagues will read this timely article by I. F. Stone and urge that they similarly give a critical eye to the budget proposed by the Nixon administration:

[From the I. F. Stone's Weekly, May 5, 1969]

UNCLE SAM'S CON MAN BUDGET

It's fortunate for the U.S. government that it is not subject to the SEC. Any corporation which filed annual financial reports like the new Federal budget would run afoul of SEC accounting requirements designed to protect the investor. Let us begin with the claim that it now has a surplus instead of a deficit. If a present-day conglomerate had among its subsidiaries an insurance company, and set up its over-all annual accounts in such a way as to make it appear that the legal reserves of its insurance company were available to meet a deficit in its other business operations, that conglomerate would soon find itself halled into court by the SEC or its own stockholders. Nixon's claim of a \$5.8 billion surplus for the coming 1970 fiscal year is based on just such fiction. It is achieved by lumping the surpluses in the government's trust funds with the deficit in its normal operations. Johnson did the same thing in January when he unveiled his 1970 budget and claimed a budget surplus of \$3.4 billion. The main source of both claims to a surplus lay in the huge social security funds, the government's public insurance business. These and other trust funds are segregated by law and not usable for any other purpose.

SAME FLIM-FLAM JOHNSON USED

When Johnson presented his budget, Senator Williams of Delaware pointed out that the Johnson calculations of a surplus for both fiscal '69 and '70 were based on the existence in 1969 of a \$9.3 billion and in 1970 of a \$10.2 billion surplus in these trust funds. "Under the law," Williams told the Senate, "no Administration and no Congress can divert these trust funds to defray the normal operating expenses of the Government." Williams said that if this bit of deceptive accounting were eliminated, it would be seen that Johnson had a deficit of \$6.9 billion instead of a surplus of \$2.4 billion in fiscal '69 and a deficit of \$6.8 billion instead of a surplus of \$3.4 billion in 1970. Senator Williams told me after Nixon's budget revisions were made public that all his criticism of Johnson's budget was equally applicable to Nixon's. Nixon's claimed \$5.8 billion surplus for 1970 was really a deficit of \$4.4 billion if the trust fund reserves were deducted.¹

Of course this method of Federal accounting has been going on for years and of course it accurately measures the net impact on the economy of Federal collections and payments from the standpoint of inflation. In earlier days this was called the "national income account" as distinguished from the administrative budget. But the administrative budget is the better index to the government's fiscal solvency since deficit in normal operations does not become visible in the consolidated cash account or "unified budget" until the deficit has grown so large that it even wipes out the surplus in the trust funds. The danger signal blinks later in the "unified budget". Earlier budget messages used to give both the consolidated account and the administrative budget. But though the basic 1970 budget presentation takes four separate volumes which total 2,012 pages (and weigh, even in paperback, 7 pounds), there is no place in it where one can find the administrative budget. Why admit that the operations of the government are still in the red, if you can make it look as if they are in the black? The \$10.2 billion surplus in the trust funds helps to dampen inflation but it is not available to buy bombs for B-52s or to feed the hungry.

The "unified budget" has another effect. It understates the extent to which the war machine eats up public revenues. The first chart in the budget message purports to show that 41 cents of every dollar in expenditure goes to the military. But if the trust funds of the government are separated from the rest of its activities, then the military share is about 55 cents. The sums Americans pay into social security trust funds for unemployment, old age and other insurance are no different in this sense from the sums they pay private insurance companies. There is no more reason to lump public insurance than private insurance funds with the general revenues of the government in measuring the impact of military expenditures.

PENTAGON TAKES 56 CENTS OF EVERY DOLLAR

The way to begin to see the real fiscal impact of the war machine is to begin with the memorandum line on p. 526 of the main budget volume where "receipts by source" are shown. This discloses that of \$198 billion in receipts, \$51 billion is in trust funds. This leaves available for the general purposes of the government \$147 billion. If you next turn to the table on "budget outlay by function," you will find \$81.5 billion for national defense. So national defense takes 55 percent of this \$147 billion. Then if you

¹ Williams also criticized Johnson for failing to include in the 1970 budget a \$2.7 billion Commodity Credit loss which the government must pay sooner or later. Nixon, too, brushed this same item under the table. To carry on the same metaphor, \$2.7 billion is quite a crumb.

look more closely you will see near the foot of the expenditure table \$2.8 billion for civilian and military pay increases. The Pentagon's share of that, for its employees in and out of uniform (the Pentagon employs nearly one-half of all the civilian employees in the government) is \$2.5 billion. When that additional pay item is added, the total for national defense is \$83 billion, or better then 56 cents of every dollar available. That is a third (actually 36%) more than the 41 cents shown in the first budget chart.²

At the same time, lumping the trust funds with the general revenues exaggerates the government's contributions to health and welfare. Johnson boasted that outlays for health and welfare in his 1970 budget would be \$55 billion "which is 28% of Federal outlays . . . more than double the level prevailing in 1964" when his War on Poverty was launched. But \$42.9 billion of this was to come "from self-financed trust funds for retirement and social insurance and Medicare." So almost four-fifths of this benevolent munificence was from the beneficiaries. Only the difference, \$12.1 billion, represents outlays from the general revenues. That is about 8%, not 28%.

While the government was to pay \$42.9 billion from these insurance and health trust funds, it would collect a total of \$45.8 billions in fiscal 1970, or almost \$3 billion more than it paid out. This addition to the surplus in the trust funds is, of course, anti-inflationary, for it cuts down purchasing power, but this is purchasing power at the bottom of the economic pyramid, taken from those least able to pay. Regarded as taxation, social security deductions from payroll represent a savagely regressive—and, unlike so many income taxes, inescapable—form of taxation. I can remember, when social security legislation was first being drafted in the early days of the New Deal, writing editorials proposing—as did other liberals and radicals—that it be financed out of income taxes so as to create a more equitable distribution of wealth, taking funds from the top of the pyramid to ease poverty at the bottom. The Social Security system adopted, which we still have, essentially takes from the poor what it gives them, and gives less than it takes.

The Welfare System and the War on Poverty were admissions that social security was abysmally inadequate. But Johnson's War on Poverty was made to look far more extensive than it was, and Nixon's revisions use the same deceptive computations. "Our 1970 Revised Budget," says a Budget Bureau statement of April 14, "involves a 10% increase over FY '69 in spending for the poor (italics in the original). This reflects our deep commitment to the underprivileged." The Budget Bureau statement did not explain, however, that this also represented a cut of \$300 million in Johnson's poverty recommendations for fiscal 1970—nor that much of this bloated estimate is padded out with normal payments from social security.

² I can remember when a feature of the annual federal budget presentation was a chart showing how much was absorbed by past, present and future wars. This added military expenditures, veterans' benefits and interest charges, the last item because past wars are the real reason for the public debt. These three items in the 1970 budget total more than \$106 billion and will take more than 70% of the general revenues. Secretary Laird said the other day that much of the Soviet Union's space activity was really military. This is also true of our space program. The funds spent on rocket boosters to reach the moon also improve the technology of mass murder by intercontinental ballistic missile. If space is added to the other three items, the total is \$110 billion, or almost 75% of the \$147 billion available.

CXV—805—Part 10

HOW THE FIGURES ARE PADDED

Johnson claimed he would spend \$27.2 billion on "Federal Aid to the Poor". Nixon out of that "deep commitment" revised this downward to \$26.9 billion. The biggest item in Johnson's as in Nixon's, Federal Aid to The Poor compilation (at p. 47 of the main budget message volume) is \$13.5 billion for "income assistance." My curiosity was piqued by a discrepancy of almost \$10 billion between this item and a passage at pages 42-3 of the Budget in Brief. This said that Federally aided public welfare would in fiscal 1970 provide assistance to a monthly average of 10 million individuals at a total cost of \$7 billion. "The Federal share," it said, "was \$3.7 billion." When I asked the Budget Bureau where the rest of the claimed figure of \$13.5 billion came from, I got this compilation (in millions):

Administrative expenses.....	\$600
Old age pensions.....	6,300
R.R. retirement pensions.....	400
Unemployment insurance.....	500
Veterans' Administration ¹	2,100
Total.....	9,900

¹ The Budget Bureau, when I asked what the Veterans' Administration had to do with the war on poverty, explained that 80% of veterans' pensions, 75% of veterans' survivors' pensions and 20% of other veterans' benefits had been counted as "Federal Aid to The Poor" in the Johnson table!

The figures given me were "rounded" and so the final totals do not quite match but this \$9.9 billion of "padding" explains how that \$3.7 billion in Federal welfare income assistance was made to look like \$13.5 billion.

It is fortunate that few people on welfare spend their spare time reading the Federal budget. It would foment riots. The Budget Bureau "press kit" for Nixon's revisions of the 1970 budget says these involve "hard choices" and are part of the Nixon Administration's "concern for the poor." Nixon added \$300 million for dependent children but squeezed \$200 million of this out of a projected increase in our pitifully low old age pensions. "For the aged," the same Budget Bureau explanation says, "a 7% social security cost-of-living increase is included in the revised 1970 budget." It does not explain that this is a revision downward from the 10% increase recommended by Johnson, nor that Nixon also shelved Johnson's proposal to increase the minimum from \$55 a month to \$80 a month. There are 2,000,000 Americans—believe it or not—now expected to enjoy retirement on \$55 a month! Instead of getting a \$35 raise to \$80 a month, they will only receive the general 7% increase, though I was told this would be "rounded off" so that instead of a mere \$3.85, they would get \$4 or \$5 a month more. This could bring them up to \$60 a month. Thanks to the Administration's concern for them, moreover, the revised legislation "includes liberalization of the social security retirement test" allowing them to earn more outside income without having it deducted from their pensions. The liberalization turns out to be \$120 a year, about \$2 a week³ and raises the ceiling on allowed earning to \$36 a week! What a dolce vita!

Roughly a billion each was cut out of so-

³ The liberalization will allow a maximum of \$1800 a year without deductions. By comparison retired professional military men (20 years service) are allowed under the Dual Compensation Act of 1964 to fill Civil Service jobs paying up to \$30,000 and still collect their full pensions, a privilege not given other veterans. Under the new pay raise this will mean retired army officers can draw up to \$50,000 a year in Civil Service pay and pensions.

cial security and out of the military budget by Nixon. This symmetry of sacrifice is deceptive. Before anyone starts dropping pennies into cups for the Pentagon, I would like to lift the curtain on another murky corner of the budget. To evaluate the Nixon military "economies" you have to go back for another look at the Johnson budget for 1970. This projected a drop of \$3.5 billion in the costs of our "Southeast Asia operations." This was to be our first dividend on the road to peace, the money to be saved principally by ending the bombing of the North. Johnson in making up his budget could have allocated this \$3.5 billion to welfare or to the rebuilding of the cities. Instead Johnson's budget allocated \$4.1 billion more to military spending *unconnected with the Vietnam war*. This accounts for the fact that in his 1970 budget the cost of national defense rose by more than half a billion dollars over 1969 despite the projected \$3.5 billion drop in the costs of the Vietnam war.

A MONSTER AT THE HEAD OF THE TABLE

This favored treatment of the military machine has to be seen against the background of a figure revealed in the Nixon revisions. His revised budget estimates for fiscal 1969 which ends next June 30 discloses that \$7.3 billion had to be squeezed out of the normal civilian and welfare operations of the government in this fiscal year to meet the expenditure ceilings imposed by Congress as a condition for voting the 10% surtax. This squeeze over and above the original 1969 budget was made necessary by an unexpected rise in certain "uncontrollable" items exempt from mandatory ceilings. *The biggest uncontrollable item was the Vietnam war which cost \$3 billion more in fiscal 1969 than had been budgeted for it.* So all kinds of services were starved in 1969 to meet the swollen costs of Vietnam in fiscal '69. Yet when a \$3.5 billion drop in Vietnam war costs were projected for fiscal '70, the amount saved was not allocated to the depleted domestic sector but to the growth of the war machine.

Nixon's cut of \$1 billion in military outlays can only be evaluated properly if you first start by observing that it was a cut in a projected \$4.1 billion increase in military spending. The cut came out of a lot of fat, whereas the cut in health, education and welfare, and domestic services, came close to the bone and gristle. The second point to be made about the military cuts is that they represent no real overhaul of the bloated military budget. Robert S. Benson, former aid to the Pentagon Comptroller, recently showed (in the March issue of *The Washington Monthly*) how easily \$9 billion could be cut out of military spending without impairing national security. But the three main "economies" cited by the Nixon backgrounders are sleight-of-hand. One is "lower consumption of ammunition in Vietnam". This looks optimistic in view of the enemy offensive and our own search-and-destroy missions; as in other years, this may be one of those preliminary under-estimates which turn up later in a supplemental request for funds. The second "saving" comes out of the shift from Sentinel to Safeguard, but the reduction in fiscal 1970 will be at the expense of larger ultimate costs. Indeed while the Nixon estimates show that Safeguard will ultimately cost \$1.5 billion more, McGraw Hill's authoritative DMS, Inc., service for the aerospace industry puts the final cost \$4.3 billion higher, or a total of \$11 billion without cost overruns (which DMS expects). The third "economy" cited is \$326 million saved (as a *Washington Post* editorial noted tardily April 3) by "postponing procurement of a bomber missile (SRAM) that doesn't yet work." Like all else in the Nixon Administration, the budget revisions represents feeble compromises which give the military machine priority over the growing urban, racial and student crises.

CONCERNING THE NOMINATION OF
OTTO F. OTEPKA

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ASHBROOK. Mr. Speaker, on Tuesday of this week the Senate Judiciary Committee, by a vote of 10 to 3, voted to recommend confirmation of Otto F. Otepka as a member of the Subversive Activities Control Board. In recent weeks press accounts have sought to link the former State Department security officer with certain organizations and individuals, as a result of which a set of six questions was presented to the chairman of the Judiciary Committee for further inquiry. The questions and the subsequent replies are part of the hearings on the nomination of Otto F. Otepka, which documents are on sale at the Government Printing Office at nominal cost.

I request that the questions relating to the nomination of Otto F. Otepka and the responses submitted thereto be inserted in the RECORD at this point:

NOMINATION OF OTTO F. OTEPKA, OF MARYLAND, TO BE A MEMBER OF THE SUBVERSIVE ACTIVITIES CONTROL BOARD

U.S. SENATE,

Washington, D.C., May 5, 1969.

HON. JAMES O. EASTLAND,
Chairman, Committee on the Judiciary,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: In accordance with the discussions at the Committee meeting last week, we believe that before the Committee takes up the nomination of Otto Otepka to the Subversive Activities Control Board, there should be included in the printed record information relating to the recent questions raised about Mr. Otepka's finances and connections. In particular we suggest that the staff obtain from Mr. Otepka, and from independent inquiry if necessary, the facts on the following subjects:

1. Mr. Otepka's source of income, other than his State Department salary, since 1961.

2. The precise sources and amounts of financing for Mr. Otepka's legal fees, living expenses, traveling expenses, and other expenses since 1961.

3. Any formal or informal connections between Mr. Otepka and (1) Mr. Willis Carto, (2) the John Birch Society, (3) the Liberty Lobby, or (4) any other persons or organizations actively associated with Mr. Carto, the Society or the Lobby.

4. The accuracy of a report that Mr. Otepka stated in response to questions about his associations: "I am not going to discuss the ideological orientation of anyone I am associated with"; and, if the report is accurate, Mr. Otepka's opinion as to the applicability of a similar standard to others being considered for federal employment or otherwise under inquiry in connection with security matters.

5. Mr. Otepka's opinion as to the possibility that individuals and groups of the type generally described as "radical right" or individuals or groups generally described as "Nazi" might under certain circumstances constitute a threat to domestic security.

6. The extent to which the issues raised in the preceding questions were investigated and considered in the course of the Executive Branch's pre-nomination procedures regarding Mr. Otepka.

We are confident that all the members of the Committee join us in feeling that fairness to the nominee and to the public re-

quires that these matters, which have been raised publicly, be aired and resolved within the Committee before it passes on the nomination. We are hopeful also that Mr. Otepka will feel free to take this opportunity to make any further comments he wishes regarding the office to which he has been nominated and his suitability for it.

Sincerely,

EDWARD M. KENNEDY.
QUENTIN BURDICK.
JOSEPH D. TYDINGS.
PHILIP A. HART.

MEMORANDUM

MAY 9, 1969.

To: Senator Eastland.

From: J. G. Sourwine.

Subject: Inquiries of Senators Hart, Kennedy, Burdick, and Tydings respecting finances and connections of Otto Otepka.

In compliance with your instructions the staff has obtained from Mr. Otepka, and from independent inquiry as necessary, the facts called for by the questions propounded.

The questions are repeated below seriatim, and the facts obtained by the staff with respect to the subject matter of each question are set forth, immediately thereafter.

1. Mr. Otepka's source of income, other than his State Department salary, since 1961.

Since 1961, Mr. Otepka has had income, other than his State Department salary, only from the following sources: (A) interest on savings accounts and stock dividends; (B) wife's salary as a school teacher (from 1965 only); (C) daughter's salary (during 1968 only); (D) director's fees (family corporation); (E) sum received by wife in 1966 by gift and devise from her aunt.

2. The precise sources and amounts of financing for Mr. Otepka's legal fees, living expenses, travelling expenses, and other expenses since 1961.

LEGAL EXPENSE

Total legal expense incurred in connection with Mr. Otepka's case has amounted to \$26,135, of which \$25,127 represented legal fees and \$1,008 represented reimbursement of cash disbursement by counsel. These legal expenses have been met by voluntary contributions from more than three thousand different contributors. Most of the contributions were in relatively small amounts, ranging from \$1.00 to \$100.00. Over \$21,000 of this amount was raised by American Defense Fund, organized in 1964 by James Stewart of Wood Dale, Illinois (now living in Palatine, Illinois) in compliance with the laws of the State of Illinois.

Mr. Stewart volunteered his assistance, after having read in the newspapers of Mr. Otepka's intention to pursue fully all of his administrative remedies, and to take his case into the courts, if necessary. Mr. Stewart appears to have made a full accounting for the purpose of complying with State law, and also has filed an accounting with the U.S. Post Office Department.

American Defense Fund has no connection of any kind with the John Birch Society, the Liberty Lobby, or Willis Carto, according to Mr. Stewart, who stated his interest in the Otepka case was sparked by a newspaper article in September 1963, and that in the fall of 1964 he undertook to raise money for Otepka's defense after he learned that contributions from other sources were not meeting the growing legal expenses of the case. Mr. Stewart said he acted as an individual and without any assistance or prompting from any organization.

All contributions forwarded by Mr. Stewart went directly to Mr. Otepka's counsel, Mr. Roger Robb.

The remainder of the legal expense in connection with Otepka's case (between \$4,000 and \$5,000) was paid by voluntary contributions from individuals not associated with American Defense Fund. (Many of these contributions were made in checks mailed di-

rectly to Mr. Otepka's counsel, and checks received by Mr. Otepka personally were turned over by him to his attorney. Mr. Otepka did not cash any such checks, nor receive or retain the proceeds therefrom.) Of these independent contributions, only one was in a very large amount, to wit: a check for \$2,500 received by Otepka's counsel on April 21st, 1964, from Defenders of American Liberties, a non-profit corporation organized under the laws of the State of Illinois for the purpose of defending civil and human rights. All other independent contributions were in very much smaller amounts.

In an effort to determine the nature of the organization known as Defenders of American Liberties, the Subcommittee staff questioned both Dr. Robert Morris, first president of the organization (who resigned in 1962 to become president of the University of Dallas, and who is now president of the University of Plano) and Mr. J. Fred Schlafly of Alton, Illinois, who succeeded Dr. Morris. Both Dr. Morris and Mr. Schlafly denied any personal connection, formal or informal, with the John Birch Society, the Liberty Lobby, or Mr. Willis Carto. One of fourteen persons identified as directors of Defenders is Dr. Clarence Manion, former Dean of Law at the University of Notre Dame, who is reported to have stated he is a member of the John Birch Society. Other directors of Defenders of American Liberties, besides Mr. Schlafly, are Mr. Roger Follansbee (Chairman of the Board) of Evanston, Illinois; Dr. Edna Fluegel, chairman of the Department of Philosophy at Trinity College, Washington, D.C.; Mr. Lyle Munson, publisher, of Linden, N.J.; Mr. Bartlett Richards, of Florida; General William Wilbur of Highland Park, Illinois; Mrs. Carl Zeiss of Phoenix, Arizona; Mr. Don Tobin, realtor, of Dallas, Texas; Mr. Charles Keating, Jr. of Cincinnati, Ohio; Mr. Norris Nelson of Chicago, Illinois, former publisher of the Calumet (Illinois) News and former assistant director of the Republican National Committee; and Mr. Brent Zeppa of Tyler, Texas. None of these, according to Dr. Morris and Mr. Schlafly, is known to either of them as a member of or connected with the John Birch Society or the Liberty Lobby.

TRAVELING EXPENSES

Since 1961, Mr. Otepka has made three round trips, by air, to the West Coast, including visits to San Diego and Los Angeles, California, Portland, Oregon, and Seattle, Washington, which trips were not paid for by Mr. Otepka out of his own private funds. Two of these trips were paid for by a number of individual citizens who had no formal group or organization but who had become interested in Mr. Otepka's case as a result of newspaper publicity, and wanted to hear him discuss it. Mr. Otepka talked to these individuals at informal gatherings only, and confined himself to discussion of his own case, avoiding politics or on other matters. At no time did Mr. Otepka accept an honorarium of fee for any speech or talk. The third trip referred to above was sponsored by a formal group, which desired to give Mr. Otepka an award. Because his appearance on this occasion was to be publicly advertised, Mr. Otepka sought and obtained the State Department's approval of this trip before undertaking it.

Total amounts of income (exclusive of his own salary) available to Mr. Otepka and his family during the period in question, which became available for financing his expenses, as indicated above, were as follows:

A. Interest on savings accounts and dividends on stock owned, \$1,711.00.

B. Director's fees (Web Press Engineering, Inc., Addison, Illinois, a family corporation), \$100.00. (This corporation does not have any government contracts whatsoever, and Mr. Otepka does not own any stock in the corporation.)

C. Mrs. Otepka's gross earnings, before taxes, as a teacher employed by the Mont-

gomery County, (Md.) Board of Education: 1965, \$3,260.00; 1966, \$8,432.00; 1967, \$9,217.00; 1968, \$10,558.00 (Since 1968, when Mr. Otepka first went on leave without pay, his family has had to depend solely upon his wife's salary, and the earnings of his daughter, (referred to below) to meet family living expenses.)

D. Mr. Otepka's daughter was first employed during 1968 and in that year earned

\$765.00 from the Washington Post Company (WTOP-TV) and \$1,189.00 from the D. L. Printing Company, Washington, D.C.

E. By gift and bequest to Mrs. Otepka from her aunt, Mildred Simon, (1966) \$3,400.00.

For ready reference, information on total amounts of income available to the Otepka family during each of the years 1961 to 1968, inclusive, is shown on the chart below.

	1961	1962	1963	1964	1965	1966	1967	1968
Interest from savings.....	101.75	80.00	80	312	23	233.00	309	254
Stock dividends.....	26.88	35.46	42	59	11	24.84	47	72
Director's fees, Web Press Engineering.....								100
Wife's gross income (salary).....					3,260	8,432.00	9,217	10,558
Daughter's gross income (salary).....								1,954
Gift and bequest to wife from aunt.....						3,400.00		
Total.....	128.63	115.46	122	371	3,294	12,089.84	9,573	12,938

3. Any formal or informal connections between Mr. Otepka and (1) Mr. Willis Carto, (2) the John Birch Society, (3) the Liberty Lobby, or (4) any other persons or organizations actively associated with Mr. Carto, the Society or the Lobby.

Mr. Otepka states he does not have and has not had any formal or informal connections with the John Birch Society, or the Liberty Lobby, or Mr. Willis Carto, or with any other persons or organizations known to him to be actively associated with any of the above three. Mr. Otepka has met Mr. Carto, having seen him two or three times, including one occasion on which he lunched with Mr. Carto at the latter's invitation. Nothing was discussed at this luncheon except the legal aspects of Mr. Otepka's case.

4. The accuracy of a report that Mr. Otepka stated in response to questions about his associations, "I am not going to discuss the ideological orientation of anyone I am associated with"; and, if the report is accurate, Mr. Otepka's opinion as to the applicability of a similar standard to others being considered for federal employment or otherwise under inquiry in connection with security matters.

Mr. Otepka states: "This is substantially the tenor of an answer which I gave on two separate occasions to two newspapermen, Mr. Neil Sheehan of the New York Times and Mr. Tim Wheeler of the Daily World, both of whom were, in my judgment, seeking to bait me into making some statement that could be used against me. I would consider such an answer entirely within the bounds of propriety if made by any person under similar questioning by such reporters in like circumstances. On the other hand, in the case of a question regarding either my associations or my associates, asked of me by a representative or official of the U.S. Government having reason and authority to inquire, I should be as fully responsive as my knowledge would permit; and I would expect any other person similarly questioned by authority and with reason to be comparably responsive."

5. Mr. Otepka's opinion as to the possibility that individuals and groups of the type generally described as "radical right" or individuals or groups generally described as "Nazi" might under certain circumstances constitute a threat to domestic security.

"From my general knowledge of history and my 27 years of experience as a security officer, I am acutely aware of the potential dangers to the security of any country from acquisition of excessive influence by totalitarian organizations or individuals of either the right or the left. I would resist with every resource at my command any attempt to establish in this country a Nazi, or Fascist, or Communist government, or any other form of totalitarianism."

6. The extent to which the issues raised in the preceding questions were investigated

and considered in the course of the Executive Branch's prenomination procedures regarding Mr. Otepka.

The staff has been advised by a spokesman for the Executive Branch that Mr. Otepka's nomination followed the usual course, including an investigation by the Federal Bureau of Investigation and a security clearance under the standards of Executive Order 10450.

BART SUCCESS FORMULA HAS CHIEF CHEMIST

HON. GEORGE P. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. MILLER of California. Mr. Speaker, when the residents of the San Francisco Bay area, part of which is within my district, decided in 1962 to invest over three-quarters of a billion dollars to establish the Bay Area Rapid Transit system—BART—the leadership of this huge metropolitan mass transit project was entrusted to Mr. Bill R. Stokes, as general manager.

As such, his job was to oversee the construction of 75 miles of track, a 3.6-mile double track tunnel under the San Francisco Bay, many miles of overhead aerial lines, the acquisition of several thousand parcels of land, the design and procurement of a technologically advanced transit vehicle and control system, and a plan of operation after the construction had been completed.

During this period Mr. Stokes has also had to be concerned with the financing of the entire project when it became apparent that the original funding was insufficient. At the present time, design of the BART system is 93 percent completed and construction is 49 percent finished. About 88 percent of the right-of-way has been acquired and 72 percent of the dollar value of contracts has been awarded. That Bill Stokes has carried out his responsibilities with great success is attested to in an article and editorial which appear in a recent edition of "Railway Age" a national publication of the transportation industry.

It is with great pleasure that I insert at this point in the RECORD the following material from that magazine recounting the record of achievement of Bill Stokes in this undertaking:

BART SUCCESS FORMULA HAS CHIEF CHEMIST

Pipe-smoking, genial Bill R. Stokes, general manager of BART, may have an image problem in reverse: He comes on so mild-mannered and agreeable that his critics have to learn the hard way how tough he is.

In 1962, when Bay Area voters approved the \$792-million bond issue that got the BART project started, a few angry citizens brought a tax-payers' suit, alleging BART was an illegal enterprise, and anyway was mismanaged.

In due course, the suit was thrown out of court—chalk up one for Stokes.

The 1964-65 period was taken up with development and testing to make BART the most sophisticated transit system in the world—chalk up two for Stokes.

But the year-long tax-payer's suit had one time-bomb aspect: Precious time was lost during an inflationary period in getting started, and it developed that BART's cost estimates for construction were too low.

The year 1966 may have been the roughest of all: On the one hand, the search for an extra \$150 million began. On the other, Stokes had to contend with a powerful local newspaper which chose this time to launch a series of articles "exposing" BART as a hoax and a boondoggle.

Stokes had two storms to ride out, not one, but he kept his cool. He prepared detailed memoranda for his board and for powerful leaders of all sections of the community, spelling out all his actions and plans—and showed that the newspaper series was concocted of half-truths and hearsay.

The mayor of San Francisco and the community opinion leaders bought Stokes' version, not the other one.

But the ordeal was not over. While construction of BART was already in high gear in the 1967-68 period, there was no guarantee it would be finished unless another \$150 million could be found.

Stokes impressed on the Bay Area delegation to the legislature that this was their fight as well as his. Won Gov. Reagan and the state administration to the cause, and emerged a month ago with victory in the form of a state law to raise the needed \$150 million.

An old charge brought against Stokes was that, as a former reporter and public relations man, he lacked administrative experience to run a billion-dollar project such as BART. It's unlikely that charge will ever be brought up again.

BILL STOKES, WILL YOU PLEASE GIVE CLASSES?

What the transit industry maybe needs is more people like Bill Stokes, general manager of the Bay Area Rapid Transit system. As pointed out BART was threatened with serious financial problems that almost spelled disaster. But the story has a happy ending, thanks to Stokes and his associates.

Even the fact that the BART project can now zoom on to completion isn't the whole story. As important a job as that is, the real significance lies in the lift this will give to the transit industry at large.

The early sixties were times of real anticipation in the transit field, as city officials around the country—with a glance over their shoulders at the Bay Area—started looking at the possibility of building transit systems of their own.

BART's well-publicized financial troubles had a psychological damping effect. What started out as studies for proposed transit systems elsewhere soon became studies of studies—in other words excuses for dragging the feet. A few cities where plans did carry on—Seattle, Los Angeles, Atlanta—saw transit proposals go down to defeat in public referenda on bond issues.

No one can say BART was responsible. But the lack of quicker progress in the Bay Area cut the ground from under the feet of transit supporters elsewhere. People can only want what they know, it has been said—and they couldn't very well want something like BART, going by aging test track photos and off-in-the-future artists' conceptions of finished systems. Least of all when they are told that the project isn't going anywhere for lack of funds.

NOW THE PICTURE HAS CHANGED

But with so much of the basic system now taking shape, and with the money assured to complete that system, transit supporters around the country can take heart. One picture is worth a thousand words—and coming BART photos of completed stations, new cars and tracks are worth all of the artists' conceptions in the world, when it comes to promoting the transit idea.

While saluting Stokes for his accomplishment in the Bay Area, it's worth wondering if transit supporters pushing for other systems shouldn't be taking a leaf from his book, when it comes to getting action.

After all, the problems in the Bay Area are not much different from those of any other metropolitan area: Skimpy funds for public works other than highways; lack of public awareness; constantly conflicting policies among planners and politicians. Stokes solved these problems not once but twice; The first time in 1962, when Bay Area voters approved the BART system; the second time just now, when the state of California was induced to provide additional aid to BART.

In both cases, Stokes planned effective strategies to mobilize public opinion, win over lawmakers and influential civic leaders. Maybe Stokes' office on Mission St. in San Francisco should be dubbed BART Test Track II—the place where successful ideas in transit policy got their start.

THE PRESIDENT'S MESSAGE ON VIETNAM

HON. THOMAS J. MESKILL

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. MESKILL. Mr. Speaker, I rise today refreshed by the President's first major address on Vietnam. I want to congratulate the President on his candor with the American people. Americans have a right to know what we are fighting for in far-off Southeast Asia. They have a right to know why American boys are dying daily. They have a right to know what our objectives are.

The patience of the American people has been worn thin over the last 8 years because our reasons for being in Vietnam have been wrapped in tired clichés.

Our new President is "telling it like it is." And we can be thankful for that. It is evident that President Nixon has resolved to end the war. It is obvious that he does not seek to raise false hopes only to see them dashed. He did not predict an end to the fighting overnight. He acknowledged that peace would take time in the wake of a war that has dragged on for more than 20 years.

But I am encouraged by the President's statement; it was a constructive step forward in the administration's all-out effort to win a negotiated settlement in Vietnam. The statement was clear, con-

cise, and well organized. It is obvious that some hard thinking and careful analysis went into his report to the American people. He did not dodge the issues, nor did he pull any punches. He faced the issues squarely.

President Nixon spoke of "limited objectives," and then he defined them. This was certainly a refreshing change. He articulated goals and policies that different groups may disagree with or argue over, but I think, on the whole, the American people will respect his forthrightness.

The President clearly stated that our objective is not a battlefield victory. Nor will we accept a unilateral withdrawal or a "disguised defeat."

Our objective is to help develop the kind of environment in which the people of South Vietnam can determine their own political future.

The President, therefore, has cleared up a lot of doubts and erased much of the suspicion over our involvement by stating flatly that we:

First, seek no military bases.

Second, insist on no military ties.

Third, are willing to agree to neutrality if that is what the people of South Vietnam want.

Fourth, are prepared to accept any government if it results from the free choice of the South Vietnamese themselves, and

Fifth, have no objection to reunification if it is accomplished through the free choice of the people of the North and the South.

If the President had said nothing else, he would have made a substantial contribution by simply enunciating these five principles. But President Nixon went further. His speech was noteworthy for its carefully detailed outline of the mechanics for peace, and after all, this is what the hard negotiating will be all about.

The President has called for the "mutual withdrawal of non-South Vietnamese forces from South Vietnam." He has called for a 12-month timetable for withdrawal. He has proposed an international supervisory body. He has called for free elections under international supervision. He has called for an early release of war prisoners. He has urged the observance of the Geneva accords of 1954 and the Laos accords of 1962.

The President has put forth a peace program "generous in its terms." His statement is encouraging for its flexibility and lack of rigidity. He has made clear his willingness to discuss anyone's program for peace. His program was not based on a "take-it-or-leave-it approach." He has made a sincere effort to prevent the United States from getting locked into a policy we cannot live with.

Now much depends on the other side. The United States has spoken its mind with a clear voice. Let us pray that it will not fall on deaf ears. We may not know the effect of the President's speech for weeks or even months. As we have learned over the past 11 months, negotiation is not a speedy process, but it is our best hope. The President has not asked unlimited patience from the American people. He has assumed full responsibility for ending the war and securing

the peace. If he fails, he will not ask for amnesty. It is my fervent hope that the American people will give the President the solid support and encouragement that he will need in the difficult days of negotiation that still lie ahead. For I ask you, what are the alternatives? I fear they are much worse.

A SUPERIOR COURT JUDGE LOOKS AT THE ABANDONMENT OF JOB CORPS CENTERS

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. JOHNSON of California. Mr. Speaker, as you all know I have been a vigorous supporter of the preservation of the Job Corps program, especially those conservation centers where we are accomplishing so much in the conservation of our natural resources as well as our human resources.

Specifically I feel that abandoning this type of program is going to prove extremely costly to us over the years.

One of the centers to be closed is the Forest Service operated Five-Mile Job Corps Center near Sonora, Calif. Superior Court Judge Ross A. Carkeet, who has been known for many years for his realistic and humane approach to justice, and especially to meet the problems of our youth, has written a very strong presentation in support of retention of the conservation center in Tuolumne County. This was published recently in the "Sierra Lookout," a column of the Sonora Daily Union Democrat. I would like to share with my colleagues Judge Carkeet's views:

I cannot help but voice my feelings about the tragic thing that is happening in our own country—the contemplated closing of the Five-Mile Job Corps.

It is inconceivable that such success in the accomplishment of the avowed purposes of the Job Corps has been achieved by our local Five-Mile Corps center under the splendid guidance and leadership of Robert (Bob) Royer, should be rewarded by an order from Washington to "shut it down."

With the co-operation of the U.S. Forest Service, under the leadership of Harry Grace, supervisor of Stanislaus forest, the center was built in 1965 and since that time has trained approximately 1,000 youths between the ages of 16 and 21 years.

Much has been written and said about the announced closure, most of it pertaining to the capital expenditure in building and enlarging the center (\$800,000), and much has been said about the trained staff of between 45 and 50 and the loss of such payroll to the county, as well as the funds expended locally each month to keep the center operating.

Much has also been said about the loss to the public of the services of this young group of trainees who have provided conservation and recreational development programs for the benefit of the users of the national forest and which would not otherwise have been provided.

All of these things are true and indeed regrettable from an economic and conservation viewpoint.

I would speak of something more important. In its less than four years of operation the center has given education and

training to more than 1,000 youths, 800 of whom now hold regular jobs as a result.

These were young men without skills or training, many of them school dropouts, some almost illiterate, who have been brought here from cities all over the United States, both large and small—not just from the big city slums.

Under the firm but fair discipline of Bob Royer these young people have been given one more chance to gain training, obtain a job, take their place in the community and gain self-respect. They have literally been snatched from the door of delinquency and crime.

It has been estimated that each young person who becomes a convicted criminal will cost society \$50,000. To the money-minded, I would point out what a savings of 800 times \$50,000 might be.

I am interested in any and all programs that successfully move in the area of prevention of delinquency and the Job Corps program is specifically aimed at delinquency prevention and the Five-Mile Job Corps has achieved outstanding accomplishment of this aim.

The people should know that the Job Corps program has always been made available to and has helped a number of our own Tuolumne County school dropouts who were verging on delinquency.

The substitution of 20 or 30 "skill centers" in the city slums, as proposed, while commendable in itself, will not take the place of the salutary program of the Job Corps, whose trainees are not drawn from the city slums alone, but from communities of all sizes all over the United States—areas just like Tuolumne county.

I would hope the citizens of Tuolumne county are concerned enough to write or wire their congressman, senators and other persons who will have a say in this matter, such as Senator Gaylord Nelson, and Congressman Carl Perkins, whose committees will be hearing this matter.

It is difficult to understand why we must at this time think about destroying a project that has been so effective.

YOUTH AND RESPONSIBILITIES IN CITIZENSHIP

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. SAYLOR. Mr. Speaker, there is no finer way for a child to learn the fundamentals of the U.S. Constitution—the rights, duties, and responsibilities of our citizens under the Constitution—than through personal experience. I am not referring to the "child-like" acts by irresponsible and irrational individuals whom we have witnessed in recent weeks and months endeavoring to destroy our institutions of learning. The personal experience to which I refer is that which is constructive, educational, and of meaningful purpose to the society at large.

In studying our U.S. Constitution and the "right of petition," the sixth grade history class of the South Fork Elementary School, located in my district, undertook such an experiment. A group of 104 children now have graphic proof of one of the freedoms with which we are endowed.

The class history instructor, Thomas Goncher of Johnstown, as well as the

school principal, Arthur Burkett of Portage, were instrumental in having Miss Pamela Walters, a member of the sixth grade, organize a petition drive with her fellow classmates. As we well know, such an effort is unsuccessful unless there is a purpose and this enterprising young group of schoolchildren determined to find out how their community stood on a subject that is close to all of us at this time—how do the people feel about the decision of the U.S. Supreme Court in striking down the existence of God in our national life?

The petitions these children utilized in their effort to understand the workings of our Constitution are similar to the hundreds which I have received from my district on this same subject, and they read as follows:

We the undersigned protest the prohibiting of prayer and Bible reading in our schools and propose a reversal of this ruling. We further protest any legislation that would possibly:

- (1) Remove chaplains from the armed forces;
- (2) Remove "in God we trust" from our currency;
- (3) Remove God's name from the pledge of allegiance to the flag; and
- (4) Remove God's name from any part of our American way of life.

Armed with these petitions and with a courage and confidence that was most heartening from those so young, members of the sixth grade history class began a house-to-house canvass of their neighborhoods to find supporters for their cause.

I am certain our colleagues will be as amazed as I was, when presented with these petitions, that a group of 104 young people had secured 3,277 signatures, and of even more importance, 1,630 of the signers were adult residents of the community.

Mr. Speaker, I want to commend the instructors who supervised this demonstration of "learning by doing," and I also want to commend and congratulate these young people for their practical and strong experiment in exercising the duties of citizenship in this day when we have heard and witnessed so much dissent and disruption by a small minority of misfits. I have a great deal of faith and trust for the future of our Nation when children like the students of the South Fork elementary history class learn at an early age the rights and responsibilities of citizens.

AIDE TO MARYLAND ATTORNEY GENERAL SEVER'S TIES WITH MAGAZINE COMPANY

HON. FRED B. ROONEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ROONEY of Pennsylvania. Mr. Speaker, on March 5, 1969, I called the attention of my colleagues to what I considered to be conflicting public and private interests of a special assistant attorney general in the State of Mary-

land. I inserted in the RECORD at that time a letter I sent to Attorney General Francis B. Burch, calling the matter to his attention.

The conflict I described involved the private position of Donald H. Noren, the special assistant attorney general, as secretary and counsel for International Magazine Service of the Mid-Atlantic, Inc., of Baltimore.

Under date of April 11, I received from Attorney General Burch an interim report on his inquiry into Mr. Noren's private association with the magazine subscription sales company. Included were letters from three officials of the States of Pennsylvania and New Jersey relative to an informal hearing held in New Jersey into sales practices of International Magazine Service of the Mid-Atlantic. Each of the letters made reference to Mr. Noren's presence at that hearing as a representative of the magazine sales company.

Under date of May 9, Attorney General Burch has advised me of his action in this matter. His letter advised in part:

I obviously cannot countenance any situation wherein a member of my staff is a legal representative or official of any company with which other divisions of my office are required to have official dealings. For this reason I have advised Mr. Noren of my decision that he must either sever his connections with the company in question or submit his resignation as a member of my staff.

Mr. Speaker, I want to personally extend my appreciation to Attorney General Burch for his firm decision to protect the integrity of his office and to give citizens of Maryland assurance that disposition of consumer complaints in the State will not be clouded by incompatible public and private interests of individual members of the attorney general's staff. The attorney general further advised regarding Mr. Noren's decision:

Mr. Noren elected to disassociate himself from the company in question and remain with the State. He has resigned as secretary of the company and as counsel to it and has in fact completely terminated his association with the law firm representing this publisher. On Thursday, May 1st, Mr. Noren advised me that he was removing his private law office to completely separate facilities several blocks removed from the company in question. This move will be completed within the next two to three weeks.

I would like to add, here, Mr. Speaker, that I believe Mr. Noren has taken a series of positive steps to remove himself completely from the incompatible relationship he previously maintained with International Magazine Service. He did so, I am certain, at a substantial personal sacrifice and his disassociation deserves my public acknowledgement.

I should like to insert in the RECORD, at the conclusion of my remarks, the correspondence from Attorney General Burch regarding this matter.

At this point, I should like to comment further on the sales practices of International Magazine Service of the Mid-Atlantic. Since I began my own study of magazine subscription sales practices back in February, I have received hundreds of complaints from consumers who

May 15, 1969

were misled by deceptive or fraudulent sales pitches to sign contracts for hundreds of dollars in magazine subscriptions.

INS accounts for the majority of the complaints I have received from residents of Pennsylvania and New Jersey. Many of the complainants explain they were told by IMS telephone solicitors that they had won or were about to win major prizes being offered by the company to promote magazine subscription sales. These prizes included trips, cars, and television sets.

IMS of the Mid-Atlantic operates in 15 States, Puerto Rico, and the Virgin Islands, according to information I have compiled. It does an annual gross business approaching \$5 million in magazine subscription sales. Its sales practices are subject of investigation by the attorneys general of both Pennsylvania and New Jersey. Its Allentown, Pa., franchised dealer recently was subpoenaed by the Pennsylvania attorney general.

Obviously, International Magazine Service of the Mid-Atlantic is thriving on deceptive sales practices. And, when its customers discover they have been misled and attempt to break their subscription contracts they are hounded by collection letters and phone calls which threaten the consumer with bad credit reports and by letters from lawyers threatening legal action to collect outstanding sums.

Although independently incorporated, International Magazine Service of the Mid-Atlantic, according to Central Registry of Magazine Subscription Solicitors, is affiliated with International Magazine Service, 1 North Superior Street, Sandusky, Ohio, which is a division of Periodical Publishers' Service Bureau, Inc., which in turn is a subsidiary of the Hearst Corp. of New York.

It would seem to me that somewhere in that vast chain of executives from the parent Hearst organization on down to the president of International Magazine Service of the Mid-Atlantic, Inc., Malcolm Berman, there must be someone who is concerned that customers not be duped into signing huge magazine subscription contracts. If such a person does exist, perhaps he will take it upon himself to stop the flood of consumer complaints by replacing misleading sales come-ons with a frank and honest sales approach based on the merits of the publications they are attempting to sell.

Some time ago, my office contacted the Better Business Bureau of Baltimore to inquire about the number of complaints on file there regarding International Magazine Service of the Mid-Atlantic. That initial call produced the information that there were only six complaints regarded as "justified." I previously made reference to that matter in this Chamber.

In the interim, however, the Baltimore Better Business Bureau has corrected what it believes must have been a misunderstanding and has supplied me with a report showing that it received 167 complaints against IMS of the Mid-Atlantic during 1968. I would like to in-

clude that report in the RECORD at this point, as well.

The material follows:

OFFICES OF THE ATTORNEY GENERAL,
Baltimore, Md., May 9, 1969.

Hon. FRED B. ROONEY,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN ROONEY: Please be advised that I have now completed my investigation into all the circumstances surrounding the meeting in the Consumer Protection Office in Newark, New Jersey at which Donald H. Noren, Special Assistant Attorney General, appeared on behalf of International Magazine Services which was under investigation.

Two officials in attendance at that meeting, Pennsylvania Deputy Attorney General Kirk and New Jersey Assistant Attorney General Harper have advised me that they observed no impropriety of any kind on Mr. Noren's part nor do they recall any mention by him that he was an Assistant Attorney General of Maryland. Mr. Harper advised me that he was aware of Mr. Noren's connection with my office but from a source other than Mr. Noren which he does not now recall. Mr. Kirk has stated that it was only subsequent to the hearing that he learned from an unknown source, other than Mr. Noren, of Mr. Noren's connection with the office of the Attorney General of Maryland.

Mr. Paul J. Krebs, Executive Director of the Office of Consumer Protection of New Jersey has advised me from his recollection that Mr. Noren on one occasion did mention that he was associated with my office. Mr. Krebs advised as follows: "While I personally found the comment to be totally unwarranted and improper when considered in the total context of this conference, it is my feeling that Mr. Noren did not flaunt his official position for the purpose of advancing either his personal interest or the private interest of his client."

Based on the foregoing facts I have concluded that Mr. Noren was not guilty of any unprofessional conduct at this meeting or of any conduct detrimental to the office of the Attorney General of Maryland. I have further discussed in considerable detail with the Chief of my own Consumer Protection Division the efforts of this Company in our jurisdiction. I am advised that we have had complaints about their operations but that Mr. Noren has not attempted to deal with our office on behalf of his client. The sole contact between our Consumer Protection office and Mr. Noren were several calls made by the Chief of our Division directly to Mr. Noren in successful efforts to obtain expeditious cancellation of contracts which we thought should be cancelled.

I obviously cannot countenance any situation wherein a member of my staff is a legal representative or official of any company with which other divisions of my office are required to have official dealings. For this reason I have advised Mr. Noren of my decision that he must either sever his connections with the company in question or submit his resignation as a member of my staff.

Mr. Noren elected to disassociate himself from the company in question and remain with the State. He has resigned as secretary of the company and as counsel to it and has in fact completely terminated his association with the law firm representing this publisher. On Thursday, May 1st, Mr. Noren advised me that he was removing his private law office to completely separate facilities several blocks removed from the company in question. This move will be completed within the next two to three weeks.

It is my opinion that the steps taken by Mr. Noren satisfactorily resolve the questions

brought to my attention by you and Mr. Spivak.

If you have any further questions about this matter please do not hesitate to contact me.

Sincerely,

FRANCIS B. BURCH,
Attorney General.

OFFICES OF THE ATTORNEY GENERAL,
Baltimore, Md., April 11, 1969.

Hon. FRED B. ROONEY,
U.S. Congress,
Washington, D.C.

DEAR CONGRESSMAN ROONEY: I have your letter of April 3, 1969. I have now received letters from the Assistant Attorney General of New Jersey, the Deputy Attorney General of Pennsylvania and the head of the Consumer Protection Division of the Attorney General's Office of New Jersey and there appears to be some difference among the three persons named above as to circumstances attendant to Mr. Noren's appearance at a meeting in the Consumer Protection Office in Newark, N.J. For your information I enclose herewith a copy of each of these letters.

You will note that the Deputy Attorney General of Pennsylvania categorically states that Mr. Noren did not at that meeting state that he was an Assistant Attorney General of Maryland. This is consistent with the statement that Mr. Noren has made to me.

Mr. Harper, the Assistant Attorney General of New Jersey, indicates that he believes Mr. Noren did on a single occasion refer to himself as an Assistant Attorney General but he did not draw from that any inference that Mr. Noren was trying to use his position as an Assistant Attorney General of Maryland to be helpful in the matter he was pursuing on behalf of his client. Mr. Krebs had the same impression as Mr. Harper, but he considered it bad taste on Mr. Noren's part to have alluded to his official position with the State of Maryland.

On March 13, 1969 Mr. Krebs indicated that he would send complaints and affidavits to me touching on the subject matter of the hearing, if I were to assure him that I would not permit them to be seen by Mr. Noren since he represents the party against whom the complaints were made. I wrote Mr. Krebs on March 19, 1969 giving him the requested assurances but I have not as yet received the material. After I have received the requested material from Mr. Krebs I will then be in a position to make a determination as to what action, if any, should be taken in the matter.

Sincerely,

FRANCIS B. BURCH,
Attorney General.

COMMONWEALTH OF PENNSYLVANIA,
OFFICE OF THE ATTORNEY GENERAL,
Harrisburg, Pa., April 10, 1969.

Mr. FRANCIS B. BURCH,
Attorney General, State of Maryland,
Baltimore, Md.

DEAR MR. BURCH: In reply to your letter of March 19, 1969 concerning the actions of Donald H. Noren at a meeting in the Consumer Protection Office in Newark, New Jersey. As you know I was present at the said meeting and to my recollection Mr. Noren did or said nothing during the meeting to give me the impression that he was in any way connected with your office. As a matter of fact the impression I received was that he was there representing International Magazine Service, Inc. as their attorney and as officer of the corporation.

It was only after the meeting was over that I learned of Mr. Noren's employment with your office as an Assistant Attorney General. I can not recall who informed me

of the above fact but I do recall that it was not Mr. Noren.

I trust that this information will be of some value to you.

Respectfully,

BENJAMIN F. KIRK,
Deputy Attorney General.

STATE OF NEW JERSEY,
OFFICE OF CONSUMER PROTECTION,
Newark, N.J., March 13, 1969.

HON. FRANCIS B. BURCH,
Attorney General of Maryland,
Baltimore, Md.

DEAR GENERAL BURCH: You have requested a written account of a certain incident occurring on or about January 28, 1969 wherein Donald H. Noren, Assistant Attorney General, appeared before this agency as both counsel for and officer of International Magazine Services.

On the above stated date International Magazine Service voluntarily appeared for the purpose of being placed on notice of certain complaints received by this office.

More specifically, you have inquired as to the references made by Donald H. Noren to his official position as Assistant Attorney General. Please be advised that Mr. Noren on a single occasion mentioned that he in fact held this public position. While I personally found the comment to be totally unwarranted and improper when considered in the total context of this conference, it is my feeling that Mr. Noren did not flaunt his official position for the purpose of advancing either his personal interest or the private interest of his client.

Furthermore, it is my personal feeling that Mr. Noren has placed himself in a position in which there is an inherent conflict of interest between his public duties and his private interests. However, the ultimate resolution of this question would seem to lie peculiarly within your province.

This agency believes that the sales practices employed by International Magazine Service raise serious questions of public policy in terms of the rights of the consuming public of this state to fair, honest and open business dealings. To that end an investigation of such practices has been initiated and is presently nearing conclusion.

I have been advised by counsel to this agency that the signed statements secured in the course of the investigation of this matter should be made available. However, as such statements may be essential to future litigation, I am also advised to request your representation to this agency that such statements will not be shown to Mr. Noren. Upon receipt of your representation I will forward copies of these statements.

Hoping this statement will be of help to you in this matter, I remain

Very truly yours,

PAUL J. KREBS,
Executive Director, New Jersey Office of
Consumer Protection.

STATE OF NEW JERSEY,
OFFICE OF CONSUMER PROTECTION,
Newark, N.J., March 22, 1969.

HON. FRANCIS B. BURCH,
Attorney General of Maryland,
Baltimore, Md.

DEAR GENERAL BURCH: I have been requested by Paul J. Krebs, Executive Director, New Jersey Office of Consumer Protection, to relate to you my understanding of what happened in a certain informal conference held in this office involving Assistant Attorney General Donald H. Noren.

On or about January 28, 1969, International Magazine Service was requested to appear before this agency for the purpose of making known to the company certain complaints which had been received concerning the solicitation of magazine subscriptions in this state. A representative of the company appeared along with Mr. Noren. Mr. Noren represented that he was both counsel to and an officer of International Magazine Service.

During the informal conference Mr. Noren stated on a single occasion that he was an Assistant Attorney General in the State of Maryland. Your concern, of course, would seem to be whether or not Mr. Noren's conduct in this particular meeting in any way was inappropriate for a person holding a public trust.

It is my opinion that the reference made to Mr. Noren's official position was casual and indirect, and in no way represented an attempt to flaunt that position for the purpose of advancing either his own or his client's private interest. At no time did Mr. Noren's conduct indicate to me a breach of any standard of professional behavior. In short, I believe Mr. Noren's conduct to have comported with that expected of his official position.

I have been informed that you have requested copies of certain signed statements made in the course of this agency's investigation subsequent to the informal hearing mentioned above. While I have advised the Executive Director to make available the requested information, we would appreciate in advance your representation to us that the statements which will be turned over to you will not at any time be shown to Mr. Noren. The reason for this request is that a decision is pending in this agency as to whether or not formal litigation in this matter should be commenced. If such a decision is made in the affirmative you, of course, realize that these statements will be essential in moving to the court and possibly as evidence to support the substantive charges alleged.

Very truly yours,

DOUGLAS J. HARPER,
Deputy Attorney General.

BETTER BUSINESS BUREAU,
Baltimore, Md., April 18, 1969.

HON. FRED B. ROONEY,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN ROONEY: Upon receipt of your letter of April 3, 1969, a thorough review of our entire file on International Magazine Service was conducted. It was discovered that at the time Mr. Huber called requesting information the complete file was not all in one location, which resulted in an incomplete summary being provided.

During 1968 the Baltimore Bureau received 167 complaints or letters concerning International Magazine Service, 51 of which involved delay in delivery.

Of the total of 167 complaints or communications received, 83 were adjusted by the company. In addition, 12 cases involved the signing of contracts by minors, where the Bureau suggested that a verification of the date of birth be submitted to the company which would enable the complainant to obtain a cancellation of the contract. In 14 cases the company disputed the statements made by the complainant and declined to make an adjustment. In 24 cases the company refused to make an adjustment because they did not feel the circumstances warranted such action. In 34 cases letters were written to the complainant with copies to International Magazine Service, indicating that for a variety of reasons the Bureau did not consider that the information furnished merited further action by the Bureau.

Contracts had been signed by the customer in the majority of cases which were processed by this Bureau and forwarded to the company.

The Baltimore Better Business Bureau is very much interested in eliminating customer dissatisfaction in the sale of magazines. The National Better Business Bureau and local Bureaus are continuously working toward this end. I have been informed that the President of the National Better Business Bureau plans to get in touch with you in the near future to discuss the matter.

Very truly yours,

EDWIN M. LOCKARD,
General Manager.

POLLUTION OF LAKE SUPERIOR

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. PUCINSKI. Mr. Speaker, the Washington Post has carried an excellent editorial calling attention to the pollution of Lake Superior.

This editorial quite properly points out that the serious pollution of Lake Superior is a danger signal that the whole country should note.

It is quite properly pointed out that Superior is the largest, deepest, and cleanest of the Great Lakes.

And, as it further points out, with Lake Erie ruined and most of the adjacent lakes gravely impaired, conservationists have found some comfort in the supposed purity of Lake Superior, but now even this enclave of purity is being dangerously contaminated.

The Post editorial cites a recent study by the Federal Water Pollution Control Administration which found that 91 municipalities, 61 industries, and 124 Federal installations are discharging waste into Lake Superior or its tributaries.

The most serious of all the dumping into Lake Superior is 60,000 tons of ore waste per day by the Reserve Mining Co. of Duluth.

The most shocking disclosure by the Post is the fact that the Reserve Co. had a permit from the Army Corps of Engineers to dump its taconite tailings into the lake since 1947.

I am calling all this to the attention of the House today to show what a grave error it committed when several weeks ago during debate on the Water Quality Control Act of 1969 the House Committee on Public Works and the House itself rejected my amendment to repeal the act of 1905 which established authorized dumping areas in the Great Lakes.

It is my fervent prayer that the Senate will accept such an amendment, particularly in light of the latest discovery of pollution in Lake Superior.

I said at the time that I offered my amendment that Uncle Sam, through the Corps of Engineers, is the greatest polluter of the Great Lakes and that we cannot expect municipalities and private industry to refrain from dumping pollutants into the Great Lakes if we condone this practice by an act of Congress enacted in 1905.

It is a source of great distress to me that obviously barge owners and all those others who gain from the traffic in pollutants into the Great Lakes should have a greater influence over the Congress than the public interest. But those obviously are the facts.

There can be no other reason why there should be any opposition to an amendment to repeal the 1905 dumping areas. The Washington Post deserves the highest commendation for calling our attention to this mounting menace in Lake Superior and the effects that the growing pollution of that Lake will have on the rest of the Great Lakes, including Lake Michigan.

I hope the Post editorial will move some

of the Members of the other body to pick up this fight to see whether or not the other Chamber will be more responsive to the public interest than we were in this Chamber when we rejected the anti-dumping amendment.

Time is running out and before long I fear all the Great Lakes will be beyond salvation, as is Lake Erie today.

During debate on the Water Quality Control Act of 1969, it was pointed out that it would take hundreds of millions of dollars to restore Lake Erie back to some standard of purity, and there was a doubt expressed that even with the expenditure of millions of dollars that Lake Erie can actually be saved. Now we see the same menace moving into the last sanctuary of purity in the Great Lakes, Lake Superior, and I wonder how long Congress will continue to remain aloof to the willful destruction of the greatest natural resource in the world, the Great Lakes of mid-America.

Mr. Speaker, the Post editorial follows:

POLLUTION OF LAKE SUPERIOR

Reports that Lake Superior is being seriously polluted are a danger signal that the whole country should note. Superior is the largest, deepest and cleanest of the Great Lakes. With Lake Erie ruined and most of the adjacent lakes gravely impaired, conservationists have found some comfort in the supposed purity of Lake Superior. Now, however, even this immense fresh-water sea between the United States and Canada is being dangerously contaminated.

Investigators for the Federal Water Pollution Control Administration have found that 91 municipalities, 61 industries and 124 Federal installations are discharging wastes into Lake Superior or its tributaries. Additional pollution is coming from watercraft, pesticides, polluted dredgings and sediment. Apparently most serious of all is the dumping into the lake of 60,000 tons of ore waste per day by the Reserve Mining Co. of Duluth.

It is shocking to learn that the Reserve Company has had a permit from the Army Corps of Engineers to dump its taconite tailings into the lake since 1947. Renewal of the permit is now being sought despite the findings of a Pollution Control Administration team that the tailings have become a source of concern. A recent study has also shown the presence of taconite tailings in the municipal water systems of Duluth, Beaver Bay and Two Harbors, Minn.

Reports that the findings of pollution by the Reserve Company were suppressed in the Interior Department at the behest of Rep. John A. Blatnik of Minnesota are especially distressing. As chairman of the House Subcommittee on Rivers and Harbors, Mr. Blatnik has been a leader in many campaigns against water pollution, but his enthusiasm for taconite mining in the Duluth area appears to have dulled his sensitivity to the damage that is being done to Lake Superior.

Despite the suppression of the report within his Department, former Interior Secretary Udall did order an "enforcement conference" on the question of pollution in Lake Superior before leaving office. That conference began on Tuesday of this week in Duluth. It has before it 20 recommendations for ending the pollution of Lake Superior. Unfortunately, the recommendation of the suppressed report that the dumping of mining waste into the lake be stopped has been toned down to a request for "continued surveillance" of the Reserve Mining Co. operation at Silver Bay. But the conference has a clear obligation to recognize pollution for what it is and to move resolutely toward its elimination.

THE DUTY OF THE HOUSE IN PRESERVING THE INTEGRITY OF OUR COURTS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RARICK. Mr. Speaker, the resignation today of Associate Justice Abe Fortas is certainly a step in the right direction. He appears to be the first Justice to resign from the Supreme Court to avoid impeachment. His unwept departure marks a significant victory for those Americans who have struggled long and valiantly to purify our judiciary—to return to a Government of law, under our great Constitution. That this man, only a few months ago, was handpicked to become Chief Justice of the United States is indicative of the depths to which we have fallen.

Perhaps today, only 2 days prior to the 15th anniversary of the "Black Monday" decision, it is appropriate to remind ourselves of the principles upon which our Government rests. The three great branches are equal, independent, and coordinate. Through a system of checks and balances each great branch is enabled to prevent in the other two the abuses of power which lead to tyranny. It is our duty to use these powers entrusted to us when it becomes apparent that such abuses are occurring.

This body is not responsible for the selection or the nomination of prospective judges of the courts of the United States. That is the responsibility of the President. The responsibility for confirming nominees also rests elsewhere. It is inappropriate for us to intrude into this process, except as individual citizens of our States and of these United States.

But it is to this House that the authority and the responsibility for impeachments is committed. And it is to this House that the people rightly look for the correction of the judicial abuses under which they more and more suffer. Our function is like that of a grand jury—when it comes to our attention that a person occupying judicial office under the United States is probably guilty of conduct for which impeachment will lie, when a prima facie case of such guilt is made out, then this House has a duty under the Constitution to impeach that person. The trial of the impeachment is confided to others, but the duty to impeach is ours and ours alone.

We cannot be blind to the things which the public knows. When wrongs call out to be righted, and the responsibility lies with us, we must act. It is appropriate to announce, Mr. Speaker, that there are those of us in this body who are prepared to do just that. Those who set themselves above the law are unfit to judge. They must step aside. If they fail to step down, let them understand here and now that they will be removed. This is our responsibility under the Constitution, and this is what the American people expect us to do.

I respectfully include my bills, House Joint Resolution 68 and House Joint Resolution 71, for the consideration of our

colleagues in bringing about judicial reform.

H.J. RES. 68

Joint resolution proposing an amendment to the Constitution of the United States relating to the approval of Justices of the Supreme Court

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. Whenever 1 per centum of the voters qualified to vote for Representatives to the Congress in each of fifty States, or whenever the legislatures of two-thirds of the States, petition for the removal of a Justice of the Supreme Court of the United States, the question of whether such Justice should be removed from office shall be placed on the ballot in each of the States at the time of the next election of Representatives to the Congress occurring more than one month after the voters in the requisite number of States or the legislatures of the requisite number of States, as the case may be, have approved petitions. A Justice may be removed from office by a majority of the voters voting in such election.

"SEC. 2. A Justice removed from office under section 1 of this article may not be reappointed to the Supreme Court, but may hold any other office to which he is otherwise eligible.

"SEC. 3. Petitions by voters and by the legislatures of the States shall be valid until the death of a Justice, but a petition submitted by a legislature may be withdrawn at any time until the requisite number of legislatures have approved such petitions."

H.J. RES. 71

Joint resolution proposing an amendment to the Constitution of the United States to provide that appointments of judges to the Supreme Court and judges to all other Federal courts, as established under section 1 of article III, be reconfirmed every six years by the Senate and to require five years' prior judicial experience as a qualification for appointment to said offices

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress:

"ARTICLE —

"SECTION 1. No person may serve as a judge of a court established under section 1 of article III unless the Senate reconfirms his appointment to such office during the last year of each six-year period after the year of his initial appointment, except that for the purposes of this article a judge of a court established under section 1 of article III holding such office on the date of the ratification of this article shall be deemed to have been initially appointed to such office on the date of ratification.

"SEC. 2. No person may be appointed as a judge of a court established under section 1 of article III who, at the time of his appointment, has not served for at least five years as a judge of a court of record of a

State or as a judge of a court established under section 1 of article III, except that no person whose appointment to a court established under section 1 of article III is not reconfirmed by the Senate as prescribed in section 1 of this article, may be appointed to any other court established under section 1 of article III.

"Sec. 3. The Congress shall have the power to enforce this article with appropriate legislation."

THE CIVIL RIGHTS AND LABOR MOVEMENTS JOIN FORCES FOR PROGRESS

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. CHARLES H. WILSON. Mr. Speaker, having spoken out last week in support of the Southern Christian Leadership Conference and the workers in Charleston, S.C., I am gratified to note that the New York Times has come out

in support of this movement and lauded the cooperation between labor leaders and black workers. The editorial appears below:

THE CHARLESTON COALITION

George Meany and Walter P. Reuther have parted company in organized labor, but they are standing together in support of striking Negro hospital workers in Charleston, S.C. A similar unity has been established by all the country's major civil rights groups, which rarely agree on tactics these days. They have put aside their differences to help a wretchedly underpaid work force win union recognition and a measure of human dignity.

The coalition that has been forged between the labor movement and the civil rights organizations in the Charleston struggle is as firm as the one that existed on Capitol Hill through the long fight to put across the Civil Rights Act of 1964. That coalition was reformed during the Memphis sanitation strike before the assassination of the Rev. Dr. Martin Luther King Jr. Its emergence now suggests that the coalition is no one-time thing and that, in easing the plight of the exploited black worker, both unions and civil rights groups have a role to play. Each can draw strength from the other in a period

when both have seemed to flounder in many of their recent efforts.

Unions have been lagging in membership. Civil rights groups such as Dr. King's Southern Christian Leadership Conference, now headed by the Rev. Ralph David Abernathy, need fresh victories. They have a mutual interest in the 500 striking Charleston hospital workers who are mostly women, mostly blacks, employed as non-professional nurses' aides, orderlies, cooks, at wages as little as \$1.30 an hour or thirty cents below the Federal minimum wage which establishes a floor for most jobs. Unions calculate that there are 2.5 million non-union black, Puerto Rican and Mexican hospital workers across the country suffering similar wage injustices.

The best hope for ending the Charleston strike without a racial explosion or a tragedy of the type that struck down Dr. King lies in intervention by the Federal Government—precisely the kind of intervention that brought labor peace after tragedy struck in Memphis a year ago. At a meeting in the White House yesterday, Dr. King's successor, Mr. Abernathy, urged President Nixon "to use his great and powerful office" to speed a settlement. "He said nothing," was Mr. Abernathy's report after the session. That is not a good enough answer; it cannot be the final one.

SENATE—Friday, May 16, 1969

The Senate met at 12 o'clock noon, and was called to order by the Vice President.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Blessed are they who hunger and thirst after righteousness; for they shall be filled.—Matthew 5: 6

O Father of mercies, have compassion upon all who need Thy forgiveness. Pardon the sins which are an offense against Thy love and Thy law. And forgive all the little evils which lay waste life and disfigure the divine image in man. Help all who would follow Thee in spirit and in truth to jettison the debris of the spirit which soils the soul, the character or the institution. May the tide of Thy righteous spirit flow over the Nation to cleanse and redeem, to heal and unite the people, that we may walk steadfastly according to Thy statutes, with clean hands and pure hearts. God bless this Nation and make it a blessing.

In the name of the Lord and Saviour. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Wednesday, May 14, 1969, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had passed the bill (S. 1011) to authorize appropriations for the saline water conversion program for fiscal year

1970, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 4152. An act to authorize appropriations for certain maritime programs of the Department of Commerce;

H.R. 5833. An act to continue until the close of June 30, 1972, the existing suspension of duty on certain copying shoe lathes;

H.R. 7311. An act to amend item 709.10 of the Tariff Schedules of the United States to provide that the rate of duty on parts of stethoscopes shall be the same as the rate on stethoscopes; and

H.R. 9951. An act to provide for the collection of the Federal unemployment tax in quarterly installments during each taxable year; to make status of employer depend on employment during preceding as well as current taxable year; to exclude from the computation of the excess the balance in the employment security administration account as of the close of fiscal year 1970 through 1972; to raise the limitation on the amount authorized to be made available for expenditure out of the employment security administration account by the amounts so excluded; and for other purposes.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President.

H.R. 33. An act to provide for increased participation by the United States in the International Development Association, and for other purposes; and

H.R. 8794. An act to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development, and for other purposes.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred, as indicated:

H.R. 4152. An act to authorize appropriations for certain maritime programs of the Department of Commerce; to the Committee on Commerce.

H.R. 5833. An act to continue until the close of June 30, 1972, the existing suspension of duty on certain copying shoe lathes;

H.R. 7311. An act to amend item 709.10 of the Tariff Schedules of the United States to provide that the rate of duty on parts of stethoscopes shall be the same as the rate on stethoscopes; and

H.R. 9951. An act to provide for the collection of the Federal unemployment tax in quarterly installments during each taxable year; to make status of employer depend on employment during preceding as well as current taxable year; to exclude from the computation of the excess the balance in the employment security administration account as of the close of fiscal year 1970 through 1972; to raise the limitation on the amount authorized to be made available for expenditure out of the employment security administration account by the amounts so excluded; and for other purposes; to the Committee on Finance.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go

into executive session to consider a nomination on the Executive Calendar under "New Reports."

There being no objection, the Senate proceeded to the consideration of executive business.

The VICE PRESIDENT. The nomination on the Executive Calendar will be stated, as requested by the Senator from Montana.

DEPARTMENT OF JUSTICE

The bill clerk read the nomination of Ira De Ment, of Alabama, to be U.S. attorney for the middle district of Alabama.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The VICE PRESIDENT. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Nos. 159 and 160.

The VICE PRESIDENT. Without objection, it is so ordered.

THE 150TH ANNIVERSARY OF THE FOUNDING OF ALABAMA

The bill (S. 1995) to provide for the striking of medals in commemoration of the 150th anniversary of the founding of the State of Alabama was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1995

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in commemoration of the one hundred and fiftieth anniversary of the founding of the State of Alabama, the Secretary of the Treasury is authorized and directed to strike and furnish to the Alabama Sesquicentennial Commission five thousand silver and fifty thousand bronze medals with suitable emblems, devices, and inscriptions to be determined by such Commission subject to the approval of the Secretary of the Treasury. The medals shall be made and delivered at such times as may be required by such Commission, but no medals shall be made after January 1, 1970. The medals shall be considered to be national medals within the meaning of section 3551 of the Revised Statutes (31 U.S.C. 368).

SEC. 2. The Secretary of the Treasury shall cause such medals to be struck and furnished at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead ex-

penses; and security satisfactory to the Director of the Mint shall be furnished to indemnify the United States for full payment of such costs.

SEC. 3. The medals authorized to be issued pursuant to this Act shall be of such size or sizes as shall be determined by the Secretary of the Treasury in consultation with the Alabama Sesquicentennial Commission.

THE 300TH ANNIVERSARY OF THE FOUNDING OF SOUTH CAROLINA

The bill (H.R. 6269) to provide for the striking of medals in commemoration of the 300th anniversary of the founding of South Carolina was considered, ordered to a third reading, read the third time, and passed.

PRESIDENT NIXON'S ADDRESS ON VIETNAM

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the text of the speech on Vietnam, delivered by the President of the United States at 10 o'clock on the evening of May 14, 1969, be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I have asked for this television time tonight to report to you on our most difficult and urgent problem—the war in Vietnam.

Since I took office four months ago nothing has commanded so much of my time and energy as the search for a way to bring lasting peace in Vietnam. I know that some believe I should have ended the war immediately after my inauguration by simply withdrawing our forces from Vietnam.

This would have been the easy thing to do and it might have been a popular move.

But I would have betrayed my solemn responsibility as President of the United States had I done so.

I want to end this war. The American people want to end this war. The South Vietnamese people want to end this war. But we want to end it permanently so that the younger brothers of our soldiers in Vietnam will not have to fight in the future in another Vietnam some place in the world.

The fact that there is no easy way to end the war does not mean that we have no choice but to let the war drag on with no end in sight.

For more than four years American boys have been fighting and dying in Vietnam. For twelve months our negotiators have been talking with the other side in Paris. Yet the fighting goes on. The destruction continues. Brave men still die.

The time has come for some new initiatives. Repeating the old formulas and the tired rhetoric of the past is not enough. When Americans are risking their lives in war, it is the responsibility of their leaders to take some risks for peace.

I would like to report to you tonight on some of the things we have been doing in the past four months to bring true peace, and then I would like to make some concrete proposals to speed that day.

REVIEW AND REASSESSMENT

Our first step began before inauguration. This was to launch an intensive review of every aspect of the Nation's Vietnam policy. We accepted nothing on faith, we challenged every assumption and every statistic. We made a systematic, serious examination of all the alternatives open to us. We carefully considered recommendations offered both by critics and by supporters of past policies.

From the review, it became clear at once that the new Administration faced a set of immediate operational problems.

The other side was preparing for a new offensive.

There was a wide gulf of distrust between Washington and Saigon, which hindered co-operation.

In eight months of talks in Paris, there had been no negotiations directly concerned with a final settlement.

We therefore moved on several fronts at once.

We frustrated the attack which was launched in late February. As a result, the North Vietnamese and the Viet Cong failed to achieve their military objectives.

We restored a close working relationship with Saigon. In the resulting atmosphere of mutual confidence, President Thieu and his Government have taken important initiatives in the search for a settlement.

We speeded up the strengthening of the South Vietnamese forces. As a result, General Abrams reported to me on Monday that progress in this training program has been excellent, and that apart from what will develop from the negotiations, the time is approaching when South Vietnamese forces will be able to take over some of the fighting fronts now being manned by Americans.

Our deepest concern has been the development of a coherent peace policy, so that our various moves would reinforce each other. As a result, we have been able to move the Paris talks toward the substantive issues essential to an agreement.

In weighing alternative courses, we have had to recognize that the situation as it exists today is far different from what it was two years ago, or four years ago, or ten years ago.

One difference is that we no longer have the choice of not intervening. We have crossed that bridge. There are now more than half a million American troops in Vietnam and 35,000 Americans have lost their lives there.

We can have honest debate about whether we should have entered the war. We can have honest debate about the past conduct of the war. But the urgent question today is what to do now that we are there, not whether we should have entered on this course, but what is required of us today.

Against that background, let me discuss first what we have rejected, and second, what we are prepared to accept.

ESSENTIAL PRINCIPLES

We have ruled out attempting to impose a purely military solution on the battlefield.

We have also ruled out either a one-sided withdrawal from Vietnam, or the acceptance in Paris of terms that would amount to a disguised defeat.

When we assumed the burden of helping defend South Vietnam, millions of South Vietnamese men, women and children placed their trust in us. To abandon them now would risk a massacre that would shock and dismay everyone in the world who values human life.

Abandoning the South Vietnamese people, however, would jeopardize more than lives in South Vietnam. It would threaten our longer term hopes for peace in the world. A great nation cannot renege on its pledges. A great nation must be worthy of trust.

When it comes to maintaining peace, "prestige" is not an empty word. I am not speaking of false pride or bravado—they should have no place in our policies. I speak rather of the respect that one nation has for another's integrity in defending its principles and meeting its obligations.

If we simply abandoned our effort in Vietnam, the cause of peace might not survive the damage that would be done to other nations' confidence in our reliability.

Another reason stems from debates within the Communist world between those who argue for a policy of confrontation with the United States and those who argue against it. If Hanoi were to succeed in taking over South Vietnam by force—even after the power of the United States had been engaged—it would greatly strengthen those leaders who scorn negotiation, who advocate aggression, who minimize the risks of confrontation. It would bring peace now, but it would enormously increase the danger of a bigger war later.

If we are to move successfully from an era of confrontation to an era of negotiation, then we have to demonstrate—at the point at which confrontation is being tested—that confrontation with the United States is costly and unrewarding.

Almost without exception, the leaders of non-Communist Asia have told me that they would consider a one-sided American withdrawal from Vietnam to be a threat to the security of their own nations.

In determining what choices would be acceptable, we have to understand our essential objective: We seek the opportunity for the South Vietnamese people to determine their own political future without outside interference.

Let me put it plainly: What the United States wants for South Vietnam is not the important thing. What North Vietnam wants for South Vietnam is not the important thing. What is important is what the people of South Vietnam want for themselves.

The United States has suffered over one million casualties in four wars in this century. Whatever faults we may have as a nation, we have asked nothing for ourselves in return for these sacrifices. We have been generous toward those whom we have fought, helping former foes as well as friends in the task of reconstruction. We are proud of this record, and we bring the same attitude to our search for a settlement in Vietnam.

In this spirit, let me be explicit about several points:

We seek no bases in Vietnam.

We insist on no military ties.

We are willing to agree to neutrality if that is what the South Vietnamese people freely choose.

We believe there should be an opportunity for full participation in the political life of South Vietnam by all political elements that are prepared to do so without the use of force or intimidation.

We are prepared to accept any government in South Vietnam that results from the free choice of the South Vietnamese people themselves.

We have no intention of imposing any form of government upon the people of South Vietnam, nor will we be a party to such coercion.

We have no objection to reunification, if that turns out to be what the people of South Vietnam and the people of North Vietnam want; we ask only that the decision reflect the free choice of the people concerned.

At this point, I would like to add a personal word based on many visits to South Vietnam over the past five years. This is the most difficult war in America's history, fought against a ruthless enemy. I am proud of our men who have carried the terrible burden of this war with dignity and courage, despite the division and opposition to the war in the United States. History will record that never have America's fighting men fought more bravely for more unselfish goals than our men in Vietnam. It is our responsibility to see that they will not have fought in vain.

In pursuing our limited objective, we insist on no rigid diplomatic formula. Peace could be achieved by a formal negotiated

settlement. Peace could be achieved by an informal understanding, provided that the understanding is clear, and that there were adequate assurances that it would be observed. Peace on paper is not as important as peace in fact.

THE NEGOTIATIONS

This brings us, then, to the matter of negotiations.

We must recognize that peace in Vietnam cannot be achieved overnight. A war which has raged for so many years will require detailed negotiations and cannot be settled at a single stroke.

What kind of a settlement will permit the South Vietnamese people to determine freely their own political future? Such a settlement will require the withdrawal of all non-South Vietnamese forces from South Vietnam and procedures for political choice that give each significant group in South Vietnam a real opportunity to participate in the political life of the nation.

To implement these principles, I reaffirm now our willingness to withdraw our forces on a specified timetable. We ask only that North Vietnam withdraw its forces from South Vietnam, Cambodia and Laos into North Vietnam, also in accordance with a timetable.

We include Cambodia and Laos to ensure that these countries would not be used as bases for a renewed war. The Cambodian border is only 35 miles from Saigon; the Laotian border is only 25 miles from Hue.

Our offer provides for a simultaneous start on withdrawal by both sides; agreement on a mutually acceptable timetable; and for the withdrawal to be accomplished quickly.

If North Vietnam wants to insist that it has no forces in South Vietnam, we will no longer debate the point—provided that its forces cease to be there, and that we have reliable assurances that they will not return.

The North Vietnamese delegates have been saying in Paris that political issues should be discussed along with military issues, and that there must be a political settlement in the South. We do not dispute this, but the military withdrawal involves outside forces, and can therefore be properly negotiated by North Vietnam and the United States, with the concurrence of its allies. The political settlement is an internal matter, which ought to be decided among the South Vietnamese themselves and not imposed by outside powers. However, if our presence at these political negotiations would be helpful, and if the South Vietnamese concerned agreed, we would be willing to participate, along with the representatives of Hanoi if that were also desired.

Recent statements by President Thieu have gone far toward opening the way to a political settlement. He has publicly declared his government's willingness to discuss a political solution with the National Liberation Front and has offered free elections. His was a dramatic step forward, a reasonable offer that could lead to a settlement. The South Vietnamese Government has offered to talk without preconditions. I believe that the other side should also be willing to talk without preconditions.

The South Vietnamese Government recognizes, as we do, that a settlement must permit all persons and groups that are prepared to renounce the use of force to participate freely in the political life of South Vietnam. To be effective, such a settlement would require two things: First, a process that would allow the South Vietnamese people to express their choice; and second, a guarantee that this process would be a fair one.

We do not insist on a particular form of guarantee. The important thing is that the guarantees should have the confidence of the South Vietnamese people, and that they

should be broad enough and strong enough to protect the interests of all major South Vietnamese groups.

This, then, is the outline of the settlement that we seek to negotiate in Paris. Its basic terms are very simple: Mutual withdrawal of non-South Vietnamese forces from South Vietnam, and free choice for the people of South Vietnam. I believe that the long-term interests of peace require that we insist on no less, and that the realities of the situation require that we seek no more.

PROGRAMS AND ALTERNATIVES

To make very concrete what I have said, I propose the following measures, which seem to me consistent with the principles of all parties. These proposals are made on the basis of full consultation with President Thieu.

As soon as agreement can be reached, all non-South Vietnamese forces would begin withdrawals from South Vietnam.

Over a period of twelve months, by agreed-upon stages, the major portions of all U.S., Allied, and other non-South Vietnamese forces would be withdrawn. At the end of this twelve month period, the remaining U.S., Allied and other non-South Vietnamese forces would move into designated base areas and would not engage in combat operations.

The remaining U.S. and Allied forces would move to complete their withdrawals as the remaining North Vietnamese forces were withdrawn and returned to North Vietnam.

An international supervisory body, acceptable to both sides, would be created for the purpose of verifying withdrawals, and for any other purposes agreed upon between the two sides.

This international body would begin operating in accordance with an agreed timetable, and would participate in arranging supervised ceasefires.

As soon as possible after the international body was functioning, elections would be held under agreed procedures and under the supervision of the international body.

Arrangements would be made for the earliest possible release of prisoners of war on both sides.

All parties would agree to observe the Geneva Accords of 1954 regarding Vietnam and Cambodia, and the Laos Accords of 1962.

I believe this proposal for peace is realistic, and takes account of the legitimate interests of all concerned. It is consistent with President Thieu's six points. It can accommodate the various programs put forth by the other side. We and the Government of South Vietnam are prepared to discuss its details with the other side. Secretary Rogers is now in Saigon and will be discussing with President Thieu how, together, we may put forward these proposed measures most usefully in Paris. He will, as well, be consulting with our other Asian allies on these measures while on his Asian trip. However, I would stress that these proposals are not offered on a take-it-or-leave-it basis. We are quite willing to consider other approaches consistent with our principles.

We are willing to talk about anybody's program—Hanoi's four points, and NLF's 10 points—provided it can be made consistent with the few basic principles I have set forth here.

Despite our disagreement with several of its points, we welcome the fact that the NLF has put forward its first comprehensive program. We are continuing to study it carefully. However, we cannot ignore the fact that immediately after the offer, the scale of enemy attacks stepped up and American casualties increased.

Let me make one point very clear. If the enemy wants peace with the United States, that is not the way to get it.

I have set forth a peace program tonight which is generous in its terms. I have indicated our willingness to consider other proposals. No greater mistake could be made than to confuse flexibility with weakness or being reasonable with lack of resolution. I must make clear, in all candor, that if the needless suffering continues, this will affect other decisions. Nobody has anything to gain by delay.

Reports from Hanoi indicate that the enemy has given up hope for a military victory in South Vietnam but is counting on a collapse of American will in the United States. They could make no greater error in judgment.

Let me be quite blunt. Our fighting men are not going to be worn down; our negotiators are not going to be talked down; our allies are not going to be let down.

I have seen the ugly face of war in Vietnam. I have visited the wounded in field hospitals—American boys, South Vietnamese boys, North Vietnamese boys. They were different in many ways—the color of their skins, their religions, their race. Some were enemies, some were friends.

But the differences were small compared with how they were alike. They were brave men and they were so young. Their lives—their dreams for the future had been shattered by a war over which they had no control.

With all of the moral authority of the office which I hold, I say that America could have no greater and prouder role than to help to end this war in a way which will bring nearer that day in which we can have a world order in which young men can grow up in peace and friendship.

I do not criticize those that disagree with me on the conduct of our peace negotiations. I do not ask unlimited patience from a people whose hopes for peace have too often been raised and cruelly dashed over the past four years.

I have tried to present the facts about Vietnam with complete honesty and I shall continue to do so in my reports to the American people.

Tonight, all I ask is that you consider these facts and, whatever our differences, that you support a program which can lead to a peace we can live with and a peace we can be proud of. Nothing could have a greater effect in convincing the enemy that he should negotiate in good faith than to see the American people united behind a generous and reasonable peace offer.

In my campaign for the Presidency, I pledged to end this war in a way that would increase our chances to win true and lasting peace in Vietnam, in the Pacific and in the world. I am determined to keep that pledge. If I fail to do so, I expect the American people to hold me accountable for that failure.

But while I will never raise false expectations, my deepest hope, as I speak to you tonight, is that we shall be able to look back on this day as that critical turning point when American initiative moved us off dead center and forward to the time when this war would be brought to an end and we could devote the unlimited energies and dedication of the American people to the challenges of peace.

THE 65TH BIRTHDAY ANNIVERSARY OF SENATOR JOHN J. WILLIAMS, OF DELAWARE

Mr. DIRKSEN. Mr. President, I think I should legislatively and judicially take note of the fact that tomorrow is the 65th birthday anniversary of the distinguished Senator from Delaware (Mr. WILLIAMS). He is serving his fourth term

in this body, and I believe the entire country and all the people are thoroughly familiar with his good work and what he has accomplished in the public cause and for the good of this Republic.

It is a little unfortunate, I think, that he has indicated that at the appropriate time he will retire from the public service, and that means at the end of his instant term, which is his fourth term.

Certainly, the country will miss him, and we shall miss him, also. But so long as he is here, I salute him, because he is the ranking Republican on the Committee on Finance, and therefore my leader.

In addition, I should observe that he has faithfully done his homework in a field which is abstruse at times and which others do not freely like to tackle, and that is the question of ceilings on expenditures, ceilings on employment, fair and equitable tax systems, and all the other things to which a person can give a lifetime of attention without also being encumbered with any other public responsibility.

So I salute the distinguished Senator from Delaware as he comes up to the threshold of his 65th birthday anniversary.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. MANSFIELD. Mr. President, I wish to join the distinguished minority leader in his tribute to the distinguished senior Senator from Delaware (Mr. WILLIAMS).

I must say, speaking nonpartisanly, that I am not happy that the Senator has seen fit not to run for reelection. During the period he has been a Member of this body, he has performed a distinct and much needed service down through the years, and I know from firsthand knowledge that sometimes it was under the most difficult circumstances.

I could not let this occasion pass without expressing publicly my respect and my affection for the distinguished Senator from Delaware and to acknowledge openly the many contributions he has made to the welfare of this body, Congress as a whole, and the Nation, as well. He has been a giant, and his departure from the Senate will leave a void which will be almost impossible to fill.

I express my high regard, my affection, and my respect for the "bulldog" of the Senate, who has performed so valuably and so adequately throughout the years of his service.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. SCOTT. Mr. President, representing so ably the First State of the Union, Delaware, and the only State which managed, by its promptitude and loyalty and adherence to the principles of union, to keep my State from having had that honor—from the First State comes one who is in many ways the first Senator, surely the first Senator in his services as a watchdog of the other branches under our system and of this legislative branch—a watchdog with teeth, I may add.

He has effectively, throughout all his service, managed to leave his imprint, or perhaps his teeth marks, upon legislative loopholes; and has, by the very pressure of his personality and of his integrity, succeeded in closing some of those loopholes, even against the best efforts of the otherwise disposed among us who sometimes did not see as clearly as he did the importance of these efforts.

I congratulate him on the threshold of his birthday I am sorry that he will not be a candidate again to succeed himself, because such a succession in the First State would be a foregone conclusion.

My congratulations to our distinguished Senator and best wishes to him always.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from Wisconsin.

Mr. PROXMIER. Mr. President, I cannot resist adding my voice to those of other friends of the Senator from Delaware. I have done this before, but he is such an outstanding Senator that I am most happy to be able to do so again.

I feel he is the one Member of this body who is its most able sentinel. I hope once again that this remarkable man will reconsider his decision to retire. I say that because none of the rest of us has had his persistence, grasp of the subject, willingness, and strong integrity to stand up again and again and make fights for a more ethical U.S. Senate and Congress. He is the one man who has been able to do this over the years, and he has done it with great effect.

I add my strong endorsement to the statement of the distinguished minority leader that the Senator from Delaware has a remarkable grasp of our complex tax structure. He has made a valuable contribution in that area.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield to the distinguished chairman of the Committee on Finance.

Mr. LONG. Mr. President, I wish to endorse the statements by Senators on both sides of the aisle about the ranking minority member of the Committee on Finance, the distinguished senior Senator from Delaware. To those statements I wish to add something that perhaps does not appear so clearly in the Record as it might. He is perhaps the most diligent as well as the most consistent Member of this body.

I say that because some years ago, when I first became the chairman of the Committee on Finance, I thought it might help to boost good attendance if a record were kept as to who showed up at each meeting and how long they were there. That record has been kept over a long period of time. It could be that some Senators would not like to have that record made public, but I know the Senator from Delaware would have no objection because frequently he is at the top of the list, notwithstanding his many other responsibilities. As chairman of the committee, I have frequently found it difficult to keep up with his attendance at committee meetings.

While he is a very convincing debater, he has never convinced me, as he has failed to convince a great number of other Senators, that he is doing the Nation a favor by insisting on retiring at the end of this term.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield to the distinguished Senator from Arkansas.

Mr. McCLELLAN. Mr. President, I wish to join my colleagues and extend congratulations and best wishes to the distinguished Senator from Delaware. It has been my pleasure to serve with him for a number of years. I share the regret and disappointment of all Members of this body in his decision to retire and not to seek reelection.

I know of no Senator with whom I have ever served who has set a higher example of steadfast integrity, diligence, dedication, and devotion to duty than has the senior Senator from Delaware, an example that each of us, and all who will become Members of this body in the future, may well emulate with great satisfaction and the assurance that in doing so we would distinguish ourselves as Members of this body.

Mr. DIRKSEN. Mr. President, I yield to the Senator from Tennessee.

Mr. GORE. Mr. President, it is my pleasure and also my opportunity—a rewarding opportunity—to serve on two distinguished committees with the able senior Senator from Delaware. His diligence and the degree of probity with which he approaches public questions, the easy equation of friendship, and the pleasant relationship he has extended to me have made of this joint service a very satisfying experience.

I hope he will reconsider his decision—and I say that across the aisle—for the senior Senator from Delaware performs a duty in the Senate and in this country which is widely recognized and which is important. He has carved for himself a role and a niche. His service here cannot be easily replaced. It would take the most diligent of Senators a long while to develop the technique, the knowledge, and the public confidence in this particular sphere which is enjoyed by the senior Senator from Delaware.

I join in extending congratulations upon his distinguished service, but I wish to voice the deepest of personal regret to see its end in prospect.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. FANNIN. Mr. President, I wish to join Senators in congratulating the distinguished senior Senator from Delaware.

Shortly after I came to the Senate, the distinguished majority leader was talking to me about our dear friend. He said, "I want you to know he does his homework, and that is why he is so effective, and his accomplishments are so marked."

I consider the distinguished Senator from Delaware to be one of the most respected men in America today. He is always consulted about pending legislation

and has tremendous influence on all his colleagues. Not only is he highly regarded by all of us in this Chamber but he is so knowledgeable that over the years he has gained the respect of the Nation.

I wish him well. I am sorry he is going to leave us, but I know he will be back to visit us often. We shall look forward to his visits. In the meantime, we shall have him with us for a few more months.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. SPARKMAN. Mr. President, I join Senators in their statements about the distinguished senior Senator from Delaware. I would like to use the term "memorialize him," but it has too doleful a connotation.

I have had the pleasure of serving for a long time with JOHN WILLIAMS on the Committee on Foreign Relations. I have had many connections with him. I have supported him in various things he has done here more often than most people would think. I pay tribute to him, especially for his active interest in trying to get a good financing system for home mortgages. No Senator has worked more diligently than he has. He knows that from time to time we have adopted programs that he has proposed or amendments he has offered.

JOHN WILLIAMS is an unusual man. I do not know whether I should say "unusual" or not. One knows pretty well what his stand is going to be. It is always going to be one that is what he considers to be right, regardless of where the chips may fall.

I spoke in his State recently, and I saw a good many of his friends. When I came back, I said, "A good many of your friends up there are expressing the hope that you will reconsider."

JOHN told me that he was not going to reconsider—but I just wonder. It seems to me it is going to be a great loss to the Senate if JOHN WILLIAMS does leave us. It would bring cheer to a great many if he would reconsider his decision and just stay here.

Mr. HANSEN. Mr. President, I wish to add my congratulations and best wishes to the distinguished senior Senator from Delaware (Mr. WILLIAMS).

As a relative newcomer to this august body, it has been my pleasure and privilege to listen closely to his counsel and to observe his actions, his industry, and his diligence in searching for the truth. He always tries to hear all sides of an argument before he makes up his mind.

I believe that the distinguished Senator from Delaware has been an effective and articulate spokesman for the quiet, self-supporting, hard-working, and typical taxpaying American. This, of course, includes the overwhelming majority of our people. He has been diligent in his search for economy in government.

It would be difficult for anyone to attempt to put a dollar sign on the contributions JOHN WILLIAMS has made through his never-ending search for an end to wastefulness and graft and for economy, or to assess how much he has contributed to this country. A great many

things will be said about him. I know that all of us will be of one accord, though, in expressing our regret that he has chosen voluntarily, in the prime of life, to leave this body.

I have tried unsuccessfully to persuade him that he should not take this step, a step which all his colleagues view with real consternation and dismay. Nevertheless, I know that he is determined to practice what he has been preaching. He has said he believes that no man should serve after reaching the age of 70.

If he adds another 6 years of service to this body, he reaches the conclusion that he cannot carry on and keep faith with the utterances he has been making.

I just say, and say it sadly, that he will be missed more than he knows as a most distinguished and highly articulate spokesman for America.

Mr. ALLEN. Mr. President, perhaps it is presumptuous of the junior Senator from Alabama to pay tribute to the distinguished senior Senator from Delaware, but I could not let pass this opportunity to speak in tribute to him without availing myself of it.

Perhaps it is like the fable of the lion and the mouse. Possibly I can be of no service to the distinguished Senator from Delaware, but I believe that a man is judged not only by his acts, by the company he keeps, the books he reads, or the music to which he listens, but I believe he is also judged by the heroes that he has.

Observing the distinguished senior Senator from Delaware from afar, as I have, for the past decade or more, I must say that he is my idea of a real statesman.

Since I came to the Senate, he has continued to be one of my heroes. I admire him for being a watchdog of the Treasury. I admire him for the never-ending battle he has waged for economy and for honesty in Government.

Thus, I avail myself of this opportunity to pay tribute to him as an example for the entire country.

Today, our people are frustrated. They are disillusioned. For good reason, they lack confidence in some of our public figures; but the senior Senator from Delaware helps restore that confidence. Not only does he set an example for all of his Senate colleagues to emulate, but for the entire country he sets an example of high-minded public service, which serves this body in good stead.

Mr. President, I believe that I am the only new Senator of the "class" of the 91st Congress in the Chamber at this moment, so certainly, speaking for all the new Senators, as well as myself, and speaking also for the people of Alabama who admire this great man, I pay tribute to him as an outstanding public servant.

When the roll is called on a vote, I find that the senior Senator from Vermont (Mr. AIKEN) is the only Senator ahead of me on the list of Senators. I always enjoy listening to how he votes, possibly in order to help to guide me in my voting. Sometimes he is not here. I am sorry that the senior Senator from Delaware (Mr. WILLIAMS) comes as far down on the roll-

call list as he does. I believe that if he voted up in the AIKENS, the ALLENS, and the ALLOTTS, possibly his vote might influence other Members of the Senate in casting their votes, and on many occasions they might cast a better and a sounder vote in the Senate.

Thus, I hope that the distinguished senior Senator from Delaware (Mr. WILLIAMS) will reconsider the decision he has made. Although it has been my observation that he does not often change his mind, I hope that this time will be an exception. If he does not, he will leave some mighty big shoes to fill. He is going to leave an example of dedicated public service that it would be well for all of us to emulate as an example of the kind of dedicated public service which the people of the country admire and appreciate.

I am very happy to pay this tribute to my good friend, the senior Senator from Delaware (Mr. WILLIAMS).

Mr. BENNETT. Mr. President, I have a special reason for rising at this point because I have enjoyed a special privilege. Over the past 16 years, I have sat with the Senator from Delaware on the Committee on Finance. I started out, literally not figuratively, to the left of him, and I have slowly moved up until I now sit just to his left on the committee.

He has been an inspiration to me, both in his knowledge of the legislation we have worked on and his steadfastness in adhering to the principles which he supports.

As one of those who have ignored his suggestion that a man who passes the age of 70 should give up his seat in the Senate, I can still agree with his decision because I know that he has a delightful wife, and the lack of opportunity to spend the rest of his life in the more pleasant sibilities which have kept them separated over much of his period of service to his country has been a trial to him. Of course, he and Mrs. Williams suffer from the fact that Delaware is too close to Washington. We who represent States at a greater distance can keep our wives at our sides, but it is too much of a temptation to keep Mrs. Williams home to take care of the home problems; and JOHN and she have therefore been deprived of that association for so long that I agree that he is entitled to spend the rest of his life in the more pleasant company that she can provide.

I have appreciated everything he has done for me, and I certainly wish him every possible success and enjoyment in the increased number of years he is saving for himself than would be the case if he ran again. But in the years ahead, assuming that I can continue to serve out my term, I hope he will come back every once in awhile so that I can have the further advantage of his advice as I take his place in the Committee on Finance.

Mr. AIKEN. Mr. President, I have just run into another conflict of interest situation. I do not know whether to congratulate the Senator from Delaware for being born, because, after all, he had nothing to do about that, anyway, or whether to condemn him for voluntarily

leaving the Senate. He could have done something about that, but he chose not to. So I have mixed feelings about him at this point.

But I will say that if he had not been born, the country would not have been so well off as it is today; and I am afraid the country will not be so well off after he leaves the Senate. But my colleagues understand why my praise of him could not be as lavish as it would be if he were going to stay with us another 24 years. However, I confess here and now that he has been my guide as far as the finances of our country are concerned, and I do not want him to leave the Senate next year.

Mr. COOPER. Mr. President, it is difficult for anyone to speak about Senator JOHN WILLIAMS of Delaware. All that he has done in the Senate and in his own life speaks better than anyone could speak of him.

In 1947, when I was elected for a 2-year term in the Senate and came here, the first Senator I met was the newly elected Senator from Delaware, JOHN WILLIAMS. Of the 50 Republicans, as I recall, in the Senate at that time, only three are here now—Senator AIKEN, Senator MILTON YOUNG, and Senator JOHN WILLIAMS.

One of the great privileges of my stay here at various times has been my association with Senator WILLIAMS. In the last 3 years it has been deepened by the fact that I sit next to him, and we have had opportunity to talk not only about legislation, but about many other matters which concern our country and our experience in life.

Someone said when JOHN WILLIAMS announced that he would not be a candidate again that no one could calculate the value of JOHN WILLIAMS to this country. If we attempted to place it in terms of dollars, no one could calculate the savings he has brought to our Government and people from his initiatives toward economy. But there are other values which cannot be estimated such as the value of his integrity and the value of his fight for honesty and integrity in areas of our Government. He always maintained his sense of justice, fairness, and simplicity.

I know that every Senator is, and I believe the people of his country are, sad because JOHN WILLIAMS has made up his mind that he will not come back to the Senate; but his work and his life will not be forgotten. His values will continue, and the country will not forget him.

Mr. BYRD of Virginia. Mr. President, I salute the distinguished senior Senator from Delaware. I join my colleagues this morning in again urging him to seek reelection to the Senate. I end by saying that in his decision to leave the Senate the losers are the American people, because, in my judgment, he is one of the most dedicated officials in the Halls of the Congress.

Mr. CURTIS. Mr. President, I join with many other Senators in wishing a happy birthday to our colleague, the Senator from Delaware (Mr. WILLIAMS). I understand that tomorrow is his 65th birthday.

In my opinion, Senator WILLIAMS is

one of our greatest public servants on the American scene today. His courage, his integrity, his diligence, his stick-to-it-iveness, and his willingness to do hard work have made him an invaluable Member of the U.S. Senate. His very presence in the Senate has been a force for good. He has been a protector, not only of the economic interests of the U.S. Government, but of our Government as an institution and our country as a country of virtue, integrity, and obedience to the law.

On another occasion, I expressed my great regret that Senator WILLIAMS had decided to retire at the end of this term. I shall not repeat that regret, because it appears that such urgings are futile. I do hope that he and his lovely family will have a very happy day tomorrow, and that he will enjoy many more birthdays of health and happiness. It is my hope that 40 years from tomorrow, he can get out the CONGRESSIONAL RECORD for this, the 16th day of May 1969, and read what his friends and colleagues said about him.

We wish him happiness and the very best.

Mr. BOGGS. Mr. President, I wish to congratulate my colleague, the senior Senator from Delaware, on his birthday anniversary tomorrow.

For more than 22 years JOHN WILLIAMS has served in the Senate, bringing great distinction to Delaware and the Nation. It has been a privilege for me personally to serve with him; and I want now to extend to him my heartiest best wishes for many more happy birthdays.

Mr. KENNEDY. Mr. President, I want to join with my colleagues in paying tribute to the Senator from Delaware on the occasion of his 65th birthday tomorrow and also to express regret that the next Congress will, by the voluntary action of Senator WILLIAMS, be deprived of his strong leadership in the area of fiscal responsibility.

Other Senators, not present this afternoon in the Chamber, will say, as I do, that, although they have not always agreed with the Senator from Delaware on matters pending before the Senate, or perhaps with his basic political philosophy, they have admired his knowledge of the Senate rules and his insight into their use in Senate debate. His preparation is scholarly when he speaks and the Senate is always better informed when he finishes. The knowledge that Senator WILLIAMS might raise questions has made Senators more diligent in their preparation, when fiscal matters have come before this body.

I just want to say, Mr. President, that, in my opinion, Senator WILLIAMS has brought credit to this Chamber by his service here and his presence will be greatly missed.

Mr. WILLIAMS of Delaware. Mr. President, seldom does the Senate find one of its Members without adequate words to express himself, but I must say that the mere expression of thanks for the many kind statements made this morning does not seem adequate. I can only say to my fine colleagues that in making my deci-

sion there were many problems to be considered.

As Senators know, for years I have advocated an age limit for service in the judiciary and in the legislative branch. I am a firm believer that a man should live by the rules he lays down for others. At the same time I wish to assure Senators that while I have announced that I will not be a candidate for reelection—and that decision is final—this does not in any sense mean that I am retiring from an active interest in public affairs. I expect to be an active citizen for many years and to take part in community and government affairs, and I hope I shall be able to make some contribution to the State and to the country to which I owe so much.

Before I came to the Senate I was with my brothers in business. We had an active career together for 24 years. Then I was elected to the U.S. Senate in 1946. When I complete this term I shall have completed 24 years as a public servant in the Senate. I am leaving the Senate, and I am going to start one more career. I shall not go into details now, but I plan on one more career of 24 years of active duty, following which, and only then, will I retire and take life easy.

Again I thank all Senators for their kind remarks. I hope I can live up to the tributes.

ADDRESS BY GEN. JOHN P. MCCONNELL, CHIEF OF STAFF, U.S. AIR FORCE

Mr. McCLELLAN. Mr. President, on Wednesday evening of this week—May 14th—I had the pleasure of attending the 51st annual dinner meeting of the American Ordnance Association which was held at the Washington Hilton Hotel here in the Nation's Capital.

On this occasion, the association presented to Gen. John P. McConnell, Chief of Staff, U.S. Air Force, its Gen. Henry H. Arnold Gold Medal Award "in appreciation of outstanding service to the national defense of the United States." I ask unanimous consent that a copy of the citation be inserted in the RECORD at this point as a part of my remarks.

There being no objection, the citation was ordered to be printed in the RECORD, as follows:

CITATION TO GEN. JOHN P. MCCONNELL

The American Ordnance Association, in appreciation of outstanding service to the national defense of the United States, awards its General of the Air Force Henry H. Arnold Gold Medal to General J. P. McConnell, Chief of Staff, United States Air Force.

Staunch patriot and inspired leader, General McConnell has distinguished himself by exceptional capability in the office of Air Force Chief of Staff, his latest in a long and illustrious career of service in defense of the United States. His outstanding leadership and management abilities have been preeminently displayed under the trying conditions of the Vietnamese conflict.

His personal involvement with our forces in Vietnam has demonstrated his deep commitment to the men he leads. During his visitations to that beleaguered country he has clearly manifested the dedication to the human element which is so vital to the outcome of any conflict.

Through General McConnell's management of Air Force personnel and materiel, the living and working conditions of individual Air Force members have been improved, greatly increasing the defensive capabilities of the Nation.

The singularly distinctive accomplishments of General McConnell have significantly strengthened our over-all defense posture. His achievements reflect the highest standards of service in defense of our country.

President.

Executive Vice President.

WASHINGTON, D.C., May 14, 1969.

Mr. McCLELLAN. Mr. President, General McConnell is a native of Arkansas and a long-time personal friend, and I was indeed proud to see him receive this distinguished recognition. In accepting the award, General McConnell gave an excellent address in which he discussed some of the critical problems of our day, particularly as they relate to our military strength, national defense, and security. I was greatly impressed with the logic and wisdom of his views. I think what he said is very instructive and persuasive, especially as related to some current vital and controversial issues now being debated and considered in national affairs.

I think that every Member of Congress and all interested citizens should have an opportunity to read his remarks. Accordingly, I ask unanimous consent that his address be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY GEN. JOHN P. MCCONNELL, CHIEF OF STAFF, U.S. AIR FORCE, AT THE 51ST ANNUAL DINNER MEETING, AMERICAN ORDNANCE ASSOCIATION

I am greatly honored to receive the General Henry H. Arnold Award of your Association. This medal holds special significance for me because it is a symbol of the vital contributions to the development of airpower made by the man for whom it is named.

In addition, this award is a reminder of General Arnold's conviction that military airpower is dependent upon what he called "the air potential provided by industry." In fact, in his final report to the Secretary of War in 1945, he was quite specific in advocating close and harmonious contact between the Air Force and industry. I share that conviction, and if my acceptance of the Arnold Award further identifies me with the many productive efforts of the so-called "military-industrial complex," I am proud of that association as well as grateful for the honor you have bestowed on me.

I am especially pleased to join you tonight at your anniversary which marks a half century of achievement in the interest of national security. This record is compelling proof of your dedication to the Association's objective of "scientific and industrial preparedness for the common defense." I want to assure you that we in the Air Force value our participation in the defense activities Association.

As you proceed with your work, the prevailing attitude toward defense-oriented industries will doubtless continue to be somewhat critical, at least for the foreseeable future. In my opinion, this attitude does not fully reflect a realistic appraisal of either the threat to our country or the proven

performance of the military-industrial team in helping to meet that threat.

The critics of that team like to take one sentence from the late General Eisenhower's farewell address to the American people to support their allegations. And this is the quotation: "In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex." Unfortunately, it is not often realized that this quotation is taken out of context. In the paragraph preceding that statement, General Eisenhower talked about the growth of the military establishment and a large arms industry as something new in the American experience. But he emphasized, "We recognize the imperative need for this development." And, preceding that, he stated, "A vital element in keeping the peace is our military establishment. Our arms must be mighty, ready for instant action, so that no potential aggressor may be tempted to risk his own destruction." In fact, General Eisenhower realized better than almost anyone else that the military strength of this country, as an instrument of political influence, must be attributed primarily to the efforts and contributions of the military-industrial partnership.

At any rate—and thanks in large part, I am sure, to the ladies present—you are to be commended for bearing up so cheerfully under criticisms that seem to be the natural lot of the management echelons in the defense industry and in the military as well. On this score, I think we can all agree that constructive criticism should always be welcomed when concerned with a problem as important and complex as defense preparedness. We have a greater need for suggestions that can help us than for unqualified praise that could make us complacent.

Much of the criticism directed toward both the military and the defense industry is being aimed at what are claimed to be unrealistic predictions regarding the time and cost involved in developing and deploying new weapon systems. Without doubt, some of our forecasting difficulties can be traced to errors that are bound to occur whenever human judgment is involved. I am confident that we are continually improving our means for avoiding or detecting such errors and for correcting them to the best of our ability. By all odds, however, the most frequent and major causes of forecasting error have stemmed from our mutual problem of trying to anticipate future events and developments.

It seems to me that many of the arguments now being raised over defense issues tend to ignore the unique environment of uncertainty and risk in which both the defense industry and the military must operate. I am certain that most of the participants in the current debates are fully aware that it takes some period of time to bring a modern weapon system from the drawing board to operational readiness. But there are two points that are frequently obscured in the heat and smoke of debate. One is the fact that our success in keeping leadtimes and costs within predictions is largely dependent on the accuracy of our forecasts of the future. The other is the need to adapt to change during the intervening years of the leadtime period.

As I have stated repeatedly in discussing our planning for the future, there is one factor which we cannot plan, and that is the future itself. We are forced, therefore, to make certain assumptions which are based primarily on past experiences and present trends. On that basis we try to project our requirements, to devise systems to satisfy those requirements, and to produce and deploy such systems within predicted leadtimes and costs.

For a number of reasons, this is a very

frustrating process. The fact that we have witnessed so many dramatic and unpredictable events in recent years is proof that it is virtually impossible to anticipate precisely the world environment and military requirements some five to ten years from now. Still, we must attempt to do so in order to allow for the leadtime required to develop and deploy a modern aerospace weapon system. Our main problem here is that our planning for the future is subject to a variety of unknown and variable factors over which we have little or no control.

Several years ago at an AOA Defense Preparedness Meeting in Los Angeles, I discussed some unpredictable political, military and technological developments that have a profound impact on our planning. The same factors obtain today and are perhaps even more influential in compounding the complexity of defining future military requirements and predicting leadtimes and costs. For this reason, it may be well to reiterate briefly some of the most significant factors that contribute to forecasting errors.

In the first place, political developments continue to bring about major changes in the international power balance and the alignment of nations. We have seen this repeatedly in recent years as nations gain added independence and adopt political attitudes and alliances which do not conform to the typical patterns of the post-war bipolar world.

Wherever we look there are potential trouble spots, brewing with discontent and violence. We must also recognize a growing trend in some developing nations toward the use of subversion, insurgency and even military force to gain political power. What is important to us in trying to predict the future is the obvious fact that there is no reliable way of forecasting the actions of other nations and their leaders in a global atmosphere of constant change. At the same time, many if not most of these potential developments will have a direct bearing on our national interests. They are, therefore, likely to compel us to take some action, either for our own protection or that of a friendly nation to which we have committed our assistance.

Closely related is a second area of unknowns. I am referring to the continuing prospect of military incidents and unprovoked acts of armed aggression that are likely to involve us in one way or another. As in the past, it is virtually impossible to predict when and where they will occur and to plan specific forces and systems to meet all future contingencies.

Nor are unpredictable military threats to the security of the Free World limited to acts of local aggression and conventional wars. The present controversy over the growth in nuclear capability of two or our potential adversaries is evidence of our current concern about expanding nuclear threats. Looking still further ahead, we must be prepared to deal with the problems that may result from increasing membership in the so-called nuclear club. In spite of our best diplomatic efforts, it is possible that the Nuclear Nonproliferation Treaty will not be universally accepted.

There is a third area of unknown and unpredictable factors, namely, major technological developments. Such developments have already made a significant impact on our own society and, indeed, on the whole pattern of international relations. And I am convinced that technology will continue to revolutionize both the means and techniques of warfare.

As far as our own efforts are concerned, we can make fairly good forecasts of the advances we expect to achieve in the next few years, but there is no reliable way of predicting the type of discoveries or new

phenomena that may lead to dramatic technological breakthroughs.

On a related point, our scientific-military-industrial team is experiencing a mounting problem in its attempts to incorporate new technology into systems already in the development cycle. Although this problem is one of the prime reasons for increased costs and production delays, we have no choice but to make every effort to prevent our weapon systems from being obsolete by the time they become operational.

Even more difficult to anticipate are the technological developments of potential adversaries, because their efforts normally are not open for international review. A major breakthrough on their part could seriously threaten the present balance of military power. For example, if the Soviets—through the application of some new discovery—should succeed in developing a highly effective defense against our ballistic missiles, they could easily gain an advantage comparable to our own atomic monopoly after World War II. Since the bulk of our own deterrent force is comprised of missiles, and will continue to be so for the foreseeable future, a Soviet breakthrough in missile defense could seriously impair the credibility of our strategic deterrent.

We know that the Soviets have maintained an intensive research and development effort in the field of anti-ballistic missile defense for many years. We also know that they have deployed a limited ABM system in the Moscow area. Even though their present system may be less than perfect, I have no doubt that the Soviets are accumulating a wealth of experience in missile-defense technology and will continue to focus major attention on ABM developments.

For this reason alone, I consider it imperative that we waste no time in advancing our own experience in missile-defense technology. The most effective and, in the end, the most economical way of doing so is to proceed with an ABM system of our own. But this is only one reason why I strongly support the Safeguard program proposed by President Nixon. The primary reason is the crucial need to preserve the credibility of our deterrent by protecting a vital component of our strategic force against a surprise attack from any quarter.

There is another area of unknowns that affects the system acquisition process, although it may be argued that it is not wholly unpredictable. I am referring to economic developments and, in particular, to spiraling inflation and the increasing demands for government funds to satisfy urgent domestic needs. Of course, the problem of inflation is generally well known—certainly at the household level and in the marketplace of trade in consumer goods and services. I think it is unfortunate that the same degree of understanding about inflation has not been applied to the weapons acquisition process. As the members of this Association know very well, inflation has become an almost daily fact of life, not only in estimating the costs of producing a weapon system, but also in completing a contractual obligation.

To illustrate the effect of inflation, I want to point out that the Air Force budget for Fiscal Year 1964 was under 20 billion dollars. Our budget request for Fiscal Year 1970 is nearly 25.5 billion dollars. On the surface, that 5.5 billion dollar rise may appear to indicate that the Air Force next year is seeking to increase its purchase of goods and services by nearly 30 percent above the 1964 level. But if we take into account the decrease in purchasing power of the dollar since 1964 we find that our 1970 budget is about the same as it was six years ago. In addition, the Air Force is carrying about 6.5 billion dollars in Vietnam expenditures on its back. That 6.5 billion in 1964 dollars would be about 5.2

billion. So if it were not for the Vietnam costs, our incremental budget for 1970 as measured in 1964 dollars would be reduced to less than 15 billion.

The problem of allocating available national resources to satisfy both military and domestic requirements is too complex for me to discuss in detail. There is a related point, however, that should be brought out. Any substantial reduction of funds for military needs would require an extensive reorientation of defense programs. This would undoubtedly mean additional changes in predicted weapon system costs and delivery schedules. Such a decision, moreover, could have serious implications for our future national security.

So much for those factors in our forecasting problem over which we have little or no control. The question now is: What can we do about the controllable portion of the problem?

Perhaps at the outset we should spell out the tasks that must be achieved through our combined efforts. In my opinion, our most important joint tasks are: first, to insure the prompt military application of those scientific and technological developments that are essential to our national security; and second, to produce what we need efficiently and at the lowest reasonable cost. A conditioning factor in performing these tasks is the continuing need to assure a high degree of flexibility in system development. We must be able to adapt our weapon systems to changing military requirements and to introduce new technology without incurring excessive delays and cost increases.

From a military standpoint, we must recognize that there is still much room for additional refinement of our analytic and planning techniques. In particular, we must do a better job of deciding precisely what we need, how complex it has to be, and how soon we have to have it. The validity of these decisions in a climate of limited and closely controlled resources is a critical factor, not only in minimizing costs but also in achieving the essential increases in the combat effectiveness of our forces.

With regard to our joint efforts in developing and producing weapon systems and their components, I believe that our success will largely depend on the quality of management throughout the scientific-industrial-military community. We can rightfully claim substantial progress in improving that quality, but there is some evidence that we are not improving fast enough. I have been told, for example, that the total fund of knowledge in the natural sciences and engineering is being doubled every three to five years. By contrast, in the field of management science—which governs the effective application of our assets—it is taking us some 50 years to double our knowledge. If this is true, it underscores the requirement for placing increased emphasis on the study and improvement of management techniques that apply to weapons development.

As for analyzing past progress, we should examine closely the experience we have gained from the number of new management approaches that have been applied and evaluated over the past several years. And as for the future, I fully support the fresh approaches outlined by Secretary of the Air Force Robert C. Seamans in his remarks to your St. Louis chapter a few weeks ago.

Yet with all the innovative improvements that we have made and will continue to make, I believe we must recognize that these devices are merely tools of management, not substitutes for management. Unless we use them wisely and modify them expeditiously, we can expect to fall behind the pace in defense activity. The old rule that you "adapt or perish" is not alone the law of the jungle. It also applies to all the critical aspects

of management that are aimed at fulfilling our national security requirements.

But regardless of our progress in this direction, we—and hopefully, our critics—should acknowledge that there are practical limitations to the level of management efficiency that we can expect to achieve. To be 100 percent efficient, we would always have to be able to demonstrate that we are using our last resource to satisfy our final requirements. With the very survival of our country at stake, we must do all we can to retain support for at least a reasonable margin of overplanning. The real aim is not 100 percent efficiency, but 100 percent effectiveness.

I am confident that I share with all of you the conviction that our joint efforts can be developed and applied most effectively within the highly creative environment of our free society. Knowing as I do the qualities of integrity, talent and dedication that are represented in AOA and other defense-oriented organizations, I am convinced that our national survival and continued progress are in good hands.

It has been a pleasure to meet with you tonight, and I hope that my comments will contribute to a better understanding of our mutual efforts. Again, I wish to express my deepest appreciation for the honor accorded me by the award of the General Henry H. Arnold Medal. My best wishes to all of you for continued success in your activities throughout your next half century of progress.

THE FINANCIAL PROBLEMS OF TAX-SUPPORTED COLLEGES AND UNIVERSITIES

Mr. McCLELLAN. Mr. President, one of the plaguing problems of colleges and universities requiring attention is their financial plight. Rising costs of operation must be met if the colleges are to function properly and the high quality of education maintained.

An editorial in the Fort Smith, Ark., Times Record, discussing this expense, made the point that while there are increasing demands by colleges for money, taxpayers also are faced with increasing financial burdens.

The editorial mentions several ways for tax-supported colleges to provide some self-help in the solution of their financial problems so the taxpayer may be relieved of part of the heavier burden that he is called on to bear.

I ask unanimous consent that the editorial entitled "Crisis at the Colleges? It's a 'Crisis' for the Taxpayer, Too," published in the Fort Smith Times Record of May 2, 1969, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

"CRISIS" AT THE COLLEGES? IT'S A CRISIS FOR THE TAXPAYERS, TOO

While talk of a "financial crisis" at the state colleges and universities continues, as an urge for increasing the sales tax by one-third, it seems to stress a need for a look over the entire situation.

Nobody, of course, wants to reduce the quality of higher education in the state. But there are several angles to a fund need (which exists everywhere) and "more tax money" isn't the only one.

It would seem a good time for the institutions to look carefully over their programs to see if there are courses or other costs which add little to the quality of education but

do mean a considerable boost in expenditures. And if so, cut them out.

It's possible a good look at administrative costs would be in order, as to whether there are considerable expenditures which mean little to education itself and which could be eliminated.

And it's possible a new look is needed at the tuition issue—whether tuition should be increased at the state-supported institutions.

It's fairly low at all the Arkansas schools. Granted that it's desirable that it should stay within reason—but it could be that the increases which have been made in tuition do not match those in costs or in other expenses and that some raises there are advisable—for students from Arkansas, possibly, and certainly for students from outside the state (whose families have contributed no tax support to the institutions).

Any proposal about tuition at once raises remarks about "the poor" and "closing the door of opportunity"—which don't seem very valid in the light of the numerous grants, loans, and other aids available to make higher education available for just about any qualified student.

For the others, perhaps it is advisable for somewhat higher payments to be made by those using the educational facilities, at the same time greater and greater support is being provided by the taxpayers at large.

We suppose everyone understands the pressing and increasing demands which have been made in recent years on the colleges and universities. The need for more money each year is evident.

But the taxpayers also face heavily increasing demands. A tremendous share of their incomes is going into tax payment now. And their individual costs each year are rapidly going up, too. A one-third boost in the sales tax would add an additional heavy load.

There ought to be a happy medium to the problem. And the finding of the happy medium is partly the job of the institutions.

A general look over the whole situation—and the possible source of economies and tuition revenue—would seem to be well in order. The taxpayer is hard hit, already.

Mr. GORE. Mr. President, I ask unanimous consent to proceed for 6 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FORTAS RESIGNATION

Mr. GORE. Mr. President, our Republic is having troubled days. Indeed, these are vexacious times for the American people. The last few days have been particularly trying for the senior Senator from Tennessee. For he has seen one of his trusted friends fall upon ill fortune and be forced by either pressure or by his own conscience to take the unprecedented action in our history of resigning as a Justice of the U.S. Supreme Court.

The resignation of Justice Fortas was, under the circumstances, a source of relief for the senior Senator from Tennessee. It also removed the degree of restraint necessarily incumbent upon a Senator, it would appear, for so long as there appeared a distinct possibility of an impeachment procedure. Now that the resignation has been made and Mr. Fortas has written a letter of explanation, the senior Senator from Tennessee is free to express some views and feels the duty so to do.

On the basis of his own explanation, serious improprieties in conduct for a

Justice of our highest court are clear. It is difficult to understand how Mr. Fortas, possessed as he is of such keen perception and of such an awareness of the strict code of conduct imposed by both principle and practice upon a judge, could have failed to see a digression from propriety, or, if seen, could have yielded even temporarily to the temptation. The canons of the American Bar Association, which holds that a judge must not only be innocent of wrongdoing but must hold himself above reproach, were, we may be sure, clear to this man of eminent legal attainment and keen powers of discernment. However severe the standard of conduct for a judge, particularly a Justice of our highest court, such standards are necessary for the maintenance of confidence in our system of justice.

There is deep sadness that one possessed of such brilliant talent and at the same time one whose life is filled with public good will and many, many private charities and one who has stood many times without pay as a champion of the lowly and unpossessed, should now be fallen from grace. Compassion would indicate that the matter should now be quieted.

But, Mr. President, the public interest must be paramount. Public confidence in institutions of government is necessary for the efficacy, if not the very survival, of our system of self-government. And public confidence in the U.S. Supreme Court, in the opinion of the senior Senator from Tennessee, has been severely shaken by the Fortas affair. Some have expressed the view that the resignation of Mr. Fortas will now repair that damage. This would surely be a welcomed conclusion, and perhaps it is partially true; let us hope to a large degree. But the resignation, praiseworthy as it may be under the circumstances, does not suffice.

We have seen the U.S. Attorney General and the Department of Justice giving and inspiring reports about "other information" widely described in the public media as "more serious" than has been divulged. No information other than the improprieties which have been made public are known to the senior Senator from Tennessee. It is his hope that no more serious information exists. But, Mr. President, the cloud that has partially been lifted from the Supreme Court by the resignation of Mr. Fortas cannot be lifted entirely from the Court or lifted from Mr. Fortas himself unless the rumors, the whispers, the leaks, the contradictory accounts of this unfortunate affair are fully disclosed. If for no other reason, justice to Mr. Fortas would require no less.

But, Mr. President, there are other reasons. A cloud needs to be lifted from the Department of Justice, too. For this Capitol is rife with rumors of the practice of intimidation—some even say blackmail. The senior Senator from Tennessee, let it be repeated, does not know the contents of the files on Mr. Fortas, nor does he know the extent to which Attorney General John N. Mitchell or others may have engaged in activities

which may or may not have transgressed the separation of powers, or which may or may not have amounted to intimidation and threats, on the one hand, or concealment of information to which the public is entitled, on the other. Suspicion in all these regards is rife in this Capitol.

Though such information has not been made available to the senior Senator from Tennessee, other Senators have privately asserted their knowledge of the contents of the files. Certain publications appear to have had access to them.

The senior Senator from Tennessee calls upon President Nixon and Attorney General John N. Mitchell to open the files. Painful as this may be, the public interest requires it because public confidence in both the Court and the Department of Justice has been shaken. This cloud can be cleared only with disclosure.

Full disclosure should be forthcoming immediately by the Justice Department both with respect to any other untoward acts or conduct of Justice Fortas, if any, and with respect to the acts of the Department of Justice and the President in this affair. An investigation by the Senate should not be necessary to produce such disclosure. But unless such a public disclosure is soon forthcoming, I call upon the Judiciary Committee of the U.S. Senate to conduct a searching public inquiry to clear the air of doubts, rumors, and suspicions. Justice to the Justice Department, justice to Justice Fortas, and, most important of all, confidence in our Government require it.

I should like to read, Mr. President, a portion of an editorial entitled "The Fortas Tragedy," published in today's Washington Post. It begins as follows:

Even on the basis of his own explanation, there were grave improprieties in the conduct of Mr. Justice Fortas which made his resignation from the Supreme Court imperative. Whether there was worse than impropriety, as the Justice Department has hinted, is not yet determinable with any certainty. His resignation lifts a shadow from the Court. That shadow is not yet lifted from Justice Fortas himself, and whether it will be, and to what extent, is something we cannot judge while there are so many contradictory accounts of this affair and so few hard facts. Ultimately, the contradictions will have to be resolved—by the Justice Department making public what it has been privately whispering around town, by Congress if Justice is not forthcoming, perhaps by Mr. Fortas himself. For today, it is enough to say that the outcome is tragic in the true dramatic sense of the term for it entails the destruction of a man of great stature and great promise. What we see now is the Abe Fortas of the Wolfson affair. But the political obituaries will have to take note of another Abe Fortas and of aspects of this man's past worth remembering and weighing in the balance against the disgrace of his downfall. If cupidity and imprudence led him to take some clients and cases he should not have taken, it is nevertheless true that idealism, courage and magnanimity led him to take some cases which self-interest might have led him to reject.

Mr. President, the public interest requires disclosures such as I have mentioned.

Mr. McCARTHY. Mr. President, I commend the distinguished senior Senator from Tennessee for having raised a most important question.

A case involving the Supreme Court Justices is not one which under the Constitution is one for the Justice Department alone to settle.

One of the most important and special constitutional responsibilities of the Senate, in addition to that of foreign policy, is to pass on men who are appointed to the U.S. courts, and most importantly on appointments to the Supreme Court itself.

I agree with the Senator from Tennessee when he states that it is not enough simply to say that the resignation takes care of the current case. The Senate must be concerned about the operations of the Court itself. It must be concerned about the operation of the Department of Justice in its relation to the Court.

About 8 months ago the Senate was asked to approve the appointment of Mr. Fortas as Chief Justice of the Supreme Court. The information now public was not given to us then. We must be concerned about the process by which nominees for the Court are presented to us.

Mr. COOPER. Mr. President, I listened to the remarks of the Senator from Tennessee concerning the case of former Justice Fortas with interest.

While I do not associate myself with all the remarks and conclusions which the Senator from Tennessee makes, or the emphasis he placed in certain parts of his speech, I do agree with the main thrust of his speech, and that is that in order to do justice to the people of the United States and not to former Justice Fortas himself, all the facts should be made public.

BIAFRA

Mr. McCARTHY. Mr. President, during the past year, the horrors of the Nigerian-Biafran war have become clearer. Widespread starvation has resulted from the compression of millions of refugees into an area one-quarter of the original homeland, from disrupted planting, and from the cutting off of trade routes by the Nigerian forces. It is reported that over a million Biafran civilians have perished from starvation and a million more deaths may occur within the next few months. Not since World War II has a civilian population been so affected by war.

The American people have responded compassionately by contributing to relief efforts, which operate under the most difficult conditions, to airlift food and medicine to Biafra. The U.S. Government also has donated food and equipment to relief organizations on both sides of the fighting line.

Unfortunately, this relief effort can alleviate only a fraction of the suffering, for as long as the fighting continues only a small part of the desperately needed supplies can be brought in. As long as official U.S. policy awaits a "military solution," present relief efforts will remain superficial and inadequate, if not contradictory to official policy.

It is time to reexamine our policy of "one Nigeria," which has resulted in our accepting the deaths of a million people as the price for preserving a nation that never existed.

The pattern of American diplomacy in this area is a familiar one, not very different from that in Vietnam. It began with misconception, was followed by self-justification, and is ending in tragedy. Political preconceptions have kept us from realistic examination. They have kept us from recognizing that the boundaries of Nigeria imposed artificially by a colonial power are not so sacred as to justify the deaths of several million people. The price of unity is too high.

When independence was attained in 1960, Nigeria was a colonial amalgamation of several hundred relatively autonomous peoples, who had by no means developed a national consciousness. It was the Easterners who were the best educated and who had left their crowded homeland in large numbers to occupy middle-level skilled jobs throughout the country, who most looked forward to "one Nigeria." It was the people of the northern region, where indirect rule had strengthened the conservative and authoritarian structure of the society, who were most regionally oriented and who threatened frequently to secede from the Federation of Nigeria unless they dominated it.

The first 6 years of the Nigerian Republic were characterized by shifting political coalitions, ethnic conflict, regional jealousies, and governmental corruption. A coup by nationalist officers, mostly easterners, in January 1966 was welcomed throughout Nigeria as the beginning of a new order. Although the new national leader, General Ironsi, was an Ibo, his policy was more nationalistic and unitary in outlook than that of his predecessor, and his largely inherited cabinet contained few Ibos. Ironsi's attempts at reform, however, threatened entrenched leaders who backed a countercoup in July 1966. This second coup was a tribal matter, with 200 Ibo Army officers killed.

In the fall of 1966, 30,000 Ibos and other easterners residing in the north were killed. The easterners living outside their homeland lost trust in the federal government and 2 million of them returned to the east, suffering loss of jobs and property and in many cases physical injury. They understandably moved away from the commitment to the federal government which had not restored mutual trust among the regions and tribes.

At a conference at Aburi, Ghana, in January 1967, a confederated union with equality among the regions was agreed upon. However, the Aburi agreement was soon abrogated unilaterally by the government in Lagos with the promulgation, without consultation with the east, of a 12-state system particularly designed to confine the Ibos to a small area and to break their influence. The easterners felt excluded from the government and seceded in May 1967, declaring the independent Republic of Biafra. Spokesmen for the Government of Tanzania stated when that country gave diplomatic recognition to Biafra that "When the state ceases to stand for the honor, protection, and the well-being of all its citizens, then it is no longer the

instrument of those it has rejected. In such a case the people have the right to create another instrument for their protection—in other words, to create another state."

Secession was followed quickly by war in July 1967. The "quick, surgical police operation" of ending secession, expected to take several weeks, has been followed by five "final offensives" and a war which is now almost 2 years old. Armed with British tanks and bullets and with Russian Mig's piloted by Egyptians, the Nigerians have surrounded the Biafrans and cut them off from traditional sources of food and outlets to the sea. A strategy of siege, designed to produce military victory, has produced massive starvation unparalleled in modern warfare. Refugees make up more than 50 percent of the population of Biafra, yet the Biafrans continue to struggle for their right to exist. Though the Nigerians occupy many deserted towns, the Biafrans control the countryside and the villages. Their will and determination have discredited the advocates of "quick kill" and the prophets of imminent collapse. Biafra continues to maintain a stable administrative structure. The Biafran army remains intact and effective.

The Nigerians claimed originally that the Biafran leaders represented a small, elitist clique who acted in their own self-interest without popular support, and this claim was accepted by the British and American Governments. It was thought that the secession would end soon. Now, although their capital has been moved three times, although they are surrounded and completely cut off from normal sources of food and trade, although they are bombed daily by jet fighters, although their young and old have died of starvation, the Biafrans have survived. They make their own oil for transport and their own crude weapons to fight with. They desert their towns to the enemy rather than collaborate. They fight on despite the human misery. This is not an elitist struggle.

From the beginning of the civil war, the British have supported the federal military government of Nigeria, partly for economic reasons and partly because of an emotional or intellectual stake in a unified Nigeria, which is represented as a triumph of the British colonial technique of indirect rule and of the successful transition from colonial rule to independence. The U.S. Assistant Secretary of State for African Affairs, Joseph Palmer, who was our first Ambassador to Nigeria, personally shared this commitment to "one Nigeria." He accepted the analogy of the secession of Biafra to the secession of the American Confederacy, entirely overlooking the fact that Nigeria, unlike the United States, was not unified by a common language, culture, and historical tradition, and had no background of stable, capable government.

Furthermore, 30,000 South Carolinians had not been massacred in 1861, and the inhabitants of the Southern States were neither pushed out of the Union nor were they living in fear for their physical security as is the case with the Biafrans in Nigeria. The U.S. State Department accepted a historical analogy without tak-

ing into account the complicated background to the secession. By putting its diplomatic and political weight behind the Nigerian position, the United States has committed itself to a purely military solution. In the summer of 1967, the Economist pointed out that the time for mediation was before war and destruction rigidified the positions of Nigeria and Biafra. Had the United States recognized this, perhaps we could have persuaded our British ally to put pressure on both sides for renegotiation of an Aburi-type agreement. However, we concurred in the hard line of Lagos, which inevitably resulted in complete rigidity and hostility.

We were and are, in fact, not neutral. The United States has been neutral only in refraining from shipping arms. Whereas Great Britain and the U.S.S.R. continue to send in arms, we have officially accepted the Nigerian explanation of the situation and have used our influence to gain acceptance for this viewpoint among other African nations.

Any review of past events clearly demonstrates the bankruptcy of American policy of "one Nigeria—at any cost." The "one Nigeria," which, upon the most optimistic projections, might survive from the war would have little resemblance to the carefully balanced federation of regions which many people had envisaged as essential to independence. The "one Nigeria" of the future would have to be postulated upon the inequality of different tribes. The Ibos and other eastern tribes who cooperated in forming Biafra would be stigmatized and penalized in many ways. The Ibos would—according to the new proposed division of the country into states—be confined to a crowded, infertile region smaller than their ancestral homeland, with no access to the sea. They would be deprived of all but token participation in the reconstituted unitary state.

At a recent planning conference in Nigeria, it was declared that it will be 25 years before Ibos can be given positions in Nigeria. Whereas the Nigeria of 1960 was ruled by civilians, one can anticipate that the Nigeria of the future will be ruled primarily by a military clique which has been greatly strengthened during the war by the increase in armaments and by enhanced military discipline. The "one Nigeria" which might arise, if the wishes of the present Federal Government of Nigeria are fulfilled, is undesirable even if it could be brought about at no cost whatever. And to accept it at the cost of millions of further casualties, in my judgment, is indefensible, and time has run out.

The United States should immediately call for an arms embargo. We should actively seek a truce. We should use our good offices to promote negotiations for resolving the differences. We should press for a deescalation of great power involvement. We should seek to form a multinational effort to provide the logistic support required for an adequate relief effort. We should accept Biafra's right to a separate national existence and look to possible early recognition of Biafra by the United States and other nations.

The reaction to these proposals by

those who have shaped American policy in West Africa heretofore can be anticipated.

They will say that Biafran independence will be a first step toward the Balkanization of Africa.

They will say that the Rivers tribes and other minority tribes of the east will suffer if Biafra gains its independence.

They will say that these proposals will undermine the position of our British ally in Africa.

They will claim that U.S. diplomatic recognition of Biafra will constitute intervention into a purely African problem.

Let us look at each of these objections.

The prediction that Biafran independence would lead to the Balkanization of Africa is obviously the discredited domino theory transferred to a new locale. There is no more reason to think that it is correct or that it is an adequate basis for present policy in West Africa any more than it is in Asia. Local grievances, local animosities, and local injustices are more important than outside influences in accounting for revolutionary developments within a country. It is significant that four African countries—Tanzania, Zambia, Ivory Coast, and Gabon—have recognized Biafra. Each of them has large minority groups, but none of them seemed to fear that its recognition of a secessionist regime elsewhere would encourage secession within its own boundaries.

As regards the question of economic stagnation and retrogression, it should be recognized that eliminating the hostility generated by an artificial political union could release energy for economic development. Certainly, the technical ingenuity of the Easterners will be stimulated by the independence of Biafra. Furthermore, independence does not preclude economic association. The Biafrans have already indicated their willingness to cooperate with Nigeria on vital problems of transportation and communication, particularly the use of the Niger River. Almost any advantage that can accrue from "one Nigeria" can also be achieved by regional economic arrangements such as a common market and a regional development board for redistributing revenues. Even without such arrangements it is clear that Nigeria is viable without the eastern region, since it has great resources, including vast amounts of oil in the midwestern region; it has been able to forgo the eastern oil revenues for 2 years while fighting a costly war, and it would evidently be in far better economic condition without the expense of the war.

It is hard to credit the claims of the Federal Government of Nigeria that Biafra is governed solely by and for Ibos, who subjugate the minority tribes. In any case, the national preference of the minority tribes is a question which can be settled through plebiscites supervised by the United Nations or the Organization of African Unity. Even without some minority tribes, Biafra would be a populous country by African standards, larger than three-fourths of the African countries. Only 10 of some 40 African countries would be larger.

The argument that American recognition of Biafra would undermine the position of our British ally depends upon two premises, both doubtful. The first is that essential British oil interests would be threatened by Biafran independence. However, as pointed out before, much of the oil is in the Midwest, nor have the Biafrans expressed any intention of expropriating British oil. In any case, this should hardly be a major consideration of American foreign policy in this case.

The second premise is that the British support the Federal Government of Nigeria has diminished Soviet influence upon that government. However, all that can be said with assurance is that the Federal Government of Nigeria has shrewdly played off the Soviet Union against Great Britain in order to receive as many arms as possible from both. Who will come out ahead in this game of influence is uncertain.

In my opinion, the interests of the United States and of Great Britain may best be served by disentangling the Nigerian-Biafran war from the cold war and by reducing great power intervention in the area. It would be better to use this area as a testing ground for reducing tensions among the great powers—since their interests are less serious here than elsewhere—than to perpetuate cold war maneuvers out of habit. In addition, many African countries are already resentful of the involvements of the great powers in their lands and might welcome a reduction of great power competition in the Nigerian conflict.

To argue that diplomatic recognition of Biafra would constitute intervention into purely African affairs is irrelevant; nonrecognition is also intervention. There are faults of omission as well as of commission. The United States has already intervened repeatedly in the area: first by propping up General Gowon when he assumed power; later by backing him when Nigeria abrogated the Aburi agreements; and also by exerting pressure on a number of African nations not to recognize Biafra.

The steps I propose are diplomatic, not military. Our goal should be the recognition of Biafra which has demonstrated that it represents the interest of its people. We should begin by seeking an arms embargo. Our goal should be a truce with a view to reasonable negotiation. We should seek to deescalate great power involvement. We should provide massive relief. The alternative—to continue to give passive military support and active diplomatic support in the name of unity—is no longer defensible.

PRESIDENT NIXON'S TELEVISION ADDRESS TO THE NATION

Mr. PERCY. Mr. President, Wednesday night President Nixon spoke wisely as he discussed the status of the Vietnam war and made proposals to end that war. His remarks were honest. They were constructive. They indicated a flexibility of approach which gives promise of breaking the impasse at Paris.

Speaking as one who has been critical of the handling of the Vietnam war over a period of 3 years, I can now say

that I have confidence that President Nixon is doing his utmost to bring the war to an end and to do it responsibly.

I was especially pleased to hear the President say that "the time is approaching when South Vietnamese forces will be able to take over some of the fighting fronts now being manned by Americans." And I was pleased to hear the President say that he has ruled out attempting to impose a purely military solution. These are important points with which I agree completely.

The President's report to the Nation was certainly the most comprehensive Presidential statement on the war so far. It was a contribution toward a peaceful solution of the conflict. And it was a contribution toward public understanding of the complex issues involved.

Mr. President, I am very pleased to offer every possible degree of support that I can to the President of the United States.

STATEMENT BY SENATOR PEARSON

Mr. PERCY. Mr. President, the senior Senator from Kansas (Mr. PEARSON) is in his home State today. He has asked that I have printed in the RECORD a statement he made on Wednesday evening, May 14, following the President's statement to the Nation.

His statement reads:

The American people tonight heard an honest, forthright, and fair statement by that person who bears the greatest responsibility of us all in regard to war and peace in Vietnam. And I think as we heard his message tonight we need to remind ourselves that the options of 1963 are not the options we have available in 1969. It was a policy statement that represents a major shift, a flexible and new proposal regarding two old principles: the first was that we seek no military relationship with South Vietnam in the future, and the second was a reaffirmation of the concept of self-determination for the people of South Vietnam. I think we can expect Hanoi, the NLF, and indeed Moscow itself, to issue immediate negative responses. But negotiations will continue in public and private and it seems that what the President needs most tonight is the support of the American people.

WASHINGTON: THE AFFLUENT CITY

Mr. PROXMIRE. Mr. President, some recently released statistics about this Capital City have just been called to my attention which should help us place the Washington problem in a sharper and clearer perspective.

Washington is viewed by many as a city that has a very serious poverty problem, and of course it does. Many persons have the impression that as the only big city in the Nation with a majority of its population black and many of its people relatively newly arrived from a depressed rural background, the poverty problem must be worse than in the other big cities of the Nation.

Mr. President, the conclusion is wrong. The fact is that of all the 16 cities in this country with a population between 500,000 and 1 million, Washington is the richest, and by far the richest.

The affluence of this city is not a statistical mirage produced by averaging a few

very high incomes with many very low ones.

The fact is that the average estimated income per household in 1969 in Washington is the highest of all of the 16 cities in the half million to 1 million population classification.

It is this year a whopping \$14,222, and that is a big \$1,370—or more than 10 percent—higher than Pittsburgh, which is second. Those figures are for this year, 1969.

For 1967—the latest year in which we have statistics on cash income—Washington ranked first in the number of families with incomes over \$10,000, with 31.3 percent.

One of the remarkable features of this prosperity is that the city of Washington has been moving ahead more rapidly than its sister cities in the past 10 years.

Ten years ago, this city, which now ranks first in family income, ranked fifth out of 16 comparable cities in median income and third in the percentage of families with income above \$10,000 per year.

But not only does Washington have more of the affluent than any other city of similar size. What is more impressive in view of the general impression, is that Washington has fewer poor persons in proportion to its population than any other comparable city except Milwaukee.

In both Washington and Milwaukee, only 15.2 percent of the families fall into the less than \$3,000 per year category.

This means, Mr. President, that Washington has almost twice as many affluent families—that is, those who earn \$10,000 and above—as poor families which make less than \$3,000.

Furthermore, this city has enjoyed even greater progress in the reduction of poverty as compared with other cities than it has enjoyed in the increasing proportion of its families having incomes in excess of \$10,000.

In 1959, seven of the 16 comparable cities had a lower proportion of their families with income of less than \$3,000 per year than Washington. By 1967, there were none of the 16 comparable cities with a lower proportion of its families in this poverty classification than Washington.

So not only is Washington better off, it also appears to be improving more rapidly than any comparable city in the Nation.

Again, Mr. President, this does not mean that this city does not have a poverty problem. Of course it does, and it is serious. But it also suggests that Washington is in a financial position to do more about that poverty problem itself—I repeat, itself—than comparable cities.

The irony is that this city, which has the financial potentiality to do more about solving its poverty problems and its other problems than other cities, has far, far less political power to do this than any other city in the country.

The city does have discretion to raise or lower its property tax. This authority should be used by the city much more aggressively than it has been. But, in all

fairness, the property tax is a limited and highly regressive tax. In other revenue areas the District of Columbia has only the humiliating right to come to Congress on bended knee and ask for the right to raise more revenues to meet its problems.

And on that same bended knee it must come before the Appropriations Committees of House and Senate to ask the right to use the funds Congress will permit it to use to meet its own problems.

Mr. President, when one considers that even the Washington government that comes before Congress is an appointed agent of the Federal Government—not elected by the people of the District—one can realize how thin the thread of power to act on its own problems is for this, the richest comparable city in America.

It is also interesting, in view of the common association of poverty with the Negro, that Washington has a far, far higher proportion of black citizens than any other city in America. In fact, it is the one major city in America which has a majority of its population black.

So it is not only the blackest city in this sense. It is also the richest comparable city. And this black city has the smallest proportion of its families suffering poverty incomes of any comparable city.

The serious poverty problem of Washington looks good as compared with that of comparable cities. But to those who know how tragic poverty is here in Washington, this simply reinforces the gravity of the nationwide poverty problem.

If Washington is the best this Nation can do in reducing poverty after nearly 10 years of uninterrupted prosperity, what a long way this Nation has to go to meet the tragedy of its poor.

The real lesson of all these statistics is that Washington unleashed with full self-rule could unquestionably do much to solve its serious crime and poverty problems. It has the financial muscle to do it. It is time it received the congressional go-ahead for home rule.

I ask unanimous consent to have printed in the RECORD a table that provides family and household income statistics for the Nation's cities with population between 500,000 and 1,000,000.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SELECTED INCOME DATA FOR CITIES WITH 1960 POPULATIONS OF 500,000 TO 1,000,000 IN 1959, AND 1969

City	Population		Households ¹					1959

¹ A household consists of all the persons who occupy a housing unit. The average population per household is obtained by dividing the population in households by the number of households.

² Family income consists of combined money incomes of all members of each family treated as a single amount.

³ The "effective buying income" of Sales Management is comparable to disposable personal income, or personal income after direct taxes. It includes cash income and where pertinent imputed rentals of owner-occupied homes.

⁴ Cash income excludes imputed rentals of owner-occupied homes which are included in effective buying income. It is comparable to money income used for basis of family income by the Census Bureau.

⁵ Income per household is the total average income earned or received by each household without all direct and indirect taxes deducted. Income is equivalent to cash income before deduction of direct taxes. It represents projections made in 1968.

Sources: 1959 and 1960: U.S. Bureau of the Census. 1967: Sales Management, "Survey of Buying Power," June 10, 1968. 1969: 1969 Editor and Publisher Market Guide.

Explanatory note.—The cities listed are all those which in 1960 had a population between 500,000

and 1,000,000. Data are for the cities only and do not include parts of standard metropolitan areas outside city boundaries. Unofficial estimates of the population of these cities are given: for 1967 from Sales Management and for 1969 from Editor and Publisher Market Guide, in cols. 2 and 3. Cols. 4-7 give comparable data for number of households. The table gives 3 related estimates of family and household income. The first (cols. 8-13) is the only official one. This one gives the U.S. Census Bureau figure for median family income for 1959 and percent with incomes under \$3,000 and over \$10,000 for 1959. The median family income is obtained by dividing for each city the number of families into two equal groups, one having incomes above the median, and the other having incomes below the median. Cols. 14 through 19 give comparable data for 1967 with the following exceptions. Data are for households rather than families; 1967 effective buying income includes imputed rentals of owner-occupied homes, whereas 1959 family income does not, but is after deduction of all direct taxes, included in 1959 family income and 1969 estimated income. It is estimated by comparing 1967 Editor and Publisher (before tax income) and 1967 Sales Management (after tax income) data that inclusion of taxes would raise the 1967 figures (col. 14) by about 25 percent. Finally the most recent figure is the estimate by the 1969 Editor and Publisher Market Guide for estimated income per household in 1969. This is a figure of average income before deduction of direct and indirect taxes and is a projection that was made during 1968.

THE C-5A—HOW TO CONCEAL AN OVERRUN

Mr. PROXMIRE. Mr. President, the facts surrounding the C-5A cost overruns continue to provide a source of shock and profound dismay. Recently I obtained a copy of an Air Force briefing document which illustrates how the Pentagon plans to obscure the magnitude of the overrun and "avoid the appearance of excess profit."

The document illustrates with charts and tables the details of the C-5A program cost status, the extent of the cost overrun on each of two production runs—call run A and run B—a way to spread the costs around so that they do not look so bad, the cost of the spare parts, and the total estimated program cost to the Government.

KEY PASSAGE

The key passage in the Air Force plan to cover up the overrun is by way of explanation of a table containing the pertinent figures. The passage reads as follows:

This chart reflects how the theoretical prices and ceilings for RDT&E plus Run A and Run B compare with Lockheed's actual cost. The differences between the *unadjusted price* and *adjusted price* columns reflect how we plan to allocate costs. This allocation provides for spreading costs incurred through the repricing formula against Run A aircraft.

Then, the explanation of the Air Force plan to juggle the figures is given in these cryptic words which I now quote from the Air Force briefing document:

This technique is used to avoid the appearance of excess profit for Run B aircraft.

BALLOONING COSTS

The reason it was necessary to reallocate the costs and to avoid the appearance of excess profit is that the contract's highly favorable repricing formula allowed a ballooning of costs on the second production run. It went up from an original estimate of \$490 million to \$1.4 billion. In other words, it nearly tripled, nearly increased threefold.

A NEW FACE NEEDED

The Air Force plan to cover this up and to put a new face on it represents one of the most outrageous attempts I have ever witnessed to mislead Congress and mislead the public about the way tax dollars are being spent. It is proof, in my opinion, that the Air Force is determined to hide as much of the C-5A overrun as possible. This desperate effort will not succeed, in my opinion. Too many facts have already been brought out into the open for the Pentagon to be able to push them out of view.

The charts, tables, and statements bear no overall title, but they might be called "The C-5A: How To Conceal an Overrun."

THE BASIC FACTS

To fully understand the new Air Force plan to hide the C-5A overrun, five basic facts should be kept in mind:

First, the original 1965 estimated cost for 120 C-5A's was \$3.4 billion. This estimate included the cost of R.D.T. &

E.—which stands for research, development, testing, and engineering—and the cost of spare parts. The estimate for the same 120 planes given in the briefing document is \$5.2 billion. The difference amounts to an overrun of just under \$2 billion. Information I have indicates that the total program costs will go even higher than \$5.2 billion.

Second, Lockheed is the prime contractor for the airframe and was given the principal responsibility for the entire program. General Electric is the prime contractor for the engines. Most of the overrun appears to have occurred in Lockheed's portion.

Third, the contract divides the program into two portions. The first portion, called production run A, consists of the R.D.T. & E. plus 58 C-5A planes. The second portion, called run B, consists of 62 planes.

Fourth, and this is crucial to an understanding of the controversy, the contract contains an option agreement and a repricing formula. Initially, the Government agreed to purchase the first 58 planes, or what is called run A. The option gave the Government the authority to order the second batch of 62 planes, run B. However, if the option for run B is exercised, the Government is also obligated to negotiate a new price for the run B portion in accordance with the repricing formula.

That option was exercised last January.

THE REPRICING FORMULA—KEY TO THE CONTROVERSY

A fifth or final fact needs to be known if the controversy over the C-5A is to be understood. It concerns the repricing formula.

Under the repricing formula, if there are big overruns and huge increases in costs for the first 58 planes—that is, if the costs greatly exceed initial estimates, as they do—a formula is applied to the estimates of costs for the second run. This formula has the effect of greatly increasing them. The higher the costs on run A, the higher the increase for run B.

That is the essential effect of the repricing formula.

Now, given these basic facts and this information, let us see what has happened.

EXCESSIVE COSTS FOR FIRST RUN

Lockheed's first production run of 58 C-5A planes is resulting in mammoth excessive costs. According to the documents for Lockheed's part of the contract, they will go up from a target cost of \$1.38 billion to a present estimated cost of \$2.436 billion. In other words, there alone is a \$5 billion increase. Under the contract, such large losses would be borne by Lockheed Aircraft unless there was a second production run at a much higher price than originally estimated.

Last January, as I have said, the Air Force authorized such a second production run or run B. Because of that fact, the "repricing" formula went into effect. The effect of this was to increase the price of the second production run. With this unjustified and unearned price increase,

Lockheed could recoup most, if not all, of its losses from run A.

DECISION FOR SECOND RUN PREMATURE

In view of the fact that only a few planes from run A had been delivered and that a competing company appears to have a comparable plane at a much lower cost, the decision to authorize run B was premature and highly questionable. It gives the appearance that a principal object of the decision in January was to bail out Lockheed.

But even worse, not only can this action save Lockheed hundreds of millions, it removed the incentive for either Lockheed or the Air Force to buckle down and cut costs on run A—of which only a few planes have been built.

BALLOONING PRICES

What now happens to the price of the second group of planes? When the repricing formula is applied, the effect is to balloon the price of the second run of 62 planes. The total price to the Government of the second batch will go up from \$490 million to a huge \$1.4 billion, or almost three times the cost. This was obviously unreasonable and ridiculous.

This snowball or avalanche result of the repricing formula is so outlandish that apparently even the Air Force wants to keep it from being revealed. The Air Force plan, as outlined in the briefing documents, is designed to accomplish this by obscuring the true nature of the overrun and the effects of the repricing formula place in the contract by the Air Force.

To avoid such an obviously untenable situation, namely how the price could go up from \$490 million to \$1.4 billion on the second run, the Air Force then, for the sake of appearances, plans to reallocate the costs from the second batch to the first batch of planes.

ACTION TO AVOID APPEARANCES

It plans to do this according to the Air Force's own briefing documents, "to avoid the appearance of excess profits for Run B aircraft."

It is clear that the Air Force could not justify paying \$1.4 billion for 62 aircraft which it originally estimated would cost only \$490 million or one-third the amount.

The Air Force, according to its own documents plans to juggle the figures in order to try to hide as much of the effect of huge cost overrun on the C-5A's first run as is possible.

The Air Force plan represents the most outrageous attempt I have witnessed to mislead Congress and to mislead the public.

And what are the consequences? How much of the price of the second batch of planes represents legitimate costs and how much represents padding under the repricing formula?

Estimates of losses to Lockheed on run A have been as high as \$600 to \$700 million. But, one has to look very hard to find any case where a big defense contractor lost money on a major contract. Last January I asked Secretary of the Air Force Charles to give me a single instance. He had been in that position for a long time and has just recently

left it. He could not cite one contractor who lost a single nickel ever on a defense contract.

CONGRESS AND PUBLIC HAVE RIGHT TO FACTS

Mr. President, I believe Congress is entitled to know all the facts about the cost overruns on the C-5A cargo planes. Funds are now needed by the Pentagon to begin paying for the second large order of planes, known as run B. The original estimated price of run B is about to skyrocket from \$490 million to \$1.4 billion. The Air Force is planning to hide this enormous price increase which it is negotiating with the contractor. One conclusion which seems inescapable is that it is afraid full disclosure of the real magnitude of the cost overrun on run A, and the escalation of run B, will adversely affect the funds needed to finance the C-5A.

FINANCIAL FIASCO

We are witnessing perhaps the greatest financial fiasco, in terms of the dollar amounts involved, in the history of Air Force procurement. The record is already filled with inconsistencies, concealment, failure to disclose, and attempts to manipulate the true facts. Now, the Air Force is planning a new tactic: to obscure the nature of the cost overrun by "spreading" its effects throughout the contract.

It is high time, in my opinion, for the Congress to take action on this matter. Mr. President, I ask unanimous consent that a series of tables and texts be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BRIEFING DOCUMENTS: DOCUMENT 1.—AIR FORCE EXPLANATION OF CHART 1

(NOTE.—Charts not reproduced in the RECORD.)

HISTORY OF LGC/C-5A PROGRAM ESTIMATES—R.D.T. & E. PLUS RUN A

This chart shows that in every case the Lockheed R.D.T. & E. plus run A estimates lagged below the SPO estimates by approximately \$200M through February 1968. The year-end cost actuals in March 1968, with only one airplane rolled out, provided us the necessary visibility to predict a significant over ceiling condition subject to the effects of the repricing formula. An ASD cost team effort in April 1968 confirmed the SPO cost estimates and provided the basis for a program change request. During September-October 1968, an analysis of additional accumulated costs was initiated and further run A cost increases impacting on the run B repricing formula, were identified. Today we believe that R.D.T. & E. plus run A cost will be \$2436M, about \$100M higher than Lockheed's estimate.

DOCUMENT 2: AIR FORCE EXPLANATION OF CHART 2

PROGRAM COST STATUS LOCKHEED GEORGIA CO.—PROBABLE TARGET COST/PRICE/CEILING

The estimate shown on the previous chart included costs for R.D.T. & E. and run A only. The original target cost for R.D.T. & E. plus run A was \$1381. Although the target price and ceiling were \$1509 and \$1764 respectively, we estimate the actual cost will be \$2436. Because the estimated costs are greater than ceiling, we are required to apply the repricing formula with the resulting run B adjustments. The formula adjusts the

original run B target cost of \$490M to \$1100M. Application of the 130% ceiling to the adjusted target cost and addition of the original \$49M target profit increases the ceiling price to \$1404M compared to the run B actual cost estimate of \$1018M. Because R.D.T. & E. plus run A and run B is covered by a single contract, all these numbers are combined in the right-hand column. We anticipate that Lockheed's net deficit at the end of production run B will be approximately \$285M. This deficit will be offset to some degree by additional work (e.g., spares, depot age, etc.) yet to be placed on contract.

DOCUMENT 3: AIR FORCE TABLE 1 AND EXPLANATION

TABLE 1.—PROGRAM COST ESTIMATE, LOCKHEED PROBABLE COST/PRICE/CEILING. R.D.T. & E.+A+B

[In millions]				
	Total cost	Unadjusted price	Adjusted price	Lockheed deficit
R.D.T. & E.+A.....	\$2,436	\$1,764	\$2,151	—\$285
Run B.....	1,018	1,404	1,018	0
Total.....	3,454	3,169	3,169	—285

PROGRAM COST ESTIMATE: LOCKHEED PROBABLE COST/PRICE/CEILING—R.D.T. & E. PLUS A PLUS B (DOLLARS IN MILLIONS)

This chart reflects how the theoretical prices and ceilings for RDT&E plus run A and run B compare with Lockheed's actual cost. The differences between the *unadjusted price* and *adjusted price* columns reflect how we plan to allocate cost. This allocation provides for spreading cost incurred through the repricing formula against run A aircraft. This technique is used to avoid the appearance of excess profit for run B aircraft.

DOCUMENT 4: AIR FORCE TABLE 2 AND EXPLANATION

TABLE 2.—PROGRAM COST ESTIMATE, GE PROBABLE COST PRICE/CEILING. R.D.T. & E.+A+B

[In millions]				
	Probable cost	Probable price	Probable ceiling	GE deficit
R.D.T. & E.+A.....	\$558	\$534	\$541	—\$17
Run B.....	184	220	213	+29
Total.....	742	754	754	+12

PROGRAM COST ESTIMATE: GENERAL ELECTRIC PROBABLE COST/PRICE/CEILING—R.D.T. & E.+A+B (DOLLARS IN MILLIONS)

As far as General Electric is concerned, their condition is not as serious as Lockheed's. We are forecasting probable costs of \$742M opposed to a \$754M ceiling which provides about \$12M in profit. This is, of course, significantly less profit than a company would normally realize on a program of this magnitude.

DOCUMENT 5: AIR FORCE TABLE 3 AND EXPLANATION

TABLE 3.—AFSC R.D.T. & E. AND INVESTMENT SUMMARY

[In millions]				
	R.D.T. & E.	Run A	Run B	Total
Lockheed contract.....	\$607	\$1,544	\$1,018	\$3,169

Total, AFSC investment cost.....	839.9	777.2	+62.7

C-5A AFSC INVESTMENT SUPPORT COSTS: FISCAL YEARS 1967 TO 1974—TOTAL PROGRAM COST SUMMARY

This chart compares AFSC investment requirements with the currently approved program (December 68 F&FP) for the fiscal years 1967-1974. An overall deficiency of \$62.7M exists.

Within the investment spares area, AFSC requires 179 TF-39 engines and 121 auxiliary power units, compared to the approved program of 154 and 91, respectively.

The weapon system initial spares requirement for the first two years (FY 1967/1968) is based on C-141 experience. Reduction of the third year factor from 21.8% to 10.9% is predicated on anticipated improved management techniques, reduction of administrative and shipping time, etc. Spares costs resulting from the applied factors are based on currently available C-5A pricing information.

The replenishment spares requirement is computed in a manner comparable to that used to compute the weapon system initial spares. This requirement includes the cost of providing those spares which are necessary for the C-5A to fly a continuous eight hour/day program subsequent to an emergency rate of ten hour/day for 45 days. A deficit of \$68.6M exists.

Within the investment equipment area, costs are again derived by applying an experience factor to the C-5A flyaway cost. The common age requirement includes funds for two sets of general purpose automatic test equipment. Modification requirements are class IV class (mission essential) changes only. Within the investment equipment area, there is a net overage of \$4.6M based on the approved program.

DOCUMENT 7: AIR FORCE TABLE 5 AND EXPLANATION

TABLE 5.—System cost estimate summary (dollars in millions)

R.D.T. & E.....	\$1,002.0
AFSC investment.....	3,346.0
AFSC investment.....	839.9
MCP.....	14.5
Total program cost.....	5,202.4

SYSTEM COST ESTIMATE SUMMARY—(DOLLARS IN MILLIONS)

This chart summarizes total program cost. The \$14.5M military construction program estimate covers costs for construction items peculiar to the C-5A such as special paint facilities, engine test cells, special maintenance docks and hangars which are charged to our system program element number. Other military construction items which are beneficial but not peculiar to the C-5A, such as taxiway extensions and strengthened runways, are charged to the base operating support program element.

DOCUMENT 8: AIR FORCE SUMMARY

Original contract schedule is unattainable. Contract schedule is realistic, will provide operational aircraft capable of performing MAC mission.

Satisfactory logistic support posture will be achieved concurrently with operational aircraft deliveries.

Management visibility will be provided to support decisions on additional aircraft buys.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. SPONG in the chair). The time of the Senator has expired.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

REAFFIRMATION TO THE CONCEPT OF HUMAN RIGHTS BY AMERICA

Mr. PROXMIRE. Mr. President, the United States has long been concerned with the attainment of human rights for all. The major American historical documents which we cherish as declarations of human rights for all peoples of this great Nation affirm the principles set forth in the United Nations conventions on human rights.

Last year was the 20th anniversary of the Universal Declaration of Human Rights. President Johnson marked this anniversary by establishing a President's Commission for the Observance of Human Rights Year. The following is a quotation from the recently published report of the President's Commission:

Mr. Nixon's major task will be, as he himself has said, to bring the nation together. His problems are many. They are heavy. They cannot be resolved or ameliorated save by the assistance of all those interested in the common causes of our country and of humanity. A thread common to most of these problems, domestic and international involve, in varying degree, human rights—the human condition.

The United Nations asked last year that in 1968 all peoples around the world attempt in some way to point out, observe, commemorate, and advance human rights—the dignity of the individual, the human being.

This turbulent year of progress, tragedy, violence, and decision has, like a careful copy reader, underscored with a heavy hand the need for a rededication to human rights.

The Commission earnestly bespeaks your assistance. Will you, as broadcasters, commentator, publisher, editor, columnist, or one who in any manner addresses the public—

call attention to civilization's need for insistence on human rights at local, national, and international levels? Will you make use of the Universal Declaration of Human Rights as a guide for our aspirations? The price of failure to establish human rights is one that none likes to contemplate.

The United States is one of the few nations that has yet to ratify the United Nations Conventions on Forced Labor, Political Rights for Women, and Genocide.

Mr. President, all Presidents have warmly and enthusiastically advocated that the Senate move ahead in these matters, but the Senate has refused. These treaties have been in the Committee on Foreign Relations for 6 to 20 years. It is absolutely urgent that the U.S. Senate move now to ratify these human rights conventions so that America can again assume her traditional place as the haven of human rights.

THE PRESIDENT'S REPORT ON VIETNAM

Mr. COOPER. Mr. President, the President's report to the Nation on Vietnam was welcome and necessary. It was a summation of the effort he has made during the 4 months of his administration to bring the United States closer to peace in Vietnam.

It was a clear statement of the President's purpose to secure a settlement through negotiation, rather than the use of military force which has only deepened the tragedy of Vietnam, and which could go on for many years.

In my view the decisive statement, and one which marked an advance over past positions, was his unambiguous affirmation that the administration was prepared and willing to consider, in negotiation, in addition to the concrete proposals he made, "Hanoi's four points, the NLF's 10 points, provided it can be made consistent with the few basic principles I have set forth here." For while the President's proposals are certainly reasonable, and consonant with the principle of self-determination which is a basic one for our country, we may not be dealing with a reasonable Government or people in terms of our own values and we must consider carefully their proposals.

I liked particularly that part of his speech in which he affirmed that the United States and "all parties should agree to observe the Geneva Accords of 1954 regarding Vietnam and Cambodia, and the Laos Accords of 1962." It has been my view, as I have expressed in a number of speeches in the Senate, that the accords provide the best basis for a settlement of the issue of Vietnam, and of Cambodia and Laos, and would have influence in all of Southeast Asia.

In 1965, I opposed the commencement of the bombing of North Vietnam. In the following years, I urged on numerous occasions that the United States cease the bombing as a means of testing North Vietnam's often declared statement that

such a cessation would bring about negotiations. I recognized that the cessation of bombing would not necessarily mean that negotiations would be fruitful or satisfactory to the United States, but I considered that it was the only means of opening negotiations. Unfortunately, negotiations thus far have not been very productive, but a start has been made. It is my hope that the President's address has opened the way for active and innovative negotiations, that will be successful in bringing about a settlement and peace in Vietnam. I hope also that his concrete proposals will immediately bring about a reduction in the fighting and violence in South Vietnam on both sides.

If North Vietnam and the NLF want peace, the President has opened the way toward a negotiated settlement and peace. I believe the Congress and the people should support the President in his initiative to achieve peace through negotiations and peaceful means.

A NEW LOOK FOR DEVELOPMENT FINANCE

Mr. COOPER. Mr. President, on Wednesday of this week the Senate took favorable action on H.R. 33 which authorizes a second replenishment of the International Development Association and provides for a U.S. contribution of \$480 million over a 3-year period.

In connection with this bill, in particular, and with development financing, in general, I would like to bring to the attention of the Senate an article appearing in the May issue of the Monthly Economic Letter of the First National City Bank of New York entitled "A New Look for Development Finance." This article comments on recent developments in this field and proposals to make this form of financial assistance more effective as we approach the 1970's, and I find it to be both timely and informative.

Mr. President, I ask unanimous consent to have printed in the Record the article entitled, "A New Look for Development Finance," which was published in the Monthly Economic Letter of the First National City Bank of New York.

There being no objection, the article was ordered to be printed in the Record, as follows:

A NEW LOOK FOR DEVELOPMENT FINANCE

The Administration is examining all U.S. foreign assistance to review what has been done and to determine its future course. In his first statement on U.S.-Latin American relations, President Nixon noted that existing policies are being reviewed with "open eyes, open ears, open mind, open heart." This examination brings foreign aid once again into the limelight.

MISTAKE TO TALK OF A "DECLINE"

At the Development Assistance Committee (DAC) of the Organization for Economic Co-operation and Development reported in its 1968 Review, "It is a great mistake to talk of a 'decline' in the flow of resources" from

industrial countries to the less-developed parts of the world. The total official and private flows of funds to finance development reached, at about \$11.5 billion, a record high in 1967-80 per cent above the level of a dozen years ago. Judging from preliminary data, there was a further increase in 1968, which will "probably" continue into 1969.

The United States accounts for somewhat over one half of the official and two fifths of the private flows. The resources of international agencies like the World Bank Group and regional development banks—capital, contributions or funds raised in the market—also come largely from the United States.

Yet, much has been heard over the past year about the "failure" of the First Development Decade, usually in the context of expressions of hope that the Second Decade—the Seventies—will show better results. In this judgment, much depends on the target against which accomplishments are measured. The only internationally agreed target is a United Nations Resolution, passed in 1961, that called for an average 5 per cent annual growth rate in the gross national products of less-developed countries by the end of the decade; this goal was just about reached in the period 1960-67.

The developed countries as a group have set for themselves a target of an average net flow of official and private financial resources equal to at least one per cent of each country's national income. The amounts made available for foreign assistance have, in fact, fallen short of this target. In 1967, only a few countries provided one per cent of their national income or more: Portugal, France, Germany, the Netherlands, the United Kingdom and Belgium, in descending order. The United States supplied 0.85 per cent of its national income. Russia and other Eastern European countries supplied—according to DAC—only about 0.1 per cent of their national incomes.

Even though the industrial world's target has not been reached, the less-developed nations have, as already noted, attained their own 5 per cent GNP growth target—a commendable achievement, which, in the words of DAC, is "a tribute" to their own efforts. It also reflects, as DAC further points out, factors such as the rise in export earnings of less-developed countries by an average of 5.6 per cent a year during 1960-67, as against the 4 per cent assumed in projections for the decade made by U.N. economists early in the Sixties.

Nevertheless, many needs of less-developed nations remain unsatisfied. Their hunger for capital has been stimulated not only by quickening political and social changes and eagerness to raise living standards but also by rapid increases in population. The annual growth of per capita income is only about $\frac{1}{2}$ of 1 per cent in South Asia, 1 per cent in Africa and less than 2 per cent in Latin America. At these rates, it would take about 40 years to double per capita income in Latin America, 70 years in Africa and nearly a century and a half in South Asia.

ACCENT ON EFFICIENT UTILIZATION OF AID

Against this background, a strong accent on the efficient utilization of aid is quite understandable. Most encouraging are the efforts to deal, however belatedly, with the Cinderella of economic development—agriculture. Ironically, it has taken twenty years to rediscover that farmers are willing to raise output if shown what can be done and if prices are right. This rediscovery calls for new approaches to U.S. food aid programs which have, all too often, driven down agricultural prices in the recipient countries.

CXV—806—Part 10

Equally striking is the realization that the flow of resources, whether from domestic sources or from abroad, cannot be large enough to meet development needs in the face of the present rapid growth of population. Support for family planning has become increasingly recognized as a proper accompaniment of economic development.

Efforts are also being made to remedy shortfalls in aid performance. There is a better grasp of the noneconomic aspects of development, including an awareness of the impossibility of transplanting American and Western European ways of living and doing things to the quite different political and cultural environments of Asia, Africa and much of Latin America. There is less enthusiasm for such panaceas as centralized economic planning. There is increased emphasis on "self help." The need for the recipient countries to allocate more of their own resources to development and to follow policies more conducive to economic growth has long been recognized. More recent is the realization that, as noted by the National Planning Association (NPA) in March, "the initiatives and decisions countries take about how to use their resources for development must be in the deepest sense their own, not those of Americans."

RENEWED STRESS ON PRIVATE ENTERPRISE DEVELOPMENT

Deemphasizing what the NPA calls "excessive U.S. activism" leads to new thoughts about U.S. aid. Among these are the needs for broader technical assistance programs and further efforts to stimulate private investment.

It is, of course, because of disappointments over official aid that private capital is being invited to increase its part in the development process. Private capital and private export credits—net of repayments by less-developed countries—came to some \$4.3 billion in 1967, out of a net total from official and private resources of about \$11.5 billion. As the chart shows, however, private capital had, by the early Sixties, already accounted for more than one third of the total flow of development resources; therefore, relatively speaking, its contribution has remained unchanged over the past decade. Of the total private flow, two fifths has come from the United States.

While official aid can help finance basic economic and social infrastructure, it is—essentially—private direct investment that can best open up natural resources, provide know-how and create broadly based manufacturing. Private capital cannot, of course, be driven. It must be attracted. It will understandably go where it can make a profit. Furthermore, in view of the uncertainties, risks and special problems inherent in private investment, investors are naturally guided not only by relative profit opportunities but also by the security offered for their investments. Less-developed countries that fail to re-establish the conditions needed to attract foreign private capital cannot, at the same time, claim more government grants and loans to make up for the lack of private investment.

Nations not only need more capital but they need it on terms that do not burden the balance of payments. When private investment takes the form of equity capital, dividends are not remitted to the investing country until profits are made; and, even when operations become profitable, large amounts of the earnings are ploughed back and those that are remitted will in large part finance themselves out of export earnings of foreign subsidiaries.

HOW MUCH, BY WHOM AND ON WHAT TERMS

Over the past twenty years, the U.S. Government has extended aid to less-developed countries under a long sequence of programs. At first, the programs were geared at supplying technical assistance and loans on commercial terms, with the Export-Import Bank as the principal lending agency up to 1957. With the passage of time, however, the programs have been enlarged and redirected to provide assistance increasingly in the form of grants and of loans repayable—in dollars or, sometimes, in the borrowers' own currencies—without interest or with very low interest, over several decades and after a long grace period. Other governments have a panoply of lending agencies and programs.

The structure of official aid programs has, over the past few years, undergone three symptomatic changes. First, aid by the large "soft" donors (the United States, France and the United Kingdom) has remained steady or declined while aid by major donors with relatively "hard" terms (Germany, Italy and Japan) has increased. The United States, which for years provided the softest development loan terms, has hardened its terms somewhat at the insistence of Congress. Second, grants, though still growing in absolute amounts, have been reduced relative to loans. And, third, government export credits on commercial terms have become increasingly important. At the same time, the tying of aid to purchases in the donor's country has become increasingly prevalent.

The dollar-repayable, long-term loans at little or no interest were originally devised for the International Development Association (IDA), a World Bank affiliate which began operations in 1960. Thereafter, several regional banks—such as the Inter-American, African and Asian Development Banks—were established to extend loans through two or three windows. At one, loans are made on commercial terms; at the second, at lower rates and longer maturities, with repayments in the currencies loaned or, sometimes, in the borrowers' own currencies; and at the third, at still lower rates and longer maturities, with repayment in the borrowers' currencies.

Meanwhile, the World Bank itself has continued financing development projects on a businesslike basis. The interest rate it charges is currently 6.5 per cent. To finance its expanding activities—loans are to double in the five years ahead—the World Bank Group increasingly relies on borrowings in capital markets. About two fifths of its \$4 billion debt is held by investors in the United States. IDA is to have its resources replenished by \$1.2 billion for three years under an agreement reached last year; the agreement does not become binding until the United States contributes its share of \$480 million. The Nixon Administration has reaffirmed its intent to participate in this replenishment and hopes to obtain the necessary legislative authorization. Other countries contribute three dollars for every two the United States provides to IDA. The World Bank transferred to IDA \$75 million out of its earnings in the year ended June 1968; \$10 million was so transferred in the previous year.

Since there are now so many government and international agencies and programs working in the area of development assistance, the problem has arisen how to minimize overlapping and waste. Serious efforts have been made to coordinate aid to India, Pakistan, Turkey and other countries. But there is also the broader problem of coordinating the whole effort of developed nations to assist the less-developed lands.

An increasingly popular prescription is to

multilateralize the provision of foreign aid by transferring to international agencies the responsibility for allocating and dispensing all, or a substantial part, of the resources which the United States is willing to supply for development assistance. The alleged advantage is that, at least initially, recommendations for sound policy and adequate performance may be less resented if they come from an international agency. Among the drawbacks is that the United States already supplies somewhat over one half—and in individual cases even more—of the official resources available for development assistance. As a result, "multilateralizing" aid without corresponding increases in the contributions of other governments would weaken the international character of international development agencies—contrary to the very object being sought.

GRAND ASSIZE ON DEVELOPMENT

A Second Development Decade is now being planned by the United Nations. Given the magnitude, the complexity and the difficulty of the task, nations should indeed think—as the new president of the World Bank, Mr. Robert McNamara, remarked—in terms of a "whole generation of development that will carry us to the end of this century."

One of the first decisions of the World Bank's new president was to take up the suggestion of his predecessor, Mr. George Woods, for a Grand Assize on Development. Mr. Lester Pearson, the former Prime Minister of Canada, was appointed Chairman of the Commission to undertake the inquiry. The report is to be published later this year.

The need of the moment is for a wholly new, independent and balanced look at the problems of development. Such a re-examination would take into account, from the vantage point of the recipient countries, the great diversity of political, cultural, social as well as economic prerequisites for development, and, from the vantage point of the donor countries, the growing demands on their own economic resources as a result of immediate and dramatic needs at home.

The capacity to repay loans depends vitally on the policies a country pursues, including efficient use of capital to help expand output and strengthen the balance of payments more than enough to cover the debt service. Export earnings of the less-developed nations will also depend on rising economic activity and farsighted trade policies of the industrial world. There will be—it must be hoped—fresh opportunity to analyze and re-appraise the errors committed in the past and remove the contradictions and bottlenecks that have impeded the development process. This fundamental re-examination will provide the challenge as well as the new strategy and new initiatives for development in the Seventies.

THE TAXES OIL COMPANIES PAY

Mr. LONG. Mr. President, before my dear friend, the Senator from Wisconsin (Mr. PROXMIER), could come into the Chamber, I told him that I was going to respond to some figures he has used respecting the industry, which I think are in error and which we have debated for some time.

This will be a continuation of our friendly debate.

I am sure that when all the facts are in, it will be shown that this industry

is not a favored taxpayer but is actually an unfavored taxpayer; that the oil industry is taxed more heavily than almost any other single industry and possibly more heavily than any industry generally and certainly is taxed much more than the average for all manufacturing industries.

On April 14, the distinguished Senator from Wisconsin (Mr. PROXMIER) and I debated the question of whether the oil industry was fairly taxed. During the debate, I made the statement that the oil industry pays more taxes than the average for all manufacturing industries. My colleague disputed my statement saying it was predicated on the inclusion of user taxes which are actually paid by the consumer. The Senator was in error—I did not include user taxes in my consideration and I attempted to correct the Senator's error for the RECORD.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. LONG. Mr. President, I ask unanimous consent to proceed for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, despite my efforts to correct the Senator's error on the 14th, on April 15, my delightful colleague was back in this Chamber repeating the same untenable theme. He placed into the RECORD a so-called tax table of 24 of the largest oil refiners published in U.S. Oil Week. Using the table, he stated that these companies paid only 21.9 percent of their income in Federal, foreign, and most State taxes—including severance taxes.

Even without having had a chance to examine the Senator's table, I did attempt to clarify my position that oil companies pay more taxes than other industries. I noted that for the 12-year average, 1955 through 1966, all manufacturing industries had a rate of return on invested capital of 10.9 percent, while the petroleum industry had a rate of return of 9.7 percent. In 1964, oil's taxes were 4.82 cents for each dollar of total revenue, as compared to 4.32 cents for all businesses. In 1965, oil's taxes amounted to 5.43 cents per dollar of gross revenue, while other corporations pay only 4.62 cents per dollar.

These figures were based on actual

gross revenues applicable to all businesses.

Well, this did not satisfy my colleague either. He admitted that the oil industry does pay high taxes in relation to its overall gross revenue, but stated that net income rather than gross income should be used. When I tried to explain to the Senator that even on a net income basis, the oil industry pays more taxes than other industries, when we consider local and State taxes together with Federal income tax, he rejected the argument by referring to the table from Oil Week.

Well, even though I believed the ratio between the tax burden and gross revenue is the most valid criteria we can use, because it avoids problems of comparability normally encountered when comparing the one industry with another—and because it allows us to ignore inter-industrial differences in the treatment of inventories and depreciation—I decided to take a look at the net income approach my colleague would have us use.

First of all, using the Treasury's "Preliminary Statistics of Income for 1966," which are the latest figures available, I took the net income figures and added back the amounts deducted as depletion allowances to avoid any distortions between industries and to view my colleagues argument in the manner most favorable to him. Then, I compared this figure with the income tax figure in each year to arrive at the comparative Federal income tax burden.

They worked out as follows:

[Percent of net income]	
All industries.....	40
Manufacturing	42
Crude oil	32
Refining	23

If we combine the last two—crude oil and refining—their taxes amount to 24 percent of net income.

Mr. President, I ask unanimous consent that these calculations, worked out from the "Statistics of Income for Corporations, 1966," published by the Internal Revenue Service of the Treasury Department, together with the table from which they were made be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPARISON OF RATIO OF TAX LIABILITY TO NET INCOME IN U.S. INDUSTRIES FOR THE YEAR 1966¹

	All industries	Manufacturing	Crude oil	Refining	Combined crude oil and refining
Net income ²	\$86,433,934	\$47,829,135	\$1,568,115	\$6,139,994	\$7,708,109
Income tax ³	\$34,836,995	\$20,233,929	\$496,799	\$1,384,183	\$1,880,982
Percentage.....	40	42	32	23	24

¹ Source data was obtained from "Preliminary Statistics of Income, 1966, Corporation Income Tax Returns, U.S. Treasury Department, Internal Revenue Service," pp. 17 and 18.

² The net income figures are the sums of line 21 "Net income (less deficit)" and line 15 "Depletion" of "Preliminary Statistics of Income, 1966." Although the depletion figure probably includes some cost depletion, the entire amount has been added back since the amount of cost depletion included was not available.

³ Line 26 of "Preliminary Statistics of Income, 1966."

Mr. LONG. Mr. President, even without anything more, there is no 50 to 17 percent spread the Senator can point to and his statement on the 14th of April that—and I am quoting—

The fact is that they (the oil companies) pay about 17 percent as far as income taxes are concerned, as compared with close to 50 percent for others.

Well, this statement is simply incorrect.

Now, over and above all of this, it has been my contention all along that to be fair we have to look to the total tax burden on the oil industry, not just its Federal income tax. Under this analysis, when you add to the Federal taxes paid, the additional local severance, production, and property taxes that they pay—the tax burden of the oil industry is greater than that of other industries. This is so even though the analysis does not include the excise taxes paid by customers on the gasoline they purchase—although that, too, is a burden on the product; nor does it include import duties paid to the Federal Government. I know that, while oil companies paid almost \$2 billion in Federal income taxes in 1966, they also paid another \$2 billion in other taxes—taxes which most other companies are not required to pay. This is what led to the following colloquy between the Senator and myself—and again I am quoting from the RECORD, page 9154, April 15, 1969:

Mr. LONG. Mr. President, I repeat the statement: it is true—I agree with the Sen-

ator—that if all you are looking at is the Federal income tax, this industry pays less than the average for all manufacturing on profits.

Mr. PROXMIER. All taxes.

Mr. LONG. But if the Senator will look at the severance tax, he will find that this is one of the very few industries that pay any severance tax, and other industries that pay it, pay very little.

In Louisiana, we hit them for 10 percent of gross before we know whether they made a profit or not.

Mr. PROXMIER. The severance taxes is included in the figures I have.

Mr. LONG. That is a tax they pay that nobody else pays. When you take into account that they pay pipeline taxes—

Mr. PROXMIER. That is included.

At other points in the RECORD the Senator made the following statements—and again I quote—from page 9153, April 15, 1969:

The figures I have from the U.S. Oil Week show that the oil industry paid something like 21.9 percent of its net income in virtually all its Federal, foreign, and State taxes including property taxes.

And he also stated:

My figures show that they are taxed far less heavily than almost any other industry. As I say, it is 21.9 percent of their net income, and this includes virtually all of their taxes, and Federal taxes.

Mr. President, when the Senator made these statements, I must admit that they surprised me because they just did not tally with the figures available to me or my committee. I told myself mentally that if he was right, then the figures

I had were wrong. To clarify the matter, I instructed the staff of the Finance Committee to compare the Oil Week table with the 10-K financial statements filed with the SEC. They were instructed to ascertain, once and for all, whether or not the figures used in the Oil Week table included the severance, production, and property taxes the Senator says they do. What were the results of that study?

Well, I think we all can understand how easy it is to be "stampeded" into taking a position prematurely without all of the facts, and I am certain my colleague did not intend to misinform the Senate and the public. Because the truth of the matter is that the figures he gave from the Oil Week table do not include any production, severance, or property taxes—in fact, outside of some inconsequential local income taxes, they do not include any taxes except the foreign income taxes and Federal income taxes. A table prepared by the committee staff indicates that oil companies paid additional production, severance, and property taxes, increasing each year from \$556,482,000 in 1962 to \$868,206,000 in 1967, which represents from 11.4 to 13.8 percent of net income. All of these taxes were omitted from the Oil Week table on which the Senator from Wisconsin relied. I ask unanimous consent that the corrected table be inserted at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

¹ The data for this study relating to severance, production, and property taxes were taken primarily from SEC records. The remaining data were taken from a table entitled "Federal Taxes of Largest Refiners" placed in the Congressional Record on Apr. 15, 1969, p. 9146. Since SEC records were unavailable for Sinclair, Tidewater, Pure, and Richfield, the amounts relative to these companies were eliminated from the table mentioned above to arrive at the appropriate percentages.

² Averaged from previous years' increases.

³ Credit.

⁴ Used an average of 70 percent of "other income" since the actual figures were not available. This is slightly lower than the average shown in the years 1962 and 1963 where figures were available.

Mr. LONG. So here, if you start with the Senator's statement that the oil industry paid "something like 21.9 percent of its net income, in virtually all its Federal, foreign, and State taxes, including property taxes," the first thing to do is note that even from the Oil Week table itself this is incorrect because the percentage of net income paid in taxes is actually 30.7 percent—the 21.9 percent allocable to foreign taxes and the 8.8 percent allocable to Federal tax. Then, if you add to these percentages the severance, production, and property taxes, which the Senator says were included in his table, but really were not—and they amount to some \$868,206,000 or 12.2 percent—the 1967 percentage of taxes paid by the oil companies becomes 42.9 percent of their net income. It is almost twice the 21.9 percent the Senator quoted to this Chamber.

All of this leads right back to the statement I made on April 15 indicating that the petroleum industry's tax burden per dollar of revenue exceeds the tax burden on other industries. This is true whether you use gross income or net income figures. I would think, then, that since the table used by the Senator does not include severance, production, and property taxes—despite his assertion that it does—and since it cannot accurately reflect the relative tax burden of the petroleum industry, he would admit his error and acknowledge that it is fatal to his case.

Now, while we are talking about the Oil Week table, I should like to make a comment on Atlantic Richfield. First of all, I know nothing of the inner workings of the company. My only reason for referring to it is that on several occasions the company has been singled out as an example because it did not pay any Federal taxes in 1962 through 1967. My comment is directed at those who

would attempt to inflame public opinion without a complete presentation of the facts.

First of all, it is misleading to say that the company paid no taxes in 1962 through 1967 because the table from Oil Week placed in the RECORD by my colleague indicates that Atlantic-Richfield paid taxes for which it received a foreign tax credit totaling almost \$86 million for the years 1962 through 1967. In addition, the corrected table shows that Atlantic paid over \$135,087,000 in severance and property taxes during those years.

These taxes, coupled with the credit for foreign taxes paid over the 6-year period, averaged about 40 percent of Atlantic's net income. So it is not quite fair to state that Atlantic paid no taxes and then stop short.

Over and above all this, it was common knowledge in the oil industry that in the 1950's Atlantic was not meeting its competition. It was also common knowledge that they were dramatically increasing their research and exploration activities. This would account for large expenditures during the years 1962 through 1967 which could well explain why their Federal income tax was zero after allowance of the foreign tax credit. But, as I say, their total tax was 40 percent of their net income.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. LONG. I ask unanimous consent to have 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Incidentally, what was the result of Atlantic's activities? Well, we all know that it was Atlantic that made a major discovery of crude oil on the north slope of Alaska. There is no question that the discovery will benefit Atlantic—but more than that—it will benefit the United States. Its effect was recently discussed in an article in the

April 14 edition of U.S. News & World Report entitled "The Changing Geopolitics of the World's Oil," and I do not believe anyone would discount the importance of the find. I ask the unanimous consent of the Senate that this article be placed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CHANGING GEOPOLITICS OF THE WORLD'S OIL

It is a new ball game in the international politics of oil. Recent discoveries in the Americas and elsewhere are altering the balance of petroleum-based power, deflating somewhat the importance of the Middle East. The Arctic is becoming a key area.

Sweeping changes under way in the world's oil picture suddenly are shifting the international power balance in the direction of the U.S.

America now is becoming self-sufficient once again in oil, the major source of energy for modern industry and for defense.

Soviet Russia, pinched by rising costs at home, may have to begin importing oil.

Oil finds in Africa, South America, North America and the Middle East are about to provide Western Europe and Japan with new sources of energy—but these nations still remain basically dependent on the U.S. for help in future political crises.

Exploration for oil is expected to shift more and more to the Arctic and to politically stable areas—away from the Middle East.

Canada and the U.S. are being pulled closer and closer together.

Biggest change since the '40s. It all adds up to the most dramatic shift in oil's impact on geopolitics since the Middle East became the world's No. 1 oil region in the 1940s.

"What is going on today will turn the power politics of the world upside down," is the way the current situation is summed up by one man who has served in high positions in both the U.S. Government and the oil industry.

For that reason alone, world oil changes shaping up are of major importance in the Nixon Administration's reassessment of American strength and commitments in the world.

And oil will play a part in U.S. strategy in big-power discussions aimed at achieving peace between Israel and the Arabs.

Talks by staff members of "U.S. News & World Report" with diplomats, economists, oil experts and other authorities in the U.S., Canada, Latin America, Europe and other parts of the world show what the changes mean.

The single most important event today, the authorities agree, is discovery of oil on Alaska's Arctic coast. Although exact size of the oil deposits still is not certain, experts now are assuming enough oil is there to keep the U.S. self-sufficient in reasonably priced fuel for the foreseeable future.

Significance of that to diplomats and military men: The U.S. no longer faces the immediate prospect of having to rely on the erratic Middle East for large supplies of petroleum.

That is a bedrock advantage for a world power. The U.S. thus can pursue a more independent policy in defense and international affairs. Russian domination of the Mideast, a growing danger, seems a less catastrophic prospect to the U.S. than formerly.

A crisis avoided. Just a few months ago, the U.S. faced the opposite prospect. Soaring consumption and lagging finds of new oil fields indicated the U.S. would have to import half its oil needs by 1980.

"The U.S. and Western Europe together constitute nearly three fourths of the free-world market for crude oil, explains John G. Winger, vice president of Chase Manhattan Bank. "And by the time the U.S. had to import half of its needs, the combined self-sufficiency of the two areas would be no more than 25 per cent."

But now the major oil strike at Prudhoe Bay on Alaska's Arctic coast appears to have changed the outlook. Production prospects are so huge—40 billion barrels, by some estimates—that the U.S. will be able to continue its present policies of importing only 12.2 per cent of its needs or less, according to oil experts.

These policies now are coming under review both by a White House task force headed by Labor Secretary George P. Shultz and by Congress. To be decided is whether the U.S. should continue to restrict imports, thus permitting a domestic price of about \$3 a barrel for crude oil. On the world market, oil sells for roughly half as much.

All eyes turn north. Alaska will have other effects of advantage to the U.S., too, experts point out. One is in exploration:

"For the next several years, the center of world oil exploration will move toward the Arctic—in the U.S., Canada, Russia, possibly Spitsbergen"—the Norwegian islands high in the Arctic—says Walter J. Levy, a leading international oil consultant.

Adds an executive of Standard Oil Company (New Jersey): "As you circle the Arctic Ocean you see some of the same geological formations all the way around."

Finds in the free-world part of the Arctic, of course, would help cut down other countries' dependence on the Middle East.

New bond for old friends. Another result of Alaskan oil is the likelihood of closer economic and political ties between the U.S. and Canada, despite differences over missiles and China policy now in the headlines.

In prospect is a single North American oil policy linking the two countries. Steps in that direction are being discussed by officials after talks on the subject by President Nixon and Canadian Prime Minister Pierre Elliott Trudeau in Washington late in March.

Pipelines already carry Canadian oil to the Great Lakes region of the U.S. and the Pacific Northwest. Yet Canada still has enormous resources of oil, largely undeveloped because of a lack of markets. Informal restrictions keep this oil out of the U.S., and it is too expensive to be sold elsewhere.

What's more, odds are that Canada will find even more oil soon.

Geologists are hunting oil in the Arctic islands between the North American mainland and the North Pole. Other work is going on across the border from Alaska's big find. And the Athabasca tar sands in the Canadian Province of Alberta, holding an estimated 300 billion barrels of oil, are being developed in preparation for the time when more readily processable deposits dwindle.

There is interest in offshore drilling along the Nova Scotia coast, too.

Joint plans in the crucible. So Canadians are having to look to the U.S. for arrangements to sell oil.

Proposed in Canada is an arrangement by which Canada would help U.S. firms build a pipeline from Alaska to Chicago in exchange for the right to sell Canadian oil in the U.S.

Many oil experts think much of the Canadian petroleum eventually will be sold in Western Europe or Japan.

"But it is hard to imagine a system that doesn't let Canada sell some oil here," says a U.S. oil man, "for security and diplomatic reasons at least."

What's important is that, taken together, Canadian and U.S. oil amount to a vast pool of energy for use of North America first and its allies second in times of emergency, say international experts.

Add to this the oil output that is now rising in Latin America.

Latest development is a rich strike in Ecuador by Texaco, Inc., and the Gulf Oil Corporation. Some oil experts think this may be part of a major oil region stretching along the Andes Mountains from Colombia to Peru.

If it turns out to be that extensive, it would challenge Venezuela, now the dominant Latin-American oil country.

Boon for Europe, too. Big oil finds such as these are offering comfort to Western Europe.

Reason: Every major oil discovery in the free world outside the Middle East enables Europe and Japan to reduce their dependence on oil from Arab and Mideastern countries.

France, for example, currently buys 86 per cent of all its crude oil from Arab countries, Italy 82 per cent, West Germany 75 per cent and Great Britain 73 per cent, Japan relies on the Middle East, including non-Arab Iran, for about 90 per cent of its oil.

That's cause for concern by Western strategists. With Britain pulling its troops out of the Mideast and Russia gaining influence, no one knows how secure the area will be for U.S. and its friends.

Now new oil production is beginning to come out of Cabinda, a part of Portugal's African colony of Angola. Nigeria is expected to increase its exports to 800,000 barrels a day by the end of 1969, despite its civil war. Australia is headed toward self-sufficiency.

Japan is prodding oil firms to find more oil in such island spots as Borneo in the Pacific and even off the shores of the Japanese home islands. Deals also are being studied for Japanese purchase of Canadian crude.

Oil output is going up in Libya, an Arab nation that has avoided many of the antagonisms against the West. The same is true of small sheikdoms such as Abu Dhabi, Dubai and Oman, where output is accelerating.

What's more, supertankers that can carry more than 200,000 tons of oil on a single trip are making it possible for industrial Northern Europe to by-pass the closed Suez Canal and get oil from far away at economic prices.

Still another potential source will be created for Europe if the attempt to open up a Northwest Passage from the Atlantic to northern Alaska succeeds. A tanker fitted out as an icebreaker is to make the attempt this summer. This would permit direct shipment of Alaskan and Canadian Arctic oil to Europe.

Adding up these developments, David Baran, a managing director of the Royal

Dutch/Shell Group of oil companies, said recently of the Middle East:

"The picture as I see it is on the whole a reassuring one." He figures major Middle Eastern producers such as Iran, Saudi Arabia and Kuwait want to sell even bigger amounts of oil than they already are selling. So they will avoid troublemaking that could turn Western Europe to competing countries. World oil prices, too, appear headed down.

Trouble is, say oil experts in Washington, Arab countries don't always act rationally or in their own best interests.

Effect on Moscow. And then there is Russia. It is reversing a long-standing policy of boosting oil production at an ever-increasing pace.

By 1980, oil men in Europe now believe, Russia may be in the market for as much as 375 million barrels of oil a year, if new production goals and consumption trends continue.

Moscow already has put a lid on oil exports. But Russia, it is thought, will continue to export to Western countries as a means of earning hard currencies—even if it has to import oil from the Mideast to make up the difference.

Eastern European satellites, kept dependent on Russia for most of their oil up to now, also will have to import more, British officials forecast.

What's going on? Rising costs, mainly. Although Russia has bigger oil reserves than the U.S. and an active drilling program, its transportation costs are sky high. Ninety per cent of Soviet oil is located in Siberia and Central Asia, but 80 per cent of demand is thousands of miles away in European Russia.

Russia's game. Western oil men expect Russia will now try to work out barter and aid deals in exchange for crude oil from Iraq, Algeria, Egypt and possibly Iran.

Russia isn't thought likely to try for an actual take-over of Western-owned oil facilities in the Mideast. Instead, says one diplomat in the U.S., the strategy seems to be aimed at political domination, thus removing control of Mideastern oil from free-world companies.

And that's clearly a matter of worry for Western strategists until the new sources of oil outside the Mideast are fully developed—a matter of some years.

"Middle East oil . . . is still, and long will be, the non-Communist world's main supply," says a recent report by the Center for Strategic and International Studies at Georgetown University.

The report continues: "Its tremendous proved reserves must always be considered of prime strategic importance, and denial of this supply of oil in times of emergency or war would have a strategic implication of profound consequence."

What emerges from the big changes now under way is that only the U.S. seems to be reducing its dependence on the Mideast significantly. And that is a matter of consequence today.

Mr. LONG. Mr. President, in my view, the Alaskan discoveries are a perfect example of why you need tax incentives in the oil industry. I am convinced that without these incentives the Alaskan discoveries would never have been made. Instead of the enviable position we now occupy, where we can envision a future free of dependence on Mideast oil, we would be wringing our hands anticipating the time when we would have to rely on foreign oil for 50 percent of our needs. When I hear all the talk about the cost of tax incentives for oil, I often wonder just how you go about measuring the tremendous benefits, both tangible and intangible, that accrue to all of us, because of the Alaskan find. Certainly

there is a compensating offset that should be recognized.

Finally, in the case of Atlantic it must be clear that their tax posture is a temporary one. Once the Alaskan wells start producing and the exploratory aspects of the venture are minimized, the company will begin realizing domestic taxable income and will pay large amounts of U.S. income taxes on that income without reduction by foreign tax credits.

In conclusion, I would like to make one last comment. It is unfortunate that those who oppose the oil industry will frequently attempt to make their case by relying upon factually inaccurate or slanted tables and magazine articles that are calculated to arouse public resentment—articles, for example, that cite the fact that Atlantic-Richfield has paid no Federal income tax, leaving the impression it has no tax burden at all, when in truth, it is paying over 40 percent of its net income in taxes. This type of thing is just not accurate or fair, or in the spirit of honest debate, where we should be seeking to inform the public. That sort of misinformation only serves to deceive them.

I would urge that if we are to discuss our different views on this matter, let us not do it by indiscriminately inserting into the RECORD articles or tables that mislead the Senate and the public. Rather, let us assemble our facts, note our points of difference, and state our views honestly and forthrightly, comparing one with the other, in order that we may decide what the real facts are, so that the ultimate decision made is best for this country.

AUTHORIZATION FOR SALINE WATER CONVERSION PROGRAMS

Mr. KENNEDY. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 1011.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1011) to authorize appropriations for the saline water conversion program for fiscal year 1970, and for other purposes, which was to strike out all after the enacting clause and insert:

That there is authorized to be appropriated to carry out the provisions of the Saline Water Conversion Act (66 Stat. 328), as amended (42 U.S.C. 1951 et seq.), during fiscal year 1970, the sum of \$25,000,000 as follows:

- (1) research and development operating expenses, not more than \$16,223,000;
- (2) design, construction, acquisition, modification, operation, and maintenance of saline water conversion test beds and test facilities, not more than \$5,355,000;
- (3) design, construction, acquisition, modification, operation, and maintenance of saline water conversion modules, not more than \$1,450,000; and
- (4) administration and coordination, not more than \$1,972,000.

(b) Expenditures and obligations under any of the items in this section except item (4) may be increased by not more than 10 per centum if such increase is accompanied by an equal decrease in expenditures and obligations under one or more of the other items, including item (4).

SEC. 2. In addition to the sums authorized to be appropriated by this Act, the Secretary may utilize any funds previously appropriated for this program which are not obligated on June 30, 1969, subject to the dollar limitations applicable to the fiscal year 1969 program.

Mr. KENNEDY. Mr. President, I move that the Senate disagree to the amendment of the House of Representatives, and request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. JACKSON, Mr. ANDERSON, Mr. MOSS, Mr. ALLOTT, and Mr. JORDAN of Idaho conferees on the part of the Senate.

THE SAFEGUARD SYSTEM

Mr. GORE. Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks several documents which I believe to be important in connection with the Senate's consideration of the proposed Safeguard system.

First, I wish to have printed in the RECORD letters from Dr. Hans Bethe, Dr. Carl Kaysen, Dr. James Killian, Dr. George Kistiakowsky, and Dr. Herbert York. Their letters are replies to letters I wrote to all those who appeared before the Subcommittee on International Organization and Disarmament Affairs before March 14, in which I said to the addressees that, since they had testified before the Safeguard decision had been announced, they might wish to comment specifically on the proposed Safeguard system. I have received replies to date only from Drs. Bethe, Kaysen, Killian, Kistiakowsky, and York. All of them oppose the deployment of the Safeguard system at present.

Second, I wish to have printed in the RECORD a letter Chairman FULBRIGHT wrote to Deputy Secretary of Defense Packard on April 22, asking certain questions about persons outside the Defense Department who had been consulted with regard to the Safeguard decision, and Mr. Packard's reply which was dated April 25. The exchange of correspondence makes clear that the full Defense Science Board which Mr. Packard included in the "List of Scientists and Engineers Consulted by Dr. Foster on ABM," a list which appears on page 308 of the subcommittee's printed hearings, met most recently on the ABM on May 10, 1967. Mr. Packard's letter also shows that ABM issues were discussed with members of the President's Science Advisory Committee on October 22, 1968, but thereafter not until March 17, 1969, 3 days after the Safeguard decision had been announced. Finally, Mr. Packard's letter reveals that, of the three members of the Defense Science Board Task Force on ABM, one is about to become Deputy Director for Strategic and Special Systems in the Office of the Director of Defense Research and Engineering and a second occupied that position from May 1962 to April 1965.

Third, and finally, I wish to have printed in the RECORD an interview which

appeared in the Washington Post on May 12 with Rear Adm. Levering Smith, Director of Navy Strategic Systems Projects. The article identified Admiral Smith as the admiral responsible for our Polaris submarine missile fleet. In the interview, Admiral Smith is quoted as saying:

The Russians have no specific new anti-submarine warfare methods the Navy knows of that would make the Polaris fleet vulnerable to attack.

I would like to recall in this connection that Secretary Laird told the Subcommittee on International Organization and Disarmament Affairs on March 21 that our Polaris fleet would not be "a sufficient and credible deterrent in the period 1972 and beyond."

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

ITHACA, N.Y.,
May 6, 1969.

Senator ALBERT GORE,
U.S. Senate, Committee on Foreign Relations,
Senate Office Building, Washington, D.C.

DEAR SENATOR GORE: Thank you for your kind letter of April 28th. I am enclosing a xeroxed copy of a "Postscript" which I have just published in the Bulletin of the Atomic Scientists, May, 1969. It sets forth my opinion on the hard point defense component of the Safeguard system.

In this matter as in my general opinion on ABM I agree closely with the opinion of Dr. George Rathjens, who also testified to your Committee.

I believe we should do the following:

(1) Design a completely new radar, much harder, of lower performance and hence cheaper than the MSR.

(2) Examine and where necessary redesign other components of the Sentinel system for the specific purpose of defending hard sites.

(3) Negotiate with the Russians on arms control, with the object to prohibit further increase of offensive forces.

(4) If 3 is unsuccessful, and points 1 and 2 have been accomplished, re-examine the question whether the Russians are aiming to develop a first strike capability against Minuteman. If the answer to this is Yes, we may then wish to deploy hard site ABM defense.

Yours sincerely,

HANS A. BETHE.

POSTSCRIPT

The foregoing testimony was given a week before President Nixon's decision to deploy a modified ABM system, the Safeguard. The area defense part of Safeguard is much the same as Sentinel, although the system has been further thinned out. This is to be welcomed. But of course the main argument of my article, that any area system can only be useful for a limited period of time and can thereafter be penetrated, remains unchanged, and so does my opinion that ABM against China is unnecessary.

In the new Safeguard system, ABM defense of Minuteman plays a prominent role, and is the first component to be deployed. As discussed in my testimony, I think such deployment is sensible in principle but is very premature.

At present the Russians have about as many land-based ICBMs as we do. Our Minuteman is well enough dispersed so that even a large Russian warhead can destroy at most one of our missiles. It would be very foolish of them to waste, in case of war, their precious large SS9 missiles on an attack on our Minutemen, getting one Minuteman for one of their much larger missiles.

The only concern one might have is the possible use of MIRV by the Russians in

the future. Because of the large payload of their SS9 missiles it would be possible for each of their missiles to carry a number of re-entry vehicles, let us say five. If this were done, they could target 1000 re-entry vehicles, carried by 200 SS9 missiles, on our Minuteman silos. Assuming 80 per cent probability of "kill" (including aiming accuracy, this is an extremely high assumption!) they might destroy 80 percent of our Minuteman force. This might be quite serious, especially if at the same time they had ABM deployed around their cities. But there are the following counterarguments:

1. Even if such an attack were to occur and be successful, we would still have our Polaris and our bombers. It is more than unlikely that all of these retaliatory capabilities would be paralyzed simultaneously.

2. Because of limited reliability of any missile we would still have 200 Minutemen left which would be a formidable force in the absence of ABM. So an agreement forbidding deployment of ABM on both sides would leave us a useful land-based deterrent even after such a devastating Russian attack.

3. Presumably not all Russian reentry vehicles would arrive simultaneously. It would therefore be possible to launch the remainder of our Minuteman force after only a few of our silos had been destroyed.

4. Most important, the element of time. MIRV testing by Russia has only just begun. It takes a long time to complete testing. It will take still longer to achieve the necessary aiming accuracy, and then much longer still to deploy a large force of MIRV's.

In short, we have a "sufficiency" of strategic weapons for a long time to come, without the Minuteman ABM.

On the other hand, once we are worried about preserving our Minuteman capability I much prefer to defend the Minuteman silos rather than to increase their numbers. The latter would be an outright arms race.

THE INSTITUTE FOR ADVANCED STUDY,
Princeton, N.J., May 6, 1969.

HON. ALBERT GORE,
U.S. Senate,
Committee on Foreign Relations,
Washington, D.C.

DEAR SENATOR GORE: Thanks for the two copies of the printed Hearings on ABM of your subcommittee. The additional statement that I submitted on March 31, which appears in the printed record on pages 158 through 161, does, I think, answer the question of my specific views on the Safeguard System, and I don't have any more to add at this time.

Let me again express my appreciation of what you and your colleagues on the committee are doing in the way of providing indispensable public information on the ABM matter and thank you once more for the opportunity to appear before the committee.

Sincerely yours,

CARL KATSEN.

CAMBRIDGE, MASS., May 3, 1969.

HON. ALBERT GORE,
U.S. Senate,
Committee on Foreign Relations,
Washington, D.C.

DEAR SENATOR GORE: I am indebted to you for sending me a copy of the printed ABM hearings of the Subcommittee on International Organization and Disarmament Affairs. The personal conclusions I expressed in my testimony at your hearings, it seems to me, are still relevant now that Safeguard has replaced Sentinel.

I greatly appreciated your kindness and courtesy at the time I came down to testify.

Yours sincerely,

J. R. KILLIAN, Jr.

CXV—807—Part 10

HARVARD UNIVERSITY,
DEPARTMENT OF CHEMISTRY,
Cambridge, Mass., May 8, 1969.

HON. ALBERT GORE,
U.S. Senate,
Committee on Foreign Relations,
Washington, D.C.

DEAR SENATOR GORE: Thank you very much for your letter of April 28 and the printed copy of the hearing on the ABM of your Subcommittee.

You ask me about my opinion about the Safeguard deployment. The Safeguard is to use essentially the same components, only slightly modified, as the Sentinel was to use, which were originally developed for the so-called Nike X deployment. The latter was, of course, designed primarily for population and city defense. The only real significant difference between Safeguard and Sentinel is that the purpose of the Safeguard is a more explicit defense of the Minuteman silos. In fact the two initial bases are specifically for the defense of Minuteman. It is my opinion that the Nike X components to be used by the Safeguard are ill suited for the defense of Minuteman deployment and will not greatly increase the survivability of this deployment in the event of a so-called first strike. On the other hand I do not believe that a first-strike which has a realistic chance of destroying our deterrent forces is feasible in the next five to seven years. Therefore, my opinion is as negative about the deployment of Safeguard as it was about the Sentinel deployment, as already stated by me before your Subcommittee.

If you wish I could go into considerable details to justify this opinion. However, I would like to say that my judgment is based very much on the considerations which were presented before the Senate Committee on Armed Services on April 22 by Dr. W. K. H. Panofsky and Dr. George Rathjens. I believe that in these prepared statements the case against the need for immediate deployment of Safeguard is stated extremely well and I share their conclusions.

Sincerely yours,

G. B. KISTIAKOWSKY.

UNIVERSITY OF CALIFORNIA,
La Jolla, Calif., May 1, 1969.

SENATOR ALBERT GORE,
U.S. Senate,
Committee on Foreign Relations,
Washington, D.C.

DEAR SENATOR GORE: Thank you for forwarding a copy of hearings on the ABM. You also noted in your letter that I had testified before the remarkable transformation of Sentinel into Safeguard had occurred, and asked for my comments on this new situation. My views on this, which are in essence the same as before only more so, are contained in the enclosed prepared statement I delivered before the Senate Armed Services Committee.

Please keep up the good work; it's eminently clear that if the Senate cannot get this thing under control, no one can. You and your colleagues are our only real hope.

Best personal good wishes.

Sincerely,

HERBERT YORK.

STATEMENT BY HERBERT F. YORK BEFORE THE
SENATE ARMED SERVICES COMMITTEE, APRIL
22-23, 1969

Mr. Chairman and Members of the Committee:

I appreciate very much the opportunity to appear before your committee to discuss the proposed ABM program. I had, as you know, an opportunity to discuss this same general problem before a subcommittee of the Senate Foreign Relations Committee on March 11. Since that time, a new threat analysis has been presented, and a new ABM deployment,

called Safeguard, has been proposed. Safeguard appears to be partly a response to the new threat analysis, partly a response to the objectives of many Americans to the deployment of Sentinel components in their backyards, and partly a response to technical objectives to the Sentinel system raised by scientists and engineers, both inside and outside the present defense establishment.

I do not doubt the statements of the Secretary of Defense that the Soviets are now rapidly building up their offensive forces. If we examine the charts presented to this committee by Defense officials a month ago, what is difficult to understand about this matter is why the Soviets settled for being a poor second in intercontinental nuclear arms for such a long time. Conceivably, the suggestion that the Soviets are reaching for a first strike capability may be true, but their actions can be easily understood without appealing to such a notion. In any event, I doubt the wisdom of the proposed U.S. response because (1) the Safeguard System is technically questionable and (2) the deployment of Safeguard would accelerate the arms race.

For our purposes today it is important to note that the Defense Department has in these last few weeks reintroduced the objective of providing an ABM defense capable of coping with a large and sophisticated offense. True, the defense of selected hard points now being proposed for Safeguard is theoretically somewhat easier than the defense of large soft targets such as cities, the goal of Sentinel and its predecessors. However, the designers are now again required to cope with that large variety of very difficult technical problems which defense designers tried unsuccessfully to solve in the days of Nike Zeus and Nike-X. I am referring to that group of qualifiable technical problems which includes radar blackout, penetration aids of all sorts (decoys, chaff, electronic countermeasures and multiple warheads), warhead kill mechanisms and the defenses against them, as well as offensive tactics such as "roll back" and saturation techniques. Fortunately, these matters have been much discussed in public in recent years and especially in recent months. As a result, I think it has become clear to most interested persons that while defense designers have sometimes been on the verge of solving one or two of these problems when they treat them separately and in isolation, they have never come close to coping with them in the complex combinations that even a moderately sophisticated offense can present. I see no reason to suppose that this situation will change.

I should like now to turn to two technical problems that pertain to all the forms of ABM so far proposed, but which unfortunately are not so simple to discuss nor so easy to quantify as that class of problems I have just mentioned.

Any active defense system such as the ABM, must sit in readiness for two or four or eight years and then fire at precisely the correct second following a warning time of only a few minutes. This warning time is so short that many systems designers would like to eliminate human decision-makers, even at low command levels, from the decision making system. Further, the precision needed for the fire time is so fine that machines must be used to choose the precise instant of firing no matter how the decision to fire is made. In the case of offensive missiles the situation is different in an essential way: although maintaining readiness throughout a long, indefinite period is necessary, the moment of firing is not so precisely controlled in general and hence human decision makers, including even those at high levels, may readily be permitted to play a part in the decision-making process.

Thus if we wish to be certain that the defense will respond under conditions of surprise, the trigger of the ABM, unlike the triggers of the ICBMs and Polaris, must be continuously sensitive and ready, in short a "hair" trigger for indefinitely long periods of time. On the other hand, it is obvious that we cannot afford to have an ABM fire by mistake or in response to a false alarm. Indeed the Army went to some pains to assure residents of areas near proposed Sentinel sites that it was imposing requirements to insure against the accidental launching of the missile and the subsequent detonation of the nuclear warhead it carries. Moreover Army R&D officials have assured the public that no ABM's would ever be launched without specific approval of "very high authorities." These two requirements, a "hair" trigger so that it can cope with a surprise attack and a "stiff" trigger so that it will never go off accidentally or without proper authorization are, I believe, contradictory requirements. In saying this I am not expressing doubt as to the stated intention of the present Army R&D leaders, and I strongly endorse the restrictions implied in their statements. However, I am saying that if the system cannot be fired without approval of the "highest authorities," then the probability of its being fired under conditions of surprise is less than it would be otherwise.

Furthermore, when control over the system passes from the present R&D oriented officers to operations oriented officers, it is not at all clear that these latter will approach the problem with the same degree of sensitivity. It is important to emphasize that this problem exists only in the real world and not in the test range; on the test range there need be no such concern about accidental misfires, the interceptions do not involve the use of nuclear weapons and the day, if not the second, of the mock attack is known. Another essential (but again difficult to quantify) difference between the real world and the test range lies in the fact that the deployed defensive equipment will, normally, never have been fully and realistically exercised and even the supposedly identical test range equipment will never have been tested against the precise target or targets that the deployed equipment would ultimately have to face. In the case of other defense systems which have worked after a fashion, practice using the actual deployed, equipment against real targets has been possible and has been a major element in increasing their effectiveness. Thus, the Soviet SAMs in North Vietnam work as well as they do because both the equipment designers and the operating crews have had plenty of opportunities to practice against U.S. targets equipped with real countermeasures and employing real tactics.

For all these reasons, I continue to have the gravest doubts as to the capability of any ABM system I have heard of, whether or not the problem has been defined into being "easy" and whether or not it "works" on a test range. I stress that I am not just talking about some percentage failure inherent in the mathematical distribution of miss distances, nor statistically predictable failures in system components, but rather about possible catastrophic failure in which at the moment of truth either the system doesn't fire at all, or all interceptions fail for some unforeseen reason.

Let us now move from technical to political matters concerning the relationship between the ABM and the arms race. It is frequently said that the ABM, or at least some versions of it, does not have serious arms control implications. The reasons advanced have to do with its intrinsically defensive character. In my opinion such a belief is based on an error which may be called "The Fallacy of the Last Move." It is indeed true that if the last move ever made in the arms race consisted in deploying an ABM system, then de-

ploying the ABM would by definition not have any arms race implications. But in the real world of constant change in both the technology and the deployed numbers of all kinds of strategic weapon systems, ABMs are accelerating elements in the arms race. In support of this, let us consider a relevant bit of recent history.

At the beginning of this decade, we began to hear about a possible Soviet ABM and we became concerned about its potential effects on our ICBM and Polaris systems. It was then that we began seriously to consider various penetration aid ideas, among them that of placing more than one warhead on a single offensive missile. This idea has since grown in complexity, as these things do, and has resulted in the MIRV concept (Multiple Independently Targeted Reentry Vehicles). There are now additional justifications for MIRV besides penetration, but that is how it all started. As others have pointed out, the MIRV concept is a very important element in accelerating the arms race, and potentially seriously destabilizing. In fact, the possibility of a Soviet MIRV is used as one of the main arguments in support of the idea of hard-point defense and thus we have come one full turn around the arms race spiral. No one in 1960-61 thought through the potential destabilizing effects of multiple warheads, and certainly no one predicted, or even could have predicted, that the inexorable logic of the arms race would carry us directly from Soviet talk in 1960 about defending Moscow against missiles, to a requirement for hard-point defense of offensive missile sites in the United States in 1969. Likewise, I am sure the Russians did not foresee the large increase in deployed U.S. warheads that will ultimately result from their ABM deployment. Similarly no one today can describe in detail the chain-reaction which the Safeguard deployment would lead to. The response of our defense establishment to the Soviet ABM, which I have outlined above, was not the result of our being "provoked," and I emphasize this because we hear so much discussion about what is a "provocative" move and what is not. Rather, our response was motivated by a deep seated belief that the only appropriate response to any new technical development on the other side is further technical complexity of our own. The arms race is not so much a series of political provocations followed by hot emotional relations as it is a series of technical challenges followed by cool calculated responses in the form of ever more costly, more complex, and more fully automated devices. I believe that this endless, seemingly uncontrollable process was one of the principal things President Eisenhower had in mind when he made his other, usually forgotten, warning: "we must be alert to the . . . danger that public policy could itself become the captive of a scientific-technological elite." He placed this other warning, also from the farewell address, on the same level as the much more familiar warning about the military-industrial complex.

It may be that the present Soviet offensive buildup is in part a response to one of the earlier versions of our ABM. The Soviet "Pentagonologists" may simply have concluded in the mid-sixties that the U.S. military-industrial complex eventually would succeed in foisting an ABM on the American people, and the Soviet technologists felt a need to provide a technical response to it, just as we did earlier in the reverse case. Just how correct this hypothetical analysis of our future action was, still remains to be seen.

Thus, although I cannot be sure of the mechanism, I believe that either Sentinel or Safeguard will produce further acceleration of the arms race. It is possible that the deployment of these ABMs will lead to a new round of penetration aid developments with further consequences of the magnitude of those produced by MIRV. It is indeed prob-

able that deployment of these ABMs would lead to greater numbers of deployed offensive warheads on both sides. We may further expect deployment of these ABMs to lead to the persistent query, "but how do you know it really works?" and thus to increase the pressures against the current Partial Test Ban Treaty. Finally, it is certain that deployment of these ABMs will lead to placing greater reliance on automatic devices for making that ultimate decision about whether or not doomsday had arrived.

Perhaps the worst implication of the ABM, with regard to arms control, is that the people and the Congress may be deceived into believing that we are finally on the track of a technical solution to the dilemma of the steady decrease in our national security which has accompanied the steady increase in our military power over the last two decades. Such a false hope would be extremely dangerous if it diverted any of us from searching for a solution in the only place it may be found: in a political search for peace combined with arms control and disarmament measures.

Let me close on a more positive note by saying that I do believe there are circumstances in which an ABM could play a beneficial role. Such a circumstance would be one in which, as part of a bold and strong arms control agreement, at least one offensive missile was eliminated for each defensive missile deployed. Under such circumstances, deployment of an ABM would receive very wide support indeed. But unfortunately, that's not what we're talking about; instead, the only serious proposals before us seem to involve more of everything.

APRIL 22, 1969.

HON. DAVID PACKARD,
Deputy Secretary of Defense,
Washington, D.C.

DEAR MR. PACKARD: When you testified before the Subcommittee on International Organization and Disarmament Affairs of the Committee on Foreign Relations on March 26, you and I discussed the question of people outside the Defense Department who had been consulted regarding the Safeguard system. You subsequently provided a list of scientists and engineers consulted by Dr. Foster and a list of members of the President's Scientific Advisory Council who were present at a discussion of ABM with Dr. Foster.

I would appreciate having, if possible within two days, answers to the following questions:

1. When were the scientists and engineers, listed as members of the Defense Science Board, consulted by Dr. Foster on the ABM?
2. Was Dr. Richard L. Garwin present at the meeting at which the members of the Defense Science Board were consulted by Dr. Foster on the ABM?
3. On what date did Dr. Foster discuss the ABM with members of the President's Scientific Advisory Council?
4. Does Dr. Roland Herbst, a member of the Defense Science Board Task Force on ABM, now hold a government position, and, if so, what is that position?
5. Does Mr. Fred Payne, a member of the Defense Science Board Task Force on ABM, now hold a government position and, if not, has he held a government position in the past and, if so, when?
6. What is the present position of Dr. Donald Ling, a member of the Defense Science Board Task Force on ABM?

Sincerely yours,

J. W. FULBRIGHT,
Chairman.

THE DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., April 25, 1969.

HON. J. W. FULBRIGHT,
Chairman, Committee on Foreign Relations.
DEAR MR. CHAIRMAN: This is in response to your letter to me of April 22, 1969. My com-

ments correspond to your numbered questions.

1. Dr. Foster has discussed the ABM issue with various members of the Defense Science Board at various times, including:

a. March 11, 1969—Defense Science Board Task Force on ABM.

b. May 10, 1967—the full Defense Science Board. The entire meeting was devoted to ABM.

2. Dr. Garwin was present at the May 10, 1967 meeting, but was not present at the March 11, 1969 meeting (he was not a member of the Task Force). Dr. Foster has, however, discussed the ABM issue with Dr. Garwin informally on several occasions.

3. Dr. Foster discussed the ABM issues with members of the President's Science Advisory Committee (PSAC) on October 22, 1968, and March 17, 1969. The Strategic Military Panel of PSAC was briefed on ABM issues by the Deputy Director of the Office of Defense Research and Engineering, Dr. Lloyd Wilson, and Lt. General Alfred Starbird, the Sentinel System Manager, on October 3, 1968. During the period that the modified Sentinel program (now Safeguard) was under consideration in the Executive Branch, it was studied by the PSAC Strategic Military Panel. It is important to know that the Sentinel System contained all the options eventually incorporated into Safeguard, such as defense of Minuteman and defense against SLBM's, so that the issues covered by the Panel were essentially those covered in the Executive Branch. The results of the Panel's considerations were discussed on February 26, 1969, by Dr. Foster and me, with Dr. Dubridge, Chairman of PSAC, and with Dr. M. L. Goldberger, Chairman of the Strategic Military Panel, and Dr. S. D. Drell, member of the Panel.

4. Dr. Roland Herbst is Associate Director of the Lawrence Radiation Laboratory, University of California. He has recently indicated acceptance to an appointment as Deputy Director (Strategic and Space Systems) in the Office of the Director of Defense Research and Engineering. Papers to this effect are currently being processed through the Civil Service Commission.

5. Mr. Fred Payne does not hold a government position. He is a consultant, however, to the Director of Defense Research and Engineering. From August, 1961, to May, 1962, he was Assistant Director (Strategic Weapons), and from May, 1962, to April, 1965, he was Deputy Director (Strategic and Defensive Systems), both in the Office of the Director of Defense Research and Engineering.

6. Dr. Donald Ling is Vice President, Military Systems Engineering, Bell Telephone Laboratories, Whippany, New Jersey. He was the personal selection, as were the other Panel members, of the Chairman of the Task Force, Dr. Richard Latter, (who incidentally is a member of the Strategic Military Panel of PSAC). Dr. Ling was chosen for his expertise in the ABM system under discussion.

When considering a subject as technically complex as the ABM, it is imperative that the government obtain inputs from many qualified sources. We depend heavily on the cooperation of the universities and of industry in furnishing us experts outside of the Department of Defense for this purpose. These outside experts are sometimes of necessity affiliated with the program under discussion. However, they function in strictly an advisory capacity and decisions are made within government.

I would be pleased to furnish any other information you may wish on this matter. Sincerely,

DAVID PACKARD.

[From the Washington Post, May 12, 1969]

A-SUB INVULNERABLE, POLARIS CHIEF SAYS
(By Jim Ottaway, Jr.)

The Navy admiral responsible for the 41-submarine missile fleet is confident the Russians cannot now and will not in the fore-

seeable future be able to successfully attack the United States' \$13-billion underwater nuclear deterrent force.

In a rare newspaper interview, Rear Adm. Levering Smith, director of Navy strategic systems projects, gave the following reasons for his belief in the invulnerability of the nuclear missiles carried by nuclear-powered Polaris submarines:

1. "I am quite positive that Russian submarines cannot and are not following any of our Polaris submarines under water. I am also quite positive that the new generation of Russian submarines that are getting close to operational status, that are now being tested, will also not be able to follow our Polaris submarines."

2. The Russians have no specific new anti-submarine warfare methods the Navy knows of that would make the Polaris fleet vulnerable to attack, despite many reports of a superior Russian sonar system or satellite detection capability.

3. Neither the United States nor the Russians can or will likely ever be able to use satellites to detect submarines under the water.

"We have tried to use satellites to do that. The laws of physics will have to be changed to make it practical. The chances of a satellite going over the right spot aren't very good. It's possible, but not practical, to use satellites for submarine detection," Adm. Smith said.

4. Although only 50 per cent or 328, of the 656 Polaris intercontinental missiles are on station at one time and ready to fire within minutes of a presidential order, the Navy knows from actual test firings that their reliability is 85 to 95 per cent.

5. He is "skeptical" about reports that the nuclear attack submarine Scorpion, not a Polaris submarine, lost near the Azores May 21, 1968, and not found until Oct. 29 was first found by the Russians, who supposedly gave us a friendly tip on its whereabouts. Columnist James J. Kilpatrick on April 4 reported that the Russians have a "superior detection system" in their submarine service, but Adm. Smith stated flatly that this is not so.

Smith's assurances on the safety of the Polaris fleet are significant because of recent statements by Secretary of Defense Melvin Laird and Deputy Secretary David Packard casting doubt on the safety and invulnerability of the 656 Polaris submarine missiles as an assured second-strike deterrent the Nation could count on in the 1970s.

In testimony before the Senate Armed Services Committee March 20, Laird and Packard argued the need for President Nixon's proposed Safeguard anti-ballistic-missile system to protect our 1054 land-based Minuteman missiles.

Laird said at one point:

"If this particular question (of Polaris invulnerability) is limited to the period through 1972, I would say I believe that our force will remain very free from attack. If you go beyond that time period I seriously question that."

When asked if the expensive Polaris missile system is not enough assured second-strike nuclear weapon capability by itself, Smith smiled and said, "You tell me."

The Navy, under Smith's direction, is working on two major projects to keep the underwater deterrent force invulnerable during the 1970s. One, called Project Sanguine, would spend \$1 billion to improve land-based communications with Polaris submarines. The other would spend many billions to build a whole new generation of Polaris submarines now called "undersea long-range missile system" or ULMS.

POLLUTION OF LAKE SUPERIOR

Mr. TYDINGS. Mr. President, the decline of water quality in our Nation is

well known to all of us concerned with environmental quality. Today every major river system in American is polluted.

Our once blue and clean waters are now brown and filthy as silt and industrial and municipal waste continue to pour into them. Despite the enactment of substantial legislation in the past 8 years, the Water Resources Research Act of 1964, the Water Quality Act of 1965, and the Clean Water Restoration Act of 1966, water pollution remains one of our major, pressing domestic problems.

One obstacle to its abatement is the scarcity of funds. The difference between the authorization and the appropriations for fiscal year 1969 construction of water quality treatment facilities was \$486,000,000. This may not sound like much compared to the figures one hears regarding ABM, but I am willing to bet in the long run it will provide a greater safeguard.

Another obstacle is the laxity of some Federal Agencies whose responsibility encompasses environmental quality. A most regrettable example of this is the approval by the Corps of Engineers of the dumping of taconite-tailings into Lake Superior, an action which has been taking place since 1949, and the apparent willingness of the Federal Water Pollution Control Authority to permit this to continue.

It is now time for this type of activity to stop. I urge the Corps of Engineers to deny the application for the renewal of the permit required to continue this dumping. I urge the FWPCA to ban this type of discharge into our waters.

The daily dumping of nearly 3 tons of nickel, a ton of zinc, 3 tons of lead, 4 tons of chromium, and 373 tons of manganese cannot but impair the ecology of Lake Superior. Surely we must realize that it simply does not make any sense to permit this activity to continue.

The Washington Post of Wednesday, May 14 contains an editorial entitled "Pollution of Lake Superior" which warned that Superior, the cleanest of the Great Lakes, is now endangered by pollution. The same day's New York Times carried a similar story. Both mention the case of the taconite-tailings and the failure of the Federal Government to put a stop to their discharge into the lake.

I ask unanimous consent that the articles be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 14, 1969]

POLLUTION OF LAKE SUPERIOR

Reports that Lake Superior is being seriously polluted are a danger signal that the whole country should note. Superior is the largest, deepest and cleanest of the Great Lakes. With Lake Erie ruined and most of the adjacent lakes gravely impaired, conservationists have found some comfort in the supposed purity of Lake Superior. Now, however, even this immense fresh-water sea between the United States and Canada is being dangerously contaminated.

Investigators for the Federal Water Pollution Control Administration have found that 91 municipalities, 61 industries and 124 Federal installations are discharging wastes into Lake Superior or its tributaries.

Additional pollution is coming from watercraft, pesticides, polluted dredgings and sediment. Apparently most serious of all is the dumping into the lake of 60,000 tons of ore waste per day by the Reserve Mining Co. of Duluth.

It is shocking to learn that the Reserve Company has had a permit from the Army Corps of Engineers to dump its taconite tailings into the lake since 1947. Renewal of the permit is now being sought despite the findings of a Pollution Control Administration team that the tailings have become a source of concern. A recent study has also shown the presence of taconite tailings in the municipal water systems of Duluth, Beaver Bay and Two Harbors, Minn.

Reports that the findings of pollution by the Reserve Company were suppressed in the Interior Department at the behest of Rep. John A. Blatnik of Minnesota are especially distressing. As Chairman of the House Subcommittee on Rivers and Harbors, Mr. Blatnik has been a leader in many campaigns against water pollution, but his enthusiasm for taconite mining in the Duluth area appears to have dulled his sensitivity to the damage that is being done to Lake Superior.

Despite the suppression of the report within his Department, former Interior Secretary Udall did order an "enforcement conference" on the question of pollution in Lake Superior before leaving office. That conference began on Tuesday of this week in Duluth. It has before it 20 recommendations for ending the pollution of Lake Superior. Unfortunately, the recommendation of the suppressed report that the dumping of mining waste into the lake be stopped has been toned down to a request for "continued surveillance" of the Reserve Mining Co. operation at Silver Bay. But the conference has a clear obligation to recognize pollution for what it is and to move resolutely toward its elimination.

[From the New York Times, May 14, 1969]

ORE WASTE TOPIC AT LAKE HEARING—U.S. AIDES WANT DEPOSITS KEPT UNDER SURVEILLANCE

(By Gladwin Hill)

DULUTH, MINN., May 13.—Federal officials announced today that an iron mining company's daily discharge of 60,000 tons of ore waste into Lake Superior be kept "under continuing surveillance" rather than stopped, as some officials and conservationists had urged.

The recommendation was made as the Federal Water Pollution Control Administration opened a hearing on suspected pollution of the lake, one of the world's largest bodies of fresh water.

The hearing, involving Minnesota, Wisconsin and Michigan, is the first stage of a statutory pollution abatement proceeding ultimately enforceable by the Federal courts.

The lake, 350 miles long and 160 miles wide, with a surface area of 31,820 square miles, is conspicuous among the Great Lakes for having largely maintained its purity.

LONG-TERM THREAT SEEN

However, a long-term threat to this condition has developed in the discharge into the lake, directly and through 100 tributary streams, of inadequately treated municipal, industrial and agricultural wastes.

The same influences, ignored until recent years, have turned Lake Erie into a contaminated sump that some experts despair of rehabilitating.

The most conspicuous of the Superior waste discharges is the "tailings," or refuse material, of the Reserve Mining Company, poured into the lake at nearby Silver Bay.

The only one of a half dozen mining companies in the area that does not deposit its tailings on land, Reserve over the last 20 years has put 67 million tons of debris into the lake.

This was done on the basis of continuing permits from the Army Corps of Engineers, which is primarily concerned with maintaining the navigability of waterways rather than with the fine points of pollution.

While a large part of the pulverized debris is sand, Federal investigators have reported that the daily discharge includes nearly three tons of copper, nearly a ton of nickel, a ton of zinc, three tons of lead, 4.5 tons of chromium and 373 tons of manganese.

COMPANY SUBMITS DOSSIER

The mining company, a subsidiary of the Republic and Armco Steel corporations, produced a two-inch-thick dossier of testimony and documentary material aimed at proving that this discharge was innocuous and in the main sank harmlessly to the bottom close to the shore in the form of silt.

The Federal Government's contention is that a lot of this powdery material circulates in the lake's waters and is impairing the lake's ecology.

This contention was supported by many members of an audience of 600 persons who overflowed the Hotel Duluth ballroom for the hearing.

The lake's condition was investigated last year by a special panel from five agencies of the Department of the Interior. A report on the study, signed by Charles A. Stoddard, then regional coordinator for the department, recommended that the dumping be stopped.

The report was disowned by the department, and a subsequent, milder analysis prepared by the Water Pollution Control Administration is the basis for the present hearing.

Referring to a report in The New York Times that the original findings had in effect been suppressed, Water Pollution Control Commissioner Carl L. Klein told the hearing:

"There has been no attempt at suppression. The other report that has been mentioned is a report by an individual. The department is not bound by his report."

Representative John A. Blatnik, Democrat of Duluth, who was reported to have figured in Congressional pressures to quash the original study, denied to reporters that he had done this.

The hearing will continue tomorrow.

THE ADMINISTRATION, AND A NEW LOW LEVEL OF LIBRARY ASSISTANCE

Mr. MONTROYA. Mr. President, all of us here are concerned over Government spending and the need to reorder our priorities. The taxpayers, in giving up a substantial portion of their year's earnings have a right to expect that their hard-earned money is used consistent with the public trust and confidence and with regard for their long-range interests.

I feel obliged to point out, however, that while some cuts made in bringing runaway spending under control have an undeniable validity, others are a threat to public faith in our Government institutions.

The Nixon administration's announced intention to give low priority to education and to library materials, services, and construction is a case in point. The administration has cut the budget figures for the U.S. Office of Education by approximately \$370 million, and of this total 25 percent of the cut is in the field of library service.

They have called for but one-half—\$17.5 million—of President Johnson's

request for title I grants, under the Library Services and Construction Act, which have been so useful in prodding local and State governments to spend money for improving and expanding their library systems.

Under title II of the same act—the construction portion for new libraries—the administration has asked that no funds at all be provided, although the Johnson budget saw the need for \$9.2 million for 1970 alone.

And under the Johnson budget for title II of the Elementary and Secondary Education Act, there would have been \$42 million to provide library materials and textbooks for public and private schools, but the Nixon budget also cuts this important title to zero.

But this is only the tip of the iceberg, as we say. Severe and drastic cuts have also been made in library services and assistance under the Higher Education Act:

Title II of the act, under which President Johnson had requested \$25 million for college library resources, has been slashed to \$12.5 million.

Title II-B funds for librarian training have been reduced by the Nixon administration from \$8.25 million to \$4 million.

Title II-C of the Higher Education Act, on ongoing program of cataloging and acquisition of materials by the Library of Congress, is scheduled at a \$4.5 million level, instead of the \$7.4 million requested by the Johnson administration—even though the project has elicited much praise for its great contribution and assistance to colleges and universities throughout the country.

And under title VIII of the act, President Johnson requested \$750,000 for a program of planning and startup of "networks of knowledge." But the Nixon administration has allocated no funds whatsoever for this important program for encouraging institutional resource sharing between higher education institutions with limited resources, development of computer hookups, and so forth.

And all of this has occurred at a time when Mr. Nixon—in celebration of National Library Week—April 20-26—just finished commenting in a most eloquent manner on the vital contribution made by libraries to the intellectual life of our Nation. He said:

Libraries are a summing up of past achievement and a stimulant to future progress. Never have we had greater reason than this year to celebrate National Library Week. For never have our libraries played a more prominent role in our campaign against ignorance and for fullness of educational opportunity.

Then, he proceeds to set our progress toward intellectual development back by virtually putting our libraries out of business. With the ever-increasing explosion of knowledge, this is indeed a tragedy, and one which we cannot allow to happen.

Our libraries are essential social and educational institutions that encourage the extension and active generation of ideas through books, tapes, films, records, printouts and video-tapes. They are universities of all the people, and our librarians are dedicated, overworked men and women who render an incalculable service in helping the people to reach the

world's collected informational and intellectual resources.

In my own State of New Mexico, the demands for library service are extremely heavy. Unhappily, our libraries are woefully inadequate, not only with respect to deficiencies and shortages in books which they should contain, but also in terms of understaffing and underequipping. In many areas of the State, libraries are totally nonexistent. As a result, there is serious cultural and educational deprivation for millions of people, including those representing the very core of desperate and abysmal need, loneliness, discouragement, pain, and abnormality.

With these cuts in financial assistance, the lively interest in summer reading programs for children will suffer. In many cases, the books were the first the child had ever had as his very own. Other energetic programs for serving the community will also take their toll—bookmobile services, talking book machines and other aids to the blind and the handicapped, services to Indian reservations, information used for vocational and adult education, and so on.

Moreover, Mr. President, there is no question but what the knowledge explosion demands new techniques for arranging and generalizing our rapid increase in knowledge about many processes. But as our present libraries and research facilities grow in size, they also become increasingly difficult to use.

Clearly the problem is critical, since a researcher must be enabled to find out in a reasonable amount of time what results are known concerning Problem X. But the monstrous accumulation of information and paperwork is slowly burying us and has slowed information retrieval to a mere crawl. It may not be too extravagant to say that the situation, combined with redtape and antiquated procedures, is probably more of a threat than Red bombs and Communist encroachments.

But there is a solution to the problem. American technology has supplied us with tools to free us from this information and paper jungle. Our present cumbersome library system is likely to be obsolete by the end of the century, and it is by no means too early to start planning a radical reorganization of the system now, since libraries of the future will have to make heavy use of automation.

This is not, of course, to say that we will be abandoning personal contact with books or proposing the use of machines where human beings can perform the task more efficiently. But without some degree of mechanization combined with machine search, information retrieval will become hopeless in a few decades, and the alternative can only be for libraries to abandon any degree of completeness.

In the face of these very fundamental operational and financial needs of our libraries and librarians, who are begging for materials and funds so that they may expand and do their job, we cannot afford to curtail library assistance funds. If we do, our children will pay the hidden price in terms of loss of great dividends in knowledge and wisdom. Fur-

ther, it could well prove ruinously expensive to the Nation as a whole.

In view of these vital and urgent needs, I most strongly urge the restoration of all library assistance funds, in order that we may continue to broaden the base of our efforts to become increasingly sensitive to human purposes, and so that we may start applying our innovations for the benefit of education and society as a whole.

TV STATEMENT BY SENATOR BYRD OF WEST VIRGINIA SUPPORTING ANTI-OBSCENITY BILL

Mr. BYRD of West Virginia. Mr. President, on May 14, 1969, I made a statement for television regarding my support of antiobscenity legislation. I ask unanimous consent that the transcript of that statement be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

STATEMENT ON THE ANTI-OBSCENITY BILL

The President's request that Congress act to halt the flow of obscenity through the mails has my support. The homes of our citizens need the protection of the Federal Government against the abuse of the mails by the purveyors of pornographic literature. I am co-sponsoring a bill in the Senate to make it a Federal crime to use the mails for the distribution of sex literature and pictures, and to ban the sales of such smut to persons under 18. The bill is based on a New York statute that has been upheld by the United States Supreme Court. I don't believe it would conflict with freedom of speech guarantees. Our citizens should not be left defenseless against offensive literature sent into their homes by smut peddlers. Citizens should not be asked to accept another postal rate increase without action by the Federal Government to curb the growing traffic in sex-oriented filth.

THE PEACE CORPS

Mr. CRANSTON. Mr. President, the Peace Corps has been one of the outstanding American success stories of this decade.

Both as an outlet for the creative idealism of American youth and as a concrete demonstration of human concern for the problems of other nations, the Peace Corps has played a very special role.

In performing both these tasks, the Peace Corps has drawn its greatest strength from the remarkable independence it has enjoyed within the bureaucratic structure of our Government. The Peace Corps, by express direction of former Secretary of State Dean Rusk, has remained apart from official American foreign policy. As a result, Peace Corps volunteers have been able to view themselves—and have been recognized in the countries they seek to aid—as individuals acting from personal commitment rather than as representatives of a foreign government.

I sincerely hope that this unique expression of American concern for others will never be stifled by unduly close ties to the more traditional foreign affairs agencies. In this regard, however, I have read with some concern an article by Frank Mankiewicz and Tom Braden,

published in the Washington Post and the Los Angeles Times of May 13, 1969. In their piece, the authors suggest that the distinctive role and nature of the Peace Corps may be undergoing some erosion, and that its previous emphasis on self-help and community change projects may be giving way to new priorities for technical assistance at a level reminiscent of AID activities.

I ask unanimous consent that the relevant portion of the article by Messrs. Mankiewicz and Braden be printed at this point in the RECORD so that it may be more readily available to Senators. I should like to note, in this connection, that Mr. Mankiewicz is particularly well qualified to write of the Peace Corps, since he was a country director in the earliest days of the Peace Corps, and in 1964 succeeded Jack Vaughn as head of its Latin America programs.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Peace Corps, once a simple idea which attracted young, idealistic Americans willing to volunteer for two years' service abroad at minimum subsistence, is acquiring considerable tarnish both from the rest of the bureaucracy and from its new leadership.

Several years ago, Secretary of State Dean Rusk sent a message to all U.S. posts overseas, saying, "The Peace Corps can best serve American foreign policy by not being a part of American foreign policy."

The import of the message was clear. There was to be no involvement in the work of the volunteers by other U.S. agencies overseas; under no circumstances were Corpsmen to be used as sources of information; they were to be as free as any other Americans abroad to speak their minds.

But, last week, the State Department ordered a study to see if there could not be more interchange of personnel among foreign policy agencies, including not only the Peace Corps and the State Department, but also the Agency for International Development, the U.S. Information Agency, and the Arms Control and Disarmament Agency.

What is ignored in this approach is that it was precisely to create a new and different American image abroad that the Peace Corps was created. If the identity of the Peace Corps volunteer, living at the level of the people he serves, is to be merged with the rest of the U.S. community abroad, living segregated and—by local standards—luxurious lives in English-speaking enclaves, the main reason for the Peace Corps is gone.

More ominously, a project which put Peace Corps lawyers into the Pacific Trust Territories of Micronesia, to help tribal councils codify their laws and to help set up institutions of self-government, has now been shelved, apparently at the insistence of the Department of Defense.

At the same time, the new Peace Corps Director, Joseph Blatchford, made it perfectly clear in his first appearances that he wants older technicians overseas, with higher pay, allowances for dependents and work projects which can be measured in terms of economic development. There will be, apparently, less of this fuzzy talk about self-help and community change.

Once again, the zeal for change obscures the reason for existence. The history of the U.S. effort in underdeveloped countries is largely a history of failure in just this kind of activity—U.S. economists and technicians trying to fit other cultures into our own economic measurements. It was once the Peace Corps' special mission to remind us that man does not live by Gross National Product alone.

Mr. CRANSTON. Mr. President, I do not know to what extent the concerns expressed by Messrs. Mankiewicz and Braden may be fully warranted by the facts. Unfortunately, these intimations that the new administration, and even the new Peace Corps Director, may not fully appreciate the distinctive character of the organization are not the first that have been heard.

I very much hope, however, that all these allegations of possible change in the nature of the Peace Corps will prove to be nothing but insubstantial rumor. I am sure that if the administration makes a careful examination of the contributions which the Peace Corps has been able to make largely because of its distinctive character, then they will leave its essential structure unaltered. The Peace Corps needs its independence from the foreign affairs establishment as much today as it did 8 years ago—for only in this way can it maintain its credibility both in the nations it serves and with the young people of America.

JUDICIAL IMPROVEMENT

Mr. TYDINGS. Mr. President, for some time the Subcommittee on Improvements in Judicial Machinery, of which I am chairman, has been attempting to develop ways of helping the Federal courts deal effectively with their caseloads.

In the past, Congress has too often responded to the problems of the courts by establishing new judgeships. It is more and more apparent, however, that increased manpower, alone, is not the entire solution to the problems.

On April 15, 1969, the subcommittee began hearings on S. 952, the omnibus judgeship bill of 1969. During the hearings the subcommittee sought not only to review the new judgeship requests and to seek to determine the justification for them, but also to explore other means of improving the operation of our courts. We were interested in learning whether or not management experts can play a role with the judicial councils or the large districts; whether or not the judicial councils are fulfilling their obligations to review and remedy administrative deficiencies in the trial courts; whether or not there are sufficient supporting personnel, prosecutors, and probation officers to absorb the additional new judges proposed in the bill; whether or not there are sufficient court reporters and whether or not the rules regulating their service are sufficiently flexible to allow their optimum utilization. Testimony on these issues and on others was heard from a number of witnesses, including the chief judges of six of our circuits.

During the course of the hearings some of the questions of the subcommittee resulted in spirited interchange with the judges. Following one such exchange, an editorial entitled "Judicial Improvement Begins at Home," was printed in the Washington Post of May 8. While pointing out that the judges "have properly come to Congress for manpower, courtrooms and equipment," the Post editorial also recognized that responsibility for the problems in the courts does not fall

wholly on Congress and that the judges should exert more effort on their own in improving the administration of justice.

I believe the Post editorial is a well-reasoned discussion of the need to find solutions other than additional judges for the problems of the courts. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

JUDICIAL IMPROVEMENT BEGINS AT HOME

Senator Tydings may have sounded querulous and impatient when he scolded the judges who appeared before his Subcommittee on Improvements in Judicial Machinery the other day. He was obviously irritated by the judges' excuses for frustrating delays and attempted to convey to the jurists the growing public criticism of the courts' general inefficiency. His criticism is not applicable, of course, to all judges in the Federal system, but it has enough substance to justify a concerted and energetic judicial response.

The judges have quite properly come to Congress for manpower, courtrooms and equipment. They should have whatever they need to enable the courts to get abreast of their mountainous caseloads. But the responsibility for the present state of affairs does not fall wholly on Congress. Many judges have been lagging in the hours spent on the bench, in their failure to press lawyers and litigants for prompt disposition of cases, in the unsystematic assignment of cases and in the neglect of court-management studies. Congress is naturally impatient when judges call for additional help without doing all they can to help themselves.

It is time for judges to realize that the public is deeply concerned about easy-going ways on the bench at a time of crisis in law-enforcement. The trouble is not merely that every month of delay blurs the memories of witnesses and complicates the judicial fact-finding process. Lagging machinery of justice, which attempts to punish offenders and reimburse victims of wrongs months or years after the events in question, creates the impression of a breakdown in the orderly means of redressing grievances. Criminals may be confirmed in their belief that a bumbling society cannot cope with their depredations.

Of course the courts must retain a judicial atmosphere. Neither criminal charges nor civil suits can be disposed of by production-line methods. But mountainous rosters of stale cases could be reduced by good management and hard work by all the judges in the system. The judges as a group could make enormous improvements in the administration of justice in this critical period if they would acknowledge that the place to begin is with themselves.

DIVERSION PAYMENTS TO FARMERS

Mr. TOWER. Mr. President, it has recently been proposed that diversion payments to farmers be stopped or limited and that these funds be applied to feeding the hard-core poor. Last session, however, Congress held a debate on limiting these payments. The decision not to do so indicates that this money is well spent. To imply that a farmer should receive a minimum payment is to suggest that a man be penalized for success in his chosen field of endeavor. Agriculture diversion payments are made on a per acre basis in an effort to keep our Nation's agricultural community strong

and capable of producing the food and fiber presently needed and of meeting all future demands. To limit arbitrarily the amount paid to any one producer and rechannel these funds elsewhere would destroy the industry which we are so dependent upon.

The American farmer met the challenge imposed by the hungry world after World War II and went into debt buying land and equipment to increase his capacity to produce food which was so desperately needed. Machinery manufacturers, chemical companies, and all associated industry spent untold millions engineering and producing better farming equipment, fertilizer, pesticides, herbicides and other specialty items needed by the agricultural community to bring their production up to a level necessary to supply the food and fiber demanded to keep our nation strong and to feed the hungry. It is imperative to note that the farmer receives less for his products today than before the second World War.

The agricultural community met the challenge of producing the much-needed food and fiber and accepted the long term financial obligations necessary to the accomplishment of this goal.

The farmer managed to raise his production to a level that exceeded demand. To prevent the failure of the farmer, who was indebted as far as possible, the Federal Government placed restrictions on him that required him to leave a certain percentage of his productive land idle. Since his mortgage and equipment payments had to be met, a payment was made to the farmer to offset his loss if he agreed not to till this land.

By reducing production, the price of agricultural products was maintained while the diversion payments helped keep the farmer solvent. The payments are in no way profitable, but, on the contrary, merely meet a small percentage of the farmer's obligations which would normally have been met by the cultivation of the diverted acreage.

The percentage of diversion is the same in all cases and the size of the farm determines the amount of acreage that is placed in the program.

It must be remembered that farming is done on an economical unit basis. One piece of equipment can only cover so many acres whether it be cultivating or harvesting. To limit payments would be to penalize a man for being successful.

SCHOOL DESEGREGATION GUIDELINES SUPPORTED BY SECRETARY FINCH

Mr. MONDALE. Mr. President, I have been following with interest, and commenting upon, certain statements and actions of the Nixon administration in the last several months with respect to the title VI school desegregation program. Several weeks ago I included in a statement I made on the floor of the Senate an excerpt from a press conference held by Secretary Finch of the Department of Health, Education, and Welfare. I stated at that time that the excerpt I was placing in the RECORD in-

cluded a clear and unequivocal response by the Secretary that current school desegregation guidelines are going to be enforced.

I went on to say at that point that as long as Secretary Finch maintained the firm position indicated in that press conference statement, he could depend upon my consistent support.

Just last week I received a letter from Secretary Finch in which he reinforced his firm and unequivocal statement that school desegregation guidelines are going to be enforced. The Secretary wrote:

The law is clear and so is my responsibility to enforce it. We are continuing to require school systems that have failed under freedom of choice plans to abolish discrimination to adopt a more meaningful and effective method that will accomplish the task by the fall of 1969. We shall allow delays beyond that date only where there are substantial impediments, such as the need for new construction. This is in accord with the policy followed by the previous Administration. I believe it is important that the Title VI program maintain the momentum that has been established, and your support of this objective is very much appreciated.

Secretary Finch's letter was in response to a joint letter sent by myself and Senators HARRISON A. WILLIAMS, JR., THOMAS F. EAGLETON, ALAN CRANSTON, and HAROLD E. HUGHES in which we questioned his statements in an interview published in U.S. News & World Report and in a memorandum he received from Mr. Mardian. I ask unanimous consent that the letter we sent to Secretary Finch on March 25 and his reply which we received recently be printed at the conclusion of my remarks.

I again congratulate the Secretary for his strong statement in support of existing school desegregation guidelines and pledge him my consistent support so long as he maintains the firm position indicated in the press conference remarks I referred to and in the letter to which I have referred.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 25, 1969.

HON. ROBERT H. FINCH,
Secretary of Health, Education, and Welfare,
Washington, D.C.

DEAR MR. SECRETARY: As supporters of the basic principle underlying Title VI of the Civil Rights Act of 1964—that Federal tax revenues collected from all Americans should not be used to support programs or activities which discriminate against some Americans—we are concerned about the way in which the Title VI school desegregation program will be implemented in the future. We believe you share our commitment to equality of opportunity, but we are concerned about the statements attributed to you in the March 10th issue of a national magazine, and the interpretations being applied to those statements.

Our concerns have been heightened by articles appearing in last Sunday's newspapers with titles such as "Finch Aides Urge Eased Guidelines." We are disturbed to learn that you are being advised to relax the school desegregation guidelines, and advised to relax them in a furtive and quiet manner. In our judgment, these guidelines accurately reflect the law of the land, and should be implemented openly and honestly.

Because of the confusion which now seems to exist in many parts of the country—particularly the South—about how this Administration plans to proceed in the school desegregation program, we urge that you issue

a statement clarifying your intent. We urge you to make clear the commitment of the Administration to implement this program firmly and fairly in accordance with the existing school desegregation policies and consistent with the decisions of the Federal courts. We believe it would be unfair and unfortunate to change the existing requirements under which hundreds of schools are now desegregating.

Finally, Mr. Secretary, we hope that you will receive this letter in the same constructive spirit in which it is intended. We want to support you in the firm and fair enforcement of the Title VI compliance program. We believe, however, that a statement from you affirming your support for the program would help immensely to clear the air.

Sincerely,

WALTER F. MONDALE.
HARRISON A. WILLIAMS, JR.
THOMAS F. EAGLETON.
ALAN CRANSTON.
HAROLD E. HUGHES.

DEPARTMENT OF HEALTH, EDUCATION,
AND WELFARE,
Washington, D.C., May 8, 1969.

HON. WALTER MONDALE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MONDALE: Thank you for the joint letter you and Senators Harrison A. Williams, Jr., Thomas F. Eagleton, Alan Cranston, and Harold E. Hughes sent me on March 25 concerning school desegregation policy.

The memorandum described in the *Washington Post* article to which your letter refers was a personal memorandum from Mr. Mardian to me. Internal memoranda are not intended to, and do not, speak for this Department.

Having read the news account, I can appreciate your concern, but it would only complete the impropriety of the publication of extracts from the memorandum for me to discuss now its contents and attempt to place the extracted quotations in the proper balance. However, I can assure you that we intend to implement fully the court decisions and to achieve the goals this Department has set which you have worked so hard to obtain.

The law is clear, and so is our responsibility to enforce it. We are continuing to require school systems which have failed under freedom of choice plans to abolish discrimination to adopt a more meaningful and effective method which will accomplish the task by the fall of 1969. We shall allow delays beyond that date only where there are substantial impediments, such as the need for new construction. This is in accordance with the policy followed by the previous Administration. I believe it is important that the Title VI program maintain the momentum that has been established, and your support of this objective is very much appreciated.

The guidelines are continually under review to determine whether they can be clarified in accordance with the latest court decisions and whether they can better state the Department's commitment to quality education, as well as to equality of educational opportunity. As you may know, the guidelines have been revised twice in the past and it seems reasonable that the Department should maintain a degree of flexibility to allow room for improvement where possible. Any changes in the guidelines will be consistent with the constitutional protections as interpreted by current court decisions. The Office for Civil Rights will clearly demonstrate by its actions our determination to enforce Title VI in the North and South.

Thank you for your support. Please let me know whenever I can be of assistance.

Sincerely,

ROBERT FINCH,
Secretary.

THE ABM SYSTEM

Mr. GORE. Mr. President, this morning the Subcommittee on International Organization and Disarmament Affairs, of which I have the honor to be chairman, continued hearings on the subject "Strategic and Foreign Policy Implications of ABM Systems." Our witnesses were Dr. Jerome Wiesner, of MIT, former science adviser to President Kennedy, and Dr. Edward Teller, of the Lawrence Radiation Laboratory, University of California.

I ask unanimous consent that the prepared statements presented by Dr. Wiesner and Dr. Teller to the subcommittee be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE SUBCOMMITTEE ON INTERNATIONAL ORGANIZATION AND DISARMAMENT AFFAIRS, MAY 14, 1969

(By Edward Teller)

In order to arrive at a balanced recommendation on the Safeguard ABM deployment, I shall consider the problem from three different points of view. First, I shall compare the inherent advantages of offensive and defensive missiles, assuming that we have a choice to emphasize one or the other form of preparedness.

Secondly, I shall discuss our state of knowledge concerning the expense of defensive deployment as compared to deployment of an offensive force.

And lastly, I intend to discuss the difficulties which have arisen in the ABM debate due to the shifts in the information on vital defense matters which are available to Congress and to the public.

Since these points have influenced my own thinking about missile defense, I will use the same arguments for the purpose of recommending the kind of deployment which I believe is both justified and urgently needed at the present time.

COMPARISON OF OFFENSE AND DEFENSE

When the existence of atomic explosives was disclosed to the world on the day of Hiroshima it seemed that henceforth defense had no chance to withstand the modern power of nuclear attack. This impression was reinforced when thermonuclear explosives multiplied the atomic blast one thousand fold. A last step in this development was achieved when the shift from delivery by airplane to delivery by rocket cut the time needed to cover the distance from home base to target in a dramatic way. The time used to be measured in hours, now it is measured in minutes.

All of this tended to prove what indeed has become a generally accepted slogan: There is no defense against nuclear attack.

In spite of this evidence, the Russian leaders have consistently claimed that it is their duty to defend the population of Russia and that in fact, such defense is possible. Historically, Russian air defense played an important role in the Second World War. At no time since the end of that conflict did the Russians relax their effort to protect their country against any possible attack.

Actually, during the last ten years there have been no essentially new major discoveries further to enhance the might of offensive power. In the same period the admittedly difficult task of defense has made considerable progress. In Russia missile defense was deployed. We have obviously arrived ourselves at a point where a concrete decision of comparing defense with offense has to be made.

There can be little doubt that if defense and offense were equally feasible it would be more humane to emphasize defense. The claim that defense is provocative hardly

seems logical. We do know that a nuclear conflict would cost millions of lives no matter under what conditions it is fought. To believe that better defense would encourage aggressive behavior on our part contradicts not only American history but even human nature.

It is an unfortunate circumstance that modern weapons have deprived us of the protection that our relatively isolated location used to offer. For this reason it is now necessary to prepare before actual trouble starts. In both the First and Second World Wars time for preparation was fortunately available. Since it is now necessary to give consideration to arms in times of peace, it will at least be in greater conformity with our feelings and our principles to put emphasis on weapons that fend off an attack and that save lives on our side, than on such weapons which are calculated to kill a maximum number of our enemies.

Secretary McNamara has often emphasized the notion that we shall keep peace by means of possessing the power of "assured destruction". It would be well to remember that in war nothing is assured. If there is any choice in the way in which our survival can be made probable that method should be given preference which will save lives over the method that escalates destruction.

Apart from such considerations, we are consciously and rightly seeking that kind of policy which leads to maximum stability. Development of aggressive weapons certainly induces fear and such fear may deter aggression. However, it may also persuade an opponent that he better take advantage of the possibility of a "first strike", because in this way he may minimize potential danger to his own country. Thus continuing deployment of aggressive weapons may indeed lead to instability.

By contrast, the development of defensive weapons is likely to have a stabilizing influence. If we possess sufficient defensive equipment, an aggressor cannot count on rendering us helpless. This is a more peaceful and not necessarily less effective way of deterrence. Our Russian opponents never have shown a proclivity to take chances. If they cannot be highly confident of success they are not likely to attack.

The mistake often is made of laying down requirements and letting technology be guided by the plans that have been developed. In reality, technical possibilities are rather inflexible. If aggressive weapons are much easier to develop and deploy than defensive ones, then the arguments that have been given above have no real weight. In the first fifteen years after World War II technical opportunities favored the offense and it would have been dangerous not to explore this potentiality. At that time it was estimated that defense may be 30 times as expensive as the amount of offensive power which could overcome the defense. Under those conditions I could not help but come to the conclusion that missile defense should not be attempted.

But in the last 10 years the technical trends have taken a new turn. The use of phased array radar meant considerable progress in the tracking of missiles. The incredibly rapid development of electronic computers has opened new horizons in the art of handling information. No one claims today as great an imbalance in cost between offensive and defensive weapons as used to prevail. Under the new conditions it is therefore of the greatest importance to compare quantitatively the effectiveness of offense and defense. In case defense has a chance comparable to that of offense there are strong reasons of common humanity and reasonably conservative behavior to place great emphasis on the development of a defensive force.

THE COST OF OFFENSE AND DEFENSE

At a future date when all relevant figures might become available to a historian it

would be of great interest to compare two expenditures. One is the effort and the money spent by the Russians in deploying missile defense. The second is the effort and the dollars invested by us to develop and deploy penetration aids which were designed to overcome the Russian defensive deployment.

Today this comparison cannot be made. We cannot estimate in any precise manner Russian expenditures. Furthermore, we have insufficient knowledge whether and to what extent our penetration aids will overcome Russian defenses. It should be clearly recognized that the best we can do is to engage in a guessing game. Any claim of a quantitative comparison or a precise scientific evaluation must be discounted.

At the same time, I want to hazard the guess that our expenditures on penetration aids were not much less and possibly were considerably higher than the Russian expenditures on defense. A crude attempt at this type of comparison had a great influence on my own thinking. I am now thoroughly convinced that the possibility of effective missile defense cannot be discounted.

Scientists in the Pentagon who opposed missile defense and advocated penetration aids experienced a similar change. It is easy to say: Let us scatter chaff, employ decoys or let one missile carry several explosives. The execution of these suggestions consumed a lot of money. There are further possibilities to counteract defense. None are cheap and simple. All result in a considerable reduction of explosive power one can deliver for a fixed amount of money.

The result after several years of hard work was an increased respect for missile defense. Those who struggle day-to-day with the problem of how to penetrate Russian ABM are now recommending that we employ some defense in our country.

There is of course, an obvious weakness in any argument for defense. What do we mean by "effective" defense? We should certainly desire to save the lives of as many of our citizens as is humanly possible, even in case that the horrible possibility of a nuclear war should materialize. But it is argued that this would require a perfect defense since the penetration of even one missile carrying a powerful nuclear explosive would spell disaster. Considerations of this obvious type have led scientists who viewed the problem from broader and somewhat more theoretical points of view to the conclusion that no defense can exist.

Actually, one can object to such a conclusion in two ways which are different but which are both valid. On the one hand, one can never ask for perfect success in the horrible and hazardous event of a war. To the extent that the dangers of nuclear war deter war itself, it is right to emphasize these dangers. But if these dangers should convince us that we need not even try to minimize the disaster, if it does strike, then the realization of a nuclear war national survival will be at stake. It is indeed possible to increase the chances of national survival even if catastrophic losses are unavoidable. If this situation is realized on both sides then war will be more easily avoided.

The second reason to doubt the validity of the assertion of "no possible defense" is the great scope for future development. In order to gain perspective it is worthwhile to consider what a determined defense effort might accomplish in the future. I shall attempt to indicate such a defense effort even though it would be certainly premature to plan such an effort at the present moment, and even though it would make no sense whatever to place a price tag on items which are as yet in the idea stage.

Any missile defense consists of two phases. First, the missile must be identified and tracked. Then the incoming missile must be destroyed. By using appropriately designed defensive explosives the latter job can be

accomplished. The serious objections to the possibility of missile defense are connected with the first phase: that of identifying and tracking the missile.

In our preliminary plans we are considering relatively small numbers of radars which serve as our eyes. It is indeed possible to destroy these radars or else to fool them even while they function, by using decoys and other penetration aids. Missile defense may become thoroughly effective if and when we find it possible to employ more devices of detection and if we also vary the kinds of detectors we use. In the end, missiles that have a global range have to be observed from extremely widely deployed and greatly varied observation stations. In this way it will become most difficult for the attacking force to escape detection or to destroy a sufficient fraction of the observing stations. A valid argument concerning future feasibility of missile defense must take into account all the variety of detectors which could be made available and which today can be discussed only under our self-imposed rules of secrecy. I have the hope that the cooperative effort of many observation stations may indeed lead to success in defense.

One should mention that the real difficulty in such an ambitious plan will probably lie in the need for rapid communication and rapid evaluation of the results observed in widely dispersed locations. Fortunately, our electronics industries and our computers are progressing so fast that these difficult problems can be attacked with some hope of success. Electronic brains seem to become ten times as effective in every decade—without becoming more expensive.

At the same time it seems likely that our present means of observation, the radar stations, will remain vital components of any defense. Therefore, deployment of defense based on radar observation will serve as a first sensible step toward a more complete and more effective system which may become possible in the future.

We have to return, however, to the immediate question whether or not deployment of presently designed defensive systems is necessary. Furthermore, it is important to ask that if such a deployment is executed what should be the first goal of this deployment.

Since it is clear that defense is indeed difficult it is reasonable to start with the easiest task. This was the consideration that guided the decision to deploy Safeguard ABM. Partial success in the defense of missile sites will indeed preserve the effectiveness of our retaliatory force in case the enemy should attempt to destroy the missile sites by a first strike. A similar partial success in defending cities may be less meaningful because of the exceedingly vulnerable nature of the city targets. The decision to defend missile sites rather than cities does not reflect a preference in favor of missile sites. It rather is due to the recognition that in a well-considered development of a defensive system we should give priority to those tasks where success is most likely.

It would be of course, highly desirable to plan our defensive system and indeed all of our military expenditures in a logical manner. Unfortunately, we lack the knowledge to do this. This is the heart of the present argument and it needs special emphasis. *We do not know whether defense or additional offensive force will be cheaper and more effective.* Furthermore, we shall never find out unless we make an actual attempt by the means of a limited deployment.

Our industries have learned long ago that no big undertaking can be planned in a sound manner without first erecting a pilot plant. No amount of calculation or laboratory work will give reliable cost estimates. I consider the Safeguard ABM as such a pilot operation. If we are to plan our defense with any effectiveness we must know whether at-

tack or defense is cheaper. We do not have the answer. The most obvious illustration of this fact is given by the exceedingly divergent estimates you obtain from proponents and opponents of the ABM deployment.

There is a group of people which probably has reliable estimates. They are the Russian experts who have practiced the deployment of defense for many years. Our own experts have widely different opinions as to the effectiveness of the Russian ABM system. I am firmly convinced that all American authorities are basing their evaluation on mere guesses.

If we are to negotiate an agreement on arms limitation we are going to face experts who have actual experience in the deployment of missile defense. We shall be at a disadvantage in these negotiations unless we gain some experience of our own. Neither planning of national defense nor agreement on arms limitation can proceed in an effective way unless we explore defensive possibilities through actual deployment.

The question will naturally arise whether in this state of affairs more research might not be preferable to the proposed pilot operation. Research would indeed be the determining factor if missile defense were to depend on a single technical discovery. Actually, the defense depends on the coordination of many elements. The resulting intricate system is apt to develop difficulties which we cannot completely foresee. At the same time, when we engage the talents of many engineers, shortcuts and savings will probably be found. For instance, our computer industry has not yet been engaged in ABM work as thoroughly as would be the case if we deployed Safeguard. No cost estimate will be valid without the experience which we are now planning to get. No state of readiness can be trusted unless this state of readiness is tested in a deployed system.

The important question is whether defense or offense is cheaper and more effective. At the present stage we must give the answer that *we do not know*. This state of ignorance must be ended. Some important answers will be forthcoming in the near future if we begin deployment as recommended by President Nixon.

THE INFORMATION GAP

Controversy due to the lack of information on feasibility and cost of defense is further complicated by contradictory presentations given both to Congress and to the American public at different times, by different Secretaries of Defense. Testimony by Secretary Laird disclosed that the Russians are gaining superiority in nuclear weapons which may put them into a position to destroy our ability to retaliate by a "first strike". Recently declassified information given by Laird and by other proponents of ABM has been essential in the debate.

On the other hand, the American public, as well as many members of Congress, remember vividly earlier statements by Secretary McNamara. These statements had given the impression of continuing American strength which would exclude the dangers which are now mentioned.

Have we acquired new information to justify the changed evaluation? Or did McNamara lull us into a false sense of security? Or shall one agree with those who believe that the recent pessimistic statements are made to obtain approval of the ABM deployment by using scare tactics? It will take time before the validity of the new statements can be verified to the satisfaction of the majority, before this situation is put into proper perspective, and before the consequences are widely realized and accepted. Only then will it be possible to reestablish greater objectivity in debates on national defense.

Having watched trends of Russian weapon deployment I have been in agreement with Secretary Laird's present conclusions for the

last three years. But one man's opinion in this question is of little value.

What is much more important is the fact that all our attempts at rational evaluation are hampered not only by effective Russian secrecy but also by the rules of secrecy which we practice ourselves. As long as decisive information is kept secret on our part and is disclosed only in a piece-meal fashion, we cannot hope to arrive at firm and rational conclusions.

The present ABM debate is most instructive as an example of the arguments which influence our decisions. The strong convictions of many opponents of ABM are based on two important statements: "Russia never will dare to attack us" and "The arms race must be stopped".

With regard to the first of these statements it is relevant to find out how Russian ability to attack is developing. Their intentions may never be correctly guessed but their deployment of arms has not remained completely hidden. The facts of this deployment and the evidence we have to support these facts have been surrounded in our country by the greatest of secrecy. This was done even though the Russians know what they have deployed and they also have a very good estimate of our ability to observe their actions. It would seem to be highly desirable if our knowledge concerning Russia's preparations would be currently displayed to public scrutiny.

The second motivating argument, "The arms race must be stopped", depends on an understanding of the nature of the arms race. In the early part of the 20th century, arms race meant a competition in the quantity of arms. The nature of these arms and their performance changed slowly, compared to the exceedingly rapid strides which characterize the technology of the last two decades. As long as an arms race can be defined in quantitative terms it is indeed a competition in brute force and can be defined in clear terms. In principle, it is possible to bring such an arms race under control.

Today's "arms race" is qualitative, rather than quantitative. Now possibilities of military developments are more important than mere multiplication of developed arms. In addition to the atomic bombs, thermonuclear bombs and missiles, one may mention the nuclear submarines and electronic equipments of increasing complexity as obvious examples. It is not easy to understand where such an arms race stands or how to limit it even if all facts are available for discussion. But if we superimpose on this situation rules of secrecy whereby the most important developments cannot even be mentioned in public, any discussion of the arms race becomes a meaningless exercise.

At this point we encounter a basic problem of our democratic society. The public demands a voice concerning military expenditures and the public is of course also sensitive to its own physical safety. At the same time, our rules of secrecy deprive the public of any possibility of arriving at an informed opinion. Congress could disregard public opinion and reply on secret information made available to selected members. The present ABM debate is a splendid example of the fact that such a procedure will not work and that public opinion cannot be discounted.

Some scientists raise the objection that the facts are so complex as to be incomprehensible to the public, even in case of full disclosures. From this opinion I differ. The situation may be made to sound complex, but an honest attempt at a straightforward explanation will allow common sense to play an appropriate role. Indeed, if we should discard our respect for common sense we will have abandoned the basic premise of democracy.

In my opinion, *we have to open the book of military secrets both to the Congress and*

to the public. To do this will have the disadvantage that we will give some help to our adversaries. The argument had weight at the end of the Second World War when our information was superior to that of the Russians. Today it is safe to assume that most of our essential secrets are known to Moscow. Indeed, I fear that Russian military research has already found many of the secrets which we are yet to discover.

I believe that our whole policy of secrecy should be carefully reviewed and that far-reaching decisions should be made to encourage open discussion. Secrecy has produced the information gap which impedes orderly discussion of the ABM question. It may produce a new credibility gap which could paralyze our government. It is in the spirit of open discussion that the weighty problem of the arms race must be solved.

TWO RECOMMENDATIONS

On the basis of what has been said, I submit that two actions are needed.

First, the ABM deployment should be approved for one year. This means a commitment of approximately \$900 million. This money would be well spent for the information we shall gain.

According to the President's proposal, the ABM problem should in any case be reviewed in one year. This should be done on the basis of information which is as complete and as thoroughly discussed as possible. My second recommendation serves this end:

Our rules of secrecy should be rediscussed and made more liberal.

If ABM deployment is started now we shall have in one year some evidence of initial shortcomings or successes. The main purpose of a pilot operation is to gain experience. This experience should be thoroughly displayed for Congressional criticism. Approval at this time should not mean a commitment for the more distant future. Nor should the present proposal limit future expansion if this can be thoroughly justified.

In the meantime, open debate on hitherto classified information should create a more solid background for decisions affecting national defenses. If Congress approves the President's plan for next year we shall have gained valuable flexibility. A negative vote on ABM will result in continued ignorance. It will close a path that may lead toward safety by deploying explosive which in a case of emergency would destroy machines, rather than the cities of our opponents.

STATEMENT BY DR. JEROME B. WIESNER, PRO-
VOST, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, BEFORE THE U.S. SENATE COMMITTEE ON FOREIGN RELATIONS, MAY 14, 1969

Mr. Chairman, Members of the Committee: I appreciate very much your willingness to allow me to testify before you on this very important subject. If you will permit I would like to qualify myself to speak on the matter of the ABM, both in respect to its technical aspects and in regard to its strategic implications, and particularly its effects on the arms race and the possibilities of arms control agreements.

I have been concerned with the technical aspects of military systems since 1942 when I joined the staff of M.I.T. Radiation Laboratory where I worked on a variety of radar systems that were used in World War II, including ones for air defense and blind bombing. At the end of World War II I spent a year at Los Alamos helping to develop more reliable electronic components for nuclear weapons, and then I returned to M.I.T. to become a member of the faculty. When the Cold War intensified in the late 1940's and the United States began to fear a massive surprise attack by Soviet bombers, a major air defense effort was be-

gun by the United States Air Force, and I participated in many of the studies it sponsored. I helped conceive the SAGE computer-aided, air defense system and the D.E.W. line. During this period I participated in many other studies for the Department of Defense relating to strategic missiles and missile defense. Also, in 1958 I was the staff director of the U.S. delegation to the Conference on Means of Reducing the Danger of Surprise Attack.

From 1957 to 1960 I was involved in various strategic weapons and arms control studies for the President's Science Advisory Committee, and in 1961 and 1962 as President Kennedy's Special Assistant for Science and Technology I was deeply involved in the studies and discussions which led to the decision not to deploy the Nike Zeus ABM system and to begin research on a more advanced ABM system, then called the Nike-X, which was converted into the Sentinel system in 1967 and whose radars, computers and missiles in a different configuration, form the basis of the Sentinel system. Through these involvements and a continuing advisory role I have been able to stay reasonably familiar with ABM developments and the related intelligence.

In the course of my advisory roles in the White House and the Pentagon during the Eisenhower and Kennedy Administrations, I became deeply conscious of the tremendous pace of the arms race and the desperate need to bring it under control. I have also become aware of the fact that there have always been ways to reverse this dangerous situation without jeopardizing our security, but for many reasons we have not been able to take advantage of these opportunities in the past. In my opinion, it is possible to greatly enhance our security by halting the arms race. And when I say this, I am referring to our military security, not our domestic security, though this too would greatly benefit if we were able to turn our minds and our resources to constructive tasks. I would be glad to talk more specifically about how we might do this if you would like me to during the question period.

I believe that the Safeguard ABM system is a prime example of a weapon system that will at best do very little good, most likely accelerate the arms race and either way, waste large sums of money.

In my discussion today, I will concentrate my remarks on the current primary mission of the Safeguard system, the protection of the United States deterrent, but I will also say a few things about its potential for city defense. In this short paper it will not be possible to cover all of the issues that should be examined, however, these matters are examined in detail in the book "ABM: An Evaluation of the Decision to Deploy an Antiballistic Missile System," which Professor Abraham Chayes and I edited and which I believe you have. I will only highlight what I believe to be the key issues and then go into as much detail as is desired during the question period.

My opposition to the Safeguard ABM is based on my judgment that:

1. It cannot be made to work reliably and in the fashion claimed.
2. Even if it could be made to perform according to plan, it could be overwhelmed and exhausted by relatively easy to achieve counter-measures, and so at best it could provide only modest protection for the deterrent forces.
3. It will not be possible to test the Safeguard system realistically, i.e., against a large attack using nuclear weapons, so that we will never know its true capabilities or deficiencies before it has been used for real and then it will be too late to redesign it.
4. It is not needed to protect the deterrent forces. Even after a massive attack such as Secretary of Defense Laird suggests might be possible in the 1975 time period, if the Soviet

Union continued the deployment of its large SS-9 missiles at the rate of the past several years and were successful with other developments such as ASW, MIRV's, FOB's, etc., a very substantial United States retaliatory strike would be possible.

5. Its deployment would be a move in the wrong direction. Safeguard is more likely to reduce our security than enhance it and represents a complicating step in the arms race. Whether it evokes a Soviet response or not, it will certainly make more difficult the arms-limitation problem.

From the point of view of the responsibility of the Congress, the fourth point is of particular importance, for if a large retaliatory force remains after the strongest attack by the U.S.S.R. that we can conceive of in the 1975 time period the desperate urgency to do something now disappears. There is plenty of time to decide what to do. Not the least of the choices is to continue to do nothing about new weapon systems while seeking the best way to insure the survival of the deterrent forces, whether through active defenses, or hardening, or increasing their numbers or through agreements limiting weapons deployments. It does appear feasible to design a hard point defense that would be considerably cheaper and better than the Safeguard system, but it wouldn't look much like the Safeguard. It is not obvious that deploying even such a system, were it available, would represent a most attractive choice.

Why do I believe that the Safeguard system is not needed? If one accepts Secretary Laird's estimate of Soviet force—numbers and accuracies, and his projected form of attack for 1975—it is possible to show that a very creditable retaliatory force would survive it. According to calculations I made for our book, based on the assumption that not even elementary precautions were taken by the United States to protect its forces, such as redeploying aircraft or flying an air alert or protecting the Polaris submarines with our own ASW forces, and assuming that the Soviets achieve the projected capabilities, several hundred United States missiles and bombers capable of delivering more than 2,500 megatons of nuclear explosive would survive. This is a truly fearsome deterrent. In reality the situation would be better because in these calculations the attacker was given every benefit in regard to missile reliability, ability to accurately time and launch a global attack involving missiles and submarines, etc. A planner designing such an attack would obviously have to be much more conservative in his calculations, and to him the chance of success would seem even more improbable.

I want to make it clear that I don't believe that the Soviet Union is planning such an attack. I am examining the question of their ability to do so. That is, their capabilities. In fact, Secretary Laird has made it clear that he too is concerned about capabilities, not intentions. I do not claim that it would be impossible for the Soviet Union to achieve a first strike capability, but for this they would have to build a vastly bigger force than that projected by Secretary Laird. It would require that a larger number of very substantial technical programs all be highly successful. They would need large numbers of high accuracy multiple warheads, a much better air defense system, an effective ASW capability and a truly effective nationwide ABM system. Clearly, the Soviet Union is far from having these combined capabilities now and there is essentially no reason to believe that they will move into such a position by 1975 or even later.

If we were actually worried about the safety of our forces it could be improved quite readily. For example, moving the bombers from coastal bases to the center of the country would almost double the number that would survive a submarine-launched missile attack. An airborne alert would allow still

more aircraft to survive. If we were still worried, a doctrine under which we fire after the first nuclear explosion if warning confirms an attack, would assure that all workable Minuteman missiles would be used in retaliation. There are other steps which could be taken, some of them quickly, to strengthen the deterrent, but unless the possible threat gets more serious than Secretary Laird's current projection, I do not believe that any of them are necessary.

My second point was that the Safeguard system would not provide much protection from a large scale attack for the deterrent force even if it did work as designed. It is generally agreed that the Spartan area defense system will not be effective against a large attack using countermeasures, so that it must be discounted in this case. Actually, the Sprint system is also vulnerable to countermeasures and saturation tactics, but even without such handicaps it will only provide modest help. The proposed first phase deployment would make hardly a measurable defense against the SS-9 force predicted for 1975. The 500 SS-9's carrying three warheads each would result in 1,500 objects to be intercepted by the defense (1,200 if we assume that the SS-9 has a reliability of 0.8). If the 150 Sprints all worked they could destroy only 150 of the incoming objects so that most of the attacking warheads would still reach their targets. Realistically two or three times as many Sprints as incoming objects would be needed for an effective defense. It would be possible to increase the number of Sprints to say 1,500 but it would also be quite simple for the offensive to counter this by replacing the three warheads with a mixture of even smaller warheads and heavy decoys which would still saturate the system. Replacing the three SS-9 MIRV's presently assumed by fifteen smaller ones and fifteen decoys, which is certainly feasible, would make the ratio of attacking objects to Sprints stay the same as before with as little consequent defense. [See revised testimony at end of speech.]

In these examples I assumed that the attack was directed at the hardened missiles. The Safeguard system radars are much more vulnerable to blast effects than the missiles. It is supposed to protect, and there are only a few of them. Since they are vital to the operation of the system, a well planned attack would concentrate its first fire on them in the hope of neutralizing the entire system.

The foregoing assumed that the Safeguard system actually worked. There is good reason to question the system's reliability. There are several interrelated aspects to this question. First, there is the reliability of what is called the hardware, that is the physical components, radars, computers, missiles, communications facilities, etc.; second, there is the question of whether it can be kept functioning by the normal military crews; third, I doubt the reliability of the computer programs, and finally, we must be concerned about a different kind of reliability, whether it is possible to imagine and simulate the actual environment in which this complex system will have to operate.

The creation of the Safeguard system, like any large scale system that depends upon computers to control the operation of its parts and their integration, really involves two engineering tasks; the design and development of the physical equipment and the design and development of the computer program for operating the system. Few people realize that the second task may be much more formidable than the first and cannot proceed independently of it. In a very loose way I can liken this to the physical and mental development of a child. The two must go along together at the start until the physical computer exists and is operating reliably, which may take some time, and then the program development can be undertaken seriously.

While I do not have the time to examine the equipment reliability in detail now, a section of our book is devoted to the matter. It can be said without danger of contradiction that the ABM system represents the most sophisticated and intricate system that man has attempted to build, greatly exceeding the SAGE system or any other previous military system in complexity. Each individual component must perform considerably better, i.e., be more reliable, than those in present day units if the system is to achieve the needed overall reliability. In a recent article, Dr. Dan Fink, former Deputy Director of Defense Research and Engineering indicated that operational missiles might be expected to have an availability of approximately fifty per cent. Though he was talking about offensive missiles, they are hardly more complex than the Sprint or Spartan devices which furthermore are subjected to considerably greater accelerations in flight. The radars and the computers of the Safeguard system are much more complex than any previously used in a military application and in my judgment, the pattern of delays and failures in electronic systems reported by Mr. Richard Stubbing, a staff member of the Bureau of the Budget, in his study of the performance experience of major weapon systems developed since World War II will be duplicated here. It is very likely that a high failure rate will be encountered during the early life of the system and probable that components and subsystems will need to be re-engineered and replaced.

More difficult than creating the "hardware" is building the computer program. This was never adequately done for the SAGE system, and I am under the impression that the effort has been given up. Every new large-scale computer system has had serious operational trouble with its software or operational program. First, the task of designing and debugging a program always takes much longer than anticipated at the start. Second, even after extensive development and shakedown, the programs for complex systems contain many defects or conflicts that come to light only during the stress of operation, and so it is quite common for a computer system to fall completely ("crash" as it is called in the profession) as some new demand is put on the system. Program "bugs" are at least as serious a source of down time on many large systems as actual component failures. Large computer programs have proven to be extremely difficult to modify or "repair" without inadvertently introducing new "bugs".

The Safeguard programs are enormous. From published data it is easy to see that the computer is designed to execute programs consisting of many millions of instructions. It is therefore both reasonable and necessary in analyzing the presumed reliability of such a system to make comparisons with other systems involving programs of similar size. There are no working examples today of huge computer programs on the scale required by the ABM program, but the body of experience with complex problems of a smaller scale inspires no confidence in the ultimate reliability of the ABM system. There is, today, no theory to account for the method of "debugging" a program; it remains an art. Moreover, it is possible to show mathematically that no such theory can be constructed.

Large computer programs can only be tested properly in their operational environment. It is not likely that it will be possible to simulate a nuclear attack well enough to have high confidence that the Safeguard system will actually function as planned when it is truly challenged. In fact, I believe that the odds are against it.

In recent weeks the two planned Safeguard sites have been termed R & D sites, and the impression conveyed that they will make possible more realistic testing of the system than can be done at Kwajalein. While some useful knowledge may be gained

because of the greater complexity of the interconnected systems, it clearly will not be possible to have the important tests, those in which the system attempts to defend the Minuteman force against a large attack in a nuclear weapons environment. In fact, I suspect that more realistic tests could be made on the test range.

Many people propose that we deploy the Safeguard system, regardless of the fact that it may not provide any protection, saying for example, that it can't do any harm, or if there is any chance that it will work, it may make an incremental contribution to our security. In my view, the most likely consequence of the attitude that we must prepare against any conceivable eventuality no matter how unlikely and that we must buy every weapon system no matter how poor, is a continuing upward spiral in the arms race and a continuing decrease in our security rather than any improvement. If the United States deploys the Safeguard system, the Soviet planners will have to be conservative and overestimate its capabilities. Their response, which would most likely be out of proportion to its actual value, could take the form of extending their ABM system or increasing still further their missile force. In either event we would undoubtedly have to respond again and so on. Such a reaction is expected by General Twining and his colleagues in the American Security Council. They recently put out a pamphlet supporting the ABM, in which the following statement appears, "Safeguard will work in the sense it is intended to work—it will force the enemy to greatly multiply his arsenal with greatly sophisticated missiles before he could dare to attack." One could go on to say that this would undoubtedly be the Soviet reaction even if they only wanted to deter an American attack. The U.S. would react similarly to a substantial Soviet ABM. Clearly we agree on the escalating effect of an ABM deployment but disagree on the desirability of it.

Freezing the present system and putting it into production even on a small scale will tend to preclude the development and deployment of an effective hard point defense if one is in fact possible and needed. The energy and resources that would go into the Safeguard system will clearly not be available to continue the search for something more useful.

It is now generally agreed that ABM systems of the Sentinel type cannot provide city protection against large attacks, but defending cities against a small Chinese attack remains one of the objectives of the Safeguard system. The argument seems to be that our massive aircraft and missile force will not deter the Chinese after they have achieved an ICBM capability and that we will need Safeguard to protect us from them. Furthermore, the argument goes, the Chinese weapons being "First Generation" would be simple and make no use of penetration aids so that the "thin" Spartan defense would work against them. I believe that both of these arguments are wrong. First of all, it is perfectly clear that we could inflict almost complete destruction on the C.P.R., should they launch an attack on the United States. It is also perfectly obvious from their behavior that they understand this so I find it difficult to imagine a creditable circumstance under which they would attack the United States. Also, the United States obviously would have a first strike capability against China, even after she achieved a modest missile force. It is conceivable that an ABM system would prolong the period during which this was true. However, it is not sound to assume that the Chinese will not produce simple penetration aids, amply described in the literature, very early in their program, and these could allow their warheads to breach the Spartan defense. Thus, the United States' first strike capability

could be short-lived and hardly prolonged by a "thin" ABM system. Finally, a "Chinese"-oriented system could well raise fears that the United States actually intended to launch a first strike and thus contribute to the very "irrationality" that some people fear.

I would like now to make a few general observations. I am troubled by the argument that the Safeguard system, by protecting the deterrent force, would strengthen the President's resolve in a crisis. Considering how unlikely it is that this ABM system will make a significant change in the strategic forces surviving an attack, it would be most unwise to build it just to back up a game of "chicken". The strategic superiority enjoyed by the United States is often cited as the reason for the Soviet withdrawal during the Cuban Missile Crisis and used to support this argument. I believe that geography and disparity of interests were much more important than relative nuclear strengths. It was easy for the United States to bring its conventional forces to bear on that situation and extremely difficult for the USSR to do so. Strategically it was much more important to the United States than to the Soviet Union. Recall that the United States had absolute nuclear superiority at the time of the 1948 Berlin crisis, but this helped very little in resolving the crisis. The United States also had vast nuclear superiority at the time of the suppression of the Hungarians by the Soviet Union and yet it could not affect the outcome because the Soviet forces were much nearer and the question of who controlled the area was much more vital to the Soviet leaders. I would also point out that the Soviet leaders have always been extremely careful not to cause an irresolvable confrontation around Berlin where they appreciate the extent of the U.S. commitment and interest.

It is frequently said that there were, in the past, debates similar to the present one over the ABM relating to the hydrogen bomb, the ballistic missile and on the Polaris submarine with the strong implication that scientists and engineers were wrong on those issues and so are likely to be wrong again. This is a very wrong interpretation of history, and I would like to tell you why. I was not directly involved in the arguments about the H-bomb, and though I have the impression that the debate started around the question of whether a specific process would work at all, not whether they would be reliable in service, I will leave this question to Dr. Teller. I was involved in both the Polaris submarine and the ICBM issues so I can talk about them with some authority.

In the case of the ICBM the outside scientists were actually advocates fighting people who didn't believe that intercontinental missiles were possible. I was a member of the Von Neuman committee and one of our major efforts was to convince the leaders of the Department of Defense—many of the Air Force generals and the civilian secretaries of both the Air Force and the Defense Department—that missiles were practical weapons. In the case of the Polaris submarine the issues were also different. Most of us who were involved in the development of the United States strategic missile systems during the 1950's believed that the nuclear submarine provided an ideal base for a ballistic missile because of its invulnerability and because, to the extent that it would be the target of a counter force attack, that attack would be drawn away from our shores. The argument was a technical one and had to do with the type of missile to put on the submarine. Secretary of Defense Charles Wilson was only willing to permit the Navy to proceed with the Polaris submarine program if it would use the liquid-fueled Thor IRBM developed by the Army at the Redstone Arsenal. Many of us thought that to do this was a serious error and argued

for the development of a solid-fuel rocket. Our objections were two-fold: the Thor system was a very complicated system that required the use of liquid oxygen and dangerous liquid fuels. In our opinion it created very major safety hazards on board the submarine. In addition, we believed that it was possible to achieve a much higher degree of readiness and reliability with a solid-fuel rocket. In the end we were able to win people over to our views and the present Polaris missile was developed. I believe that Admiral Rayburn, who was the director of the Polaris project understood our objectives and to the best of my knowledge appreciated our efforts. It is hard to see what lessons can be learned from those situations that would apply to the present debate.

I would summarize my position as follows:

1. I have very serious doubts about many technical aspects of the Safeguard system.
2. I do not believe that the Soviet Union can achieve a first strike capability against the United States in the 1975 time period by following their present course of action.

3. Even if Safeguard could be made to work as designed, it would be relatively simple—compared to the difficulty of building Safeguard—for the Soviet Union to deploy effective counter measures against it.
4. Safeguard is unnecessary and building it would waste a great deal of money.

5. If the survival of our deterrent was in danger, I would still oppose Safeguard, and I would search for more promising ways to maintain it.
6. We must make a more determined effort to halt the arms race. Neither building the ABM nor stopping it will insure our security. We must find a way to stop the development and deployment of new strategic weapon systems, MIRVs, FOB's, etc. and to reduce the existing attack forces on both sides. Similarly, we must support means of preventing or controlling limited conflicts. There are obvious steps that would be explored for these objectives.

I would give the highest priority to beginning the bi-lateral discussions with the U.S.S.R. on strategic weapons. I hope that your committee will give urgent attention to this broader range of issues.

7. The views I have expressed here are shared by the persons who worked with me on the ABM book.

REVISED BY DR. J. B. WIESNER, COMMITTEE ON FOREIGN RELATIONS, MAY 14, 1969

Since I prepared my testimony, Dr. Foster has suggested that my calculations regarding the surviving Minuteman force were in error. He estimated that only 50 missiles would survive a Soviet SS-9 attack instead of the 270 shown in our ABM book. My calculations were based on Department of Defense data released in March and April of this year. Dr. Foster has now changed those figures. He says that the SS-9 warhead will have a 0.95 probability of destroying a Minuteman rather than the 0.8 previously predicted. This involves a new estimate of the SS-9 MIRV accuracy and reliability, a reliability which is hard to accept. He also has changed the estimate of Soviet SS-9's from 500 to 600.

Dr. Foster also says that the Soviets might have the capacity for monitoring their MIRV warheads and only using a second one against a target when the first has obviously failed. This is a technical complication in addition to the MIRV's and I don't believe would be used. Even if it was, there is an easy counter to it. The attack will have to come in two waves spaced by a few minutes so that the attacker can determine which reentry vehicles have failed and need backup. Our Early Warning System will certainly indicate that there are two components to the attack. It seems unlikely that we would wait for the second attack to hit, rather than fire the remaining missiles after the first weapons explode. In this case about 290 land based

missiles (Minutemen and Titan II) would be available for counterattack. As our book indicates there will also be a great many aircraft and Polaris missiles available as well.

I find it hard to believe that the changing rationalizations, data, and intelligence estimates in support of the Safeguard system can be based on a truly careful study.

ELECTORAL COLLEGE REFORMS

Mr. MUNDT. Mr. President, it is well known that I have spoken in the Senate with considerable frequency on the subject of electoral reform. An article published in the Washington Daily News of May 12, 1969, indicates that one of the plans for reform which I have argued against will most likely not be passed by the State legislatures, even though Congress should approve it. This is the so-called direct-vote plan.

While many have made snap judgments in favor of the so-called direct-vote plan, the reasons for the widespread disapproval of this plan among many others are obvious. From a political or practical standpoint, it would give one State, like Massachusetts with 14 electoral votes under our present system, the power to completely cancel out the voting majority of many States having a great number of electoral votes. States would be asked to perform an act that would, as one Montana official stated, make them "a drop in the bucket." Another called it a request that "many States commit political suicide" by depriving themselves of the electoral strength to which our great Constitution now entitles them.

As the news story indicates, this self-protective philosophy already prevails in the legislatures of 10 States. Only three more negative votes would be necessary to block ratification of the so-called direct-vote proposal to eliminate the electoral college. On the other hand, only three States are solidly behind the direct-vote plan, and nine others lean in that direction. This leaves 28 States as battlegrounds, and the proponents of the direct-vote system would have to convince 26 of them—a batting average of almost 90 percent—to win national approval for such a proposed amendment to the Constitution.

Mr. President, this is obviously an almost impossible task. It is clear that we would be involved in an exercise in futility if Congress were to approve a direct vote plan. The net result would be no change in our present system. This is an alternative we must not select. We need electoral college reform.

Happily, the vehicle for reform exists in Senate Joint Resolution 12, the so-called district plan. Senate Joint Resolution 12, which I have cosponsored with 18 other Senators would eliminate the deficiencies in our present electoral system. It would give a truer representation of the voter's wishes in each State; it would force the candidate to give equal consideration to the interests of all regions instead of concentrating his appeals and programs on one segment of our society such as the great masses of votes and the pressure groups in the large cities; it would give each voter an equal vote and

each State an equitable "vote-power" since each voter would be voting for only three electors; it would encourage the retention of our two-party system since a third party, to have any effect, would have to be truly national in scope; and above all, it would end the winner-take-all system which is the principle fault of our present system.

Although the United Press International report does not mention it, one State has already adopted the district system. As I pointed out to the Senate last month, the State of Maine on March 26 of this year changed its law so that electors are allocated to their congressional districts with two elected statewide. This is an example of how simple it is to achieve meaningful reform that is still equitable and constitutionally sound.

Mr. President, it is essential that the present electoral system be changed and it must be changed now. There is no excuse for delay, and no excuse should be accepted. I urge the Senate to pass Senate Joint Resolution 12 as soon as possible.

I ask unanimous consent that the Washington Daily News article and the complete text of the United Press International release be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Daily News, May 12, 1969]

UPI SURVEY—VOTE CHANGE PROPONENTS ARE TRAILING

If Congress decided to abolish the electoral college and elect the President by direct vote, the legislatures of 38 states would have to give their approval. But a preliminary survey indicated today only 12 states, at most, now firmly favor the idea.

By contrast, it would take negative votes in only 13 states to veto such a proposed constitutional amendment. And the same survey indicates there are already 10 states where that would probably happen.

The outlook comes from UPI interviews with legislative leaders made in all 50 states. The composite picture is this:

CLOUDY PICTURE

Only three states are solidly behind direct election and only nine more show a noticeable preference for the plan.

Six states estimate the plan has no chance in their legislatures and sentiment in four others is running against direct election.

In the remaining 28 states the issue is either too divided or undeveloped to make a judgment.

The proposed amendment is still in the mills of Congress. The House Judiciary Committee has overwhelmingly approved the direct election.

Altho it is possible to read a detectable preference in only two of every five legislatures, there are these indications:

States showing the greatest opposition to direct presidential election include Alabama, Arkansas, Georgia, Idaho, Nebraska, Arizona and Utah. States where opposition is substantial but not as strong include Minnesota, North Dakota, Oklahoma and Texas.

The plan is given the edge in Maryland, Massachusetts, Rhode Island, Vermont, Kansas, Kentucky, Colorado, Hawaii, New Mexico, North Dakota, Oklahoma and Texas.

While efforts have been made to make the issue nonpartisan, Republicans generally line up against and Democrats for.

ELECTORAL

(By Robert J. Taylor)

WASHINGTON (UPI).—Advocates of electing Presidents by a direct popular vote face a formidable task in convincing State legislatures that the electoral college should be scrapped, a UPI survey showed Sunday.

Interviews with legislative leaders in all 50 States indicated that only 12 legislatures show a noticeable preference for the plan, while approval by 38 is needed to abolish the electoral college by a constitutional amendment.

In contrast, leading lawmakers of six States estimate it has no chance in their legislatures and sentiment in four others is reported leaning against direct election. Together, this is only three short of the 13 States required for an effective veto.

In 28 States, legislative opinion is too evenly divided or too lacking to make a judgment, political leaders reported.

With the threatened constitutional crisis posed by the three-way 1968 presidential race still fresh in mind, Congress has put electoral reform high on its list for action this year.

The House Judiciary Committee has already given overwhelming approval to a proposed constitutional amendment that would replace the electoral college with a direct election plan. Committee hearings are nearing completion in the Senate.

Although it was not his first choice for electoral reform, President Nixon has promised to throw the power and prestige of his office behind direct election if it passes the House and Senate by the required two-third majorities.

He could make the difference. Many leaders reported sentiment for direct election is evenly divided in their legislatures, and some said interest in electoral reform has suffered as 1968 receded into history and local problems grew.

But in one form or another nearly all the legislators interviewed echoed the feeling of Speaker William Ratchford of the Connecticut House that a change in electing the President is much overdue.

"The electoral college has long outlived its usefulness," he said. "The time is right."

While only about two out of five legislatures at this point show a detectable preference in electoral reform, these patterns are emerging:

Opposition to the direct election plan is greatest in Southern and mid-Western States, where Nixon ran well in 1968, and in smaller States. These include Alabama, Arkansas, Georgia, Idaho, Nebraska, Arizona and Utah. Exceptions are Minnesota, Ohio and Pennsylvania, where there is also substantial opposition.

Direct election is strongest in the East and in Middle Southeast States. It is given the edge in Maryland, Massachusetts, Rhode Island, Vermont, Kansas, Kentucky, Colorado, Hawaii, New Mexico, North Dakota, Oklahoma and Texas.

While Nixon and Congress have taken pains to avoid giving the issue a political tinge, Republicans generally line up against direct election while most Democrats favor it.

Opposition to direct election generally centered on abolishing the Electoral College, which give each State one vote for each of its Congressmen and a two-vote bonus. Small States figure the bonus votes give their votes an edge over big-State voters, although computer studies dispute this.

The alternate reform plan most frequently mentioned in the survey was the proportional system, Nixon's first choice. It would retain the Electoral College but outlaw the winner-take-all practice where States give all their electoral votes to the popular vote winner. Electoral votes would instead be apportioned according to a State's popular vote percentages.

Proportional reform was reported to be popular in eight States, and Minnesota is

near final action on a measure adopting the proportional plan.

A Montana official summed up the small-State case against direct election with the comment "we'd be a drop in the bucket."

"If it went to a vote today, it would have no chance at all of passing," he said. "However, there would be a 50-50 chance if it was changed to apportionment of electoral votes according to popular votes."

Next most popular reform proposal was the so-called district plan, which would give one electoral vote to the winning candidate in each congressional district and the two bonus votes to the candidate carrying the State. This was significant support in seven legislatures.

The House Judiciary Committee weighed and discarded both these alternatives, largely because they would still allow the loser in the nationwide popular vote to become President through the electoral vote.

Although direct election supporters have an uphill fight, public opinion is on their side. Polls show overwhelming public enthusiasm for electoral reform and better than an 80 percent preference for direct election.

Time, however, may work against them. Only 29 legislatures meet in 1970, the year they would be expected to get their first chance at whatever reform plan Congress proposes.

Under the complicated effective date formula of the House Judiciary Committee, the balance of the States necessary for ratification—at least nine—would have to act in the first three weeks of 1971 for the new method to be effective in the 1972 presidential election.

Observers consider this highly unlikely to be achieved, making it probable 1972 will pass with the electoral system unchanged—and the momentum for reform lost.

GEN. FREDERICK REINCKE

Mr. RIBICOFF. Mr. President, Gen. Frederick Reincke has announced his pending retirement from the post of Connecticut State Prison warden. On June 30, when General Reincke steps down, Connecticut will lose a great and good friend. For 20 years Fred Reincke has been the man to whom the State has turned to carry out the most difficult tasks. Our faith was well placed, for the general never let us down.

General Reincke headed Connecticut's military forces for 15 years as State adjutant general. In World War II his gallantry in New Guinea won him the Legion of Honor and the admiration of his officers and men. Throughout his career General Reincke earned the high accolade as a man who did the job well.

His service to Connecticut will long be remembered and admired. While adjutant general his administrative skills were largely responsible for developing the State military organization into its present form. Twice Connecticut has turned to Fred Reincke in moments of crisis at the Old State Prison in Wethersfield. Twice the general quickly and skillfully restored normal conditions.

In 1963, after 15 years as adjutant general, Fred Reincke accepted the request of Governor Dempsey to head the State prison as warden. For 6 years he has filled this sensitive post with skill and understanding, and the new prison at Somers has received national recognition.

I know that all Connecticut citizens join me in expressing our thanks to Fred Reincke for a job well done. He will be sorely missed. With our thanks, go our

best wishes for many happy years of retirement.

CHANGE BY FORCE OFFERS NO ALTERNATIVE BUT RULE BY FORCE

Mr. PROXMIER. Mr. President, for the great majority of Americans, the student disorders we have been witnessing have cloaked the American campus in a fog of confusion. It is not clear what the universities or local and State governments or the Federal Government should do. It is not clear what the students leading the protests want.

Yet one thing is clear, and I quote a statement of the University of Wisconsin Faculty Assembly:

The use of force to achieve change or to express dissent offers no alternative save a rule by force.

As this applies to the college administration, so too does it apply to the simplistic solution of Federal intervention. This is basically a problem to be solved by the school administrations. Federal intervention could be very dangerous and become a possible infringement on academic freedom.

That is why it is particularly important that the changes be anchored within the universities by strong principles not to slow change or to make it more difficult but, as the Wisconsin Faculty Assembly put it; to "supply a methodology through which change can be achieved in a manner which provides an opportunity for the preservation of freedom to dissent."

Mr. President, I ask unanimous consent that the entire text of the University of Wisconsin Faculty Assembly statement, entitled "The Basic Purpose of a University, and the Principles on Which It Must Operate," be printed in the RECORD:

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE BASIC PURPOSE OF A UNIVERSITY, AND THE PRINCIPLES ON WHICH IT MUST OPERATE

(A statement by the University Faculty Assembly, Feb. 26, 1969)

At this time, when University policies, procedures and traditions are under healthy scrutiny, and sometimes subjected to destructive attack, the Faculty reasserts the basic purposes of a University, and the principles on which it must operate.

The purposes of a University are: (1) to provide students with optimum opportunity for learning from the heritage of the past, for gaining experience in use of their intellectual and creative capacities, and for developing themselves as concerned, responsible, humane citizens; (2) to extend the frontiers of knowledge through research; (3) to provide society with objective information and with imaginative approaches to the solutions of problems which can serve as the basis for sound decision-making in all areas.

To fulfill these purposes it is essential that the University community operate on the principles that: (1) there must be complete intellectual freedom for Faculty and students; (2) satisfactory solutions to problems can be achieved through rational inquiry and discussion; (3) implementation of needed changes in the University must be through legal means; (4) each individual has the right to his opinion and to be heard, but no individual has the right to prevent those of differing views from equal opportunity to be heard.

It follows from these principles that diversity and dissent are essential to a University. All propositions are subject to investigation and challenge. It is the right of all members of the academic community to dissent from currently accepted perceptions about the world if they believe these are inaccurate. It is fundamental to the existence of the University, however, that the mode of dissent adhere to the principles. These principles are not obstacles to change; quite the contrary, they supply a methodology through which change can be achieved in a manner which provides an opportunity for the preservation of freedom to dissent. The use of force to achieve change or to express dissent offers no alternative save a rule by force. There can be no compromise in the University's commitment to these principles if there is to be a University.

All members of the University community are entitled to exercise the rights of free speech recognized in constitutional law and to perform lawful acts of protest to express dissent and to effect change. The use of force as a way of achieving change is, however, wholly incompatible with intellectual freedom and rational inquiry. The academic community must resist attempts by any group to impose its opinions on others by physical force or intimidation.

It is well to recall that The University of Wisconsin has been one of the leaders among American institutions of higher learning in recognizing the proper role of students in formulating academic policies. Large numbers of students serve on a wide and increasing variety of Faculty committees, and further student involvement in various academic areas is under active consideration. The Faculty recognizes that students have played and should continue to play a significant role in improving the quality of the University. For the most part, students control student organizations and publications, and the Faculty believes that a greater number of concerned students should involve themselves in student elections, the conduct of student organizations, and the management of student publications.

The Faculty recognizes that the University has a special obligation to extend the benefits of higher education to those who are disadvantaged in society, whether because of race, or poverty, or other factors. In respect to equality of opportunity we believe that the black population of the country and other minority groups have a legitimate grievance. While The University of Wisconsin has endeavored for decades to meet its obligation to maximize educational opportunity, and long ago established and implemented a policy condemning invidious discrimination on the campus, the Faculty accepts racial justice as an urgent and pressing concern.

As current and future problems press upon the academic community for solution, the Faculty expresses the hope that the many channels of communication among the various segments of that community, which have been developed and effectively utilized for many years, will remain open for all to use and that new channels will be opened as needed. The Faculty hopes that as a result of such communication no part of the University community will adopt force as the means of seeking to make opinions prevail, but that all will accept intelligent analysis and rational persuasion as the instruments for achieving change. There is no place in a university for those who abandon rationality.

A PLEA FOR DIGNITY

Mr. ALLEN. Mr. President, Hon. Rubin Morris Hanan, of Montgomery, Ala., is one of the outstanding citizens of the State of Alabama and of the Nation. He

is a sincere humanitarian, always interested in and active in behalf of his fellow man. For 30 years he has been active in behalf of the senior citizens of Alabama.

With the thought that any comments that he might make on the problems of our senior citizens would be of interest to the Senate, I ask unanimous consent that a letter from him to the editor of the *Montgomery, Ala., Journal* dated May 3, 1969, be printed in the *RECORD*.

There being no objection, the article was ordered to be printed in the *RECORD*, as follows:

A PLEA TO THE PRESIDENT ON BEHALF OF DIGNITY

EDITOR, ALABAMA JOURNAL:

I have sent the enclosed letter to President Nixon on behalf of the Alabama League of Aging Citizens.

DEAR MR. PRESIDENT: This is an urgent appeal on behalf of Alabama's Senior Citizens, who have served our nation long and faithfully. They are grieved and shocked beyond belief in the manner the Federal Government is depriving them of their rights, benefits, and financial assistance promised under Title III of the Older Americans Act of 1965.

I immigrated to this country from the Isle of Rhodes, 42 years ago. The good people of Alabama welcomed me with open arms and a silver platter. Since 1939 I have worked with the Senior Citizens of this great State in an effort to say "thank you" for all they have done for me.

As you continue your vigorous campaign for a better future for all mankind, please be mindful not to overlook the joys and hopes, the griefs and anxieties of Alabama's 375,000 Senior Citizens, especially those who are poor and sick or in any way afflicted; these too are the joys and hopes, griefs and anxieties of our great affluent society.

Today the Torch of Freedom is held high by the people of Alabama by all races, creeds or religions. Please, Mr. President, let us remember the supreme sacrifices that the people of Alabama made in war and peace in building this great nation. We need only to look at the cemeteries at Lexington, Gettysburg, Santiago, Chateau Thierry, Coral Sea, Okinawa, Palermo, Normandy, Korea and the malaria beaten jungle of Vietnam to realize the supreme sacrifice that called the sons and grandsons of those deserving people of Alabama whom the United States Department of Health, Education and Welfare has deprived for the past four years of their rightful claim to funds under the Older Americans Act. Their sacrifices must not be in vain so that all the people from all the nation might be secure.

No nation in the history of the world owes so great a debt to anything physical as the United States of America owes to its gallant warriors in Vietnam. Today more than 900 young men of Alabama died in Vietnam; for untold sorrow and heartache for their parents, grandparents, brothers, sisters and wives, and perhaps their children.

It is this heritage that the American people have fought for and gained. We don't plan on losing it by "regulations" or "guidelines" or by force for some while.

We are appealing to you for the rectitude of the HEW's intentions and to remember that we are a nation conceived in liberty and dedicated to the proposition "that all men are created equal"! The men of 1787 converted a small, weak and poor nation into one immeasurably great, powerful and rich. All our material prosperity is incidental. Our true heritage, our real inheritance from our forefathers is an obligation to prove to all the world that free men can govern themselves better than any king can govern them, and that a nation of freedom, dedicated to the principle of equal justice under

the law, far from being a menace to its people, is their best guarantee of security and equality.

Too many of Alabama's aged have been left behind by the progress they worked most of their lives to create—a better society. They suffer a disproportionate burden of poor health, low income and bad housing.

Holding back funds from Older Americans in Alabama has eroded the dignity, freedom, independence and integrity of these individual human beings. Alabama asked full approval by HEW in April of 1968 as the State Commission on Aging was in full compliance with Federal regulations, including civil rights.

This trend toward punishing the aged and elimination of their rights as citizens of this great nation can mean only one thing—less freedom and less individualism; because you are born or reside in Alabama, the old wound is still open.

America cannot ignore what is happening to those basic fundamental principles and philosophies upon which this great nation of ours was founded. I believe in my adopted country, because it is the land that gives me my freedom, and because it is my adopted home. I am an American father and grandfather, and I can best serve my country by "doing justly, loving mercy, and walking humbly with my God."

RUBIN MORRIS HANAN,
President, Alabama League of Aging
Citizens, Inc.

ESTIMATING THE BENEFITS OF PUBLIC EXPENDITURES

Mr. PROXMIRE. Mr. President, this week the Subcommittee on Economy in Government of the Joint Economic Committee has been holding hearings on "Guidelines for Estimating the Benefits of Public Expenditures." This is a most important topic, one which should be of vital concern to Congress. It is only by having quantitative estimates of the benefits and costs of alternative expenditures that the Congress and Executive decisionmakers can make rational choices—choices which are in the public interest.

On Monday, May 12, the subcommittee heard testimony from Dr. Jack Carlson, Assistant Director for Program Evaluation at the Bureau of the Budget. The statement which he presented was most important for two reasons. First, he set forth some basic principles of benefit estimation and the appropriate means of handling estimation when there are several objectives which a program is attempting to achieve. I quote from his statement:

Most decision-makers feel that the objective of securing the greatest dollar return per dollar spent is important. In some projects, it evidently is the sole objective. But in others, nonmonetary benefits and redistributive benefits are also important. Thus, there is a problem of combining measures of diverse objectives. The only way I feel comfortable in doing this is to keep the measurement of each objective separate and not try to mix them. Therefore, I would show the national income benefit with national income cost and then show nonmonitized benefits in whatever physical or social units that are useful such as lives saved, numbers of more informed citizens, scenic beauty preserved, assistance to particular locations or to certain target groups—Appalachia and the poor, the aged, the blind.

Some people contend that one should aggregate all benefits and all objectives by monetary proxies for incommensurables,

such as national income benefits, regional income distribution and assistance to Appalachian poor. This, I think, is misleading and does not allow each participant in the decision-making process to weigh the importance of each objective himself.

Also, I feel it is misleading to arbitrarily allocate project or program costs to each measure of different objectives. We frankly do not know how to allocate project costs when a project provides multiple outputs. Until we know we should not dilute the one measure that can appropriately compare national income costs and benefits.

The second significant aspect of Dr. Carlson's statement is his description of a major study being undertaken by the Bureau of the Budget—the "Program Overviews." In his testimony, Dr. Carlson presented an example of the results of this study. For two programs in the manpower area, program costs, program benefits, the benefit-cost ratio, and the characteristics of the beneficiaries of the program are all provided. This is most helpful information, and the Bureau of the Budget should be commended for developing it. We now look forward to the time when the full study can be presented to the Joint Economic Committee and to Congress.

Because of the importance of this information, I feel that the entire Congress should be made aware of Dr. Carlson's testimony. I ask unanimous consent that Dr. Carlson's statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF JACK W. CARLSON, ASSISTANT DIRECTOR FOR PROGRAM EVALUATION, BUREAU OF THE BUDGET, BEFORE THE SUBCOMMITTEE ON ECONOMY IN GOVERNMENT, JOINT ECONOMIC COMMITTEE, ON GUIDELINES FOR ESTIMATING THE BENEFITS OF PUBLIC EXPENDITURES

Mr. Chairman and Members of the Subcommittee: I am happy to appear before this Subcommittee to discuss "guidelines for estimating the benefits of public expenditures." This question is, of course, at the heart of public expenditure evaluation. In recent years the major executive departments and agencies, and the Bureau of the Budget in particular, have devoted much effort to improving the process through which Government resources are allocated to accomplish the various objectives of public policy. My remarks will be organized to try to set the problem of measuring benefits in the context of the existing conceptual framework and available measurement techniques.

IMPROVEMENT IN DISCOUNTING PRACTICES AND GUIDELINES

Some aspects of program evaluation already have been considered by this Subcommittee and have been recorded in several useful reports, especially the excellent report of this Committee on discount policy last summer. During the Committee's discount hearings last summer, the Bureau of the Budget and other executive branch agencies testified in support of consistent and improved discounting procedures. The Water Resources Council testified in support of a new formula for arriving at a more appropriate discount rate than was then being used. Since those hearings, the Water Resources Council has recommended to the President a new procedure for estimating the discount rate to be used for evaluating projects. The new formula has been approved and is based on the current yield of Government bonds with changes in the rates limited to one-fourth of one percent per year. I believe that

this was an important step in improving discounting procedures. Our objective is to apply this guidance in all areas of public investment and we hope to have a Circular published this month.

During the hearings last year, the Bureau also testified in favor of studying the appropriate conceptual basis and measurement techniques for estimating the opportunity cost of private spending which the financing of Government expenditure displaces. That study has been initiated and should provide further insights later this year. In the meantime, agencies have been requested to use a range of discount rates for program evaluation efforts. The Bureau's letter identifying major program issues for agency evaluation this year stated that all agencies should use a 10 percent discount rate with tests for sensitivity at higher and lower rates.

Complexity of program evaluation

Obviously, evaluation of public investment is important because Government expenditures absorb valuable inputs and produce valuable outputs. And equally obvious, the Government should invest only when benefits exceed costs. But the multiplicity of objectives of public expenditure often makes actual determination of benefits and cost extremely difficult. In summary form, the objectives of public programs effecting resource allocation can be classified as follows:

The provision of public goods—that is, goods whose consumption by one individual does not reduce the amount available for consumption by others, and the consumption of it does not provide direct return on the provider's investment. Decisions about such goods have to be made collectively. Examples are deterrence of war and preservation of scenic beauty and wildlife.

The redistribution of income—that is, assistance to specific groups such as the poor, the aged, and the disadvantaged. Redistribution may be effected by the transfer of money, future income, or by the provision of goods and services. Examples are: public assistance programs, public investment in education programs, and food distribution programs, respectively.

The elimination of spillover effects—that is, situations where one person's actions may benefit or harm another in ways that cannot be ignored in the original decision, as when one firm emits soot which damages others in the absence of appropriate charges or prohibitions.

The removal of imperfections in the operation of the private market or the alleviation of their effects—for example, providing a competitive standard for public enterprises where none would otherwise exist; improving market information to consumers, producers and workers where the market would otherwise work badly; developing large-scale projects where significant economies of scale exist.

MANAGEMENT OF PUBLIC RESOURCES

Even this multiple classification vastly oversimplifies the objectives of the public sector. Each classification could be broken down into a multitude of more narrowly defined objectives; for example, income redistribution programs include such diverse groups as young people in central cities, older people in rural depressed areas, and American Indians in both rural and urban localities.

Moreover, unfortunately for simplicity in the evaluation of Government programs, almost all of the broad objectives have implications for more than one public sector objective. Public expenditure on education may provide transfers of income to beneficiaries and a public good to society in the form of a better educated electorate. Additional benefits associated with increasing educational levels in the area where the beneficiaries live may include a reduced crime rate and a more efficient labor market

as individuals become more aware of their opportunities through education. Clearly not all of these dimensions of the performance of our public education program can be subjected to measurement in terms of dollars. The dollar yardstick for measuring benefits is relevant only when a private market for goods and services does or could exist, or where reasonable proxies for private markets or "shadow prices" can be calculated. Since no private market can evaluate the political value of a better educated electorate, that element of the output of public education programs must be measured in nondollar terms, or must be considered qualitatively. This, as I shall discuss below, has important implications for the evaluation of public expenditures.

Recent evaluation of our manpower programs illustrates how multiple criteria can complicate the task of analysis. It would be easier to evaluate those programs if the criterion for selection of improvement of programs were solely the addition to national income no matter whose income is increased. But it does matter who benefits. For example, analysis of the Manpower Development and Training Act, Institutional Training Program indicates that average net earnings gained by participants in the program are almost triple the per trainee cost. Two-thirds of the recipients are poor and forty percent are under 21 years of age. On the other hand, similar information on the Neighborhood Youth Corps Out-of-School Program suggests that this program increases the average earnings of participants by only 120 percent of the per trainee cost; however, all of the participants are poor and under 21. In order to choose the desired mix of programs or for possible reorientation of each program, a weighting for each criterion—income increases, assistance to poor, assistance to youth—is necessary, but we have no objective social basis for assigning a specific value to a dollar transfer to a poor person relative to a dollar transfer to someone with higher income, or to a young person relative to an older person.

Moreover, the weights attached to each objective will differ for each participant in the decision-making process. A Cabinet Secretary may have different weights for each objective when he makes recommendations to the President than the President may have when he makes recommendations to the Congress, or than each of the substantive committees and appropriations subcommittees have when they make recommendations to the entire Congress. This fact is important for selecting guidelines for benefit estimation and does require measures for a wide range of objectives in order to assist all participants in the decision-making process.

When we are dealing with programs that have provision of public goods or redistribution of income as important objectives, evaluation must take the form of cost-effectiveness analysis rather than cost-benefit analysis. Cost-effectiveness analysis compares the cost of alternative ways of achieving a given objective with output measured in physical, social, or some other nonmarket oriented term. I contrast it with the typical cost-benefit analysis which compares cost and benefits directly in dollar terms.

This distinction has important implications for analysis of public resource allocation. Unlike cost-benefit analysis, cost-effectiveness analysis does not provide an obvious decision rule for approving or disapproving a specific project or adding to a program—assuming the use of the national income objective. To choose an obvious example, the meaningless of a dollar value of changes in the strength of our nuclear war deterrence makes it necessary to determine the level of deterrence by the judgment of responsible officials. In the investment of electric power generation, by contrast, there is general acceptance that only projects where dollar

benefits equal or exceed cost should be undertaken.

The inability to compare the value of additional spending on national security and water resources, or education, or highways, means that formal, quantitative analysis cannot determine the broad priorities among areas of Government spending. Nevertheless, if the principal role of analysis is, as I believe, to assist in choosing efficient ways of achieving public objectives within each of the broad areas of public activity, it has an important role to perform in improving the process by which political, social and economic considerations are combined to determine broad priorities. I believe it can exercise this role by expressing and summarizing more effectively the cost and consequences of alternative resource allocations.

BENEFIT ESTIMATION

Let me turn from the evaluation of public expenditures in general to the estimation of benefits. First, we need a definition of benefit. A reasonable definition can be found in the basic guidance for evaluating water resources projects, Senate Document No. 97:

Benefits: "Increases or gains, net of associated or induced costs, in the value of goods and services which result from conditions with the project, as compared with conditions without the project." (p. 8)

The document explains further that "associated costs" are "the value of goods and services over and above those included in project costs needed to make the immediate products or services of the project available for use or sale." In practice it is used in the evaluation of increases in net farm income resulting from irrigation projects and refers to the cost of additional inputs required to increase farm output. Induced costs are "all uncompensated adverse effects caused by the construction and operation of a program or project, whether tangible or intangible" (whether measured in dollar or nondollar terms). Deterioration in environmental quality resulting from a water resource project can be cited as an example of this type of cost.

This definition of benefits is useful. Whether to include associated and induced costs as a subtraction from benefits or an addition to cost is largely a matter of convention. The effect on the benefit-cost ratio of either alternative usually is very slight, and consistent practice makes the issue somewhat pedantic.

Although our attention is appropriately directed to the difficulties of estimating benefits, cost estimation presents its problems too. This is especially true when measuring costs outside the area of water resources. Accounting systems that have been established for bookkeeping purposes are often of little value for analysis. Moreover, in new areas of public endeavor, such as investment in the Liquid Metal Fast Breeder Reactor, technical and engineering uncertainties are often great, compounding an already difficult problem.

After finding an acceptable concept for benefits and costs, procedures for measuring benefits must be developed, and less is known here. Beyond the area of water resources projects, far less attention has been given to it.

One distinction in measuring benefits is whether or not benefits can be expressed in dollars. Dollar benefits are those gains or benefits which have a counterpart in the private economy which reflect the values of society by the pricing system. Another distinction is one of principal and subsidiary benefits, which merely categorizes those benefits which contribute to accomplishing the main or major objective or objectives of a project and those that contribute to lesser objectives. A third distinction is that of direct and indirect benefits. Direct benefits are those gains or increases which are closely related in a cause and effect relationship with the project. Indirect benefits are more tenu-

ously related. In Senate Document 97 direct and indirect benefits are called primary and secondary benefits.

This leads me to the benefit measurement called national income benefits. To qualify, benefits must be expressible in dollar terms and include both principal and subsidiary benefits and both direct and indirect benefits—net, in practice, of associated and induced costs which can be expressed in dollar terms.

Since national income benefits are expressed in dollar terms, they can be compared with costs to provide a basis for evaluating a project and developing a decision rule. In water resource project evaluation, for example, a benefit-cost ratio based on what is taken to be national income benefits and project costs which is greater than one provides some assurance that society in general will gain more by doing the project than if the resources were consumed elsewhere.

Note, I say some assurance. There is no guarantee that this is always the case. A project with a benefit-cost ratio less than one may still be desirable because nondollar benefits may provide enough additional benefits in the judgment of a decision-maker to make the project worthwhile. Similarly, a project with a benefit-cost ratio greater than one may not be desirable because induced and associated costs were not adequately considered or because project costs were understated. Whether or not such an approach consistently understates or overstates the benefit-cost ratio for water resource projects is a matter of measurement accuracy and comprehensiveness of all estimates, and better project evaluation lies in improving both cost and benefit estimation. Nondollar benefits and costs should be recognized and quantified—and, if feasible, valued in dollar terms—to the greatest extent possible. Reasonable men can certainly agree that the way to improved project evaluation is by improving measurement of total dollar benefits so that they can be compared with total project costs with greater confidence.

One area of possible improvement in national income (total dollar) benefits may lie with what Senate Document 97 calls secondary benefits; that is, indirect benefits. Just what indirect benefits really are from a national standpoint is difficult to establish as a practical matter. However, conceptually it is clear that secondary benefits only arise when the economy does not run smoothly. If the economy is reasonably close to full employment, if labor and capital resources are mobile, and if economies of scale of pertinent commodities generally have been exhausted under competitive conditions, a change in secondary benefits and costs in one region of the country tends to be offset by secondary benefit and cost changes elsewhere in the economy. Therefore, there is no reason for accounting for secondary benefits.

However, if unemployment does occur, if resources are not entirely mobile, and/or if monopoly influences exist, then secondary benefits are present and should be measured and will change the calculation of benefits and costs.

A word of caution is appropriate because the imperfections of the marketplace giving rise to potential secondary benefits change through time, and one should not assume that observable benefits this year will exist three years from now. Also, the mere fact that a public investment project reduces the costs for other investments in its vicinity is not enough to demonstrate secondary benefits; rather, the differences between the reduction in cost in this location and a like dollar investment cost in any other location is needed—if positive, then a secondary benefit; if negative, then a secondary disbenefit. As a practical matter, the claim that secondary institutional, physical or social changes caused by a project are not nullified by changes elsewhere in the economy is difficult to prove.

The current degree of accuracy of national income benefit estimates is fortunate. Most decision-makers feel that the objective of securing the greatest dollar return per dollar spent is important. In some projects, it evidently is the sole objective. But in others, nonmonetary benefits and redistributive benefits are also important. Thus, there is a problem of combining measures of diverse objectives. The only way I feel comfortable in doing this is to keep the measurement of each objective separate and not try to mix them. Therefore, I would show the national income benefit with national income cost and then show nonmonetized benefits in whatever physical or social units that are useful such as lives saved, numbers of more informed citizens, scenic beauty preserved, assistance to particular locations or to certain target groups—Appalachia and the poor, the aged, the blind.

Some people contend that one should aggregate all benefits and all objectives by monetary proxies for incommensurables, such as national income benefits, regional income distribution and assistance to Appalachian poor. This, I think, is misleading and does not allow each participant in the decision-making process to weigh the importance of each objective himself.

Also, I feel it is misleading to arbitrarily allocate project or program costs to each measure of different objectives. We frankly do not know how to allocate project costs when a project provides multiple outputs. Until we know we should not dilute the one measure that can appropriately compare national income costs and benefits.

RECENT EFFORTS TO MEASURE BENEFITS

Keeping in mind the diversity and multiplicity of objectives, we have initiated some experimental projects to improve benefit estimation and provide summary measures of the important indicators which are used to justify public assistance.

The first of the interrelated projects, *Program Overviews*, is an effort to display benefits measures related to the major objectives of public policy and to summarize the degree of accuracy of each measure. Where measures are not available and judgment is inadequate to develop even speculative measures, then no measure is recorded. In short, the project summarizes both our knowledge about the benefits of Federal programs and our level of ignorance.

Because of the multitude of objectives and thus measures of benefits, we developed definitions and a data format that would display measures of the major objectives decision-makers use. Compromises had to be made, however, to make the project manageable and the presentation of information concise. The attached table for the Manpower Program Overview shows the format that we are currently using, with two examples displayed. The data includes the following:

- (a) Federal programs (and relative tax advantage) listed according to closeness of interrelationship with other programs and irrespective of managing agency [Column (1)].
- (b) Obligation and expenditure data for each identifiable program for the current or anticipated fiscal year [Columns (2), (3) and (4)].
- (c) The unit of output provided by the program and the average output provided beneficiaries [Columns (5) and (6)].
- (d) The cost for each unit of output, broken down by major components [Columns (7), (8), (9), (10) and (11)].
- (e) The annual national income benefit of the unit of output, where possible [Column (12)].
- (f) The net benefit based on addition to national income, where possible [Column (13)].
- (g) Benefit-cost ratio, where useful [Column (14)].
- (h) Average income maintenance benefit per beneficiary [Column (15)].

(i) Characteristics of the beneficiaries of each program, by income, age, education attainment level, race, geographic location—both size of community [Columns (16), (17), (18), (19) and (20)] and region of country (shown on another format), and

(j) Judgment as to the flexibility of re-directing the program to other beneficiaries [Column (21)].

The data is identified as to its accuracy by the use of parentheses; no parenthesis indicates the estimate is based upon a high probability of accuracy; a double parenthesis indicates a very low probability of accuracy. In addition, each data presentation is accompanied with a description of sources and estimation methodology.

Two examples are given: Manpower Development and Training Act (MDTA), Institutional Training Program and the Neighborhood Youth Corps (NYC), Out-of-School Program. The 1970 budget request contemplates that the NYC program will spend \$102 million, which will provide 34,000 man-years of training; however, the average duration in the program per trainee is 20 weeks. The Federal Government spends \$950 for allowance and subsistence (income maintenance) and \$300 for other expenditures for a total cost of \$1,100.

Although the benefits are uncertain, available data indicate that the annual salary increase is \$190 per year. If the differential continues for 10 years, the present value of the net benefit is \$775 (10 percent discount rate), and provides a benefit-cost ratio of 1:7.

The characteristics of the trainees are: 97 percent from poor households, 100 percent under the age of 21, 93 percent with less than a high school education, 50 percent Negro, 28 percent live in the central city of a city over 500,000, 8 percent in the suburbs of cities over 500,000, 16 percent from smaller cities, and 48 percent from rural areas.

A similar format is used for each Program

Overview so that the relative achievement of objectives across programs can be compared. For example, assistance to the aged could be observed in manpower, health, transportation, natural resources and other program areas, even though other objectives that are measured are not commensurable, such as days of health care vs. days of manpower training vs. lane miles of road vs. military airlift capacity.

Although the analysis is far from complete, some observations can be made. First, more precise definition of terms is needed. Variations in definitions of data can be misleading. Second, relatively few studies have measured or attempted to measure all the benefits or for that matter all of the costs of individual Federal programs. In order to obtain estimates, judgment from fragmented information has to be employed. Third, for large areas of Federal expenditures, not even fragmented data upon which to base benefit estimates are available. Fourth, program managers often are reluctant to develop this information because they feel that their role in the decision-making process will be diminished. Fifth, the information systems in the Federal Government are not geared to provide benefit data useful for setting priorities and decision-making. Rather, almost without exception, the data are for financial control, and even here inadequacy exists. Yet less relevant data are abundant.

Two other related projects are being attempted on an even more experimental and crude basis than the Program Overview Project. The first of these is the Social Achievement Indicators Project, which is intended to relate public expenditure to the indicators of social condition. In the case of manpower training programs, for example, unemployment and underemployment information would be displayed in a format which is similar to the impact measures presented in the Program Overview: by income levels, age, race and location. Also, we

are attempting to determine in a very crude but hopefully useful way the short- and long-run impact of current levels of social commitment and other social forces on these indicators.

The second related effort, again on an experimental basis, is intended to display both Federal program benefits (Program Overview information) and social conditions (Social Achievement Indicators) by selected regions of the country and Standard Metropolitan Statistical Areas. A case study of each is being attempted now. Obviously these are ambitious projects, but even small and partial successes can make the attempt worthwhile.

Guidelines for estimating benefits

To sum up, the evaluation of public investments is complex and raises serious conceptual and measurement problems. Nevertheless, analysis of benefits and costs does help identify better ways to allocate public resources. Recent experience with the Program Overview Project has affirmed the usefulness of better benefit estimating and the paucity of good measurements at the present time.

A desirable program for the future would:

(1) Encourage improved measurement of national income benefits and costs;

(2) Require separate estimates and displays of nonmonetary benefits and non-monetary costs;

(3) Provide benefit estimates for the major objectives that the decision-makers consider important, such as is being attempted in the experimental Program Overview Project.

I believe that we have been and will continue to move toward these goals and that their attainment will produce significant improvement in the analysis of Government investment programs. In the coming months, the Bureau of the Budget will be continuing its work in cooperation with the Federal agencies and departments to improve benefit estimation.

¹ Parentheses indicate estimates are tenuous. Double parentheses indicate estimates have high potential range of error.

² Contained in revised 1970 budget request as of May 9, 1969.

³ Expenditure level in fiscal year 1973 necessary to fund program on an annual basis under current program levels and policies.

⁴ Includes Federal, State, and local.

⁵ Usually measures enrollees' foregone earnings net of allowances; for on-the-job training measures employers' costs.

⁶ Estimated value of average increase in annual earnings as a result of participating in the program.

⁷ Benefits to net national income is net value of benefits; specifically, (a) discounted value of future earnings increase + (b) value of work performed — (c) economic costs.

⁸ B/C denotes efficiency benefit cost ratio, specifically (a) present discounted value of enrollees' annual wage gain (discounted over 10 years at 10 percent) + (b) value of work performed ÷ (c) social costs, including enrollees' foregone earnings.

⁹ Value of cash or in-kind consumption items per participant while engaged in program.

¹⁰ —3,500 denotes in poverty category; 3,500–10,000 denotes family income between poverty and \$10,000.

¹¹ 500K CC denotes central city of SMSA with 500,000 population or more; 500K Sub denotes corresponding suburbs; other urban denotes all other urban areas; rural denotes all areas with less than 2,500 population.

¹² Index of potential for redirection of program to specified target groups on scale of 1 to 10. Programs with low potential for redirection (formula grant programs) would be rated low, while those with high potential (operated directly by Federal Government) would receive high rating.

A GREAT YOUNG AMERICAN— BORN IN KOREA

Mr. MUNDT. Mr. President, 1 week ago last night, in the Mayflower Hotel of our National Capital, a remarkable awards banquet was held under the auspices of nationally famed Freedoms Foundation of Valley Forge.

Honored for distinguished service to cause and country at this banquet were the following outstanding Americans:

Former Senator Albert W. Hawkes, of New Jersey.

Dr. Frederick Brown Harris, recently retired Chaplain of the Senate.

Adm. Arthur W. Radford.

Adm. Arleigh A. Burke.

Gen. Bruce C. Clarke.

I ask unanimous consent that the program for the awards banquet be printed in the RECORD at this point in my remarks.

There being no objection, the program was ordered to be printed in the RECORD, as follows:

Master of Ceremonies: Howard H. Callaway.

Advancement of Colors: Knights of De-namic, Boy Scouts of America.

Pledge of Allegiance: Geno Meth, Medal of Honor holder.

National Anthem.

Invocation: Rev. Edward Gardiner Latch, Chaplain of the House of Representatives.

Dinner.

Introduction of Special Guests: Dr. Kenneth D. Wells, President, Freedoms Foundation at Valley Forge.

A Choral Salute: The College of William & Mary Choir, Williamsburg, Va., Dr. Carl A. Fehr, Director.

General Washington's Prayer for our Country: Msgr. Patrick J. Ryan, Major General, U.S. Army (Ret.).

General Eisenhower's Inaugural Prayer: Rabbi Harry Silverstone, Past President, Washington Board of Rabbis.

Salute to Dwight David Eisenhower: Honorable Gordon Allott, U.S. Senate.

Introduction of honored guests.

Hon. Albert W. Hawkes—Honorable Karl E. Mundt, U.S. Senate.

Dr. Frederick Brown Harris—Honorable Barry Goldwater, U.S. Senate.

Adm. Arthur W. Radford—John C. Broger, Director, Office of Information for Armed Forces, Department of Defense.

Adm. Arleigh A. Burke—Frank Gard Jameson, Former President, Navy League of the U.S.

Gen. Bruce C. Clarke—1st Lt. Link S. White, U.S.A.R.

Benediction: Rev. Edward L. R. Elson, Chaplain of the Senate.

Retirement of colors.

Headtable flowers courtesy Florists' Transworld Delivery.

THE AMERICAN WAY OF LIFE

To personally understand and maintain the American Way of Life, to honor it by his own exemplary conduct, and to pass it intact to succeeding generations is the responsibility of every true American.

Fundamental belief in God.

Constitutional government designed to serve the people.

Political and economic rights which protect the dignity and freedom of the individual:

- Right to worship God in one's own way.
- Right to free speech and press.
- Right to peaceably assemble.
- Right to petition for redress of grievances.
- Right to privacy in our homes.
- Right of habeas corpus—no excessive bail.
- Right to trial by jury—innocent until proved guilty.

- Right to move about freely at home and abroad.

- Right to own private property.

- Right to free elections and personal secret ballot.

- Right to work in callings and localities of our choice.

- Right to bargain with our employers and employees.

- Right to go into business, compete, make a profit.

- Right to bargain for goods and services in a free market.

- Right to contract about our affairs.

- Right to the service of government as a protector and referee.

- Right to freedom from arbitrary government regulation and control.

Mr. MUNDT. Mr. President, I wish that I had copies of all of the speeches made in tribute to these great living Americans as well as of the significant and inspiring responses made by the honorees. Unfortunately, most of the statements in both instances were extemporaneous in nature and copies are not presently available, although it is to be hoped that under the always competent and careful administration of Dr. Kenneth D. Wells, the distinguished and able president of Freedoms Foundation, a reproduction of these proceedings will eventually be printed in booklet form and be made available to all interested citizens.

I was fortunate, however, to receive from General Clarke a typewritten version of a highly moving and significant tribute which he paid to a most unusual and outstanding young officer in the American Army—a young Korean or-

phan who at the tender age of 10 attached himself to our American forces in Korea. The process by which his association led him to become an American citizen and to work his way up to the rank of first lieutenant in the U.S. Army Reserve is a most inspiring American epic.

I ask unanimous consent that this unusual story as told by General Clarke be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A GREAT YOUNG AMERICAN

(By Gen. Bruce C. Clarke, USA, retired)

When the United Nations Armies recoiled from the Yalu River in the Korean War they brought back with them many thousands of North Koreans who did not again want to live under Communism.

One of them was a ten year old boy who for two years had been the sole support of his family. His name was Chisli (Cheesy). Let's follow Chisli for the next eighteen years.

Chisli obtained work in the X U.S. Corps General's Mess as a handy mess boy. He worked also in the N.C.O. Mess. His pay was food and a place to sleep and such tips as the officers and NCO's gave him—this money he very carefully saved.

I began the X Corps Commander, located in central Korea at Kwandari, in December 1953. I met and took a liking to Chisli. I had a couple of boys at home who were about Chisli's age.

Later I left this assignment and Chisli.

Subsequently I learned that a Sergeant White had brought Chisli home with him, adopted him, sent him to school and then to Muhlenberg College in Allentown, Pennsylvania.

Sergeant White subsequently died. Chisli was broken up. Under his adopted name: Link S. White, he enlisted in the United States Army. He was selected for officer candidate school and graduated with a commission as 2nd Lt., U.S.A. Res. and was sent to Vietnam in 1967.

In February 1968 I was visiting the troops in Vietnam at the request of General Westmoreland. While visiting in the Delta, a smart young 1st Lieutenant came up to me, saluted, and said "Do you remember Chisli?" I cannot adequately describe my reaction at our reunion after fourteen years.

Chisli finished his Army tour with credit and returned to Muhlenberg College, where today (May 1969) he is a Junior. He will graduate in the Class of 1970.

This is the story of a young boy from behind the Bamboo Curtain who by work, determination, and devotion sought and found a better way of life than under Communism. He has served his new country well, both in peace and in war. He is a proud American citizen. He is appreciative of what America has to offer and will continue as a good citizen in his new homeland. We need more of such in our country today.

AN INCIDENT IN CHISLI'S YOUNG LIFE

The Army in Korea was paid in Military Payment Certificates (MPC's) which was paper money. From time to time a new issue was printed in a different color. Then everyone had a few days to convert to the new bills before the old ones became worthless. Korean civilians were not supposed to have MPC's. All of this was for the purpose of reducing the Black Market in Korea.

Chisli received tips in MPC's which he very carefully kept buried in a tin coffee can. One day he came to me with his life savings in his hand, all in old MPC's. They were of the then obsolete color. He had been wiped out. He had not gotten the word of the change. I was distressed. I asked him to give them to

me. The next time I went to the 8th Army Headquarters in Seoul I took them along. Before I left Seoul I had persuaded the 8th Army Finance Section to change the old MPC's for new and Chisli's life time savings were restored.

PROPOSED CONSOLIDATION OF FEDERAL REGIONAL OFFICES

Mr. GORE. Mr. President, the Nixon administration has been widely heralded for its "businesslike" approach to problems. Apologists for the administration would have us believe that the country will no longer be plagued by wasteful and inefficient Government expenditures, that Defense Department cost overruns will be a thing of the past, that mistakes in judgment no longer have relevancy.

I have questioned some of these assumptions with respect to important matters such as the ABM issue. I would like now to raise some questions about a matter which might be adjudged minor by some.

Some 6 or 8 weeks ago, it was announced that a number of regional offices of various departments and agencies would be closed, consolidated, or moved. Among the offices affected was a regional office of the Department of Labor which was to be moved from Nashville, Tenn., to Atlanta, Ga. There had been no indication whatsoever, so far as I knew, that this office had not been operated efficiently, that costs had been excessive, or that its personnel had failed to render proper service to the public. I, therefore, wrote to the Secretary of Labor to ask a few questions concerning the reasons for moving this office.

I ask unanimous consent that a copy of my letter to the Secretary, dated April 2, 1969, be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 2, 1969.

HON. GEORGE P. SHULTZ,
Secretary, Department of Labor,
Washington, D.C.

DEAR MR. SECRETARY: As you know, a regional office of the Department of Labor located at Nashville, Tennessee, has been recently ordered to transfer to Atlanta, Georgia. So far as I am aware, this office has functioned efficiently and economically, and I protest its transfer.

I expect to join with other Senators in an effort to take effective action to prevent the consolidation of all regional federal offices in a few key cities. Government ought to be brought close to the people rather than forcing those who would do business with federal government agencies to go to Washington or to some other distant city.

I would appreciate your furnishing me a report at your earliest convenience to include the following:

1. studies showing the need for moving this office from Nashville to Atlanta;
2. relative costs of operating this office in Nashville and Atlanta;
3. the cost of moving this office from Nashville to Atlanta;
4. disposition of the space now occupied by this office in Nashville; and
5. location of this office in Atlanta together with type of space to be occupied and cost thereof.

Unless it can be shown that sizable savings can be realized by the government by moving

this office, I can see no justification for forcing those citizens and taxpayers who have heretofore had occasion to deal with personnel in this office to go to Atlanta to transact business.

I shall look forward to an early reply to this letter.

Sincerely yours,

ALBERT GORE.

Mr. GORE. Mr. President, the questions I raised were simple ones, and the answers had to be known to whatever official made the decision to move this office—that is, if the decision was really made on rational and businesslike grounds.

Within a few days I received an acknowledgment from an Assistant Secretary advising me that the report I had requested would be sent "as soon as possible." I was a bit disturbed and somewhat shaken in my faith in the businesslike approach to problems purportedly to be taken by the Nixon administration, however, by the statement to the effect that "work is underway" on the report I had requested.

I ask unanimous consent that the letter from Mr. Werts be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR,
Washington, D.C., April 9, 1969.

HON. ALBERT GORE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GORE: This will acknowledge receipt of your letter to Secretary Shultz of April 2, 1969, concerning the relocation of regional offices from Nashville to Atlanta.

Work is underway on the report you asked for and the report will be sent to you as soon as possible.

Sincerely,

LEO R. WERTS,
Assistant Secretary for Administration.

Mr. GORE. Mr. President, not having received anything further by April 25, I again wrote to Secretary Shultz. I pointed out to him that the information I had requested must have been available prior to his reaching a decision to move this office. Frankly, I was getting a bit irritated that some underling was just sitting on the compilation of cost figures and comparative data on which I knew the Secretary, or someone, must have relied in making the decision to move this office to Atlanta.

I ask unanimous consent that my letter of April 25 be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 25, 1969.

HON. GEORGE P. SHULTZ,
The Secretary, Department of Labor,
Washington, D.C.

DEAR MR. SECRETARY: On April 2, I wrote to you concerning the announced removal of the Nashville, Tennessee regional office of the Department of Labor to Atlanta. In that letter I raised certain points which I felt should be clarified.

On April 9, I received a letter from Mr. Leo R. Werts, Assistant Secretary for Administration. This letter stated that work is under way "on the report you asked for." I have not yet received this report. It appears to me that the information I have requested must have been available to you prior to

your making the decision to move this office. I do not see how you could have made the decision to move the office without having this information available.

I would appreciate an early and substantive reply to my letter of April 2.

Sincerely yours,

ALBERT GORE.

Mr. GORE. Mr. President, I still have not received a substantive reply to my letter of April 2.

I am now getting just a little bit suspicious that there is, in fact, no good, businesslike, reason for moving this office. And this suspicion, in turn, carries over into other areas. What about the announced closing of several Job Corps centers? What about changes in procurement practices? What about the ABM?

Does the administration really have good and valid reasons for doing what it is doing? Does it really know why it is proposing what it is proposing? Can it really build an ABM system which will accomplish what it is intended to accomplish for the price which has been quoted?

Of course, on this latter point, the administration is already fudging. The nuclear components were not included in the announced cost of the package. Secretary Packard, despite his flat assurance to the contrary, has begun procurement with funds already voted for another system. Is this partially to hide costs? I know these are ugly questions, and I should not ask them.

Could one of my Republican colleagues help me get an answer from Secretary Shultz about my relatively small problem concerning the move of a Labor Department regional office from Nashville to Atlanta?

DUE PROCESS OF LAW

Mr. HART. Mr. President, to define "due process of law" and make clear its central role in a lawful society has challenged thoughtful writers for centuries. That challenge has never been met more successfully than by William T. Gossett, who honors the profession of law by serving currently the American Bar Association as its president.

It is not from parochial pride, although Mr. Gossett is a valued resident of Michigan, that I ask to have printed in the RECORD the "President's Page," written by Mr. Gossett for the American Bar Association Journal for May; rather, I ask unanimous consent that this brief but compelling article be printed at the conclusion of my remarks so that it may be read and always available to each Member of Congress and, hopefully, to students and leaders across the land.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRESIDENT'S PAGE

(By William T. Gossett)

Several years ago, a distinguished Pennsylvania judge, Curtis Bok, made a simple but profound statement: "In the whole history of law and order, the longest step forward was taken by primitive man, when, as if by common consent, the tribe sat down in a circle and allowed one man to speak at a time. An accused who is shouted down has no rights whatever. Unless people have an instinct for procedure, this conception of basic human rights is a waste of effort, and when-

ever we see a negation of those rights it can be traced to a lack, an inadequacy, or a violation of procedure."

We of the legal profession long ago developed a term that epitomizes the ancient custom of allowing one person to speak at a time, of allowing the accused to speak without being shouted down. We call it "due process of law". Due process represents procedural decency and fairness. It came down to us from Magna Charta, through the common law, and it is embedded in our Constitution.

In the language of the Supreme Court: "[Due process] is the primary and indispensable foundation of individual freedom. It is the basic and essential term in the social compact which defines the rights of the individual and delimits the powers which the state may exercise."

There are many areas of life today that demand a sharpened sense of due process from us. Equal access to the law is one. A person without legal advice because he cannot afford it is deprived of due process by that fact alone. Unpopular people and those serving unpopular causes can be and often are deprived of due process by that fact alone. An accused who is detained in ignorance of his rights, or denied a prompt and fair hearing, or subjected to public and extrajudicial abuse and denigration by a public prosecutor while awaiting trial may be deprived of due process by that fact alone.

The essential ingredient of the truly lawful society—equal access to and equal protection of the law for all men—is not theoretical but wholly practical. This means simply that neither poverty nor ignorance nor unpopularity nor bias nor even clear evidence of guilt shall deprive anyone of due process, of the right to be heard and of the right to counsel.

People in positions of authority, especially, must be sensitive to and well instructed in the right of every individual to due process. Public administrators, government agencies, public prosecutors and police officers should understand the doctrine and respect it as the very cornerstone of our society, without which all the rest of our legal structure would come crashing down. And it should be a constant part of our professional mission to remind our fellow citizens that however emotional the atmosphere and however provocative the occasion, not only the accused person but also all society suffers if we yield to the temptation to take short cuts in affording individual rights.

If lawyers are crusaders at all, as they must be, they are first and foremost crusaders for due process. If lawyers are public teachers, as they must be, they have a continuing responsibility to enlighten the public about the necessity and utility of decency and fairness in the law's attitude and in the conduct of public officials toward the individual and his fundamental rights.

Indeed, the lawyer's continuing obligation to defend and support due process goes beyond his professional functions and his duty as an officer of the court. It reaches to the very core of his character and of his convictions. Even if every other individual and institution in our society should forget or subvert due process, the lawyer—alone if necessary, defiant if challenged, resolute if discouraged—should never yield on the right of any man to the benefits of due process.

If we are to promote trust in the lawful society as the straightest and broadest avenue to a better society, we must be skillful in employing to that end all the machinery of the law—from its application by the city policeman to its codification of economic morality. Let us remember that in the first place laws were instituted among men intent on a lawful society for the common good of all men—not just the most, not just the strongest and not just the uncomplaining.

If the long processes of history, a society based upon due process of law has been the

perpetual vision of men of good will. Through all the trials and conflicts of history a just society has done most to illumine that vision. Let us in our time—when the challenge is hardest and the stress greatest—bring it to fuller realization.

CONFIDENTIAL FILES—WHAT THEY KNOW ABOUT YOU

Mr. PROXMIRE. Mr. President, recently the National Broadcasting Co., aired a comprehensive radio report on the growing problem of confidential files on individuals and the protection of the individual's right to privacy. One aspect of the privacy problem is exemplified by credit bureaus and credit reporting agencies. Not many Americans realize that the credit bureaus of our country contain files on 110 million Americans and that last year they issued 97 million credit reports.

One firm alone, the Retail Credit Co., based in Atlanta, Ga., has 1,800 offices throughout the country and maintains files on 45 million people.

Mr. President, on Monday, May 19, my Subcommittee on Financial Institutions of the Senate Banking and Currency Committee will begin 1 week of hearings on the Fair Credit Reporting Act which is intended to protect consumers against arbitrary or inaccurate credit information. Thus, the excellent report by NBC radio is extremely timely. I ask unanimous consent that the transcript from the program be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

SECOND SUNDAY: CONFIDENTIAL FILES—WHAT THEY KNOW ABOUT YOU

(Radio report by National Broadcasting Co.)
(Noises.)

MAN. How many people do you have information on?

MAN. In our Los Angeles data bank we have credit information on approximately thirteen million individuals. And we also have information on a like number in our New York data center, which will be increased by about two million credit histories when our Detroit operation goes onstream next month. The Detroit area will be served by a satellite computer in Detroit which will access the data stored in New York. We expect that in the next five years we will approximately double the number of individuals whose records appear in our data banks.

(Music.)
ANNOUNCER. This is Second Sunday, the NBC award-winning series of radio documentaries concerned with the problems of these difficult times. Tonight, Second Sunday takes a look at what computers know about you, the remarkable story of where you are on file. Here now with "Confidential Files—What They Know About You" is Edwin Newman.

EDWIN NEWMAN. Good evening. Most of us are vaguely aware that someone somewhere has information on file about us. It is no surprise that much is known by such information-hungry federal agencies as the Internal Revenue Service, Social Security, and the Census Bureau. Many of us also may be found in the files of the FBI or state or local police agencies. Several million Americans might be startled to discover, if they could, that much information about them is in the files of the super-secret Central Intelligence Agency. Military records concerning millions upon millions of Americans are kept at the Pentagon and by the Veterans Administration.

What is perhaps slightly more startling than our personal statistics with government agencies is the voluminous information on file in a non-governmental institutions. If we have ever applied for a bank loan or bought an automobile on time or obtained a credit card or charged a dress or a shirt at a department store, personal data records, sometimes in almost shocking detail, are available about us with credit agencies, those purveyors of information who tell businessmen about the credit rating of their customers. Life insurance companies and automobile insurance companies also have a great deal of information about us. So, too, do our employers, past and present.

To paraphrase a fine Churchillian observation, "Never in human history have so many known so much about the citizenry of an entire nation." Now in the light of this, there are certain questions which must be asked. How accurate are these voluminous files? Who has access to them? What use is made of them? If we accept that government files are reasonably well-maintained and with some safeguards, how about the tremendous knowledge that is available through credit agencies? What makes this moment for questioning even more pertinent is the awesome, ubiquitous, almost frightening symbol of tomorrow, the computer.

For files are no longer kept on a card in a drawer. Now files are magnetic symbols, and the primitive era when a clerk had to spend hours looking up information on you or me has disappeared. Today every bit of information about us in the memory bank of a credit agency computer can be retrieved in a second or two. It can be made available almost instantly to other computers located anywhere in the nation. And the data information age is barely beginning.

We opened our search into the proliferation of information files in Washington. Peter Hackes of NBC News asked Senator William Proxmire, who has long been concerned with credit agency operations, how big a problem they pose.

Senator WILLIAM PROXMIRE. We're talking about a problem that affects one hundred and ten million Americans. That means it affects the overwhelming majority of adults in this country. There's one firm that has forty-five million people in its files. That is, it has credit reports on forty-five million people. There's another firm that's adding fifty thousand people a day, so they say if you haven't heard of these firms, chances are that these firms have heard of you. It's very, very widespread, and I think on the basis of everything we've seen and heard that the abuses in this field are widespread too.

PETER HACKES. Now, what are some of the abuses that have come to your attention?

PROXMIRE. There are a number of problems that are involved here. In the first place, the information the credit bureau has may not be accurate. In a number of cases, we've found that it's not accurate. In other cases, it's not relevant, and it's the kind of information that can be very harmful to a person's reputation and to his prospects, not only of getting credit, or getting insurance, but actually holding onto his job. And, in the third place, that information is not kept confidential, at least as much as it should be.

HACKES. Well, Senator, what's the answer to this whole problem? Do you abolish the credit reference bureaus?

PROXMIRE. Oh, absolutely not. I think that these credit bureaus are performing an essential purpose, really important purpose. I think we have to recognize what's happened to this country in the last few years. In 1946 all consumer credit was only five billion dollars. Today it's one hundred and ten billion dollars—22 times bigger in 23 years. Now, consumer credit relies on the credit worthiness of the people who get the credit. So their credit worthiness has to be checked out and should be. Some of these firms—in fact, I'd say most of them are doing

a fine job. They're doing the kind of things that we think should be done. We don't think they should be abolished. We think that they should be reinforced, but we think that there are certain acts which the government should require them to take which would protect the consumer without adversely affecting them.

Number one, we feel very strongly that a person should be notified in the event adverse information is being put into his or her credit file so that he or she could come down and have a chance to make the correction. I think that this is a very, very important improvement, and without that kind of improvement it seems to me it would be very hard to get at what is really the heart of this kind of difficulty. Then, in addition to that, we feel that the irrelevant information—information that has nothing to do with credit worthiness—it doesn't matter what a person's morals, whether they drink. What does that have to do with whether they should have credit? If they have had a good credit record, if they have a steady job and so forth, this is the kind of information that's pertinent. So it ought to be pertinent. Then, also, the information ought to be provided only for the purpose for which it was derived. If a person applies for credit, and they make a credit investigation, they certainly shouldn't provide it to everybody else. We have one example, for instance, of a Columbia University professor who, in order to determine what he could get, decided he'd ask a credit bureau about a secretary who worked for him.

NEWMAN. Professor Alan Weston, who teaches public law at Columbia University, described that experience himself.

ALAN WESTON. Most people, when they think about the information they give to credit sources, think that it's used only for credit, and the credit industry often has at the bottom of its forms a printed statement, assuming you ever get to see those, which says that this information is collected only for credit purposes and should only be so used. The fact of the matter, though, is that many, many of the local credit bureaus not only give out credit information but they're also employee investigating firms, and they give both services to their clients. And I had an experience myself in which I wanted to test this out. I wrote to the particular credit bureau—it's the Greater New York Credit Bureau—and said that I was considering promoting an employee in a center that I directed—Columbia University—and this would be a responsible job and I'd like to find out more about this individual. There was no credit purpose mentioned whatever. This individual had not said anything. I didn't indicate the employee had consented in any way. In fact, privately, the girl who was participating in the experiment said she had no objection. She gave me the permission to collect the information.

Within a day I received back a full credit report on her and in addition, it was suggested that if I wanted more they'd be glad to do interviews and check upon her and so on. Now, this was offered to me, I'm sure, from what's been said afterwards, as a kind of a—it must have been a good purpose I had in mind, Columbia University wouldn't misuse information, this was obviously an employee of mine, and so on. But the fact was that I had gone to a credit bureau, and I had gotten employee information. I'd gotten it without the person about whom the information was collected having consented and without my having verified the purpose for which I wanted it. And so, realistically, as a professor at Columbia University, I suppose I could have gotten a similar report on any one of the 17,500 students or the 5,000 faculty at that university.

NEWMAN. The information available to credit agencies and what they do with it is

not only a matter of federal concern but has begun to create a sense of disquiet in several states. In Illinois, for example, the state legislature has before it a bill to investigate credit agencies. State Representative Robert Oowler described the measure to Ted Smart of NBC News, Chicago.

ROBERT OWLER. Basically, the Credit Commission Bill which Representative Walker has introduced this session is designed, rather than being a piecemeal attempt to answer some of the problems in the credit reporting area, it's designed to establish a commission to study the area in detail, have some hearings, let both sides testify as to how legislation might better answer some of their problems. The primary impetus for this whole piece of legislation was the Senate hearings by Senator Proxmire and others which interested Representative Walker around the first of the year to the point where, when I was in Washington for the Inauguration, he had me go over in some detail the hearings which they had had.

We're quite interested in making sure that every credit consumer—in other words, virtually everyone in the state—has the right to go into his credit bureau and find out precisely what rumors or what actual facts are being circulated about him and that he has the right to answer charges which are untrue or which do not properly represent the state of his credit. Things such as divorced wives we find occasionally are dunned for the bills of the husband, who has not been married to them for some time. Or people who have had a long, lingering illness in the family find that their credit is impaired without having any explanation furnished to the new creditor at the time when they make an application for credit where, let's say, Sears and Roebuck, for example, might be understanding about a person with a bad credit reputation if they had known the reason for accumulating that bad record in the past and knowing it's just not a peculiarity of the person.

As a personal matter, I have attempted to find out as much as I could about this by allowing a great many of my own personal obligations in the nature of oil company credit card bills to lapse and have attempted to see precisely how they go about collecting these things, whether it's an actual computer operation or whether there are human beings involved in the thing. And for six months now, I have not heard from a human being. I have corresponded with a number of computers about these matters, but I've never yet heard a human being's voice with regard to any bill I owed.

Now, I could see how the average person would become very confused and very disillusioned with the possibility of setting straight an error regarding his credit if the thing is as computerized as it purports to be.
(Music.)

NEWMAN. Since personal credit files are now embedded in the blinking electronic brain of computers, Dean Mell of NBC News, New York, travelled to Cherry Hill, New Jersey, and talked with A. D. Beard, the chief engineer of the RCA computer division about what computers can do with information.

DEAN MELL. Mr. Beard what kinds of information on people can be computerized?

A. D. BEARD. I would say that any kind of information which you can put down on paper or with a typewriter into someone's file folder, for instance, certainly can be put into a computer system.

MELL. Does it have to be information that has a yes-no, either-or sort of alternative? Can it deal with subtleties and information or subtleties in character?

BEARD. It can deal with anything which can be expressed in the English language, for instance, and reduced to writing.

MELL. Mr. Beard, can computers talk to other computers?

BEARD. In a sense, they can. They can transfer information from one computer to another. They can transfer the records of say an individual that's stored in one computer system's memory banks to another computer system's memory banks. A very common type of compatibility which exists today is in the form of how data is stored on magnetic tapes. Many systems today can exchange the magnetic tape records from one computer system to another.

MELL. Mr. Beard, where are we going with this whole system of taking scraps of information about people—the information that can be gleaned from a credit card application? There is information in there that describes an individual—his tastes, his likes, his dislikes, his socio-economic bracket. Are we getting to a point where all of this information can somehow be collated so that if I wanted to know about John Doe from the time he was born to the time he dies, all I'd have to do is punch a button.

BEARD. Well, that is conceptually possible with the computer hardware that exists today, but whether or not it would be economically practical for someone to put together all of the data that is required—because it will take manual preparation, the data—putting it into the system, requiring computer hours, which cost money, and it's very difficult for me to visualize any industry or even the government wanting to go through such an enormous task for whatever end purpose there might be in mind. So what you say is, it is possible, but I consider it to be a very improbable sort of situation.

NEWMAN. On the eighth floor of 30 Rockefeller Plaza, in a room which looks as though it belongs to the 21st century, Leonard Probst of NBC News looked into the question of what computer operators themselves have been told about legal restrictions, if any exist, on the use of computers in the information field. As a giant RCA Spectra 70 hummed away, solving problems for clients from Florida to Washington, Probst spoke with James Tucker.

LEONARD PROBST. Mr. Tucker, are there any legal restrictions as to what you can program into a computer or the information it will give out?

JAMES TUCKER. No. It can print anything, it can calculate anything, it can keep records of anything. So computers of themselves are machines that have no morality; they're amoral.

PROBST. How about the people who run the computers? Are they restricted in any legal way?

TUCKER. Well, there is no restriction at all.
(Music.)

NEWMAN. Two of the giant credit agencies in the nation are Credit Data Corporation and the Retail Credit Company. In San Francisco, Robert Lazich of NBC News spoke about credit information with Dr. H. C. Jordan, head of Credit Data.

ROBERT LAZICH. Could you describe for us the mechanics of Credit Data Corporation?

H. C. JORDAN. Well, Credit Data Corporation operates a pooled bank of credit information for the exclusive use of credit granters who supply the information to it. This information consists of factual data on the credit performance of individuals supplemented by public record information. A condition of subscribership to our service is that the subscriber company who must be a credit granter, must supply to us evidence of performance of individuals who obtain credit from that subscriber. It is the pooling of this data from many subscribers supplemented with reports of ongoing performance to keep the data current and of course with public record information that constitutes our total data bank.

LAZICH. When you say a data bank, what do you do with the information to store it?

JORDAN. The information which we have is stored in computers. We have two principal centers, one in New York and the other one in the Los Angeles area. In each of these centers we have two IBM computers, which serve as backup to each other in the case of mechanical failure. And rather large banks of random access storage equipment so that the record on a given individual can be retrieved in the order of a second or two.

LAZICH. Is there any protection for an individual if you have incorrect information on that person?

JORDAN. Well, in any information gathering and storage system, there will be errors. We encourage our subscribers where it appears to them that there is an erroneous data item or where a customer of theirs suspects that there is an erroneous data item, to send the individual directly to us so that we can first establish his identity and know that he is not an imposter and then review with him his credit history. We will, of course, correct any errors which are discovered at no expense to him. To put the error problem in context, the average individual who appears in one of our data banks has a probability on the order of one chance in a thousand of a correctable error occurring in his file during his credit lifetime.

LAZICH. How many people do you have information on?

JORDAN. In our Los Angeles data bank we have credit information on approximately thirteen million individuals. And we also have information on a like number in our New York data center, which will be increased by about two million credit histories when our Detroit operation goes onstream next month.

LAZICH. Is there any attempt by the government to get access to your files, for whatever reason they might want?

JORDAN. We have taken the position that the data in our files is for credit granting purposes only and should not be available to law-enforcement agencies except in cases involving national security. We of course would be obliged to release data after due process. As an example of this, many times in the course of the last few years the Internal Revenue Service has attempted to obtain data from our files which they commonly do from other sources as a part of investigation of taxpayers. We have consistently refused and thus far the courts have not forced us to honor any IRS subpoenas. If the IRS and other law-enforcement agencies were to be given unlimited access to our information, we think the implications for personal privacy are self-evident.

NEWMAN. Perhaps the most revealing of Mr. Jordan's remarks was his cryptic comment that personal records are made available to agencies involved with national security. We might ask, "What agencies?" "Who authorizes the search?" "What use is made of it?" Big Brother sounds suspiciously close.
(Music.)

NEWMAN. In Atlanta, Jack Scott of station WSB discussed some of these sensitive problems of retail credit agencies with W. Lee Birch, president of the Retail Credit Company.

JACK SCOTT. This whole area of information gathering from the Census Bureau to credit-investigating organizations such as yours are currently under fire for being a bit too snoopy now. What's your position in this whole question?

W. LEE BIRCH. Well, obviously, the business intelligence system is a rather extensive thing, but it's a very vital thing in the support of our economy.

SCOTT. What kind of information does Retail Credit have in its files?

BIRCH. Fundamentally, we provide the information that's needed for a particular transaction. For example, if a man wants to buy a new house, we furnish the information

that's necessary as to his employment and his income and whether or not he has the general reputation of paying his bills satisfactorily. On the other hand, if he is insuring his house, we just generally provide the type of house that it is, whether it's in good repair, whether it's convenient to fire protection, and this kind of thing.

SCOTT. Now, what kind of companies subscribe to your service?

BIRCH. Fundamentally, we have the credit granters, the people who approve mortgages, the people who approve life insurance transactions or fire insurance transactions or automobile insurance transactions. Or, in the case of employment personnel departments or personnel interviewers.

SCOTT. Do large employers come to your company and ask for a very thorough investigation of potential top employees that they're looking at?

BIRCH. We have some such requests. This is quite frequently done in connection with the employment process of key people.

SCOTT. Do you feel the criticism of your general industry is fair or unfair?

BIRCH. I do not feel that generally there is a reason to criticize the business information process. Now, I must admit that with advancing technology and the computer, people in the business investigation field must conduct themselves with great integrity and that they should be sensitive to the matter of privacy.

(Music.)

ANNOUNCER. We will return to Second Sunday's "Confidential Files—What They Know About You" after a ten-second pause for station identification.

Again, Second Sunday. Here is Edwin Newman.

NEWMAN. The very thought of what gleaming electronic computers can do has enormously excited those who deal with information. Among other suggestions advanced has been a national data bank run by the federal government. James Robinson, NBC News, talked about this with Representative Cornelius Gallagher of New Jersey who is very much against such an information center.

CORNELIUS GALLAGHER. The National Data Bank is sort of the big daddy of all the computer thinking. It is a plan to consolidate all of the records that exist on every single individual American and put all of these records into one giant computer network. This would include Social Security records, your tax records, your military records, your school records—any record that now presently exists or would exist would be consolidated and centralized. The reason for this was that, since these records presently exist, that they should be consolidated in the interests of economy and efficiency.

The very dangerous part of it, however, is that the network, as it was originally conceived, could be converted into a national espionage network where you would have a dossier instantaneously retrievable at the fingertips of anybody who would have access to the National Data Bank. My objection was to this. I believe that what we should be doing is protecting human values.

JAMES ROBINSON. But how can you protect it with modern industry, a computerized industry where, for instance, one department store, if you come there for credit, can connect itself into a computer and find out various aspects of your financial holdings and your dealings and your home life, all within two minutes. Are there any checks and balances? Are there any laws going into effect to protect myself as an individual?

GALLAGHER. Well, that's what our whole campaign is about. Our credit hearings brought out the fact that there are, I think it was 148 million American names in the dossiers of the credit bureaus. Strangely enough, there are all kinds of laws protecting dogs and horses, but there are no laws at all,

no federal laws at all, protecting reputations of people within the credit industry.

ROBINSON. These people who operate the computing machine—what's to stop them from getting this information on the quiet, by themselves, and bootlegging information and blackmail?

GALLAGHER. I'm sure that a great deal of that is being done now within industry. This is the danger of people using the new technologies without knowing the dangers of these technologies. To computer professionals there's a slogan, "Garbage in, garbage out." Whatever you put into the computer, you're going to get the same thing out of it. I have respect for these professionals. The thing that troubles me is how to disabuse non-professionals of the notion that really means, "If it's garbage in, it's gospel when it comes out." This is the real danger of the non-professionals who see their particular purpose being better-served by computers.

NEWMAN. Senator Sam J. Ervin, Jr. of North Carolina has long been disturbed by computerized information available on federal employees. He explained his concern to Peter Hackes.

SENATOR SAM ERVIN. The principal danger is that they may put in a computer rumor or hearsay which is derogatory to the federal employee and which stays in the computer and at some subsequent time, that he will lose a promotion, or he may be even denied employment in a security agency because of that derogatory information. I think it's a great injustice to store up information in a computer that's derogatory to a man when he has no chance to know that it's there, no chance to refute it, or no chance to explain it.

HACKES. How does that information get into the computer in the first place?

ERVIN. Well, it's put in there by those who collect personnel records of federal employees, which I would say would embrace most every agency of government.

HACKES. And the information, I suppose, is from numerous sources which either may or may not be accurate.

ERVIN. Absolutely. And another danger to a federal employee is there may not be sufficient rules for access to the information stored in the computer and that people who are not authorized to get it might get it. I think it's highly important not only are pains to be taken to make it accurate, but also to make it impossible for those who really have no right of access to it to get access to it.

HACKES. Have you run across any examples of people who may in fact have been victimized in this area by others getting unauthorized information about them?

ERVIN. Well, I don't know of any particular instance where it involved the use of computers, but in our studies, which resulted in the civil rights for federal employees, we found on many occasions that personnel officers had obtained entirely inaccurate information from persons who go into federal employment, and those people suffer grave consequences. In some cases they were denied promotions. In other cases they were denied access to information which they otherwise would have been trusted with.

HACKES. Is there any recourse that a federal employee has in a situation like this?

ERVIN. None whatever that I know of. In other words, he may go through the rest of the years of his federal employment denied promotion without ever knowing what the cause of the denial of the promotion is.

NEWMAN. Richard Scammon, director of the Election Research Center in Washington, formerly headed the United States Census Bureau. To Scammon, the possibility of computerized files being misused, especially by the government, seems remote, almost innocently so.

He made his position clear to James Robinson in Washington.

RICHARD SCAMMON. Do you remember, some years ago, there was this great revolt against the use of a full-numbering telephone system and there's always been the business about let's mutilate all the cards we can find on which we get our monthly bills from department stores and utilities and so on. I'm sure there's this apprehension. I don't really think it's well-founded and the reason I say that is a totalitarian regime doesn't really need the data. You take one like Trujillo in the Dominican Republic. I'm sure he never even had an IBM card and he never had a computer of any significance. And yet, that didn't keep him from running his country with an iron fist for many, many years. And other countries that have very scientific and advanced systems aren't totalitarian. The idea that you sort of equate a great amount of data in the computers with totalitarianism is just wrong, although I know that there are many people who fear that somehow the computers are going to run our lives, you know. They're going to come lurching down off their pedestal and come hunting us through the corridors of time and this sort of thing. It just isn't so, because basically this is a matter of people. If people want to misuse the data, they can. But the computers don't misuse the data.

ROBINSON. Yes, but we as a people are very individualistic, and it just happened, I would guess, this last decade or so that all this tremendous amount of information on our—what I consider our private life has been collected, not only by credit bureaus but also, I suppose, if you're looking for a government job, various government intelligence agencies will go through your personal file and your background and all that. And the fact is, all of this information on your private life and on your public life is collected, and various agencies around this country. . . .

SCAMMON. Well, much of it, of course. . . .

ROBINSON. . . . and that data is there.

SCAMMON. Well, much of it, as you say, is collected particularly by private people. Credit bureaus, for example, check on your credit rating before they give you credit. Now, of course, there's an easy way to beat that. If you don't want the credit, you aren't checked on by a credit bureau. It's when you ask for something often that these things develop. You ask for a government job, and so they check you out. Just as a taxpayer, I must say that I'm happy they do check out people who are applying for jobs with the intelligence agencies. I'd be a little suspect if they didn't check them out. As far as the government itself is concerned, though, the collection of this kind of data—I suppose much of it is done through the census, but then that's all confidential, so they can't get at that. I don't know that the government collects as much of this as we sometimes think.

NEWMAN. Obviously, all information stored in the inexhaustible memory banks of computers is not dangerous. For example, Aspen Systems Corporation in Pittsburgh is proving a boon to the legal profession with its computer information. I talked with John Harty, president of Aspen Systems, about his company and asked him:

You claim that your company has the largest body of full-text information ever stored in a computer. What have you got?

JOHN HARTY. Well, what we have in the computer at present are the statutes of all the fifty states—the complete statutes and the text of them, so that they can be searched upon request.

NEWMAN. What's the advantage of your having them, since presumably you had to get them in the first place, they must have existed somewhere?

HARTY. Well, they exist in published books—over five hundred volumes of published books—and are only available for research by means of the indexes to these books. What we have done is to use the computer

for what it does best, and that is to take very large groups of materials, text, and make it searchable all at once within a very short period of time and for questions which previously just couldn't be asked.

NEWMAN. Well, how fast could you get me something that I wanted?

HORTY. Well, let's assume that a committee of Congress was looking into the question of consumer protection and the laws that the states have enacted in the last few years dealing with consumer protection. You could run a search, frame it and run it on the computer in about eight hours and have all of the laws in every state that deal with a broad subject of this sort.

NEWMAN. What do you mean by framing a search, Mr. Horty?

HORTY. Well, this is the method by which the person wants the information thinks of words and phrases occurring in the statutes that will produce for him those statutes he'd like to look at, and he can do this. It doesn't take a computer expert at all. We've already trained over a thousand lawyers to search in this way.

NEWMAN. Are the federal statutes brought together in this way anywhere?

HORTY. Yes. We have the United States code available for searching. You might be interested to know it's about the size of Pennsylvania. No larger. About the same size as the statutes . . .

NEWMAN. As the state of Pennsylvania?

HORTY. No; as the statutes of Pennsylvania. NEWMAN. Some technicians foresee the day when all medical information about every citizen will be stored in a computer system, thus enabling a doctor at the flick of a button to get your complete medical history in event of an emergency.

(Music.)

NEWMAN. There is a disturbing side to the idea that each of us today is readily accessible to almost anyone who wants to find out about us through computerized information. I talked with Professor Weston about this growing problem.

WESTON. You have to start off by saying that we've come to the end of an era, an older period when people had face-to-face relations with one another, grew up in the same town, knew people to make judgments about them or when the kind of experiences people had in going to college or not going to college or getting a high school course in something pretty much gave people the ability to know a lot and conclude a lot about them. Today we have such a national society, people are so much like one another in so many characteristics, mobility patterns are so high and the credentials of education really mean less and less because everybody mostly goes to high school and so many people go to college. So I think the reason why so much information is being collected, one reason for it is that we've become a kind of credential society. We think we have to build up far more information about people in order to know whether we should promote them or prefer them or give them benefits of the society, give them welfare, et cetera. And our theory—and here's where the social scientist, I think, plays an interesting role—we've come to believe that the more personal the data, the more it fits certain categories about education and sexual adjustment and other social science-like categories. Here's where the social scientist in some ways has augmented the desires of the personnel manager or the government security clearance man and convinced a lot of the people who collect the information that by and large collect lots of information and collect a lot of very personal information that otherwise you can't make good judgments.

NEWMAN. In other words, collecting information is a good thing in itself.

WESTON. Yes. One of the things that intrigues me is how we're building up a national network of people whose essential

psychological outlook is that they're information collectors, and this leads to what Congressman Gallagher has called the information buddy system, because everybody who depends on getting information for his purposes knows that he has to share it with the other people who collect the information. Whenever any organization gets a computer, the first major impact is that it doubles or triples the amount of information it collects about its people, whether it's the student or the client or the regulated group, because there's that big, gorgeous machine which can be filled up with forty entries or a hundred and forty entries, whereas once it was so costly to put in twenty entries that the organization really couldn't think of it. So that corporations, for example, their personnel people start collecting not simply the record information they used to about an employee, but they ask him about his hobbies and where he spends his vacation, and what foreign languages he speaks, all trying to be helpful, all hoping that they can use this for better relations. But collecting far more personal information than they used to.

NEWMAN. Have you come to any conclusion, Professor Weston, about whether that is useful to those companies or do they simply handcuff themselves with all of that stuff?

WESTON. Well, I think you have to approach that—at least, I do, at two levels. One, it depends very much on whether the individual who gives that information trusts the authority and believes at heart that he's not going to be hurt. If he does trust the authority then very often extra information can be useful. But the larger phenomenon is that we live in an age in which more and more people are resisting the authorities that control their lives, whether they're universities or local governmental institutions, we're—people are trying to feel more autonomy, and privacy is a very important aspect of autonomy.

NEWMAN. The American Civil Liberties Union is concerned, and this concern was voiced by the ACLU's executive director, Jack Pemberton.

JACK PEMBERTON. We're deeply concerned about the problems of data accumulation in government and in private organizations and find this a uniquely puzzling problem, because it's hard to look into the future and foresee the policy lines that ought to be drawn.

NEWMAN. What kinds of safeguards have you recommended so far?

PEMBERTON. One is purely privacy. Are there things about yourself or myself that we ought to be totally privileged to keep to ourselves unless we elect to tell somebody else, including our government, about those things? For example, in the taking of the census. That issue hasn't been resolved. The Congress has made no flat decision that there are questions that the census taker can't ask.

Then there are questions of security. You give out information about yourself for, let's say, credit purposes, maybe to a government agency, because you're going to get a federally-guaranteed loan. It's proper that those who are going to use that credit information for determining whether you're eligible for a loan should have access to it. But are there adequate protections against anybody else having access to it? And having access to it—perhaps misusing the information and gaining a source of power over you.

And then, third, there's a question of plain fairness. Our government does collect information from and about you willy-nilly. You file income tax returns, there is census data, there's birth and death data and marriage and health data, public education data, and so forth and so on ad infinitum. If this

data is incorrectly collected, it may be used to your detriment.

NEWMAN. Mr. Pemberton, this is not in the Constitution of the United States, but there does exist a concept—privacy—which is less and less regarded as a right, I think. Is that disappearing from American life?

PEMBERTON. Well, at the same time that the size and complexity of our society seems to be impinging upon our privacy, the courts are making some strides in giving it more formal recognition. Four years ago, now, the Supreme Court in the *Griswold* case found explicit Constitutional sanction in a combination of fourth, fifth, and other amendments in the Bill of Rights provisions for a Constitutional right of privacy. And I think the legal concept will develop, because the complexity of society is creating the need for these legal concepts.

One of the most interesting aspects of the invasions of privacy involved in data gathering by more efficient mechanical or electronic means is the extent to which this information is available today but in widely separated and hard to put together sources.

NEWMAN. You can't see a time coming when people are going to sweep in anger into computer centers and smash 'em up, can you?

PEMBERTON. I could well conceive of expressing the kinds of frustrations that are otherwise being expressed on college campuses today with that kind of action unless we take steps now to anticipate the problems.

NEWMAN. With unobtrusive speed, computerized personal files are suddenly an integral factor in American life. This complex problem has been studied by Congress before. It will be taken up again by Senator Proxmire's subcommittee on financial institutions next week.

PROXMIRE. We have a number of people co-sponsoring the bill, a number of other Senators have indicated that they will support it. However, I'm not being fooled by how difficult it is going to be to get this through the committee and to the Senate and the House. And I say that because the opposition, as always in these cases, is organized, well-financed, highly articulate. They'll have witnesses appearing before our committee who'll be extremely well-briefed, and the support for the bill from the consumers is diffuse, is not organized, and is going to be much harder to rally. I'm sure that members of Congress are going to get letters from credit bureau people on an organized basis, and I think the only way we can get this bill through is if we can get consumers who are concerned about this to write to their Senators and to write to their Congressmen, saying they want a fair credit-reporting bill and we ought to have it. That's the kind of an action that I think is going to be effective, and that's what we have to have if this bill is going to pass.

HACKES. Do you think this affects enough people around the country that perhaps the average listener, for example, to this program this evening, who hasn't had any trouble with this over twenty, thirty years might in fact run into it next week?

PROXMIRE. I think so, and I think he can write his Congressman, write his Senator. If they write me, that's wonderful, but it's even better if they write their own Congressman and Senator. Because he's likely to run into it next week. He's likely to run into it not only in getting credit. It could conceivably, and it has in many, many cases, thousands of cases, affected people holding on to their own jobs or getting another job. So it could affect them in many ways that could be extremely serious. And of course, in all these cases, people are reluctant to tell you why. This bill would require that you be told why, that you know. It would also enable you, of course, to do something about it. And this is the terribly difficult and frustrating and cruel effect, that this kind of an automated system we

have in this country, the computer system, can have on literally millions of people. And as you say so well, the man or the woman who is listening to this program and saying, "Well, I haven't any trouble with this"—don't kid yourself. You could have trouble, and plenty of trouble tomorrow or next week or next month.

(Music.)

NEWMAN. Tonight we've touched only fleetingly on one of the more dubious gifts of the computer era. It is apparent that personal privacy, like clean water and clean air, have become polluted by man's genius for disregarding his fellow man. We are, of course, engaged in a struggle to protect our physical environment from total pollution. It appears that we must also become involved in a struggle to protect our personal environment, to re-assert our right to keep part of ourselves, some of you and some of me, forever private unto ourselves. This is Edwin Newman.

(Music.)

ANNOUNCER. You have been listening to Second Sunday. "Confidential Files—What They Know About You". Second Sunday was written and produced by Herbert Gordon, directed by Albert Reiss. The tape engineer was Mort Nelson. Research assistant—Susan Parrots. Second Sunday is produced under the direction and control of NBC News. This is Harry Fleetwood.

FINANCIAL DISCLOSURE OF SENATOR JOSEPH D. TYDINGS

Mr. TYDINGS. Mr. President, the endurance of our democratic system of government directly depends upon public confidence in its integrity and in the impartiality of its officers and employees. The maintenance of this public confidence is one of our highest obligations.

Since my election to the Senate, I have supported, as a key element in fulfilling this obligation, the principle of public disclosure by Government officials of their financial interests. Such disclosure is the best protection against both actual conflicts of interest and public suspicion of partiality for private gain in the writing, execution, and judicial interpretation of the laws.

I have, therefore, in the 90th Congress, and again in the present Congress, co-sponsored the Case bill, S. 1993, to require full public disclosure by Members of the Congress, and I have voted for similar strong provisions proposed in the Senate.

Believing that disclosure should apply to the judiciary, as well as to the legislative and executive branches, I introduced in 1968 the Judicial Reform Act, which was developed through intensive study begun in 1965 by the Subcommittee on Improvements in Judicial Machinery of which I am chairman.

This bill, which I have reintroduced again this year, includes provisions requiring each Federal judge and justice to file an annual financial statement disclosing the amount and source of his income, including gifts and honoraria, and also to disclose his other financial holdings and interests.

Despite our efforts last year to enact strong disclosure rules for members of the Congress, adequate, public financial disclosure still is not required of Senators or Representatives.

I, therefore, have made the personal

decision to make voluntary disclosure to the Senate and to the public.

I ask unanimous consent that my statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FINANCIAL DISCLOSURE OF JOSEPH D. TYDINGS

ASSETS

This does not include: Equity in Federal Retirement Fund; Livestock and Farm Machinery.

My life insurance has no cash value.

Cash in banks (other than checking accounts)..... \$14,200

Real estate

Home in Havre de Grace.....
Interest in Elkton office building.....
Interest in Havre de Grace & Aberdeen commercial property.....
Interest in Tregaron, Washington, D.C.
Interest in rental apartments in Florida

Total value of real estate... 637,420

Stocks

Rowe Price New Horizons Fund, Inc.

LIABILITIES

Debts due on mortgages, collateral and personal notes..... \$84,000
Net worth—computed to April 30, 1969 (does not include any personal property) 2,581,520

I am "of counsel" for the Baltimore law firm of (Millard) Tydings and (Morris) Rosenberg. I receive no compensation from this firm.

I own the Northern Maryland Title Agency—an agency I organized in 1957 to search titles in Harford and Cecil Counties. In 1968, I received income from this company totaling \$4,812.03.

I am one-eighth residuary beneficiary of two trusts of my grandfather, the late Joseph

E. Davies. The total value of the trusts amounts to approximately \$1,840,000.00.

I received in 1968 honoraria for lectures, speeches and writings totalling \$5,615. The entire amount of such honoraria, except that donated to Towson State College, was spent on expenses of running my Senate office, such as costs of newsletter paper and office supplies. I accepted no honoraria as personal income and I do not accept honoraria from Maryland groups.

A TIME TO STAND UNITED

Mr. HANSEN. Mr. President, Mr. Nixon reported to the people of the United States this week the position of the Nation in regard to Vietnam and Southeast Asia. The President's message was to the people of the world as well.

He made it clear to the world that this Nation's goal in Vietnam is to achieve a just peace and to prevent a massacre of the South Vietnamese people by the Communists.

At the same time, he made it clear that the United States is not a paper tiger, as the Communists claim, but a great and responsible Nation that will stand by its commitments and will not desert its allies.

In my opinion, he spoke from the confidence that can be attained only through knowing that Americans throughout the land stand united behind their President and with our valiant men of the Army, the Navy, the Air Force, and the Marines.

President Nixon described the realistic proposals this Nation has made to the enemies of the north. And the proposals are reasonable. It is difficult to imagine that the Communists would reject this proposal. For the Communists to reject this fair proposal is for them to admit to the world that they have not the slightest interest in peace or stopping the bloodshed.

The program outlined by the President is generous. Many will feel it is too generous.

Yet President Nixon has made it plain that this Nation's interest in peace is such that we are willing to consider other proposals.

But the killing and the maiming must cease, and our President has given the following firm warning:

No greater mistake could be made than to confuse flexibility with weakness or being reasonable with lack of resolution. I must make clear, in all candor, that if the needless suffering continues, this will affect other decisions. Nobody has anything to gain by delay.

No American should give the Communists any reason at this time to take that warning lightly.

The greatest encouragement to the Communists to pursue the war that they have lost decisively on the battlefield has been the turmoil in our streets. The ag-

gressor nations do not tolerate demonstrations of any sort—either violent or peaceful. Demonstrations are possible in those countries only when outright rebellion exists. They do not understand the freedoms allowed in our Republic. They think when such demonstrations take place in our country that the Government of the United States is near toppling. We know this is not the case, and all Americans realize this is not the case. But those living under the yoke of communism do not, cannot, and will not understand this fact.

This is a time for all Americans to stand united with the President and with our young men who are facing, and defeating, the enemy on the battlefields of Vietnam.

The proposals outlined by President Nixon are the least expensive course for the enemy to take toward an end to the bloodshed.

There is another way to end this war, and should the enemy force the United States to take that course, they will find it costly; they will find it disastrous.

All of us hope the end of this long and tragic conflict is—at last—in sight.

GREEN THUMB IN NEW JERSEY AND ELSEWHERE

Mr. WILLIAMS of New Jersey. Mr. President, "Green Thumb" is one of the most successful and appealing programs sponsored by the Office of Economic Opportunity. As part of the Department of Labor's "Operation Mainstream" job opportunity program, "Green Thumb" provided more than 2,000 older, retired, low-income farmers during 1968 with a wide variety of service projects including beautification and improvement of roadside areas, parks and historical sites. At year's end, the hearty and resourceful Green Thumbs were at work in 14 States. Much of their work is done in rural areas. A representative of the Farmers Union—which developed the project—recently gave this vivid description of what Green Thumb means to one participant in the program:

Tonight in Utah, Grandpa Steven, a man in his nineties, will go square dancing with joy, after having had a square meal. He has a job. He works three days a week on the Green Thumb program. He has helped beautify the grounds of his State Capitol. He has even passed his defensive driving course recently. He is a proud citizen. He is not a welfare recipient. Occasionally when mood strikes him, he recites some mountain poetry. Here is an example of a senior citizen who sincerely believes he has been given a second lease on life.

One of the joys about the Green Thumb program is that it also serves well in more urbanized areas. In my home State of New Jersey elderly participants are working on many worthwhile restoration projects, including one at Ringwood State Park and another at Mount Holly. The New York Times of November 24, 1968, reported that more than 142 retired farmers are working in Garden State parks and gamelands.

One of the most interesting projects was described in the Trenton Evening Times of May 12. An excellent story written by George W. Robinson reports on the development of a "mini-park" and the

transformation of an abandoned church into a drop-in center for the older Americans of Trenton. Many lessons can be learned from the Green Thumbs in the capital city of New Jersey. I ask unanimous consent that the news story be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENIOR CITIZENS CONVERT FORMER CHURCH (By George W. Robinson)

An abandoned church is being renovated in Trenton to serve as the city's fifth "drop-in" center for senior citizens.

Located in the old John Calvin Magyar Reformed Church at Morris Avenue and Washington Street, the center hopefully will be ready by July 1.

The 85-by-102 foot church property is being spruced up by eight elderly citizens who are members of the city's federally funded Project Green Thumb.

There the city's elderly may play shuffleboard and checkers or relax on benches in the pleasing surroundings of juniper bushes, azaleas and rhododendron.

Renovation is being done at a cost of \$6,300, according to Parks Maintenance Superintendent Harry Baum, who is overseeing the work for the city.

He said this will include new electrical service and lighting, a new drop ceiling, lavatory and kitchen facilities, a new tile floor, paneling and painting.

City employees have already begun some of the work by removing the old floor, pouring a concrete base for the new floor and by doing some paneling in the rear of the church, built in 1931.

BUILDING SOUND

"Essentially the building is sound," Baum said, pointing out that the exterior cedar shakes will need paint. The rest of the exterior is gray stone.

Lino Florelli, president of the Mercer County Senior Citizens Council, said he expects the 20-by-60-foot building would accommodate 40 to 50 people when completed.

It would be open certain hours during the day for senior citizens to get together and hold functions, according to Mel B. Gosline, volunteer worker in the city of Trenton's Office on Aging.

The city purchased the building for approximately \$13,000 and developed the grounds last year as one of Trenton's 21 mini-parks.

CREW BUSY

The Green Thumb crew was busy raking and tidying up the grounds this week. It was headed by John Reed of Hamilton Township, supervisor.

Health, Recreation and Welfare Director Edward Silverglade said he is so satisfied with the work this group is doing in Trenton that he plans to make application for a second crew.

The renovation on the church is being done through Silverglade's office.

The other four senior citizens' drop-in centers are a cottage on Parkside Avenue at Cadwalader Park, the community room in the Josephson Apartments at 237 Oakland Street, a house on Fell Street and a building on Chestnut Street.

GOLDEN OX OF ANTITRUST

Mr. HART. Mr. President, my unhappy feelings about the ruling the Internal Revenue Service made in 1964 allowing convicted antitrust violators to deduct financial penalties from their income tax should be well known by now.

But perhaps I have failed to make as clear a case as possible as to why I feel

my position is fair and just—and the IRS is dead wrong.

An article written by Morton Mintz, of the Washington Post staff, and published in the April 14, 1969, issue of The Nation will fill that possible lack.

In his usual capable and thorough manner, Mr. Mintz lays out in a very readable way the background of this decision and its ramifications for taxpayers and future private antitrust enforcement.

I commend the piece to Senators requiring the investment of little time with the guarantee of great value. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GOLDEN OX OF ANTITRUST (By Morton Mintz)

Amidst all the talk by the Administration and on Capitol Hill about tax reform, a large golden ox, which could be gored without complaint from the great mass of taxpayers, small and large, is standing almost unnoticed outside the corral. The ox in question belongs to those corporations which have been judged to have violated the antitrust laws. Under one of these laws, the Clayton Act, the courts are directed to enter judgments of treble the amount of the damages actually proved. The matter of concern to taxpayers is whether payments to settle claims for such damages should or should not be deducted from gross taxable income.

The issue acquired immediacy with the recent announcement of agreements looking toward a \$120 million settlement of treble-damage suits that were brought by states, cities and other litigants against five suppliers of tetracycline and two other antibiotics which are effective against a broad span of infectious diseases. This case is of special interest, not only because the settlement would be the largest ever to be wrapped into a single package but because of certain unusual circumstances.

In the 1950s, Chas. Pfizer had a patent monopoly on oxytetracycline (Terramycin) and American Cyanamid on chlortetracycline (Aureomycin). Each firm charged pharmacists \$30.60 for 100 capsules in the most common dosage. This price, which ranged from two and a half to almost twenty times the cost of production, was threatened by the advent of tetracycline, which many physicians regarded as generally superior to the chemically related products. If a patent on tetracycline was not secured, then anyone could make it; and if anyone could make it, there would be drastic price competition and drastic reductions in profits, which were as high as 85.7 per cent before taxes.

Pfizer claimed—and Cyanamid came to agree—that it had been the first company to reach the Patent Office with a practical application. The trouble was, Pfizer's process for producing tetracycline required the use of Cyanamid's patented chlortetracycline. In other words, Pfizer could not exploit a patent unless it had Cyanamid's cooperation. And so an agreement was reached under which Cyanamid would be Pfizer's exclusive licensee for tetracycline. At the Patent Office, however, there was especial concern about one point: Was tetracycline a naturally occurring by-product of the manufacture of chlortetracycline? If this was the case, no patent could be issued. Pfizer and Cyanamid provided tests and studies to assure the Patent Office that tetracycline was not such a by-product, and Pfizer got the patent.

Another hitch developed when Bristol-Myers, which had tried in vain to establish a place in the tetracycline market, learned that a private detective retained by Pfizer

for \$60,000 had been tapping its phones. The ultimate result was that Bristol, along with the Olin Mathieson Chemical Corp., and the Upjohn Co., were, in restricted capacities, dealt in. (Olin was then the parent company of E. R. Squibb which since has become Squibb-Beech-Nut.)

But the Federal Trade Commission upset things when it concluded that Pfizer, aided by Cyanamid, had misled the Patent Office and obtained the crucial patent by fraud—a finding that the Court of Appeals in Cincinnati affirmed last year. Pfizer then went to the Supreme Court, which on March 24 refused to review the case. Then, in 1961, a federal grand jury indicted Pfizer, Cyanamid and Bristol for conspiring to fix prices, conspiring to monopolize and achieving the desired monopoly—and named Olin Mathieson and Upjohn as co-conspirators. On December 29, 1967, a jury in New York City convicted the three firms on all three counts. Appeals are pending.

The issue, then, is whether companies which obtained a patent by fraud, which were convicted of criminal antitrust violations, and which were shown to have charged exorbitant prices for vital medicines should be allowed, by tax relief, to pass more than half the cost of the \$120 million expected settlement to the public which had been the victim in the first place.

As a matter of law, whether the companies should be taxed is entwined with the problem of what Congress intended by imposing triple damages. Did it intend the provision to be remedial, in which event deductibility would logically be allowed? Or did it intend triple damages to be punitive, in which case deductibility would be improper? Down through the years, there have been conflicting interpretations of what Congress meant. Until 1961, the Internal Revenue Service allowed deductions for treble damages. Then, in a letter to the Joint Committee on Internal Revenue Taxation, it quietly changed its mind.

However, the agency decided to develop a public policy after the conviction, in 1961, of General Electric, Westinghouse, and twenty-seven other manufacturers on criminal antitrust charges involving electrical equipment. Sometime in 1963, then Commissioner Mortimer M. Caplin discussed the matter with staff members. Their recommendations are in dispute. In any case, on July 31, Caplin and aides, including his successor, Commissioner Sheldon S. Cohen, and the Justice Department met with the accounting and law firms which represented the equipment makers.

In September 1963 Assistant Atty. Gen. William H. Orrick, Jr., in a memo to Caplin, said that when damages are paid following litigation, "no deduction should be permitted," and that to permit deduction would be to "encourage disrespect" for the antitrust laws and to reduce "their effectiveness and deterrent effect." In addition, the Department said it was "prepared to defend in court a rule of complete nondeductibility." Nonetheless, on July 24, 1964, the IRS announced a ruling under which payments to satisfy treble-damage claims—specifically including those following criminal convictions—"are deductible as ordinary and necessary business expenses."

The ruling produced a howl of outrage from the chairmen of the Congressional antitrust subcommittees, Sen. Philip A. Hart (D., Mich.) and Rep. Emanuel Celler (D., N.Y.), but enabled the electrical equipment conspirators to write off about half a billion dollars in settlements. GE alone saved about \$90 million.

In July 1966, two years after the ruling was made, Hart held three days of hearings—ignored by most news media—on a bill to reverse it. He said that in only two years the ruling already had assured tax savings of "more than a billion dollars as cases now in

process, involving price-fixing in the sale of salt, aluminum cable and other products, are concluded."

Caplin and Cohen defended the ruling as one that had to be made under the kind of even-handed administration of the tax laws which for most of the public is the foundation of what the IRS calls the system of voluntary compliance. That is, they said, they could be no less and no more considerate of General Electric and Westinghouse than of an individual taxpayer who, say, was hovering near the poverty line. Caplin and Cohen never did dispel all of the questions about how this resolute egalitarianism squared with having held a meeting at the highest level of IRS with accountants and lawyers for the equipment maker—a privilege not often accorded ordinary taxpayers.

Neither did Caplin and Cohen persuasively rebut the testimony of Prof. L. Hart Wright of the University of Michigan, an adviser to the IRS, who is a leading tax consultant. Appearing before Senator Hart, Wright said that in situations involving a somewhat doubtful tax-avoidance device, the Commissioner "does and should" act as "an advocate who is willing to litigate an important matter even though he may tend to believe the odds . . . are somewhat against him." Hart was left incredulous that IRS failed to act as an advocate by ruling against the electrical manufacturers, leaving it to them to challenge the ruling in the courts—especially because there was considerable reason to believe that in the Supreme Court the IRS would have won, and saved the taxpayers more than \$1 billion.

Caplin acknowledged that a factor in his decision was congestion of court dockets. This raised another question about even-handedness, the congestion having been caused by the filing of about 1,500 treble-damage suits which grew out of the electrical cases. In other words, as Hart put it, the larger the antitrust conspiracy, the greater the clogging of the docket—and the less likely a fight by the IRS.

Hart's bill got nowhere. Neither did another sponsored by Sen. Russell B. Long (D., La.). While the antibiotics firms were on trial in December 1967, Hart, calling the IRS ruling "indefensible," tried again with a bill which would make payments in excess of actual damages neither taxable income for a plaintiff nor deductible expenses for a defendant. Again, nothing happened.

Hart, who says the issue is whether "the American taxpayer is entitled to equal treatment in the administration of our tax laws," will make another attempt this year. So will Long and Celler. It remains to be seen how much help they get from the Nixon Administration and from Rep. Wilbur Mills, chairman of the Ways and Means Committee.

LAW DAY, U.S.A., OBSERVANCE, NEW HAVEN COUNTY BAR ASSOCIATION

Mr. DODD. Mr. President, on May 1, 1969, it was my privilege to participate in the Law Day, U.S.A., observance in New Haven, Conn.

The observance, which has been held for some years, was organized by the New Haven County Bar Association, and took place in the New Haven courthouse. The courthouse was crowded for the occasion with members of the bar, distinguished judges, and leading citizens from every walk of life.

The theme selected by the New Haven County Bar Association for this year's observance was "Justice and Equality Depend on Law and You".

The central point of the New Haven observance was the presentation of the

bar association's annual award, the Liberty Bell Award, to William F. Buckley, Jr., the celebrated editor of the National Review.

Mr. William Fox Geenty, the highly esteemed president of the New Haven County Bar Association, in presenting the award to Mr. Buckley described him as "a citizen whose career typifies the purposes and objectives of Law Day, U.S.A."

Mr. Buckley, in receiving the award, delivered a talk which was marked both by its wit and its profundity.

Commenting on our campus disorders, Mr. Buckley said:

It is clear that America's tradition of tolerance and magnanimity have begun now to elide into ambiguity and self-doubt. It is increasingly apparent that some of our opinion makers believe that the line between the law and the defiers of the law ought to be flexible. They are saying to us, in effect, that if young people are prepared to throw themselves into the police barricades, perhaps they are telling us something urgent, which requires our democratic attention. Perhaps we are responsible for listening to them, for hearing them, even as Constantine heard the marginal cry of the Marginal Christian who threw himself at the lions.

In paying tribute to the judiciary as the central pillar of the law, Mr. Buckley had this to say about the situation at Harvard University:

We see at Harvard today a situation in which the judiciary refuses to release students who are manifestly guilty of criminal trespass, notwithstanding that the president of the university has urged him to do so. It may, in fact, be that the judiciary is the only instrument in public life left with sufficient stamina to protect the law, even against such unwilling agents of the law as college presidents, an ambiguous situation, to be sure. But what are the faculty going to do about it if they are saved by the judiciary—impeach Earl Warren?

My very able colleague from Connecticut, Congressman BOB GIAIMO, also made an important contribution to the proceedings. Congressman GIAIMO told the audience:

What constitutes trespass or an assault or breach of the peace must be equally charged, whether it is committed on a city street or a college campus.

No longer can we tolerate the unfair application of the law in some areas and not in others.

A world of credit is due to Mr. Frank J. Mongello, Jr., the chairman of the Law Day committee of the New Haven County Bar Association, for a very well organized and dignified observance.

Mr. President, I ask unanimous consent to have printed in the RECORD excerpts from the transcript of the Law Day proceedings in New Haven, Conn., on May 1, containing the remarks of: Attorney Frank J. Mongillo, Jr., Attorney William Fox Geenty, Congressman ROBERT GIAIMO, and William F. Buckley, Jr.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

STATE OF CONNECTICUT, SUPERIOR COURT, NEW HAVEN COUNTY BAR ASSOCIATION, NEW HAVEN, CONN., PROCEEDINGS ON LAW DAY, MAY 1, 1969

Chairman MONGILLO. Members of the Judiciary, Senator Dodd, Congressman Giaimo,

Mr. Geenty, Honored Guest, Mr. Buckley, ladies and gentlemen:

I am Frank J. Mongillo, Jr., Law Day Chairman for the New Haven County Bar Association. The program we are presenting here in Superior Court this morning is part of the annual observation of Law Day, U.S.A., May 1, 1969. This will mark the twelfth anniversary of this ceremony, which has been established by presidential proclamation and joint resolution of Congress.

We are gathered here to honor an outstanding American with the presentation of the Liberty Bell Award. Previous recipients of this award by our Association have been Kingman Brewster, President of Yale University, Charles McQueeney, Managing Editor of the New Haven Register, Doctor Frank Mongillo, and John McDevitt, Supreme Knight of the Knights of Columbus.

Law Day has been instituted in the United States on May 1st as a day in which public attention is called to our American Heritage, the basic values of the rules of law, and to foster an increase in respect for law and our Courts. The theme for Law Day, U.S.A., 1969, is "Justice And Equality Depend Upon Law And You."

As responsible Americans, it is our duty not only to uphold the law, but also to assist the various law enforcement agencies in performing their duties, to testify in the Courts, and to respect the basic rights of others. It is only through respect of the rights of others that we can preserve our own individual rights.

We are now living in a very difficult time. We are confronted with public demonstrations, draft card burning, and campus disorders. These are the events which make this day so much more important. It becomes readily apparent as lawyers and loyal Americans that we must encourage respect for the law. It is our absolute duty to do so, especially when university presidents are encouraging disrespect for law by capitulating to demands of disruptive students, whose only aim is to prevent the vast majority from pursuing the courses of their choice. These disruptors who show an utter disrespect and contempt for law should not be appeased by administrators, but rather expelled from the universities. (Applause.)

It now becomes imperative for the decent majority of this country to rise up and be heard and put a stop to these acts by the lunatic fringe fanatics. (Applause.)

While our legal and judicial system is far from perfect, it is the finest yet devised in the history of man, and it is only through continued respect for the law and the rights of others that we can build upon this fine system and create an even greater one.

It is now my pleasure to present a member of our Association, whose efforts in Congress have brought great honor to himself, his community and our Association, Congressman Robert Gialmo. (Applause.)

Congressman GIALMO. Thank you very much, Frank.

Distinguished members of the judiciary, our guest of honor, Bill Buckley, Senator Dodd, ladies and gentlemen: I suspect that Bill Buckley is more polysyllabic than monosyllabic, at least from what I have heard of him on television, which is quite frequently, and I am delighted that you have honored him today with the award which you are giving to him.

I want to say to Mr. Buckley that he and I are at least running a close race with who is more unpopular at a nearby university here.

I am very happy to have this opportunity to participate in Law Day because as I look out here and see so many of my friends, who are members of the Bar Association in this area with me, I think we, as lawyers, and those of us who are privileged to be lawyers have an opportunity to take a greater role in the apparent breakdown in respect

for law, which is obviously taking place throughout the United States today, and we, as lawyers, have got to begin to speak out and to insist on equality under the law and constantly seek justice, but with the full realization that the first law of any civilized society must be a healthy respect for law on the part of all citizens because otherwise we break down into violence and we break down into the necessity of using force rather than the rule of law.

With particular reference to the young people who are protesting on our college campuses and who are seeking to be treated as adults, it would behoove them to understand that they can't have it both ways. If they want to be treated as adults, then they must be responsible under the law as adults. (Applause.)

And what constitutes trespass or an assault or breach of the peace must be equally charged, whether it is committed on a city street or a college campus. (Applause.)

No longer can we tolerate the unfair application of the law in some areas and not in others.

In Washington, D.C., just this past week, takeovers and trespasses occurred on two college campuses in the same city. On one campus, the decision of the administration was to charge the people with the proper violation. On the other, the decision was to drop the charges against the students. This is inequality under the law because the law must be clear, and what is a trespass and what is an assault must be charged and must be applied in both instances, and then, under our great American system of justice, we will leave it up to the decision of the judges, such as we have here today, to decide whether or not a conviction should follow.

But this attitude, the attitude of too many administrators in colleges who are knuckling under to threats and to force, who are deciding on their own whether or not the law will be prosecuted or whether or not people will be charged with a violation, that is leading not to better justice, not to greater civility, but it is leading to absolute chaos in our society and cannot be tolerated.

I think that we, as lawyers, have the primary responsibility to speak out, and to speak out loudly in this area.

Thank you. (Applause.)

Chairman MONGILLO. Thank you, Congressman Gialmo.

Every year, in conjunction with Law Day, the New Haven County Bar Association presents the Liberty Bell Award. Here to present this award to Mr. Buckley on behalf of the lawyers of our Association is William Fox Geenty, President of the New Haven County Bar Association. (Applause.)

Mr. GEENTY. Thank you, Frank.

First of all, ladies and gentlemen, we had expected to have his Honor, Mayor Richard C. Lee, present here today, but because of a compelling commitment, he was unable to be here, and he had this note delivered to me this morning asking that his regrets be made to you and also his best wishes.

Frank, Mr. Buckley, honored guests, members of the judiciary, members of the New Haven County Bar Association, and you, ladies and gentlemen of the public who took the time to come here for Law Day, I greet you on behalf of the New Haven County Bar Association.

It is my pleasant duty, as President of the New Haven County Bar Association, to present on behalf of the members of the Association its Liberty Bell Award to a citizen whose career typifies the purposes and objectives of Law Day, U.S.A.

Law Day, U.S.A., was established in 1958, as Frank Mongillo said, by a Joint Resolution of the 87th Congress of the United States and by Presidential Proclamation, by the late Dwight D. Eisenhower. The Resolution is a short one, and I would like to read it to you, if you will bear with me for a moment.

It is entitled, "Joint Resolution to designate the first day of May of each year as Law Day, U.S.A."

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the first day of May of each year is hereby designated as Law Day, U.S.A. It is set aside as a special day of celebration by the American people in appreciation of their liberties and the reaffirmation of their loyalty to the United States of America; of their rededication to the ideals of equality and justice under law in their relations with each other as well as other nations; and for the cultivation of that respect for law that is so vital to the democratic way of life.

"The President of the United States is authorized and requested to issue a proclamation calling upon all public officials to display the flag of the United States on all government buildings on such day and inviting the people of the United States to observe such day with suitable ceremonies and other appropriate ways, through public bodies and private organizations as well as in schools and other suitable places."

I felt it would be better to read that to you because it does it much better than I could do it.

Ladies and gentlemen: The career of William F. Buckley, Jr., the outstanding gentleman we honor today with our Liberty Bell Award, typifies the purposes and objectives of Law Day, U.S.A.

William F. Buckley, Jr.'s career has been an amazing and fascinating one.

He served in the United States Army from 1944 to 1946.

He studied in England, France and Mexico. He attended Yale University, graduating in 1950. While at Yale, he was Chairman of the Yale Daily News, a member of the Torch Honor Society, Skull and Bones and the Elizabethan Club. He was also Class Day Orator. After graduation, he taught Spanish at Yale for four years.

He then entered the literary field where he has excelled, being a contributor to many publications. He writes a weekly column which is syndicated in over 200 newspapers in this country.

In 1955, he founded, "The National Review." In addition, he has found time—how he has, I don't know—but he has found time to write and have published several books, about a dozen books.

In 1965, Mr. Buckley stepped out of the literary field and ran for Mayor of the City of New York. He didn't do as well in politics as in the literary field. I often wonder what he would have done if he won the election.

In 1966, Mr. Buckley began hosting a weekly television show known as "Firing Line." On this show, he has as his guests national leaders in practically every field. It is on Channel 9, Mutual System. I, for one, believe it to be one of the most interesting programs on television.

Mr. Buckley has received many honorary degrees from universities and awards from many organizations throughout the country.

He has never failed to speak out courageously on matters of public interest, without regard to the popularity of the statements. The country needs more men like William F. Buckley, Jr.

It is a privilege indeed for me to present to William F. Buckley, Jr. the Liberty Bell Award of the New Haven County Bar Association.

Mr. Buckley, will you please come forward. (Mr. Buckley stepped forward.)

As I said, it is my great pleasure, sir, to present this Liberty Bell Award to you. I don't know of anyone better entitled or more entitled to it than you. (Applause.)

Mr. BUCKLEY. Thank you very much, Mr. Geenty.

Senator Dodd, Congressman Gialmo, distinguished members of the Judiciary, Mr. Mongillo, ladies and gentlemen:

I am most grateful to you, each in his turn; to Senator Dodd for his most extravagant kindnesses as he detailed my accomplishments, and my thoughts turned, quite honestly, to his own, but I recognize that as a dangerous game to play.

Indeed, Ambrose Beers once defined admiration as one's polite recognition of other people's similarities to one's self.

In any event, I am happy to be here in this distinguished company.

A moment ago, I was posed by the photographer with all of these gentlemen. I never felt so legal in my life. (Laughter.)

When I receive a copy of that picture, which I trust I will, I intend to append to it a caption in memory of this occasion, "Bill Buckley and his appointees." (Laughter.)

I know that some of you are as confused as I am, a confusion which, in my judgment, issues out of a certain manifest philosophical confusion on the part of the community which is the result of our apparent incapacity to cope with certain community disorders.

It is clear that America's tradition of tolerance and magnanimity have begun now to elide into ambiguity and self-doubt. It is increasingly apparent that some of our opinion makers believe that the line between the law and the defiers of the law ought to be flexible. They are saying to us, in effect, that if young people are prepared to throw themselves into the police barricades, perhaps they are telling us something urgent, which requires our democratic attention. Perhaps we are responsible for listening to them, for hearing them, even as Constantine heard the marginal cry of the Marginal Christian who threw himself at the lions.

That is why, I suspect, there is so much philosophical disorder on the question of law and justice and the necessity to uphold the law.

That is why, I suspect, that Thomas A. Edison, if he were materialized tomorrow with a machine that would dispossess unlawful rioters without a moment's pain or humiliation, that Mr. Edison and his machine would be quickly run out of town; that this machine would be proscribed along with that long list of anathematized riot control weapons which have been similarly proscribed, ranging from cattle prods to tear gas to mace.

It seems certainly as though there were a breakdown in the common understanding of the necessity to obey the law, and it is certainly true that certain sophisticated and importune distinctions are thrust at us on the basis with which we are supposed to proceed with ambiguity.

Professor Dan Boorston points to the distinction between violence and non-violence as perhaps the favorite distinction of those who plead the righteousness of civil disobedience. He says that we cannot, in a flow technology like our own, countenance such distinctions. It used to be, he says, that if you wanted to hurt somebody, you had to hit him; but now all you have to do is slow down.

In a society as volatile, as dynamic as our own, someone driving a car has merely to slow down importunately in order to be damaged by the person in the rear and always make it look as though the other person were responsible. By using such tactics, says Professor Boorston, a man appeared to be reaching out for the Halo of St. Francis but is, in fact, reaching out for the Crown of Napoleon.

So he calls for a common pledge by members of the intellectual community, by laymen, by professors, by teachers, a common pledge to ostracize those who attempt to make the case for civil disobedience.

His point is—and it is a profound point—that precisely our indecision registers to those who would disobey the laws in their society, that final, fatal ambiguity of our own devotion to our own system registers to them a certain collective insensibility to the ramifications of the breakdown of civil order; that

unless we can approach them with resolution, we cannot communicate our purpose, and our failure to communicate our purpose does nothing more than to stimulate their doubt and to stimulate that sunburst which leads them to believe that we do not believe in our society seriously enough to defend it with all our power; to turn even against our own countrymen, if necessary to do so, to turn even against our own sons and daughters, even as our ancestors did who pledged their lives and their sacred honor in defense of the ideals that they cherished.

What, in fact, must be done is to make such a pledge as Professor Boorston has outlined, and we must, above all, recognize that perhaps the proximate instrument of our deliverance is going to be the judiciary.

We see at Harvard today a situation in which the judiciary refuses to release students who are manifestly guilty of criminal trespass, notwithstanding that the president of the university has urged him to do so. It may, in fact, be that the judiciary is the only instrument in public life left with sufficient stamina to protect the law, even against such unwilling agents of the law as college presidents, an ambiguous situation to be sure. But what are the faculty going to do about it if they are saved by the judiciary—impeach Earl Warren? (Laughter.)

The answer is, of course, that the leadership has got to be exerted by the men of law who have to educate not only the most ignorant members of our society but also the best educated members of our society. We have to educate not only ignorant sophomores who believe they can transform this society into a better society by smashing its institutions, but also the members of the faculty who are so highly educated that they are struck with those ambiguities on the basis of which they cannot—they have even lost sight of what has seemed to be to the rest of us as axiomatic, the process must proceed with reference to due process.

So that, ladies and gentlemen, I join with you in paying tribute to the judiciary, to those who uphold the law and defend it because I believe, as unquestionably you do, that the events of the future are very likely to render the unmistakable judgment that the future is in your hands.

Thank you very much. (Applause.)

Chairman MONGELLO. Thank you, Mr. Buckley and other guests.

This concludes our Law Day ceremony for this year.

Thank you.

PRESIDENT NIXON'S VIETNAM SPEECH

Mr. ALLOTT. Mr. President, I wish to add my voice to the voices of other Senators who have voiced their confidence in and support of President Nixon for the stand he has so clearly enunciated regarding our posture in Southeast Asia.

It was a positive speech. It did not look back. It went beyond the point of arguing whether or not we should have intervened in Vietnam. It stated America's position on negotiations with the enemy in precise and yet flexible terms.

As I viewed the speech, I felt clearly that it was not only directed at the American people, but was definitely a part of our strategy in the peace talks at Paris. I am confident that it was the proper strategy.

Now the nations of the world have the cards laid out on the table. They are aware of the President's generous offers. They will be able to see how the other

side reacts, and should be able to judge their sincerity.

Now the enemy knows the terms under which we are willing to settle. Moreover they know that we will not abandon our commitment and that any attempt to "wait it out" will only hurt their chances to emerge from this war under reasonable negotiated terms.

I was most impressed by the fact that the President made his remarks after full consultation with the South Vietnamese.

There is no question that if this war is to be brought to an honorable conclusion, the valid and legitimate Government of South Vietnam, headed by President Thieu, must play a major role in the settlement.

I was further pleased that the President included in his overall view of the problem, the point that Laos and Cambodia must be included in any final settlement we negotiate with the North Vietnamese. This approach is both sane and sensible to a long-term solution of the problem.

All in all, Mr. President, the candor with which the President presented his address was refreshing and is to be especially commended in view of the terribly confused situation under which we have been operating for the past few years.

Mr. Nixon's posture on Southeast Asia clearly lays the groundwork for uniting the country behind a serious plan to stop the bloodshed in Vietnam.

AN INVITATION TO GET LOST

Mr. CHURCH. Mr. President, there is deep-seated disappointment over the decision of the Nixon administration to drastically curtail the Job Corps program.

According to an editorial in a recent edition of the Washington Post, "reports from individual centers around the country reveal that trainees at the axed centers are shocked and depressed at the administration's action" in closing 59 of the 109 Job Corps centers.

They may have interpreted the signal from on high as an invitation to get lost—

The Post continued—

but that is how they read it, nevertheless.

And the message the Job Corps centers are sending back to the administration in return is in the words of Yeats:

"Tread softly, because you tread on my dreams."

Mr. President, I ask unanimous consent that the Washington Post editorial, and an editorial from the Lewiston, Idaho, Morning Tribune be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Post, May 7, 1969]

TREAD SOFTLY ON THE JOB CORPS

The basic mistake the Nixon Administration may be making about the Job Corps, as it seeks to close 59 of 109 centers and to shift the rest from OEO to the Labor Department, is in assuming that it is only a job-training program. Anyone who has ever been at a Job Corps center the day a batch of recruits piled off the bus will know it isn't. Unkempt,

unsociable, unwell, unlearned, their condition adds up to a frozen unfitness for anything, not to mention job-training.

Officials dealing with the poor are fond of the term *the disadvantaged* in describing Job Corps youth. Disadvantaged? They read and add at fifth grade level. Fifty per cent have never seen a doctor or dentist. Sixty-four per cent have been either thrown out or pushed out of school. Sixty per cent lived in substandard housing. Sixty per cent are from broken homes. Add to all this the fears, neuroses and suffering that statistics can't get to, and the term *disadvantaged* becomes a put-on. At best, the average Job Corps youth is seriously sub-disadvantaged, so far at the bottom of society's barrel that until Job Corps, no scraping was thought possible.

The Administration, sensitive to charges that some 13,000 trainees will be thrown to the wolves when the 59 centers are closed, has busily given assurances to everyone that those trainees unable to be placed in jobs or other centers will be absorbed into existing manpower programs. But this is unrealistic. One reason Job Corps was created in the first place is that it is a human renewal program, a last-stand try at reclaiming the broke and broken youths when other programs can't or won't. Programs in the Manpower Development and Training Act and Concentrated Employment Program are meant for the pleasantly "disadvantaged," not the unpleasant kind in Job Corps.

Sides have been forming in recent weeks on the fate of Job Corps. Last week the Senate Labor and Public Welfare Committee cleared a resolution calling on the President to hold up the shutdown. It is scheduled for the Senate floor Monday. Meanwhile, Nixon aides are now holding confidential files alleging a high incidence of gang rapes, homosexuality and drug use at the Job Corps centers. Presumably, the Administration may use this information, if things get tight, as a trump card to persuade Congress that it's better to let Job Corps die.

Aside from the cheapness, the tactic would be based on a distortion. The headlines describing the files may say, for example, that the Kilmer Job Corps Center in New Jersey had 22 cases of narcotics in the first six months of 1968. Yet Kilmer's 22 narcotics users represent a relatively small proportion of the 1700 total in the center, whose officials should be congratulated if that's actually the full dimension of their drug problem.

The genesis of all this President Nixon's trimming of the \$280 million budget currently set for Job Corps by the House and Senate to \$180 million. This cut allows him to tell taxpayers of another \$100 million saved. But next to defense and space money, the saving is ridiculously small. Job Corps never had the funds it needed in the first place. Economy driving now only adds fiscal insult to social injury.

As for the injured, a few showed up here last week. A busload of students, faculty and Job Corps trainees on a 25-hour ride from northern Michigan testified before the House Education and Labor Committee. They said simply that the Job Centers are worth preserving.

Reports from individual centers around the country reveal that trainees at the axed centers are shocked and depressed at the Administration's action. Others, too beaten by the odds to react, have slipped off quietly. They may have misinterpreted the signal from on high as an invitation to get lost. But that is how they read it, nevertheless. And the message the Job Corps centers are sending back to the Administration in return is in the words of Yeats: "Tread softly, because you tread on my dreams."

[From the Lewiston (Idaho) Morning Tribune, May 3, 1969]

A GUTTER ATTACK ON THE JOB CORPS

Efforts to close down half the Job Corps centers across America have reached the gut-

ter level of an effort to discredit and demoralize the corps with reports of homosexuality, drug use and other crimes. The nature of the attack reflects more on those who would resort to such tactics than on the Job Corps itself.

Naturally President Nixon does not know about and would not approve of this despicable gambit, but he does have a responsibility to discover who among the overzealous members of his administration is using smear tactics against this remarkable program.

The Associated Press investigative team has learned that the Nixon administration has files on criminal behavior at some Job Corps camps which have been prepared to use as the telling blow in the controversy over whether to proceed with plans to close half the centers. AP reporters learned that at least one congressman hostile to the program has been primed with some of the material.

The larger controversy may now become, not the closing of the centers, but the political methods of those who would close them.

The tactic is hypocritical on the face of it. If the anti-social activities at Job Corps camps were really so serious and so incurable, it would warrant closing all centers, not just half of them. If the situation were really unmanageable and the Job Corps really the irreversible failure that these reports are meant to imply, why keep any of them open?

There has been some criminal activity in some Job Corps centers, but the fact many centers have operated with less than the expected level of such incidents would indicate that the administration centers is in doubt, not the program itself.

In fact, there has been some evidence that the program is poorly administered from the top with too much latitude given to the directors of individual camps in the way they operate their Job Corps centers. That has been evident in the centers located in Idaho where a change of directors has sometimes brought discipline problems or cured them if they existed before. Some directors who have served during the last four years in this state have taken a permissive attitude toward running their camps which has resulted in behavior problems; some have operated under a philosophy of rather strict discipline based on the belief that those who can't behave can't stay; the offending corpsmen are given to understand from the beginning that they shape up or ship out.

There are also universities, military units and Cub Scout dens with discipline problems and anti-social behavior. But the answer is not to close down the universities, the Army or the Cub Scouts. And it certainly isn't to close half of them. The answer is new leaders to replace inadequate ones.

But, of course, the Nixon administration knows that. It wants to close the Job Corps for budget cutting reasons, not because the program is a failure. These sordid and expedient methods are being used, not because they are relevant to the worth of the corps, but because they are potentially more damaging than an honest and pertinent attack on the program.

By all means clean up those centers with a shoddy record. A young man who enrolls in the corps to improve himself must be permitted to do so without being harassed by depraved bullies. He deserves untainted opportunity. But closing the Job Corps centers would give him no opportunity at all.—B. H.

AMENDING THE CONTINGENT ELECTION PROCESS—SENATE JOINT RESOLUTION 18

Mr. YARBOROUGH. Mr. President, it has been said that those who cannot learn from the mistakes of the past are

doomed to repeat them. I believe that there is, in the constitutional process for electing a President, a dangerous mistake which we have repeated every year we have failed to remedy it. One day, this mistake will bring us much sorrow.

The mistake of which I speak is contained in the constitutional provision for the election of a President when that election devolves on the House of Representatives. Senate Joint Resolution 18 proposes an amendment to the Constitution which would remedy this mistake by changing the method which the House uses to elect a President. At this time, each State has one vote in the balloting. I propose giving each Member of the House a vote. One Congressman—one vote. My reasons for advocating this change are given in my statement before the Senate Judiciary Subcommittee on Constitutional Amendments on March 11, 1969. I ask unanimous consent that the statement be printed in the Record.

There being no objection, the statement was ordered to be printed in the Record, as follows:

TESTIMONY OF SENATOR RALPH YARBOROUGH BEFORE THE SENATE CONSTITUTIONAL AMENDMENTS SUBCOMMITTEE, MARCH 11, 1969

Mr. Chairman and Members of the Subcommittee, thank you for the privilege of appearing here today. The matter of electoral reform is one which I believe to be of constant concern to all of us. It is obvious that the process of electing a President is in need of revision, so I am encouraged, as I am sure all of us are, that this committee is taking a careful and comprehensive look at this question.

I am aware that most of the testimony and discussion before this committee has dealt with the question of reforming or abolishing the electoral college. But, my proposal is not so ambitious; I seek, rather, to reform only a small segment of the process we have for electing a President. Small though this may seem, however, I believe that the change which I propose would correct a very serious, potentially fatal flaw in this process, the most dangerous of all flaws in our presidential election machinery.

My proposed amendment to the Constitution deals with the Constitutional provision for contingent election of the President in the House of Representatives. The main provision for this type of election is found in Amendment XII which was adopted in 1804. Section 3 of Amendment XX, adopted in 1933, also contains some language concerning contingent elections of the President. Because it might be rather confusing to read the two amendments separately, I shall read Amendment XII, inserting language from Amendment XX where applicable. This Amendment says:

"The Electors shall meet in their respective states and vote by ballot for President and Vice President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the persons voted for as President, and in distinct ballots the person voted for as Vice President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the greater number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no persons have such majority, then from the persons having

the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But, in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. [If, at the time fixed for the beginning of the term of the President, the President shall have died, the Vice President-elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President-elect shall have failed to qualify, then the Vice President-elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President-elect nor a Vice President-elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, contingent election of a President and Vice President is a mish-mash. It is a process rooted in an archaic, antiquated, totally anachronistic concern, crucial to the Founding Fathers but irrelevant in this age of one-man-one-vote—for protecting the rights and privileges of the small states against the larger states. All of you will recall that the chief reservation, the small states had about abandoning the Confederation was that they would be swallowed up by the larger states. It was, in part, this concern which produced our bicameral legislative system with the House of Representatives representing the people and the Senate representing the states. It was also this concern which produced the compromise proposal for contingent election of the President and Vice President. The small states were fearful that election in the House with each member having one vote would throw the balance back in favor of the larger states. Therefore, the small state delegates and their allies insisted that voting for President and Vice President be on a one-state-one-vote basis. Strange as it may seem, this procedure has remained in effect ever since that time, even though Senators have been popularly elected for more than half a century now. I think, Mr. Chairman and Members of this Committee, that the anachronism of this method of contingent election is only one reason to abandon it.

A second reason is that this system is so chaotic. The President and Vice President were elected by different Houses and by different methods in each House—on a state-by-state basis in the House of Representatives and on a one-member-one-vote basis in the Senate. The House chooses from the top three men, the Senate, from the top two. This system should be made more rational. Furthermore, given that it is our aim and our wish to make the selection of a President and Vice President as democratic a process as is feasible, it would seem necessary to rationalize this system by bringing the procedure in the House in line with that used in the Senate.

The third reason for a change, however, is the most critical. This reason should have become clear—very clear—to all of us during the election just past. For the system as it now stands contains the seeds of a paralyzing Constitutional and political crisis which could have very grave results indeed for this country.

In the 1968 election, we had a serious third-party candidate whose chief prospect was not to win the election, but rather to force the final decision into the House of Representatives in order to "bargain" with the other two candidates for certain policy concessions in return for his support.

The strategy was not an unsound one. By my count, the Democratic Party controlled twenty-six state delegations, the Republican Party, nineteen, and five delegations were

divided evenly. But, it is probable that some of the state delegations would have voted initially for the third party's candidate, Gov. Wallace. There are no Constitutional provisions binding members of the House to support their party's candidate for President. Moreover, Governor Wallace carried five southern states and it is possible that these five state delegations would have supported him in the House of Representatives. The result would have been deadlock in the House. Meanwhile, the Senate, choosing between the two front runners, would have met, voted, and in all probability, elected a Vice President, who would then be faced with the awesome task of serving, not as President, but as acting President. Can you, Mr. Chairman and Members of this Committee imagine how chaotic the party quarrel would have become under these circumstances.

Several other very detrimental results could come of the stalemate in the House. The President finally chosen might be of a different party from that of the Vice President, thus recreating—the very situation which Amendment XII was written to avoid. Moreover, it is altogether possible that the concessions the President-elect would have been obliged to make in order to be elected would weaken his power to govern. If the Congress could not decide on a President and a Vice President, it would then have to select a person to act as acting President.

Gentlemen, I hope I have been able to show why I have introduced S.J. Res. 18, and why I think it is so important that this Amendment be adopted as soon as possible. A Constitutional crisis such as I have just described would do great harm to our body politics. I don't believe that today we ought to preserve a system of contingent election of the President which is as undemocratic as the one we now have. I believe it is now time to change it.

My proposal is not a new one. In 1823, Thomas Jefferson wrote, "I have ever considered the Constitutional mode of election ultimately by the legislative voting by states as the most dangerous blot on our Constitution and one which some unlucky chance will someday hit." In 1824, Senator Thomas Hart Benton of Missouri proposed an amendment to the Constitution recommended by the Senate Select Committee on Elections, which would have provided for contingent election of the President and the Vice President by a Joint Session of Congress with each member having one vote. Later, in 1876, Congressman Samuel Addison Oliver of Iowa introduced H.R. 27, a joint resolution which provided, among other things, for contingent election of the President by the House *viva voce* with each member having one vote. Similar proposals were made in 1918 by Representative Tucker of Virginia and in 1928 by Representative Browne, of Wisconsin. Other leading legislators and scholars among them, Senator Oliver P. Morton (1877), Joseph Cady Allen (1917), and Edward Lee (in 1943), have long recommended this change which I am proposing now. Finally, in 1966, President Johnson said in a Special Message to Congress on January 20, 1969:

"In such an election [contingent election], the House of Representatives would be empowered to elect a President from the three highest candidates. However, each State casts only one vote. . . .

I firmly believe that we should put an end to this undemocratic procedure."

As I said when I introduced S.J. Res. 18:

"This joint resolution is not introduced as the ultimate solution to our electoral ills. . . . I propose this change in the Constitution with the intention of correcting a very specific fault, but a very dangerous fault, in our electoral system. If the House of Representatives is to remain the final arbiter in our Presidential election system, we must be concerned with the mechanics of selection in that body. Voting by state is one of the great-

est faults in our total election process. I seek to bring the contingent election of the President by the House closer to the people by allowing each representative of the people to cast his own vote."

There are several proposals before this subcommittee relating to electoral college reform instead of reform of the contingent election provision. If we did away with electors but kept the electoral college, giving a vote to each congressional district and two at-large to each state or if we apportioned the electoral votes according to the percentage of the popular vote, the candidate receives, we may still end with no candidate having a majority of the electoral vote. And, if we abolish the electoral college and substitute direct popular election, we may end up the same way. Therefore, Mr. Chairman and Members of the Subcommittee, I feel that in any case, my Amendment is necessary.

I hope that you will give my proposal the most careful consideration possible. I hope it will be adopted by the Congress and by the states very soon.

Thank you.

THE MEDICARE AND MEDICAID PROGRAMS

Mr. WILLIAMS of Delaware. Mr. President, on May 14, 1969, as appears in the CONGRESSIONAL RECORD on pages 12557-12560, I outlined a series of abuses that are developing under both the medicare and the medicaid programs. As pointed out in my remarks, part of these abuses developed from the exploitation and overcharges on the part of a few members in the various participating groups, and part of the responsibility lies in a weakness of the law and to a certain extent in a lack of efficiency and proper supervision on the part of both State and Federal agencies.

Since making those remarks I am glad to note that the American Medical Association has joined in expressing concern over the rising costs of both these programs, and Dr. Dwight L. Wilbur, president of the AMA, has pledged the cooperation of the association in the study by our committee and at the same time has issued an order to all State and local medical societies "to act swiftly and firmly in all instances of known exploitation."

In an April 17 letter to Secretary Finch, the Secretary of the Department of Health, Education, and Welfare, Dr. Wilbur said that the AMA was eager to make available to his office "the composite experience and judgment of the Nation's physicians, who are the principal providers of health care to all the people." He pledged further that—

The knowledge and judgment of the nation's physicians—as well as of the prepayment plans, health insurance industry, hospitals, the allied health professions, the actuaries and others—must be enlisted in your battle against the health-care portion of the inflation problem.

This is the type of cooperation we need, and I appreciate this support from the American Medical Association. I sincerely hope that we shall have similar pledges of support from representatives of the other groups affected.

I can assure each of these groups that our study will not result in a blanket indictment against any segment of the industry involved. We fully recognize that the overwhelming percentage of

those who are in any way connected or working with this program are trying to do a good job; however, when instances of exploitation or excessive charges are discovered they must be exposed and properly dealt with.

I ask unanimous consent that the press release of the American Medical Association of May 15, 1969, be printed at this point in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

The American Medical Association shares with Sen. John J. Williams, (R. Del.) a concern over the rising costs of medicare and medicaid. Dwight L. Wilbur, MD, president of the AMA, last month offered Health, Education and Welfare Secretary Robert H. Finch the assistance of the AMA in coping with the problem. The AMA also will be glad to cooperate with the Senate Finance Committee or any other committee of Congress studying the problem of rising health care costs.

For some time the AMA has been giving national leadership in coordinating the efforts of state and county medical societies in the establishment and effective functioning of local review and utilization committees checking on the health care services rendered under the medicare and medicaid programs. Close liaison also has been established between carriers and many medical societies in reviewing disbursements under the government programs.

All investigations so far have indicated that an overwhelming majority of physicians participating in medicare and medicaid are charging reasonable fees. The charges of only about two per cent of the physicians receiving payments from the programs have been challenged. Of course, the AMA favors appropriate action in any of the cases where physicians are found to receive improper payments. Last June, the AMA Board of Trustees urged all state and local medical societies "to act swiftly and firmly in all instances of known exploitation, and excessive charges for health care that may occur in their jurisdiction." In 1967, the AMA said "any reports of abuses by physicians or by any other health care program should be thoroughly and promptly investigated and action taken where indicated." Several medical societies have expelled members where it has been proved that a physician's charges were excessive or he in some other way exploited the program.

The AMA, through its publications and speeches by its officials, has been emphasizing to physicians the responsibility they have to hold down the health care costs of their patients both under and outside government programs. In an April 17 letter to Finch, Dr. Wilbur said the AMA "is eager to make available to your office the composite experience and judgment of the nation's physicians, who are the principal providers of health care to all the people."

"The knowledge and judgment of the nation's physicians—as well as of the prepayment plans, health insurance industry, hospitals, the allied health professions, the actuaries and others—must be enlisted in your battle against the health-care portion of the inflation problem," Dr. Wilbur said.

MIDDLE SNAKE MORATORIUM THE PRUDENT COURSE

Mr. CHURCH. Mr. President, recently my colleague from Idaho (Mr. JORDAN) and I introduced proposed legislation for a 10-year moratorium on construction of any dams on the Middle Snake River. It is our feeling that there is no reason to hurry to judgment on the building of new dams on this stretch of the river until

fundamental questions can be answered as to its highest and best use.

The Lewiston Morning Tribune has done an excellent job summarizing the arguments that Senator JORDAN and I have made in favor of a moratorium.

In its editorial treatment, the Tribune concluded that it would be "hasty and shortsighted to plunge ahead with what may be the wrong dam at the wrong time, and quite literally, in the wrong place."

I ask unanimous consent that this perceptive editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Lewiston (Idaho) Morning Tribune, Mar. 30, 1969]

GUESSWORK ON THE MIDDLE SNAKE

With Pacific Northwest Power Co. announcing it is ready to resume its efforts to dam the Middle Snake, it is more imperative than ever that Congress declare a 10-year moratorium on development of that portion of the stream.

The Middle Snake must not be committed to what may be an obsolete option—hydroelectric generation—until at least two other more promising alternatives have been explored. That will take time.

And it is time that Idaho Sens. Frank Church, Democrat, and Len B. Jordan, Republican, are trying to buy with their proposed 10-year moratorium. Each of the two senators, however, is interested in a separate possibility for the stream.

Church has not closed his mind to other options, but he is leaning at this point toward the belief the stream should remain as it is—as close to its natural state as upstream regulation of the river by Idaho Power Co. dams will permit. The full Middle Snake from Hells Canyon Dam downstream to Lewiston may be worth perpetuating in its present form. But it is Hells Canyon, that awesome slice of Oregon and Idaho real estate, that would get its feet wet in a Middle Snake Dam. So that is currently the matter of most concern.

Jordan is interested in the moratorium for a different reason. He suspects that one day it may be highly desirable to dam that section of the river to initiate a pump-back storage system in which water is quite literally pumped back over dams. Thus the water would be used and reused, providing surplus water for several million new acres of parched land in southern Idaho and perhaps beyond.

Jordan would hesitate for 10 years to plunge forward with his plan until the major question of the fish runs can be settled. The senator believes it will be settled, one way or another within those 10 years, and he is probably correct. Either the fish will have been obliterated by the dams that are already in place today, or the fish biologists will have succeeded in their promising efforts to help the fish cope with man-made interference with their migration.

If fish runs have been developed that can cope with almost any dam—or if the fish runs have been destroyed—it won't make a great deal of difference (at least from the standpoint of fishing) where you build a dam on the Middle Snake. And, if that day comes, you might as well build at the site where your dam will catch the most water. That is below the mouth of the Salmon, rather than above it, where Pacific Northwest Power Co. hopes to build (originally for very responsible reasons).

PNP is going after a secondary site before it is decided whether the best one can be built.

If the day comes that Jordan foresees, when the fish problems have been removed as an issue and a hungry world needs the food production that would result from irrigating more of southern Idaho and eastern Oregon, then those who tend now to lean toward conservation of the stream in its present form will have to re-examine the situation. A free-flowing stream feeds the soul, but there may be then too many mouths to feed to permit the luxury of raw natural splendor. Development may become essential.

It would be foolish and short-sighted therefore to legislate at this moment the perpetual nondevelopment of the Middle Snake.

And it would be equally hasty and short-sighted to plunge ahead with what may be the wrong dam at the wrong time, and quite literally, in the wrong place.

Perhaps, if built, the PNP dam would actually serve the highest purpose. The officers of that firm could be correct in their guesses on what the future will demand. We could be wrong in our guess that leaving the stream as it is or developing it for agriculture would better serve.

That is the point: There is too much guesswork involved in rushing to judgment this very minute as PNP would have us do.

Church and Jordan offer the prudent course.—B.H.

THE PRESIDENT'S VIETNAM SPEECH

Mr. DODD. Mr. President, President Nixon's speech on Vietnam Wednesday night was the best on the subject that I have heard.

The President has now made it abundantly clear to Hanoi and the rest of the world that the United States wants nothing more in South Vietnam than to bring an end to this dreadful war. He emphasized once again that the people of South Vietnam should decide for themselves what their future will be.

Of course, he said much more than that. President Nixon spelled out in detail how this war could be ended. The President's proposals for the withdrawal of all non-South Vietnamese forces under international supervision, and for free elections, also under international auspices, deserve the full and complete support of all Americans. Indeed, it is our fervent hope that these proposals will be given careful consideration by Hanoi.

So I say in the most nonpartisan spirit that all our thanks must go in this instance to President Nixon. His speech must, indeed, have an impact on our enemies. I also believe that it will help us here at home, because it will certainly reunite people in the common purpose of finding a just peace.

Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled, "Speech Shows Nixon Realizes Consequences of a Surrender," written by Joseph Alsop, and published in this morning's Washington Post.

It is, I believe, an accurate assessment of what the world can expect in South Vietnam in the event of a Communist takeover.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SPEECH SHOWS NIXON REALIZES CONSEQUENCES OF A SURRENDER

(By Joseph Alsop)

In the President's study, quietly eloquent and common-sense speech about Viet-

nam, you could hear ghosts walking. To be specific, you could hear the ghosts of the 2000 dead of Hue.

The New Left in the U.S., and indeed a good many of the so-called media, can now summon indignation against almost anyone but the enemies of this country. This is perhaps why the Communists' monstrous crime in Hue has been so little noticed, with only two or three honorable exceptions.

During the Tet offensive, in brief, the Communists occupied much of Hue for a little more than three weeks. The occupied part of the little city had an original civil population of perhaps 80,000 men, women and children. One half or more of these people—probably more—managed to seep out between the lines in the confused early stages of the fighting.

Thus the Communists' potential victims numbered no more than 35,000 to 40,000 at most. Of these, they killed in cold blood at least 2000, old and young, men and women, and even little children. That may have actually been found in the mass graves in which the Communist high command buried these 2000, who were guilty of nothing except being suspected—and you can doubly underline "suspected"—of opposition to a Communist takeover.

In a grim story describing the reburial of 300 of the recently found dead by the Hue municipal authorities, Robert Kaiser of The Washington Post described how many of them had been beaten to death with clubs, that they did not have a whole bone in their bodies. Many more, said Kaiser, showed clear evidence of having been buried alive!

So now extrapolate, as our virtuous academic intellectuals so often say. Before Tet, Hue was the city in South Vietnam most disaffected from the government. It had very few Catholics, and none of those massacred in the mass graves of Hue were soldiers. Yet the Communists massacred on the order of 5 per cent-plus of the civil population they got briefly in their grip.

To extrapolate correctly, moreover, you must crank into the calculation South Vietnam's million men in uniform, and the million Catholics that the U.S. brought down from North Vietnam in 1954. Realistic extrapolation from what happened in Hue would therefore give a figure of at least a million South Vietnamese who would be doomed to prompt execution, in the event of a nationwide Communist takeover. And this is quite in line, in turn, with the blood bath that occurred in the North after the Communist takeover there.

A grave and sober consciousness of the consequences of an American surrender, disguised or otherwise, showed through in every line of President Nixon's speech. So did realism about the necessary terms of any acceptable settlement, as when he stressed the absolute need for North Vietnamese withdrawals from Cambodia and Laos as well as South Vietnam. And showing, too, was the courage to see through this hard, intractable problem.

The dead of Hue meanwhile symbolize, indeed in some sense define, the severe limitations on the President's freedom of action. Because he has so clear a view of the consequences, he cannot take the advice to give up that is pressed upon him by men like Sen. J. William Fulbright. (But he can, of course, ask these gentlemen, at a later date: "Do you want the blood of hundreds of thousands of innocents on your hands, and on your country's hands?")

The President, in short, cannot possibly accept anything less than the minimum he asked for: absolutely free self-determination, with no threat of northern re-invasion, for the people of South Vietnam. Hanoi knows perfectly well that only the tiniest minority of South Vietnamese would freely choose a Communist regime. Hence Hanoi is certainly not ready, as yet, to give the President

anything like the minimum he must insist upon.

That is why the President warned that an early end of the war was not in sight. Yet Hanoi's problems, mercifully, are a hundred times more painful than Saigon's problems, or indeed than the President's problems. Above all, Hanoi now has to worry about the dreadful and continuing manpower drain on the North, and worse still, about the potential crack-up of large chunks of the VC structure in the South.

So the President's best posture is not merely to look resolute, but also to be resolute. In his speech, he was very resolute indeed. Hanoi, therefore, now has solid knowledge of the President's purposes—which are very different from the guff that has been so widely written about his purposes.

BIG THICKET MAY VANISH IN 3 YEARS UNLESS BIG THICKET NATIONAL PARK BILL, S. 4, IS PASSED VERY SOON, FORT WORTH STAR TELEGRAM WARNS

Mr. YARBOROUGH. Mr. President, we are rapidly running out of time in which to act to save some portion of the beautiful Big Thicket in southeast Texas. A hundred years ago, the Big Thicket covered 3½ million acres. Today, fewer than 300,000 acres remain—less than 10 percent of the original acreage.

Mr. Terry Flemmons of the Fort Worth Star Telegram has written a disturbing article about the rapid disappearance of the remaining portions of the Big Thicket. He ably describes the unique beauty of the Thicket area, quoting various scientists and conservationists regarding the value of the Big Thicket. I am afraid that unless the Senate moves now to consider S. 4, my bill to establish a Big Thicket National Park of not less than 100,000 acres, Mr. Flemmons' somber predictions about the future of the area will come true.

I ask unanimous consent that the article entitled, "Texas' Big Thicket: A Fading Wonder," published in the Sunday, January 19, 1969, edition of the Fort Worth Star Telegram be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Fort Worth Star-Telegram, Jan. 19, 1969]

TEXAS' BIG THICKET: A FADING WONDER (By Jerry Flemmons)

To view the remains of what we could have had, you drive east from Huntsville to Livingston, to Woodville, south to Kountze, west to Rye through Votaw and Honey Island.

What you see are the bits and pieces of Texas' Big Thicket, shards of a lost ecological empire. Once a rare and wonderful place, the Big Thicket today is shattered tragedy.

A hundred years ago the Big Thicket covered three million acres. Today fewer than 300,000 acres remain and conservationists declare the existing forest is disappearing at the rate of 50 acres daily.

There even are those who claim that of the 3 million acres, actually only a four-acre tract along a stream called Beech Creek, punctuated with 35-foot-tall magnolia and beech trees, is the true surviving Big Thicket.

And even that remnant is doomed, because early in 1968 loggers cut away surrounding trees from the virgin area and the magnolias

and beeches now will wear away without their protection.

It covered 11 counties from Nacogdoches to Beaumont and from the Sabine to the Trinity River. That was the Big Thicket. Take a drop-let of mercury and strike it with a hammer. The mercury separates and forms tinier, isolated beads. The Big Thicket is like that today, chopped and channeled, hacked and cross-patched.

The Big Thicket, what remains of it, is a unique treasure for Texas. Quite probably no other spot in the world resembles the thicket. It is there that three distinct climatic zones live in harmony. For subtropic proof there are magnolia, palmetto palms and more than 20 types of wild orchids. Yet mesquite and cactus—desert plants—are nearby. In addition there is plant life characteristic to the Appalachian Mountains.

A botanical wonder, the Big Thicket's rhododendrons, and azaleas, great banks of wild honeysuckle and verbena, spider lily and wild wisteria grow in profusion everywhere they are allowed peace.

There are five carnivorous plants—that is, plants which catch and eat insects and the like—known in the world. Four, the bog violet, sundew, bladderwort and pitcher plant, are native to the Big Thicket.

Scientists speak of the Big Thicket as a "region of critical speculation." They mean that the climate, soil and other botanical elements combine to cause environmental change within plants.

More than 100 different trees and plants grow in the thicket. Something over 300 species of birds nest in the forests. The ivory-billed woodpecker, for instance, was seen there recently after naturalists believed it to have been extinct for more than three decades.

Texas Author Mary Lasswell has called the thicket a "... giant garden that is being looted and despoiled."

Sen. Ralph Yarborough, one of the few politicians who has attempted to save the thicket, maintains it is Texas' "last true wilderness."

Most conservationists blame big business—the eternal villains in matters such as these—for the probable loss of Big Thicket's valuable presence.

It is true. Loggers have ripped away most larger trees, particularly the hardwoods (because more money is made on pine than hardwoods, such as Cypress and Magnolia, which shut out the pine).

Bulldozed roads, in spots, run in a straight line with no care for any botanical prizes that may have lain in their paths. Supreme Court Justice William Douglas, in his angry book, "Farewell to Texas: A Vanishing Wilderness," tells of a bulldozed road, relating that "... on the road's edge dozens of magnolia lay freshly cut ... they were not cut for flooring, for paneling or for railroad ties. They were cut for sheer destruction and the trunks lay rotting."

Rights-of-way for pipelines are stripped into forest lands and salt water overflows from oil operations and pollutes streams, killing fish. A lumber company recently sprayed its hardwoods with a defoliant and killed an entire rookery—hundreds of birds—of herons, egrets and their young.

Landdevelopers are subdividing remaining forest lands, raising houses and clearing away giant trees.

The conservationists have tried for 30 years to save the Big Thicket. Most recently was a bill, introduced by Yarborough, asking that about 75,000 acres be set aside as a national park. Although supported by the Lone Star chapter of the Sierra Club, the Wilderness Society and the Audubon Society, the bill simply died from lack of airing. Another bill, hopefully, will be pushed in the current session of Congress.

The national park proposal is matched against a compromise offer suggested by the

U.S. Park Service which has asked for a 35,500 acre national monument. Lumber companies, not unexpectedly, like this plan best and, as recently as six months ago, had postponed cutting in the suggested monument area.

To the companies' credit there is much local opposition to either a national park or monument. Lumber and oil are major occupations in the Big Thicket and employees, naturally, fear their jobs might be wiped out with establishment of public lands. (The U.S. Park Service, however, claims tourism would create more money and jobs than now are maintained by either lumber and oil.)

Others fear their own land would be taken for portions of the national areas which, undoubtedly, they would. They fear taxes would go up on homesteads if the valuable lumber lands were taken away.

It seems a mute question. Yarborough maintains 35,000 acres "won't protect the ecology of the Big Thicket."

The U.S. Park Service argues that it is too late to save larger pieces of the thicket.

Some scientists support the national park plan, theorizing that through careful protection the Big Thicket would come back to its original state. The climate, which man can't totally destroy, created the Big Thicket once and it can do it again.

Conservationists have failed to have anyone listen to them for three decades. It is doubtful that many will lift an ear to hear them now.

What remains of the Big Thicket—the bits and pieces—will be gone entirely within three years, they say.

If that is true, perhaps a national monument would be more apt. A monument is tribute to a dead issue and lost cause and seems to be the fate of Texas' Big Thicket.

THE PRESIDENT'S SPEECH ON VIETNAM

Mr. TYDINGS, Mr. President, President Nixon's address Wednesday night on Vietnam indicated a flexibility and restraint which could contribute materially to hastening an end to the war.

I was disappointed that the speech contained no mention of the need for internal reform in the Government of South Vietnam. The President did seem to acknowledge the civil nature of the war in the South. But he did not focus on the corruption and tyranny in the South Vietnamese Government which has been the major contribution to Vietcong political strength in the South and a basic cause of the war itself. Hopefully, the President's silence on this subject does not necessarily indicate he will ignore the need for an end to corruption, terror, and intolerance on the part of the South Vietnamese Government if that government is to survive a U.S. withdrawal.

But, on the whole, the President's speech argued persuasively for time to pursue his plans for ending the conflict. While I will not neglect my responsibility to speak out when necessary on the war, I believe he should be given that time.

But let us be clear about two things. First, this has been the third most costly war in our history, the longest and the most unpopular. It has taken 40,000 American lives and wounded 222,000 other American boys. It has split our own Nation and wrought havoc on our economy. And it continues to take 200 American lives and wound 600 men a week. This carnage must be concluded.

At the same time, however, those with whom peace must be made—the North

Vietnamese and the Vietcong—must recognize, as the President warned last night, that the American patience is not unlimited. The "other side" would be foolish indeed to intensify the fighting or to mistake the President's flexibility for timidity. Incredibly tragic as further escalation of the war would be, the Vietcong and North Vietnam will make a catastrophic blunder if they believe they can achieve more on the battlefield than at the conference table.

Wednesday night the President eloquently summarized the tragedy of this war and the urgency for its solution when he said:

I have seen the ugly face of war in Viet Nam. I have visited the wounded in field hospitals—American boys, South Vietnamese boys, North Vietnamese boys. They were different in many ways—the color of their skins, their religions, their race. Some were enemies, some were friends.

But the differences were small compared with how they were alike. They were brave men and they were so young. Their lives—their dreams for the future had been shattered by a war over which they had no control.

With all of the moral authority of the office which I hold, I say that America could have no greater and prouder role than to help to end this war in a way which will bring nearer that day in which we can have a world order in which young men can grow up in peace and friendship.

I say today let us have the further patience the President implicitly sought last night. Let us give him a chance to end this awful war.

THE PRESIDENT LEADS THE WAY ON THE VIETNAM ISSUE

Mr. BENNETT, Mr. President, since the Senate was not in session on Thursday, the day following President Nixon's statement on the Vietnamese war, we did not have an opportunity to comment on his speech in the Senate. I should like my feelings on the matter to become an official part of the RECORD, so I ask unanimous consent that the statement that I issued on Wednesday night at the request of the news media be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WALLACE F. BENNETT, REPUBLICAN, UTAH, AFTER PRESIDENT NIXON'S VIETNAM SPEECH, MAY 14, 1969

With his very significant statement Wednesday night President Nixon has seized for the United States the initiative for peace and placed the burden of a realistic response upon the Communists.

The President's plan was specific yet flexible. It was comprehensive yet very clear. It was conciliatory yet firm. It was generous yet it indicated the United States will not tolerate defeat.

The proposal frankly recognizes that much in the Viet Nam war is political. That is why the President offers regulated and mutual withdrawal. His plan also seeks to assure Cambodia and Laos about their future. I found his proposal creative: the time is now for building the international supervisory body that the President has bodily offered.

I strongly urge the American people now to unite behind the President. If we cannot get together on a mutual withdrawal and a negotiated settlement allowing a free choice in South Viet Nam, what hope do we have?

To the advocates of an immediate unilateral withdrawal, I call on them to give the President and his plan a chance. It is time to close ranks and deny Hanoi the privilege it has had of exploiting our differences.

ECONOMICS OF AGING: III

Mr. WILLIAMS of New Jersey. Mr. President, the Senate Special Committee on Aging recently held 2 days of hearings on the "Economics of Aging." We heard from university specialists and Government experts; we heard from the representatives of leading senior citizens' organizations; we heard from economists, social scientists, and business analysts. All of these witnesses gave testimony which underscored the grim conclusions of our committee's earlier task force report on the fiscal problems of the elderly.

In that report, we noted—

Three out of ten people 65 and older—in contrast to one in nine younger people—were living in poverty in 1966, yet many of these aged people did not become poor until they became old.

During the days prior to the hearings, we received eloquent testimony—through cards and letters—from hundreds of older men and women. Their experiences, as conveyed through their letters, add up to yet another dramatic demonstration of the seriousness of the economic problems facing the aged and aging.

A letter written by a 76-year-old woman from Swarthmore, Pa., makes a telling point with these words:

I am one of those older people, living alone (will reach the age of 77 in three weeks) who has become poor since becoming old! Unable to work any longer, I am trying to get along on my Social Security of \$55 per month income, besides drawing a few dollars from a fast-dwindling nest-egg in the bank and an occasional fee from private French teaching and some baby-sitting, to meet the ever increasing cost of living. I am however, aware of the fact that some elderly people are worse off than I, and for those, drawing less than \$80 or \$100 a month, the name of Social Security has become a paradox indeed!

A number of letters have addressed themselves to the inadequacy of social security benefits. As reported in the task force study—

The Social Security system has failed to keep up with the rising income needs of the aged.

The following remarks from a letter written by a Los Angeles resident dramatically illustrate that point:

We beg of you to do something better than a 7% increase in Social Security benefits. What can you do with a 7% increase when our rents have increased 10%, groceries up 4% last month, when a lb. of coffee and carton of milk is \$1.00, a loaf of bread 45c cereals are 55 to 57c a box, and then only ¾ full. When we were working and starting savings accounts we never dreamed it would cost this much to live.

I will repeat what I said in the preface to the task force report:

Such questions cannot be answered simply by adding a few dollars to monthly social security payments, or by making modest improvements in private pension plans. What is needed now is an honest, hard look at today's inadequacies and failures in light of trends now clearly visible.

MACHIASPORT

Mr. SCHWEIKER. Mr. President, on behalf of the Senator from Massachusetts (Mr. BROOKE), I ask unanimous consent to have printed in the RECORD a statement he had prepared for delivery today.

There being no objection, the statement by Senator BROOKE was ordered to be printed in the RECORD, as follows:

Mr. BROOKE. Mr. President, I am informed that on 9 p.m., Tuesday, May 20, television station WETA will present a color documentary entitled "Machiasport, Conflict Over Oil."

This program has already been shown by several educational television stations around the country and has received great praise for its fair and balanced analysis of the debate over the establishment of a foreign trade zone and oil refinery at Machiasport, Maine. With its showing in the Washington area on Tuesday, I hope all that have expressed an interest in this vital matter will have the opportunity to view this program.

"CRIMINAL INJURIES COMPENSATION: TIME FOR ACTION"—AN ARTICLE FROM THE GEORGETOWN LAW WEEKLY

Mr. YARBOROUGH. Mr. President, earlier this year, the Georgetown Law Weekly, a well-written weekly law journal published by the students at the Georgetown Law Center, asked me to prepare an article on compensation to innocent victims of crime. My bill, S. 9, deals with this subject.

This article came out in the May 5 edition of that fine paper. I wish to call the attention of the Senate to the title of the article, "Criminal Injuries Compensation: Time for Action." I cannot stress too strongly the importance of action on this measure to the people of America. It is time for action in this very vital field.

There is too much crime in this Nation already and it is steadily rising. While concern about the criminal is quite proper and understandable, we simply cannot afford to continue to ignore the victims of these crimes.

Mr. President, the time for action in this field is now. I ask unanimous consent that the text of my article entitled, "Criminal Injuries Compensation: Time for Action," which appeared in the May 5 edition of the Georgetown Law Weekly, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CRIMINAL INJURIES COMPENSATION: TIME FOR ACTION

(By Senator RALPH YARBOROUGH)

(NOTE.—Senator RALPH W. YARBOROUGH was first elected to the United States Senate in a special 1957 election. He is now the senior Senator from Texas having been re-elected during the two succeeding regular election contests. Yarbrough, a noted attorney before his successful political career, was a former judge, assistant state attorney general, lecturer at the University of Texas Law School, member and former director of the State Bar of Texas and active member of many leading professional law associations.)

As anyone who bothers to pick up a newspaper knows, one of the greatest concerns of many of our people today is the rapidly rising crime rate. The most recent figures furnished

me by the FBI indicate that all crimes of violence were up by 19% in 1968 over 1967. Included in this figure were crimes such as murder (up 14%), armed robbery (up 34%), assault with a gun (up 24%), and similar increases in all other categories. Obviously, this is a matter of great importance to us all.

In my opinion, though, too many people are interested only in the capture and punishment of the criminal. We hear calls for increasing Federal expenditures for all types of crime-fighting activities—larger police forces, more courts, more modern penitentiaries, more effective rehabilitation of law-breakers.

Not only that, but there is a growing concern for care of criminals after their arrest and during their incarceration. And quite rightly so, for we cannot permit callous and inhuman treatment of any of our fellow citizens—even law-breakers.

CONCERN WITH VICTIMS OF CRIME

But, all of this concern, praiseworthy though it may be, fails to take cognizance of the bifaceted nature of every crime. In each instance when a crime occurs, two parties are involved—the criminal and his victim. And, unfortunately I find that in many cases, the victim becomes the forgotten man. He may have the personal satisfaction of seeing the man who harmed him punished, but he is almost never compensated for the harm done to him.

There are two ironies here. First, at the very time when we appear to be devoting greater attention to crime detection and prevention and the rehabilitation of the criminal, the victim is being neglected and the enormity of this neglect is magnified every day it is continued. Second, the victims of crime are usually those who can least afford additional burdens and the perpetrators of violent crimes are usually those who have the least with which to compensate their victims. Therefore, the victim usually goes uncompensated.

My personal interest in and concern with this unfortunate anomaly began over thirty years ago when I served as a District Judge in Texas. Finally, in 1965, I introduced a bill in the 89th Congress to rectify this situation. This was the first bill of its sort ever introduced in the United States Congress.

Since that time, support for such a proposal has grown steadily and in December of 1968, the National Commission on the Causes and Prevention of Violence conducted an International Conference on this subject. This conference was held in Los Angeles at the University of Southern California. Moreover, other nations—New Zealand and Great Britain—and five states in this country—Massachusetts, California, New York, Maryland, and Hawaii—have written such a provision into their laws. I feel that it is now time for the United States Congress to act in this field.

BILL TO COMPENSATE VICTIMS

What the bill I have introduced in the 91st Congress on this subject, S. 9, calls for is the creation of a Federal Violent Crimes Commission. This Commission would be empowered to consider claims, examine evidence, and provide up to \$25,000 compensation for individuals injured by crimes of violence. The provision of this bill would apply only to those areas in which the Federal Government exercises general police power—The District of Columbia and the special maritime and territorial jurisdictions of the United States.

I agree with The New York Times which pointed out in an editorial on January 18, 1966: "Since the maintenance of law and order is a basic responsibility of the State, it follows logically that the innocent victims of violent crimes are entitled to compensation from the State." And with Justice Arthur J. Goldberg (now no longer on the Supreme Court) who said in February, 1964:

"The victim of a robbery or an assault has

been denied the 'protection' of the laws in a very real sense, and society should assume some responsibility for making him whole."

Moreover, our society today obliges its citizens to go about unarmed and creates through a variety of laws and institutions the expectation that the citizen will be protected. When society fails in its assumed duty to protect its citizens, society ought to have the responsibility for compensating the innocent victim for his personal injuries.

I feel that the importance of this bill cannot be read alone in the dollars and cents which it would provide to the victims of crimes of violence—important as this goal is. This bill records for the American people a milestone in the quest for a humane and socially responsible treatment of innocent people brutalized by acts of violence. With this bill, we can demonstrate that a wealthy nation which can spend millions to bring justice to the perpetrators of crime is not indifferent to the light of their victims.

It is important, though, to protect both the rights of the victim and the rights of the criminal and for this reason, I have taken great care to see to it that nothing in this bill would impair or alter these rights. First, the victim's rights to seek civil remedies for wrongs done him. Compensation provided by the Commission would be in the nature of the fulfillment of a duty which runs between the victim and the State. The rights and responsibilities running between the criminal and the victim would be unaffected. Moreover, since the bill provides for *ex gratia* reward, it will not create a right not otherwise available to bring a civil action against the Government in other proceedings.

RIGHTS OF ACCUSED

Proceedings before the Commission would not be allowed to prejudice the rights of the accused. The primary interest in these proceedings is in the victim, not the criminal. If, on the basis of the evidence the Commission decides that the victim has been in fact criminally injured, the absence of the unapprehended criminal will not bar the victim's claim or color the proceedings. Furthermore, the finding by the Commission in favor of the victim would not be used against the criminal in proceedings against him.

CONCLUSION

In my opinion, the time has come for us to take this first important step in a neglected area of the law. We have collectively created an environment in which crime flourishes. Although we can sincerely dedicate ourselves to the reduction or even the eventual elimination of crime, we ought not to ask the innocent victim to wait upon our labors. We have missed the mark by not devoting concern to the innocent victims of crime equal to that we have given the criminal. The victim needs our help through compensation. We can give him no less.

HEALTH CARE FOR THE ELDERLY—AS PART OF HEALTH CARE FOR ALL

Mr. WILLIAMS of New Jersey. Mr. President, the American College of Nursing Home Administrators has long been a persuasive and persistent force for higher standards of care in long-term care institutions. During the current dispute over proposed standards for skilled nursing homes under Medicaid, in particular, the ACNHA has taken a stalwart stand against dilution of requirements sought in legislation sponsored by the senator from Utah (Mr. Moss), which finally became a part of the Social Security Amendments of 1967.

Senator Moss participated in an ACNHA Forum on Health Care and So-

ciety in Chicago on April 28. His remarks at that time were influenced partially by his role as chairman of the Subcommittee on Long-Term Care in the Senate Special Committee on Aging, of which I am chairman. But he also attempted to show that good health care for the elderly should not be regarded as an end in itself, but as one of the built-in components of good health care for all people of this Nation.

I ask unanimous consent that Senator Moss' remarks be reprinted in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

HEALTH CARE AND THE ROLE OF THE FEDERAL GOVERNMENT

(An address by Hon. FRANK MOSS, a Senator from Utah, at the American College of Nursing Home Administrator's forum, Chicago, Ill., April 28)

Sister Ambrosette was good enough to provide a suggested topic for this talk, and that topic is "Health Care and the Role of the Federal Government."

As she said, this "is deliberately a subject of wide latitude", one in which I could "roam the length and breadth" of many subjects related to that theme.

Well, I will roam somewhat here today because I believe that the Federal role in health care is still ill-defined, even though we have committed billions of dollars for programs that either help provide treatment for people or help them pay for treatment.

And it is a timely topic—it couldn't be more up to the minute.

There is no doubt in my mind that the \$50 billion a year health industry will receive—during this year and possibly two or three more to come—the most intensive scrutiny ever yet paid to it by the Congress of the United States.

It is clear that the Senate Finance Committee, for example, is making far-reaching preparations for a searching re-evaluation of the Medicare and Medicaid programs.

It is clear, too, that other units of the Congress will give careful—and perhaps pugnacious—attention to the many health programs that come up for renewal this year, including Hill-Burton, Regional Medical Programs, and so on.

And finally, it is quite clear that the new Administration is of a mind and a mood to change priorities in and perhaps even purposes of, existing programs. The Nixon proposals will certainly be questioned by the Congress; our reappraisal may not be agonizing, but it certainly should be thorough and we shouldn't be afraid to ask tough questions.

Why the Congressional concern?

A major reason, of course, is simply that health care costs are going up, and everyone is worried about them.

But, I think another force is at work, too. I believe that the people of our nation are becoming more and more aware of the deficiencies in the delivery of health care today.

We know more now, for example, than we have ever known before about poverty in our urban and rural areas, and many Americans are appalled by the widespread neglect of health among our poor, young and old.

We are also more aware about the heavy demands put upon physicians and health care systems as population rises and suburbs drain cities of people and practitioners.

And, of course, adding to all the other pressures is the growing demand by more people for more and better health services.

That is true of the widow who has just qualified for Medicare.

That is true of the union member who has just received wider health benefits under a new labor-management contract.

And it is true of the middle-and-upper income parents who want far more in the way of health care for their children than they themselves had when they were young.

What will come out of these dual pressures—rising costs and rising expectations?

If government, health practitioners, and the general public can work together for the enlightened self-interest of all, we could well make major advances in providing high quality care to all. Costs may be higher, but we would be more certain of getting our money's worth.

I choose to be optimistic in my appraisal of the prospects simply because I shudder to think of what will happen if we permit today's unresolved problems to become worse. And I think that there is a good possibility that our concern about health economics may well be just the goal we need to make changes on the scale that is needed.

A witness at a Congressional hearing* made the point very well when he said:

"The problem of rising costs is going to be one of the strongest educational instruments to clarify that our system of providing health care is not as efficient and effective as it could be.

"Throughout the whole history of medical care developments in the world, the problem of rising costs has stimulated improved patterns of organization."

If the witness was right, and the amount of improvement is proportionate to the rise in costs then we should be in for a period of unparalleled change for the better.

I won't take the time of this audience to recite the statistics of rising costs, but I will mention just a few facts that have caught my eye in recent weeks:

The price of medical services has risen far faster than prices.

The Consumer Price Index for all items went up from 112.9 in June 1966 to 123.7 in December 1968, but for medical care it went up from 127. to 149.

Seen from a different perspective it is equally clear that the medical care cost rise is accelerating. A survey made last year shows that the medical care index rose at a rate of 4.7 per cent a year during the 1950's, dropped during the early 1960's to 2.6 annually, but then increased to 6.6 per cent in 1966 and 6.4 per cent in 1967.

And so, from the end of World War II to the end of 1967, the medical care index was 125 per cent, compared to only 61 per cent for all consumer items.

As you undoubtedly know, the biggest increase in that period occurred in hospital daily service charges, which rose 441 per cent. The rise in physicians' fees was 107 per cent.

The dollars and cents figures are bad enough, but there is, as I suggested before, far more to the health care problems of today than economics. We are also faced by deep-rooted organizational problems that persist and too often intensify.

Many of you know about the problems of the inner cities. You know of entire neighborhoods in which there are no physicians or nurses. You know of the long waits at clinics and you know that many clinics are miles away from people most in need of them, and that many people have no transportation to get to the help they should have. It's no wonder many people—the elderly, for example, or the young mother who can't get her youngster across town to the clinic—grow discouraged and accept "feeling poorly" as a way of life.

Those of you from rural sectors know of the almost unbelievable isolation of many individuals and families and the difficulty in providing specialized help.

However distressing the problems of urban

and rural poor are, however, such problems are not limited to people with low income. The National Advisory Commission on Health Manpower, in its 1967 report, summed up a great deal when it said:

"There is widespread and serious talk of a 'health crisis' in the country, a crisis which is believed to be upon us now or just around the corner. The indicators of such a crisis are evident to us as Commission members and private citizens. Long delays to see a physician for routine care; lengthy periods spent in the well-named 'waiting room', and then hurried and sometimes impersonal attention in a limited appointment time; difficulty in obtaining care on nights and weekends, except through hospital emergency rooms; unavailability of beds in one hospital while some beds are empty in another; reduction of hospital services because of a lack of nurses; needless duplication of certain sophisticated services . . . and obsolete hospitals in our major cities.

"There is a crisis in American health care. The intuition of the average citizen has a foundation in fact. He senses the contradiction of increasing employment of health manpower and decreasing personal attention to patients."

Having presented this indictment to you, what plan do I have for federal action that will solve all the problems?

The answer, of course, is that no single plan will meet all contingencies, and no government—even the great federal establishment of today—is big enough to draft such a plan, much less implement it.

Instead of talking to you about an action plan, I'd like to discuss instead certain desirable trends that could be encouraged in one way or another by appropriate federal initiative or response to leadership from experts in the health field and from interested laymen.

The first trend I would like to see is a greater federal commitment to preventive medicine.

No one knows better than you the total cost of chronic disease in our nation.

The dollar cost is staggering: about \$57 billion a year.

Now we spend billions upon billions every year to treat disease, but we spend only a little over \$3 billion a year to prevent illness.

And yet, the greatest return for our health money would undoubtedly be yielded by preventive medicine.

We should have more multiphasic health screening programs.

We should have more educational programs that really get across vital information to the consumer of health services.

We should have more personnel skilled in "health maintenance" techniques that will take part of the burden off physicians and other professionals—highly trained individuals who should not have to take precious minutes or hours for routine tasks that could be done by others.

The second trend I would like to see is closely related to the first: we should be more inventive in providing manpower and resources that will keep people out of institutions or speed them toward discharge if they are in institutions and if they are dischargeable.

The federal government should be doing far more than it now is doing, for example, to provide some health aides: women or men who could provide services needed by persons who are semi-independent and who could stay at home if they had a little help.

Federal agencies should be doing far more, too, to provide other kinds of trained personnel in areas of vital need: assistants of all kinds, social worker aides who can spot potential health problems and report them to physicians in time for positive action; and much more.

A third trend—and this is one that the Federal level should insist upon—would be

*Dr. Milton Roemer, Professor of Public Health, UCLA, at hearing on "Costs and Delivery of Health Services to Older Americans", June 22, 1967.

greater experimentation in setting new standards of care and in providing new means of delivery.

I was encouraged by the establishment of the National Center for Health Services Research and Development last May. I think that it has a major responsibility for performing research, demonstration projects, and evaluation of the organization of health services for the total population. But I am also alert to the possibility that an underfunded Center—or a Center which is given too many studies to make without clearcut objectives in areas of greatest need—could conceivably be worse than no center at all. You and I and everyone concerned about health in this nation should keep close watch on the work under way at the Center.

Despite my warning, my major reaction to the Center is a hopeful one, just as I am hopeful about the cost-cutting experiments authorized under the Social Security amendments of 1967. These experiments are to develop "incentives for economy while maintaining or improving quality in the provision of health service in connection with reimbursements under such programs as Medicare."

Here is a clearcut example of the potential long-range effect of Medicare in terms of improving quality of services. We must be bold in insisting upon well-considered experiments from which we can shape a health care system in which patients, practitioners, and people in need only of health maintenance services can have satisfying relationships.

PLANS FOR THE SUBCOMMITTEE ON LONG-TERM CARE

My talk today thus far, as you have seen, has indeed "roamed," but for its remainder, I would like to talk about one specialized area of health care, an area of mutual interest to all in this auditorium today.

I'm referring to the "long-term care institution," and that of course is a growth category today. We have nursing homes, extended care facilities, intermediate care facilities, homes for the aged, and others that look suspiciously like motels.

Many in this audience may know that I serve as Chairman of the Subcommittee on Long-Term Care in the Senate Special Committee on Aging. I was somewhat startled a few days ago when I looked at the transcript of the first hearing I conducted for that Subcommittee. The reason for my surprise was the date: May 5, 1964.

Almost 5 years ago to the day. And what was my major declaration half a decade ago? I checked the transcript and found this: "... From the point of view of the nursing home field, our programs are a patchwork. The Federal Government lacks a coherent policy toward the long-term care field and toward its role in assisting this field to develop. The task of the Subcommittee, then, is to begin the long and difficult process of rethinking our Federal policies in this field."

That statement was made in Washington, D.C., at the very beginning of our study. At hearings which took us into seven other cities during 1965 and 1966, we discovered that my initial declaration was somewhat of an understatement; and we discovered conditions and problems that were shocking and infuriating:

Neglect of patients.

Firetraps that somehow stayed in business even after official warnings were given.

Services and drugs paid for with government funds—but not provided to persons desperately in need of them.

And much more.

And so I introduced legislation calling for higher standards in nursing homes receiving Medicaid funds. Senator Edward Kennedy, who took an active part in the hearings, introduced companion legislation calling for licensing of administrators of nursing homes supported by Federal funds.

As you know so well, both measures passed as provisions of the Social Security Amendments of 1967.

Over a year later, however, I find that there was an attempt early this year to water down the new standards for which I asked. Fortunately there was a forceful outcry when word leaked out. Sister Ambrosette was especially informative and emphatic, and I appreciate her concern and her assistance. We are still not yet out of danger, and the battle for new standards goes on.

With threat to my legislation very much in mind, I have been giving some thought of late to conducting a new round of hearings by the Subcommittee on Long-Term Care.

Our studies in 1964 and 1965 were primarily concerned with—as the title of the hearings expressed it—"Conditions and Problems in the Nation's Nursing Homes."

The hearings I now contemplate would be called "Trends in Long-Term Care."

We will, of course, deal with problems. Unfortunately problems abound. But it seems to me that we should now try to focus on the long-range development of long-term care, and to discuss that we would have to ask far-reaching questions:

What is being done in the "model" nursing homes—those with far-sighted innovations—that could be applied elsewhere?

What more can be done for rehabilitation of nursing home patients, in terms of mental outlook as well as physical restructuring?

What are the merits and possible trouble areas in the trend toward chain ownership of "extended treatment" centers?

What relationships should nursing homes have with other health facilities in a community, and what mechanisms should be developed for long-term planning?

What has to be done to make Medicare and Medicaid more effective in developing higher standards of care?

You probably could list a great many other questions right here on the spot. I hope you will feel free to make suggestions in the very next mail about matters that could come up for discussion at our hearings.

In the nursing home field, as in so many others related to health, we face a period of growth and problems caused by growth.

In the face of that growth, it becomes all-the-more important that the budget cuts now under discussion are surgical rather than crippling.

President Nixon's budget, submitted on April 15, cut \$267 million from Medicaid; \$104 million from Hill-Burton hospital construction grants; \$22 million from Regional medical program authority; and \$28 million in research programs conducted by the National Institutes of Health.

At a time of cutbacks caused by commitments throughout the world and here at home, the Congress—it seems to me—has a special duty to examine all proposed retrenchment with a highly objective eye and attitude.

We have a responsibility to be constructive. We have the duty to be alert.

I am sure that, with the help of you and others who share an interest in the health and well-being of our population, we can do far more than merely hold the line against potential dangers.

We can also use this period of intense reevaluation for positive action, imaginative innovation, and—always—an insistence that quality of health service can go only up, and not down.

EDUCATION SHOULD HAVE A HIGH PRIORITY IN FUNDING

Mr. YARBOROUGH. Mr. President, my attention has been drawn to a helpful series of tables which appeared on

pages 22 to 25 of the April issue of *American Education*, a publication of the Office of Education.

The article is entitled "State Allotments for Funded Programs, Fiscal Year 1969" and sets forth the State allotments for each program administered by the U.S. Office of Education.

This is helpful information, since we will later this session be considering fiscal year 1970 funding of educational programs carried in the Labor-HEW appropriation bill. We all know that there is a keen and growing interest in the degree to which programs will be funded on the part of members of the educational community. These people must make their plans for the operation of their educational systems, taking into consideration the degree to which the Federal funds may be available for their use. As a further service to them, I have asked Commissioner of Education James Allen, to provide me with a breakdown, contrasting and comparing the figures on these fiscal year 1969 tables, which are hereinafter appended, with those which would be in effect if the revised budget estimates for fiscal year 1970 were to be appropriated. In addition, I have also asked the Commissioner to provide me with the comparable figures for fiscal year 1970 which would be in effect if the full authorization amounts were to be appropriated for each of these programs. The 1970 tables are not yet available.

When I receive these figures, I propose to place them before the Senate for its information. I feel that each of us needs to know the implications of our funding patterns.

Let me illustrate by an example which affects the operations of each of our State departments of education.

The curtailment under title II ESEA, the school library support title for fiscal year 1970, means that \$50,000,000 expended for fiscal year 1969 State operations will not again be available unless Congress acts to provide funds in the HEW appropriations bill. If the \$50,000,000 is not appropriated, administrative positions funded under it will be eliminated.

In similar fashion, a personal services impact at the State level could follow the elimination of the \$78,740,000 available in fiscal year 1969 for title III NDEA State operations, the \$17,000,000 elimination of the title V-A guidance counseling and testing functions, and the 30-percent reduction in the title III ESEA supplementary centers and services programs funded in fiscal year 1969 at \$164,876,000. All of these eliminations were recommended in the Nixon budget.

We need to know quickly about these matters and others.

Mr. President, it is for these reasons that I ask unanimous consent that the tables to which I have alluded be printed in the *Record* at the conclusion of my remarks.

I am indebted to the Council for Exceptional Children for a discussion of the impact of the proposals for special education and for two very helpful tables which the council developed for its membership. I would hope that every

educational association would, in a similar manner, analyze the situation and provide advice related to its specific problems to those of us who serve in Congress and who must take the responsibility of providing the funds to carry out the programs which we, through our authorizing statutes, have decided to be in the national interest.

Mr. President, when President Lincoln signed the Morrill Laurel-Grant College Act over a century ago, he crystallized, through the establishment of the land-grant university system, the placement of educational support as a legitimate and necessary national purpose for the investment of Federal funds.

That priority of purpose has been ratified ever since, particularly in recent decades, under Presidents of both major national parties.

The time has come for us to follow through by putting up the necessary money to do the job that Congress decided ought to be done.

I ask unanimous consent that the explanatory materials developed by the Council for Exceptional Children and the tables previously referred to be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

FISCAL YEAR 1970 APPROPRIATIONS FOR EDUCATIONAL IMPROVEMENT OF THE HANDICAPPED

In January, 1969, before leaving office, President Lyndon Johnson presented the proposed budget of the United States to the Congress and thus began the yearly process of hearings and Congressional consideration to determine the amount of fiscal resources that will be devoted to various federal programs. The budget is a very broad and complex document; its billions of dollars stagger the imagination. However, within its context is a small line item titled "Educational Improvement of the Handicapped." It is this small line item that provides the main source of federal assistance to programs for handicapped children.

In 1958, the Congress passed Public Law 85-926 to prepare personnel to teach handicapped children. Since that date Congress has become increasingly active and has established over eleven new programs for the education of the handicapped. In 1958 appropriations in this area were less than one million dollars. Today the figure is \$79 million.

However, this progress is tempered by the fact that two-thirds of the over five million handicapped children are presently not receiving special education services. Federal programs have helped, but the task is still great. The failure of the budget proposals for fiscal year 1970 to significantly increase funds for these programs severely threatens their growth.

Attached you will find a breakdown of the 1970 budget requests for "Educational Improvement of the Handicapped" showing the relationships between these requests and their authorizations. You should note that an authorization represents an indication of the sum of money that the Congress when passing the law felt was necessary to assure its effectiveness. There is usually a gap between authorization and appropriation.

For example, the budget request for fiscal year 1970 for all of the Elementary and Secondary Education Act amounts to 51.4% of the sums authorized, while the budget request for "Educational Improvement of the Handicapped" is only 27% of the amount authorized. The distinction between authorization and appropriation is important to

consider carefully since many times the Administration has argued that programs for the handicapped have had consistent increases while other programs have been held to previous year's levels. For example, this year's budget request for "Educational Improvement of the Handicapped" is \$85.85 million, a \$6.85 million increase over fiscal year 1969. While this on the surface looks like a reasonable increase, the historically low level of funding makes the increase insignificant. It is similar to the man who had a nickel and received a 50% increase but still could not afford a cup of coffee.

The following programs have been particularly hard hit by the FY 1970 budget requests:

1. Title VI of the Elementary and Secondary Education Act is a grant-in-aid program to the states to assist them in initiating and expanding special education services within the state. For fiscal year 1970, the Congress has authorized \$200 million. The President's budget only requests the 1969 level of \$29.25 million. This represents less than 15% of the Congressionally determined authorization, and only \$5.85 per handicapped child. Title VI was passed by the Congress in 1966 as the major support program to assist states in attacking the problems of the handicapped. The first several years were primarily devoted to planning. The states have completed their plans and are now ready to develop major programs. However, the funds have not been adequate to initiate such programs for the handicapped. In fiscal year 1969 over one-half of the states received less than \$500,000; thirteen states received less than \$150,000; and six states received only \$100,000. You will find the projected fiscal year 1970 state allocations for Title VI attached.

2. Public Law 85-926 has been one of the most successful programs the Congress has established. This law provides fellowships and traineeships to prepare professional personnel for the education of the handicapped. Money is provided to colleges and universities and state departments of education for this purpose. Since the passage of the law in 1958 the program has helped double the number of special education personnel. But the task is still great. Evidence now shows that over 300,000 teachers are needed, with only 83,000 now available.

Administrative changes within the Office of Education may be recommending increasing fellowship stipends. This, coupled with natural increases due to long-term program development grants will mean a decrease in training potential available for fiscal year 1970 if the budget proposal is not increased. In addition, the Division of Training in the Bureau of Education for the Handicapped has been working with colleges and universities through special projects to develop prototypes for increasing manpower training potential. Without additional funding, these prototypes may never get off the ground. The budget request for personnel training is \$29.7 million, the same as the amount appropriated for fiscal year 1969, although \$55 million has been authorized.

3. The 90th Congress passed with strong support Public Law 90-538, the Handicapped Children Early Education Assistance Act. This law represents a bold new venture into providing grants for research and demonstration programs relating to preschool education for handicapped children. This reflects the belief that an intensive thrust in this area may prevent or ameliorate many handicapping conditions and thus enable many children to eventually profit from a normal educational program. Congress saw fit in the fiscal year 1969 to single this program out for initiation by granting an appropriation of \$1 million, in the hope that planning could quickly be developed so that a full scale program would be operative by 1970. For fiscal year 1970, the President has only requested \$3 million although \$10 million was author-

ized. This small request will again delay the ability for this program to effectively stimulate state and local action in this area.

4. During the first session of the 90th Congress, amendments were passed to Title VI of the Elementary and Secondary Education Act to add three new authorities crucial to program development in special education. The first was the establishment of regional resource centers to provide additional evaluation and programming for handicapped children. For fiscal year 1970 \$10 million was authorized and only \$1.5 million requested. The second program was to provide for the establishment of centers for children who are both deaf and blind. Because of the limited number of such children within any single local school population, but the large number of such children nationally due to the rubella epidemic, such centers are probably the only means by which deaf-blind children can receive an education. Seven million dollars was authorized for fiscal year 1970 and only \$2 million requested. The third new authority was the development of a national recruitment program to bring people into the field of special education and to disseminate information on existing programs to the public. One million dollars is authorized, but only one-half million dollars requested for 1970. The consistent low level of funding of these three programs may prohibit them from becoming a reality beyond planning.

5. Realizing the dire need for educational programs for the handicapped, Congress has continued to expand the base of programs to be administered by the Bureau of Education for the Handicapped. However, the urgency of the Congress has not been met by the willingness of the Budget Bureau to provide the staff positions necessary to administer the programs effectively. For example, under the Handicapped Children Early Education Assistance Act, P.L. 90-538, not one staff position has been allotted. The Bureau of Education for the Handicapped has attempted to fulfill its mandates from the Congress by internally transferring staff from one program to another. Such an approach does not facilitate good administration. Staff positions for the authorities passed by the Congress in the past several years are urgently needed.

The preceding are concerns stimulated by the failure of the fiscal year 1970 budget proposals to reflect the needs of handicapped children as mandated by the Congress. The attached budget breakdown shows clearly the sharp diversity between authorizations and appropriations. It is hoped that Congress will, during the appropriations process, consider these programs carefully in light of national concerns and its commitments to handicapped children.

During the next several months Congress will be giving deep consideration to the provisions contained within the budget request. You will find attached a description of how a bill travels through the Congress. You should note especially that appropriations bills always originate in the House of Representatives. The budget will be brought before the appropriate subcommittees in the House of Representatives and the Senate. After passage there, they will be considered by the full Appropriations Committees. A list of members of these committees is attached. It is during the committee hearings that the possibility of increases will have to be determined. The degree to which this can be achieved will be reflected in the extent to which the constituents of these lawmakers express their desire for such increases. In addition, members of committees are very sympathetic to the interests and concerns of other Congressmen. For this reason, all Congressmen can have an important role to play in urging increased support for the handicapped regardless of their committee assignment.

The most common vehicle for communicating with a Congressman is a letter expressing your personal opinion about the matter. You will find attached some guidelines concerning Congressional letter writing. Another vehicle you can use are articles in local newspapers and other communications media discussing the problems of the handicapped child and giving indication of Congressional interest. Particular attention and publicity should be given to those people who have gone out of their way to help. Congressmen really have little to gain by

helping the exceptional child other than good publicity. Anything you can do in this regard would be most helpful.

You will also find attached some guidelines under the title "Accentuate the Positive" for activity that can be undertaken at home to communicate the needs of handicapped children to your legislative representatives.

Often people believe that as an individual they have very little influence. This is not the case when large numbers of individuals become active. For this reason, support should be given not only on a personal basis, but

also through organizational affiliations. This need not be just from interested groups for the handicapped, but from civic organizations such as the Lions, Kiwanis, American Legion, PTA, women's clubs, etc. as well. Working jointly, people and organizations can help legislators in a decision making capacity see more clearly the needs of the handicapped child and guide the passage of effective legislation.

Please feel free to contact The Council for Exceptional Children for any additional information you may need in this regard.

FISCAL YEAR 1970 BUDGET FOR EDUCATIONAL IMPROVEMENT OF THE HANDICAPPED

Program	Authority	Purpose	1969 appropriation	1970 budget request	1970 increase	1970 authorization	Percent of authorization requested
Grants to States.....	Public Law 89-10 (title VI), as amended by 89-750.	Grants to States to initiate, expand, and improve programs and projects for education of the handicapped.	\$29.25	\$29.25	\$0.0	\$200	14
Regional resource centers.....	Public Law 89-10 (title VI), as amended by 90-247.	To create regional resource centers to provide educational evaluation and assistance in developing educational strategies for handicapped children.	.5	2.0	1.5	10	20
Education of deaf-blind children.....	Public Law 89-10 (title VI), as amended by 90-247.	To provide for the establishment and operation of centers for children who are both deaf and blind.	1.0	2.0	1.0		28
Recruitment and information.....	Public Law 89-10 (title VI), as amended by 90-247.	To provide programs to recruit personnel in special education and to disseminate information on programs in the field and the public.	.25	.5	.25	1	50
Educational media for the handicapped.....	Public Law 85-905 as amended by 90-247.	Originally to provide films and other educational media for the deaf, loan service of materials, and research and training in the use of media. Now expanded to all areas of the handicapped.	4.75	4.75	.0	10	48

FEDERAL FUNDS: STATE ALLOTMENTS FOR FUNDED PROGRAMS, FISCAL YEAR 1969

Of the \$3.9 billion available during fiscal year 1969 for U.S. Office of Education administered programs, more than \$3.5 billion is distributed to the States on the basis of formulas prescribed in the basic laws. The accompanying charts do not include those funds allotted on an individual project basis.

Some \$2 billion—over half of the total distributed to States by allotment—supports elementary and secondary school activities. Higher education receives the second largest share, over \$615 million. About \$225 million will go into vocational education, and library and community service activities get \$95 million. For the first time, under the new Education Professions Development Act, \$15 million is available to States to recruit and train persons for careers as elementary and secondary teachers and teacher aides.

Although they must comply with the intent of the acts, States have a good deal of leeway in the way they may distribute their funds to best meet their own individual State and local educational needs.

The New York State education department, for instance, used some of its Elementary and Secondary Education Act title I funds to compile its *Annotated Bibliography: Educating the Disadvantaged*, which is useful not only to New Yorkers but to educators across the country.

California is using part of its Library Services and Construction Act title I allotment to fund a two-year demonstration project to attract the hard-to-reach segment of 13-19 year olds—the dropouts, the disadvantaged, and those who never had used libraries. Now, young adults can check out such varied items as psychedelic posters, rock-and-roll music or mod jazz, films, musical instruments, typewriters, sports equipment, and, of course, books. The books are paperback and are loaned on the honor system.

This is but the briefest of introductions to the many ways States are putting Federal money to their own good interests. For further information on use of funds listed here, contact your State department of education.

¹ In ESEA, title 1, \$550,000 is reserved to establish a migrant transfer record system.

² Includes arts and humanities grants to States.

³ Includes arts and humanities loans to nonprofit schools.

⁴ \$3,000,076 is reserved for major disasters.

⁵ Includes \$77,464 of undistributed moneys.

⁶ Includes \$1,282,298 for special facility planning projects.

⁷ Amounts represent initial-year awards only.

Note: Discrimination prohibited—Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving Federal financial assistance." All programs cited in this article, like every other program or activity receiving financial assistance from the Department of Health, Education, and Welfare, operate in compliance with this law.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his Secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, The PRESIDING OFFICER laid before the Senate sundry messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDING OFFICER laid before the Senate the following letters, which were referred as indicated:

REPORT OF THE LOCATION, NATURE, AND ESTIMATED COST OF AN ADDITIONAL FACILITIES PROJECT PROPOSED TO BE UNDERTAKEN FOR THE ARMY RESERVE

A letter from the Deputy Assistant Secretary of Defense (Properties and Installations), reporting, pursuant to law, a report of the location, nature and estimated cost

of an additional facilities project proposed to be undertaken for the Army Reserve, Miller Field, Staten Island, N.Y.; to the Committee on Armed Services.

REPORT OF CURRENT WORKING ESTIMATES WITH RESPECT TO CERTAIN CONSTRUCTION PROJECT PROPOSED TO BE UNDERTAKEN FOR THE ARMY NATIONAL GUARD

A letter from the Deputy Assistant Secretary of Defense (Properties and Installations), reporting, pursuant to law, a report of current working estimates with respect to certain construction projects proposed to be undertaken for the Army National Guard within the uncommitted balance of lump sum authorization provided by section 701(1) of Public Law 89-188; to the Committee on Armed Services.

REPORT TO THE CONGRESS ON THE STRATEGIC AND CRITICAL MATERIALS STOCKPILING PROGRAM

A letter from the Director of Office of Emergency Preparedness, Executive Office of the President, transmitting pursuant to law, the semiannual report to the Congress on the strategic and critical materials stockpiling program for the period July 1 to December 31, 1968 (with an accompanying report); to the Committee on Armed Services.

REPORT OF THE BOARD OF GOVERNORS ON THE FEDERAL RESERVE SYSTEM

A letter from the Vice Chairman, Board of Governors of the Federal Reserve System, transmitting, pursuant to law, a report of the Board of Governors of the Federal Reserve System, covering operations during the

year 1968 (with an accompanying report); to the Committee on Banking and Currency.

REPORT OF THE FEDERAL HOME LOAN BANK BOARD

A letter from the Chairman of the Federal Home Loan Bank Board, transmitting, pursuant to law, a report of the Federal Home Loan Bank Board for the calendar year 1968 (with an accompanying report); to the Committee on Banking and Currency.

A REPORT TO THE CONGRESS OF GRANTS APPROVED BY THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE SOCIAL AND REHABILITATION SERVICE

A letter from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report of the grants approved as required by section 1120 of the Social Security Act, for the period January 1, 1969, to March 31, 1969 (with an accompanying report); to the Committee on Finance.

REPORT TO CONGRESS OF THE U.S. INFORMATION AGENCY

A letter from the Deputy Director of the U.S. Information Agency, transmitting, pursuant to law, a report to the Congress of the U.S. Information Agency, July to December 1968 (with an accompanying report); to the Committee on Foreign Relations.

PROPOSED CONCESSION CONTRACT TO CONTINUE TO PROVIDE ACCOMMODATIONS, FACILITIES, AND SERVICES FOR THE PUBLIC IN GRAND TETON NATIONAL PARK, WYO.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a

proposed concession contract under which Mrs. Louise M. Bertschy, Harold M. Turner, John F. Turner, Jr., and Donald M. Turner, operating jointly as Triangle X Ranch, are authorized to continue to provide accommodations, facilities, and services for the public in Grand Teton National Park, Wyo., for a 5-year period from January 1, 1969, through December 31, 1973, when executed by the Director of the National Park Service (with accompanying papers); to the Committee on Interior and Insular Affairs.

THIRD PREFERENCE AND SIXTH PREFERENCE CLASSIFICATIONS FOR CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, reports relating to third preference and sixth preference classifications for certain aliens (with accompanying papers); to the Committee on the Judiciary.

PROPOSED LEGISLATION TO AUTHORIZE AN ADEQUATE WHITE HOUSE POLICE FORCE, AND FOR OTHER PURPOSES

A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize an adequate White House Police Force, and for other purposes (with accompanying papers); to the Committee on Public Works and the Committee on the Judiciary, jointly, by unanimous consent.

REFERRAL OF MESSAGE FROM SECRETARY OF THE TREASURY TO PUBLIC WORKS AND JUDICIARY COMMITTEES

Mr. MANSFIELD. Mr. President, I ask unanimous consent that a message received today from the Secretary of the Treasury transmitting a draft bill "to authorize an adequate White House police force, and for other purposes" be referred jointly to the Public Works Committee and the Judiciary Committee.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. STENNIS, from the Committee on Armed Services:

Daniel Z. Henkin, of Maryland, to be an Assistant Secretary of Defense.

Mr. STENNIS. Mr. President, from the Committee on Armed Services I report favorably the nominations of three general officers of the Army. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered placed on the Executive Calendar, are as follows:

Gen. Theodore John Conway, Army of the United States (major general, U.S. Army), to be placed on the retired list in the grade of general;

Lt. Gen. John Lathrop Throckmorton, Army of the United States (major general, U.S. Army), for appointment to the grade of general; and

Maj. Gen. Melvin Zais, Army of the United States (brigadier general, U.S. Army), for appointment to the grade of lieutenant general.

Mr. STENNIS. Mr. President, I also report 1,257 promotions in the Army in

grade of colonel and below and 203 appointments in the Army in grade of major and below. Since these names have already appeared in the CONGRESSIONAL RECORD, in order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to lie on the Secretary's desk are as follows:

David M. Schofield, for reappointment in the active list of the Regular Army of the United States, from the temporary disability retired list;

Homer G. Benton, and sundry other persons, for appointment in the Regular Army of the United States;

Thomas S. Bednarczyk, and sundry other distinguished military students for appointment in the Regular Army of the United States;

Marshall R. Cox, and several scholarship students, for appointment in the Regular Army of the United States;

Donald W. McAvoy, for promotion in the Regular Army of the United States; and

Louis E. Abele, and sundry other persons for promotion in the Regular Army of the United States.

By Mr. DODD, from the Committee on the Judiciary:

Stewart O. H. Jones, of Connecticut, to be U.S. attorney for the district of Connecticut; and

Richard K. Burke, of Arizona, to be U.S. attorney for the district of Arizona.

By Mr. SCOTT, from the Committee on the Judiciary:

Richard L. Thornburgh, of Pennsylvania, to be U.S. attorney for the western district of Pennsylvania.

By Mr. SPARKMAN, from the Committee on Banking and Currency:

Carl O. Kamp, Jr., of Missouri, to be a member of the Federal Home Loan Bank Board;

R. Alex McCullough, of South Carolina, to be a member of the Board of Directors of the Export-Import Bank of the United States; and

Nicolas G. Theodore, of Pennsylvania, to be Superintendent of the Mint of the United States at Philadelphia.

By Mr. RANDOLPH, from the Committee on Public Works:

Alfred E. France, of Minnesota, to be Federal Cochairman of the Upper Great Lakes Regional Commission.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDING OFFICER:

A Senate memorial adopted by the Florida Legislature; to the Committee on Agriculture and Forestry:

"SENATE MEMORIAL 188

"A memorial to the congress of the United States urging support of the U.S. department of agriculture and the defeat of H.R. 5865, introduced on February 3, 1969, by Congressman Udall, which would remove tomatoes from section 8(e) of the agricultural marketing agreement act of 1937, as amended

"Whereas, many erroneous news items have been published criticizing Florida tomato growers and the U.S. department of agriculture concerning the adoption and effects of the regulation on limitation of tomato shipments effective January 8, 1969; and

"Whereas, the recommendations of the Florida tomato committee, which have been promulgated by the secretary of agriculture, are designed to accomplish the declared policy of congress to establish and maintain such orderly marketing conditions for tomatoes in interstate commerce as will establish parity prices as defined in the agricultural adjustment act of 1938; and

"Whereas, any marketing order, issued pursuant to section 8(c) of the agricultural adjustment act of 1938, containing any terms or conditions regulating the grade, size, quality or maturity of tomatoes, produced in the United States, operates to prohibit the importation into the United States of any tomatoes during the period of time such order is in effect, unless they comply with the same grade, size, quality and maturity provisions required of the United States producers; and

"Whereas, a marketing policy was adopted October 3, 1968, pursuant to paragraph 966.50 of the tomato marketing order; and

"Whereas, Florida growers must dispose of their restricted tomatoes to the in-state market or leave them in the fields, while Mexico can and does dispose of their restricted tomatoes to the forty-five million in Mexico plus twenty million people in Canada; and
